Wellington Global Health Care Long-Short Fund

EUR Class N Accumulating Hedged

Wellington Global Health Care Long-Short Fund (the "Fund") a sub-fund of Wellington Management Funds (Luxembourg) (the "Umbrella Fund")

ISIN: LU1169587919

Management company: Wellington Luxembourg S.à r.l.

OBJECTIVES AND INVESTMENT POLICY

- The Fund seeks long-term capital appreciation.
- The Fund will be actively managed, investing primarily in health care companies globally, including emerging markets. The Fund will be unconstrained across health care and related sub-sectors (such as pharmaceutical, biotechnology, medical technology and health services), market capitalisations and geographic regions; in each case net market exposure and concentrations are flexible, and will vary based on the Investment Manager's views. The Fund will establish both long (benefits when an investment's price goes up) and short (benefits when an investment's price goes down) positions for investment purposes, however the Fund will generally have more long exposure than short exposure.
- The Fund primarily invests, either directly or via derivatives, in shares and other securities with equity characteristics such as preferred stocks and depository receipts; and may also use securities such as bonds, currencies, indices, cash and cash equivalents. The Fund may, from time to time have significant exposure to cash and/or liquid fixed income securities for collateral purposes.
- Derivatives will be used to hedge (reduce) risk and/or volatility and for investment purposes (such as gaining exposure to a security, to create leverage and/or a short position). Derivatives will form a significant part of the strategy and will impact performance.
- Any income allocated to the Unit class from the Fund is reinvested.
- Units can be bought or sold weekly in accordance with the Prospectus. The base currency of the Fund is USD.
- The Fund is intended for long-term investors.
- Hedged Unit classes of the Fund will, via derivatives, seek to remove the impact of the movement of exchange rates between the currency of the Unit class and the base currency of the Fund.

RISK & REWARD PROFILE

< LOWER RISK

< Typically Lower Rewards

HIGHER RISK >

Typically Higher Rewards >

The indicator is not a measure of the risk of capital loss, but a measure of the previous ups and downs in value of the Fund. It is based on historical data and may not be a reliable indicator of the Fund's future risk profile. If the Fund has been in operation for less than 5 years, representative history, such as a comparable Unit class or index, may have been used to create the indicator.

- The indicator may shift over time and is not a target or guarantee.
- The lowest category does not represent a risk-free investment.
- The Fund is classified as a 4 as over the past 5 years the average amount by which returns varied each year was equal to or above 5% and less than 10%.

RISKS TO CONSIDER:

CAPITAL: Investment markets are subject to economic, regulatory, market sentiment and political risks. All investors should consider the risks that may impact their capital, before investing. The value of your investment may become worth more or less than at the time of the original investment. The Fund may experience a high volatility from time to time.

CONCENTRATION: Concentration of investments within securities, sectors or industries, or geographical regions may impact performance.

EMERGING MARKETS: Emerging markets may be subject to custodial and political risks, and volatility. Investment in foreign currency entails exchange risks.

EQUITIES: Investments may be volatile and may fluctuate according to market conditions, the performance of individual companies and that of the broader equity market.

HEDGING: Any hedging strategy using derivatives may not achieve a perfect hedge.

LEVERAGE: The use of leverage can provide more market exposure than the money paid or deposited when the transaction is entered into. Losses may therefore exceed the original amount invested.

SHORT SELLING: A short sale exposes the Fund to the risk of an increase in market price of a security sold short; this could result in a theoretically unlimited loss.

SMALL AND MID-CAP COMPANY: Small and mid-cap companies' valuations may be more volatile than those of large cap companies. They may also be less liquid.

RISKS NOT ADEQUATELY CAPTURED BY THE RISK INDICATOR:

COUNTERPARTY: The institutions, with which the Fund may trade or invest, or to which assets may be entrusted, may fail to meet their obligations which could impact the operational capability or value of your investment.

DERIVATIVES: Specific risks such as operational issues, complexity, and valuation may be linked to the possible use of derivatives.

LIQUIDITY: The Fund may invest in securities that are less liquid and may be more difficult to buy or sell in a timely fashion and/or at fair value.

OPERATIONAL: The impact of breakdowns in systems, internal procedures and human error.

A more detailed description of the risk factors that apply to the Fund is set out in the section "Risk Factors" in the Prospectus.
