

Franklin

Multi-Asset Euro Conservative Fund Class A Acc. (EUR)

Prior to 9 August 2021, the Fund was known as Legg Mason QS Investors Multi Asset Euro Conservative Fund.

Fund details

Summary of Investment Objective:

The fund seeks to achieve income and growth of the fund's value in Euro terms, through investment in other mutual funds (Underlying Funds).

The fund will primarily invest in two categories of Underlying Funds, with at least 60% of its net assets in bond-oriented Underlying Funds and at least 20% of its net assets in equity-oriented Underlying Funds.

The value of investments and the income from them may go down as well as up and you may not get back the amount you originally invested.

Fund Inception Date: 24/02/2015

Performance inception date: 30/11/2004

Reference Benchmark*:

FRK Multi Euro Conservative Benchmark (revised April 2016, Apr 2009, Nov 2007)

Morningstar Category peer group:

EUR Cautious Allocation - Global

Risk and reward profile*

Portfolio statistics

Total Net Assets (in millions)	€11,09
Month end Net Asset Value (NAV)	€107,03
Number of holdings	20
Percentage of top ten holdings	88,55

Codes

ISIN	IE00BQQPS958
SEDOL	BQQPS95

Charges

Minimum initial investment	1,000 EUR
Entry charge	5.00%
Exit charge	None
Ongoing charge	1.63%
Performance fee	None

The charges are the fees the fund charges to investors to cover the costs of running the Fund. Additional costs, including transaction fees, will also be incurred. These costs are paid out by the Fund, which will impact on the overall return of the Fund. Fund charges will be incurred in multiple currencies, meaning that payments may increase or decrease as a result of currency exchange fluctuations.

* Refer to the Definitions section on page 2

Percentages are based on total portfolio as of date displayed and are subject to change at any time. Holdings and allocations breakdowns are provided for information purposes only and should not be deemed a recommendation to buy or sell the securities mentioned or securities in the industries shown. From 28 August 2020, the pricing of securities held in Legg Mason Global Solution Plc will use the mean (or mid) value of the bid and ask prices, to calculate the Funds' Net Asset Values ("NAV"). The Funds previously used a bid price methodology for fixed income securities, and last traded price for equity securities.

This fund was created from the contribution of all the assets of the no longer existing Luxembourg SICAV Legg Mason Multi-Manager Conservative Fund (Euro) established on 30/11/04, a fund with a substantially similar investment objective and policy. Past performance was calculated using historical performance data of [the Luxembourg SICAV] and it may not be a reliable indicator of the fund's future performance. The performance data should be used for illustrative purposes only, as performance prior to the Fund's inception date has not been adjusted to reflect the fees of the Fund. As at Fund inception, the Fund's fixed annual expenses for the share class shown above (investment management fees, custody and administration fees and shareholder servicing fees) were around 1.45% in comparison to the predecessor fund of 1.79% – there may be other variable costs not included in these figures.

Emerging Markets Bonds	4.80		

Franklin
Multi-Asset Euro Conservative Fund Class A Acc. (EUR)

Investment risks

The fund is subject to the following risks which are materially relevant but may not be adequately captured by the indicator:

Fund of Funds: The fund is subject to the overall costs, investment objectives or policy changes, performance and investment valuations of the underlying funds in which it invests which could result in a loss to the fund.

Investment in company shares: The Underlying Funds may invest in shares of companies, and the value of these shares can be negatively affected by changes in the company, its industry or the economy in which it operates.

Bonds: There is a risk that issuers of bonds held by the Underlying Funds may not be able to repay the bond or pay the interest due on it, leading to losses for the Underlying Fund. Bond values are affected by the market's view of the above risk, and by changes in interest rates and inflation.

Emerging markets investment: The Underlying Funds may invest in the markets of countries which are smaller, less developed and regulated, and more volatile than the markets of more developed countries.

Liquidity: In certain circumstances it may be difficult to sell the fund's investments because there may not be enough demand for them in the markets, in which case the fund may not be able to minimise a loss on such investments.

Fund currency: Changes in exchange rates between the currency of the investments held by the Underlying Funds and the funds base currency may affect the value of the fund and any income received from it.

Interest rates: Changes in interest rates may negatively affect the value of the fund. Typically as interest rates rise, bond values fall.

Fund counterparties: The fund may suffer losses if the parties that it trades with cannot meet their financial obligations.

Fund operations: The fund is subject to the risk of loss resulting from inadequate or failed internal processes, people or systems or those of third parties such as those responsible for the custody of its assets.

Complete information on the risks of investing in the Fund are set out in the Fund's prospectus.

A temporary negative cash position may be due to (1) unsettled trade activity (2) permitted purposes, such as borrowing or derivatives use, if allowed by the prospectus.
