Bank of America Merrill Lynch

Merrill Lynch Investment Solutions – GOTHAM U.S. EQUITY LONG/SHORT UCITS FUND – EUR D (acc)

ISIN Code: LU1144786792

a sub-fund of Merrill Lynch Investment Solutions (the "Fund")

Management Company: CM Investment Solutions Limited

Objectives and investment policy

The Fund aims to generate long-term capital appreciation primarily through long and short investments in equity securities listed on one of the major U.S. stock exchanges.

The Fund pursues a value oriented strategy by buying the securities of companies the Investment Manager believes are undervalued and shorting the securities of companies it believes are overvalued. Generally, the cheaper a company appears to the Investment Manager, the larger allocation it receives on the long side. On the short side, the more expensive a company appears to the Investment Manager, the larger short allocation it receives.

To achieve its investment objective, the Fund has flexibility to invest in a wide range of instruments including, but not limited to, common stocks, preferred stocks, convertible securities, equity-related instruments, warrants, swaps and other derivative instruments.

Investment decisions are based upon the Investment Manager's proprietary methodology, under which the Investment Manager analyzes companies taking into account various factors, such as recurring earnings, capital efficiency and valuation.

The currency of the Fund is USD and your shares will be denominated in EUR. Your shares will be hedged with the aim of protecting them from exchange rate fluctuations between their denominated currency and the currency of the Fund.

Your shares are non-distributing (i.e. any income arising from your shares will be included in their value).

You may redeem your shares on demand on any Luxembourg, London and United States banking day.

The risk category has been calculated based upon simulation of the Fund's performance using historical data, which may not be a reliable indicator of the Fund's future risk profile.

The risk category shown is not guaranteed and may change over time.

The lowest category (category 1) does not mean that the investment is risk-free.

The Fund is rated 4 due to the nature of its investments which include the following risks:

- Equity risk – the value of equities and equity-related instruments within the Fund may be affected by stock market movements.
- Derivative risk – the Fund may make extensive use of derivatives, which carries the risk of substantial loss, increased volatility and unexpected outcomes in adverse market conditions. The use of derivatives will result in the Fund being leveraged, and in adverse market conditions, leveraging may magnify losses because the market exposure exceeds the amount invested by the Fund.

The following are additional risks which are not captured in the risk category:

- Counterparty risk – the counterparty to a transaction with the Fund may fail to fulfil its contractual obligations, which may expose the Fund to financial losses.
