

Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Man GLG Flexible Bond Class DY EUR Acc Shares

(ISIN:LU1135554753) Man GLG Flexible Bond (the 'Fund') is a sub-fund of Man Umbrella SICAV (the 'Company').

MDO Management Company S.A., is the Manager of the Company.

Objectives and investment policy

- The Fund seeks an above average level of return (through income and capital appreciation) by investing primarily in fixed income securities (such as fixed and floating rate government and corporate bonds, convertible bonds and index linked securities) global currencies, money market instruments and time deposits.
- The Fund may have significant holdings of cash and cash equivalent assets from time to time.
- The Fund may use financial derivative instruments (instruments whose prices are dependent on one or more underlying asset, 'FDI') extensively for investment purposes (including the taking of synthetic short positions) as well as for hedging (the practice of undertaking one investment activity with the aim of protecting against loss in another) or other efficient portfolio management purposes.
- Benchmarks. The Fund is actively managed; no benchmark is used as a universe for selection or for performance comparison purposes.
- Shares can be bought and sold each Dealing Day.
- Any income generated by the Fund will be reinvested to grow the value of shares.

Risk and reward profile

- The lowest category does not mean 'risk free'.
- The risk and reward profile is not guaranteed and may change over time.
- Historical data may not be a reliable indication for the future.
- The risk category for this share class is 5 as funds of this nature engage in strategies that typically have a moderate to high volatility. The calculation is based on the historical volatility of the Fund's performance. Where there is insufficient Fund performance the calculation is based on either the historical volatility of a relevant benchmark for the investment strategy or the Manager's Value at Risk limit for the Fund. Please refer to the prospectus for further information relating to the Value at Risk.

The following risks may not be fully captured by the risk and reward profile:

- Emerging markets experience specific risks due to increased volatility, illiquidity, political and economic instability, market turmoil, settlement risk and relatively weak regulatory standards.
- The use of FDI involves additional risks: (i) FDI may be highly sensitive to price movements of the asset on which they are based; (ii) a counterparty to a non-exchange traded FDI may not meet its payment obligations in the event of default; (iii) FDI may allow the Fund to obtain market exposure in excess of the value of the Fund's assets (leverage). These risks may lead to significant losses.
- Liquidity characteristics of non-exchange listed investments can be irregular, and may result in higher than anticipated costs to liquidate the investment.
- The Fund may invest in non-investment grade securities which are considered higher risk investments that may cause income and principal losses for the Fund.
- The Fund may invest in contingent convertible ("coco") bonds. The performance of such bonds is dependent on a number of factors including interest rates, credit and equity performance, and the correlations between factors. As such these securities introduce significant additional risk to an investment in the Fund.
- The Fund is subject to normal market fluctuations and the risks associated with investing in international securities markets.
- The value of your investment and the income from it may rise as well as fall and you may not get back the amount originally invested.

Further investment risks are set out in the relevant appendix to the prospectus.
