Information relating to changes in fund manager, investment objective, benchmark and corporate action information

Some performance differences between the fund and the benchmark may arise because the fund performance is calculated at a different valuation point from the benchmark.

The Benchmark performance is shown in the base currency of the fund. To enable comparison between the performance of this Hedged share class and the Benchmark, and to show the effect of the currency hedge, the equivalent unhedged base currency share class performance is also shown. The equivalent unhedged share class and benchmark will be blank if the inception date is different to the hedged share class inception date. The fund's performance should be assessed against its target benchmark being to exceed the Thomson Reuters Global Focus investment Grade Hedged index (USD). The fund's investment universe is expected to overlap materially with the components of the target benchmark. The investment manager invests on a discretionary basis and there are no restrictions on the extent to which the fund's portfolio and performance may deviate from the target benchmark. The investment manager will invest in companies or sectors not included in the target benchmark in order to take advantage of specific investment opportunities. The target benchmark has been selected because it is representative of the type of investments in which the fund is likely to invest and it is, therefore, an appropriate target in relation to the return that the fund aims to provide.
