

Schroder International Selection Fund Global Conservative Convertible Bond

C Accumulation USD | Data as at 29.02.2020

Fund objectives and investment policy

The fund aims to provide capital growth in excess of the Thomson Reuters Global Focus Investment Grade Hedged index (USD) after fees have been deducted over a three to five year period by investing in convertible securities issued by companies worldwide. The fund is actively managed and invests at least two-thirds of its assets in a diversified range of convertible bonds issued by companies worldwide. The fund may also invest in equities of companies worldwide. The fund is designed to participate in rising markets whilst aiming to mitigate losses in falling markets. The mitigation of losses cannot be guaranteed. The fund may invest securities with an investment grade or sub-investment grade credit rating while aims to achieve an average credit quality equivalent to investment grade (as measured by Standard & Poor's or any equivalent grade of other credit rating agencies for rated bonds and implied Schroders ratings for non-rated bonds). Convertible bonds are typically corporate bonds that can be converted into equities at a given price. As such, the investment manager believes investors can gain exposure to global equity markets with the defensive benefits and less volatile characteristics of a bond investment. The fund may also invest directly or indirectly in other securities (including other asset classes), countries, regions, industries or currencies, investment funds, warrants and money market investments, and hold cash. The fund may use derivatives with the aim of achieving investment gains, reducing risk or managing the fund more efficiently.

Relevant risk as associated with this Fund are shown overleaf and should be carefully considered before making any investment.

Share class performance

Cumulative performance	1 month	3 months	YTD	1 year	3 years	5 years	Since inception
Share class (Net)	0.6	1.6	7.0	5.3	7.6	-	14.5

Calendar year performance	2014	2015	2016	2017	2018
Share class (Net)	-	6.0	1.4	4.6	-5.1
Target	-	2.9	2.3	1.6	-3.5

Performance over 5 years (%)

Past Performance is not a guide to future performance and may not be repeated. The value of investments and the income from them may go down as well as up and investors may not get back the amounts originally invested. Exchange rate changes may cause the value of any overseas investments to rise or fall.

Source: Morningstar, bid to bid, net income reinvested, net of fees. The fund's performance should be assessed against its target benchmark being to exceed the Thomson Reuters Global Focus Investment Grade Hedged index (USD). The majority of the fund's investments may be components of the benchmark. The investment manager invests on a discretionary basis and is not limited to investing in accordance with the composition of the benchmark. The investment manager will invest in companies or sectors not included in the benchmark in order to take advantage of specific investment opportunities. Dominique Braeuninger, CFA, replaced Stefan Krause as Fund Manager on 01.01.2020

Schroder International Selection Fund Global Conservative Convertible Bond

C Accumulation USD | Data as at 29.02.2020

Risk considerations

Credit risk: A decline in the financial health of an issuer could cause the value of its bonds to fall or become worthless.

Liquidity risk: In difficult market conditions, the fund may not be able to sell a security for full value or at all. This could affect performance and could cause the fund to defer or suspend redemptions of its shares.

Operational risk: Operational processes, including those related to the safekeeping of assets, may fail. This may result in losses to the fund.

Contingent convertible bonds: The fund may invest in contingent convertible bonds. If the financial strength of the issuer of a contingent convertible bond falls in a prescribed way, the value of the bond may fall significantly and, in the worst case, may result in losses to the fund.

Currency risk: The fund may lose value as a result of movements in foreign exchange rates.

High yield bond risk: High yield bonds (normally lower rated or unrated) generally carry greater market, credit and liquidity risk.

Derivatives risk – Efficient Portfolio Management and Investment Purposes: Derivatives may be used to manage the portfolio efficiently. A derivative may not perform as expected, may create losses greater than the cost of the derivative and may result in losses to the fund. The fund may also materially invest in derivatives including using short selling and leverage techniques with the aim of making a return. When the value of an asset changes, the value of a derivative based on that asset may change to a much greater extent. This may result in greater losses than investing in the underlying asset.

Interest rate risk: The fund may lose value as a direct result of interest rate changes.

Emerging Markets & Frontier risk: Emerging markets, and especially frontier markets, generally carry greater political, legal, counterparty, operational and liquidity risk than developed markets.

Counterparty risk: The fund may have contractual agreements with counterparties. If a counterparty is unable to fulfil their obligations, the sum that they owe to the fund may be lost in part or in whole.

Performance risk: Investment objectives express an intended result but there is no guarantee that such a result will be achieved. Depending on market conditions and the macro economic environment, investment objectives may become more difficult to achieve.

IBOR: The transition of the financial markets away from the use of interbank offered rates (IBORs) to alternative reference rates may impact the valuation of certain holdings and disrupt liquidity in certain instruments. This may impact the investment performance of the fund.

Synthetic risk & reward indicator (SRRI)

LOWER RISK

Potentially lower reward

HIGHER RISK

Potentially higher reward

The risk category was calculated using simulated historical performance data and may not be a reliable indicator of the fund's future risk profile. The fund's risk category is not guaranteed to remain fixed and may change over time. A fund in the lowest category does not mean a risk-free investment. A fund is in categories 1 to 3 where it can take lower risks in search of potentially lower rewards and its price may rise and fall accordingly. A fund is in categories 4 to 7 where it can take higher risks in search of potentially higher rewards and its price may rise and fall accordingly.

Risk statistics & financial ratios

	Fund	Target
Annual volatility (%) (3y)	3.7	4.1
Current yield (%)	0.6	-
Yield to maturity	-	-
