

DB PLATINUM IV BASSO

Share Class: R3C-E (ISIN: LU1192952544), (WKN: A14NZA), (Currency: EUR)

a sub fund of DB Platinum IV. The Fund is managed by Deutsche Asset Management S.A., part of the DWS Group.

Objectives & Investment Policy

This product is in the process of being terminated. Further information on this is available on www.systematic.dws.com.

The aim of the Fund is to achieve capital growth through investment in a range of asset classes such as debt, in particular convertible bonds (bonds which have a feature which will or may allow them to be converted into shares), shares and financial contracts (derivatives). The Fund invests on a global basis, with a bias to US investments, and does not focus on any particular industry sector.

The Fund's investments will be selected by the Fund's investment manager, Basso Capital Management, L.P. The Fund seeks to identify investments by balancing the risk with the potential for returns associated with each investment decision. The Fund utilises one or more of a range of investment strategies to identify investments for the Fund including relative value investing and 'low premium' convertible investing (both of which seek to identify opportunities to capture positive returns on two related investments); credit oriented investing (seeking to identify investments in convertible securities which have an attractive embedded credit element); equity oriented investing (seeking to identify convertible bonds for the purpose of gaining a direct exposure to the value of the shares into which they may convert); event oriented investing (seeking to identify investment opportunities linked to certain

corporate events which affect the value of securities); structure oriented investing (seeking to identify investment opportunities linked to the capital structure of issuers which impact on the value of the issued securities); trading oriented investing (seeking to identify investment opportunities based on short-term stock market events); and volatility oriented investing (seeking to identify investment opportunities based on the volatility of a security against the volatility of the market generally).

The Fund may use derivatives for investment purposes as well as to attempt to offset potential losses that may be incurred by other investments made. Derivatives may also be used to try to increase returns by increasing the exposure to certain investments (leverage). The leverage is not expected to exceed 900% of the value of the Fund.

The Fund, which is calculated in US dollars, may use hedging to try to reduce the effect of foreign exchange rate fluctuations where investments are denominated in currencies other than US dollars.

No dividends will be paid on your shares.

You may redeem your investment on demand on a weekly basis.

Risk and Reward Profile

The risk and reward category is calculated using historical data which may not be a reliable indicator of the Fund's future risk profile.

The risk and reward category may shift over time and is not a target or a guarantee.

The lowest category (i.e. Category 1) does not mean a risk-free investment.

The Fund is in Category 3 because of the low range and frequency of price movements (volatility) of the underlying investments referenced by the Fund.

The following are additional risks not covered by the risk and reward category.

The Fund may enter into one or more derivatives with a number of counterparties. If any of the counterparties fail to make payments (for example, it becomes insolvent) this may result in your investment suffering a loss.

Deutsche Asset Management entities and related companies may act in several roles in relation to the Fund such as distributor, counterparty to financial contracts, prime broker and management company which may involve conflicts of interest.

The Fund is not guaranteed and your investment is at risk. The value of your investment may go down as well as up.

The Fund has been designed for investors who are looking for long term capital growth through exposure to alternative investment strategies. As the Fund may therefore employ sophisticated strategies (including the use of derivatives), it is intended only for knowledgeable and experienced investors who are able to understand and evaluate both the investment strategy and its inherent risks (such understanding and evaluation may be gained through advice from a professional advisor).

The Fund may have increased exposure to particular investments known as leverage. A fall in value of such investments can result in a proportionately greater loss to the Fund.

The Fund relies upon the performance of the Investment Manager and the successful implementation of the Strategy. If the Investment Manager performs poorly or the Strategy is not successful, the value of your investment is likely to be adversely affected.

The Fund may use derivatives i) for investment purposes; and ii) to try to reduce movements in currency exchange rates. This may not always be successful and may result in greater fluctuations in the value of the Fund. This may negatively affect the value of the Fund and your investment.

More information in relation to risks in general may be found in the "Risk Factors" section of the prospectus.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest		<p>The entry and exit charges shown are maximum figures. In some cases you might pay less - you can find this out from your financial adviser or distributor.</p> <p>The ongoing charges figure shown here is an estimate of the charges as there is insufficient historical data. It excludes portfolio transaction costs and performance fees, if any. The Fund's annual report for each financial year will include detail on the exact charges made.</p> <p>More detailed charges information may be found in the "Fees and Expenses" section of the prospectus.</p>
Entry charge	5.00%	
Exit charge	None	
This is the maximum that might be taken out of your money before it is invested (entry charge) and before the proceeds of your investment are paid out (exit charge).		
Charges taken from the Fund over a year		
Ongoing charges	1.75%	
Charges taken from the Fund under certain specific conditions		
Performance fee		
Where the Gross NAV (net asset value after deduction of certain fees but not performance fee) exceeds the higher of (i) the highest Gross NAV at any previous year end or (ii) the issue price (High Watermark), 10% of the amount, negative or positive, that the Gross NAV exceeds the higher of (i) the prior day's Gross NAV and (ii) the High Watermark, will accrue daily and be paid annually. In the last financial year 0.00% of daily average value of the share class was charged as performance fee.		

Past Performance

Please be aware that past performance is not a reliable indicator of future results.

The fees for the ongoing Fund charges are included in the calculation of past performance. The entry/exit fees are excluded from the calculation of past performance.

The Fund was launched in 2015 and the share class was launched in 2016.

Past performance has been calculated in EUR.
