**Glossary**

**Average Credit Quality:** The credit rating of a bond is an assessment of the credit worthiness of individuals and corporations. It is based upon the history of borrowing and repayment, as well as the availability of assets and extent of liabilities. The average credit quality of a fund reflects the holdings of the underlying issues, based on the size of each holding. Usually we quote the average credit quality as per Standard & Poor's or Moody's credit rating agencies.

**Average Duration:** Also known as 'effective' or 'Macaulay' duration it is a measure of the sensitivity of the price (the value of principal) of a fixed-income investment to a change in interest rates. Duration is expressed as a number of years. It's an indication of an issue's coupon relative to its maturity. Rising interest rates mean falling bond prices; declining interest rates mean rising bond prices. The bigger the duration number, the greater the interest-rate risk; (or reward for bond prices). The weighted average duration of a fund reflects the effective duration of the underlying issues, based on the size of each holding. This value differs with 'Modified Duration' which is modified for the market (dirty) price of an issue.

**Average Weighted Maturity:** An estimate of the number of terms to maturity, taking the possibility of early payments into account, for the underlying holdings. Average life is calculated using the weighted average time to the receipt of all future cash flows for all holdings. Sometimes also known as 'average maturity' for fixed-term products. The weighted average life of a fund reflects the maturity of the underlying issues, based on the size of each holding.

**Price to Book Value (P/BV):** The price per share of a stock divided by its book value (i.e., net worth) per share. For a portfolio, the ratio is the weighted average price/book ratio of the stocks it holds.

**Price to Cash Flow (P/CF):** Supplements price/earnings ratio as a measure of relative value; represents a weighted average of the price/cash flow ratios for the underlying fund holdings.

**Price to Earnings (P/E):** The share price of a stock, divided by its per-share earnings over the past year. For a portfolio, the weighted average P/E ratio of the stocks in the portfolio. P/E is a good indicator of market expectations about a company's prospects; the higher the P/E, the greater the expectations for a company's future growth in earnings.

**Yield to Maturity:** Yield to Maturity ('YTM') also known as the 'Gross Redemption Yield' or 'Redemption Yield'. The rate of return anticipated on a bond if it is held until the maturity date. YTM is considered a long-term bond yield expressed as an annual rate. The calculation of YTM takes into account the current market price, par value, coupon interest rate and time to maturity. It is also assumed that all coupons are reinvested at the same rate.

**Important Information**

Given the variety of investment options available today, we suggest investors seek guidance from a Financial Adviser.

This document is intended to be of general interest only and does not constitute legal or tax advice nor is it an offer for shares or invitation to apply for shares of the Franklin Templeton Investment Funds SICAV (the Fund). Nothing in this document should be construed as investment advice. Given the rapidly changing market environment, Franklin Templeton Investments disclaim responsibility for updating this material. Subscriptions to shares of the Fund can only be made on the basis of the current prospectus and where available, the relevant Key Investor Information Document, accompanied by the latest available audited annual report and the latest semi-annual report if published thereafter. No shares of the Fund may be directly or indirectly offered or sold to nationals or residents of the United States of America. Shares of the Fund are not available for distribution in all jurisdictions and prospective investors should confirm availability with their local Franklin Templeton Investments representative before making any plans to invest. References to particular industries, sectors or companies are for general information and are not necessarily indicative of a Fund's holding at any one time. The value of shares in the Fund and income received from it can go down as well as up, and investors may not get back the full amount invested. All or most of the protections provided by the UK Regulatory System will not apply to Franklin Templeton Investment Funds (SICAV) Investors. An investment in the Fund entails risks which are described in the Fund's prospectus and where available, the relevant Key Investor Information Document.

Source for data and information provided by Franklin Templeton Investments, as of the date of this document, unless otherwise noted. Benchmark related data provided by FactSet, as of the date of this document, unless otherwise noted. References to indices are made for comparative purposes only and are provided to represent the investment environment existing during the time periods shown. An index is unmanaged and one cannot invest directly in an index. The performance of the index does not include the deduction of expenses and does not represent the performance of any Franklin Templeton fund.

All MSCI data is provided "as is." The fund described herein is not sponsored or endorsed by MSCI. In no event shall MSCI, its affiliates or any MSCI data provider have any liability of any kind in connection with the MSCI data or the Fund described herein. Copying or redistributing the MSCI data is strictly prohibited.

**EUSD Status:** Any tax information provided is intended to be a general guide and should not be relied upon as a basis for calculating individual liabilities. The information does not take into consideration your / your clients / or any personal circumstances and may be subject to change in the future. If you are in any doubt about the impact of tax on your investment you should consult a qualified tax adviser.

**Top Holdings:** These securities do not represent all of the securities purchased, sold or recommended for clients, and the reader should not assume that investment in the securities listed was or will be profitable. The portfolio manager for the Fund reserves the right to withhold release of information with respect to holdings that would otherwise be included in the top holdings list.

**Fund Measures:** The average credit quality (ACQ) rating may change over time. The portfolio itself has not been rated by an independent rating agency. The letter rating, which may be based on bond ratings from different agencies, is provided to indicate the average credit rating of the portfolio's underlying bonds and generally ranges from AAA (highest) to D (lowest). The ACQ is determined by assigning a sequential integer to all credit ratings AAA to D, taking a simple, asset-weighted average of debt holdings by market value and rounding to the nearest rating. The risk of default increases as a bond's rating decreases, so the ACQ provided is not a statistical measurement of the portfolio's default risk because a simple, weighted average does not measure the increasing level of risk from lower rated bonds. The ACQ is provided for informational purposes only. Derivative positions and unrated securities are not reflected in the ACQ.

**Ongoing Charges:** The Ongoing Charge Ratio (OCR) represents all operating charges and expenses of the Fund in the prior 12 months as a percentage of the Fund's average net assets for the period.

Performance attribution is calculated in the base currency of the fund.
