Effective 01/05/2019 the Custom Multi-Sector Blended Index is 100% the Bloomberg U.S. Aggregate Bond Index. It consisted of the following: 60% ICE BofA U.S. High Yield Constrained/20% ICE BofA All Convertible/20% Bloomberg U.S. Aggregate Bond Index through 31/1/2015, 50% ICE BofA U.S. High Yield Index/30% Bloomberg U.S. Aggregate Bond Index/10% S&P 500 TR/10% JPM CEMBI Broad Diversified from 1/2/2015 to 30/04/2019. Lord Abbett believes the Bloomberg U.S. Aggregate Bond Index is a more appropriate representation of the overall strategy. The blended index is calculated on a monthly basis and returns have been obtained from published sources. **Performance data quoted reflect past performance and are no guarantee of future results. Current performance may be higher or lower than the performance quoted.

Performance data quoted reflect past performance and are no guarantee of future results. Current performance may be higher or lower than the performance quoted. The net asset value performance above shows the Fund's average annual total returns excluding sales charges, which are not applicable to Class I shares. Returns for periods of less than one year are not annualized. If sales charges had been included, performance would have been lower. The investment return and principal value of an investment in the fund will fluctuate so that shares, on any given day or when redeemed, may be worth more or less than their original cost. Please refer to the Share Class Information table on the next page for since inception dates; benchmark since inception is 05/01/2015. Currency-hedged share classes use hedging techniques in an attempt to reduce fluctuations between the hedged share class and the portfolio's base currency. The goal is to deliver returns that track the portfolio's base currency returns more closely. Any gains/losses associated with the hedging techniques will accrue solely to the relevant hedged share class. There can be no guarantee that these techniques will be successful.

GROWTH OF USD 1,000,000

Past performance does not predict future returns.

USD 2,000,000

Based on a hypothetical Class I (acc) USD investment of USD 1,000,000 on 05/01/2015 without sales charge and includes the reinvestment of all distributions, if any. Data as of 31/12/2023.

Key Risks: The Fund is subject to risks associated with investing in debt securities, including credit risk, interest rate risk, high yield risk, mortgage and asset backed securities risk and derivatives risk. For share classes denominated in a currency other than U.S. dollars, changes in currency exchange rates may reduce or increase fund returns. Please refer to the end of this document as well as the Fund's KIID and prospectus for more detailed risk information.

GLOSSARY OF TERMS

Effective Duration is the change in the value of a fixed-income security that will result from a 1% change in market interest rates, taking into account anticipated cash flow fluctuations from mortgage prepayments, puts, adjustable coupons, and potential call dates. Duration is expressed as a number of years, and generally, the longer a duration, the greater the interest-rate risk or reward for a portfolio's underlying bond prices. Where applicable, securities, such as common or preferred stock, convertible bonds and convertible preferred stock, ETFs, ADRs, and CPI swaps and related futures are excluded from these calculations.

Average Coupon is the weighted average coupon for all the securities in a portfolio. A bond's coupon is the annual rate of interest on a bond's face value that the issuer agrees to pay the holder.

Average Maturity is the length of time until the average security in a portfolio will mature or be redeemed by its issuer in proportion to its dollar value. Indicating a portfolio's sensitivity to general market interest rate changes, a longer average maturity implies greater relative portfolio volatility.

Average Yield to Worst is the lowest yield that can be received on a bond without defaulting.

Average Yield to Maturity is the rate of return anticipated on a bond if held until it matures. Yield to maturity assumes all the coupon payments are reinvested at an interest rate that equals the yield-to-maturity. The yield to maturity is the long-term yield expressed as an annual rate.

Investors should carefully consider the investment objectives, risks, charges, and expenses of the Fund. This and other important information is contained in the Fund's prospectus, fund supplements, KIIDs, and Summary of Shareholder Rights. Read these documents carefully before you invest. Subscribing for shares in the Fund shall not provide an investor a direct interest in any assets of the Fund.

Morningstar Rating Information (If Applicable): For each fund with at least a three-year history, Morningstar calculates a Morningstar Rating based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a fund's monthly performance, placing more emphasis on downward variations and rewarding consistent performance. The top 10% of funds in each category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars and the bottom 10% receive 1 star. The Overall Morningstar Rating for a managed product is derived from a weighted average of the performance figures associated with its three, five, and ten year (if applicable). Overall Morningstar Rating is a copyright of Morningstar, Inc., 2024. All Rights Reserved.
