#### More about this rating

The rating is based on price volatility over the last five years, and is an indicator of absolute risk. Historical data may not be a reliable indication for the future. The value of an investment, and any income from it, may fall as well as rise, and you may not get back the amount you originally invested. The rating is not guaranteed to remain unchanged and the categorisation may shift over time. The lowest rating does not mean a risk-free investment.

#### Why is this fund in category 5?

Equity prices tend to fluctuate more than other asset classes as investors directly participate in underlying companies and their earnings. Real estate volatility can be greater than other market sectors as it is linked to progressive cycles in property markets.

#### Risks materially relevant not adequately captured by the SRRI

- ▶ **Exchange Rate Risk** Changes in currency exchange rates could reduce or increase investment gains or investment losses, in some cases significantly.
- ▶ **Counterparty Risk** The possibility that the counterparty to a transaction may be unwilling or unable to meet its obligations.
- ▶ **Liquidity Risk** Liquidity Risk is the risk that a Fund may encounter difficulties meeting its obligations in respect of financial liabilities that are settled by delivering cash or other financial assets, thereby compromising existing or remaining investors.
- ▶ **Operational Risk** Operational risks may subject the Fund to errors affecting transactions, valuation, accounting, and financial reporting, among other things.
- ▶ **Derivatives Risk** Derivatives can behave unexpectedly. The pricing and volatility of many derivatives may diverge from strictly reflecting the pricing or volatility of their underlying reference(s), instrument or asset.
- ▶ **Emerging Markets Risk** Emerging markets are less established, and often more volatile, than developed markets and involve higher risks, particularly market, liquidity and currency risks.
- ▶ **Real Estate Investments Risk** Real estate and related investments can be negatively impacted by any factor that makes an area or individual property less valuable.
