

# Hermes US All Cap Equity Fund

## a sub-fund of Hermes Investment Funds plc

### Class F US\$ Acc. Shares (ISIN: IE00BVVB6662)

## Objectives and investment policy

The Fund aims to increase the value of your investment over the long term.

The Fund will predominantly invest in shares of companies located in or earn substantial revenue from the United States and, on occasion, Canada. This includes companies listed in the Russell 3000 Index. The company may be of any size based on the market value of its shares (i.e. 'all cap').

On occasion it may also invest in other financial instruments, for example other funds, Derivatives and rated or Unrated Bonds. The Fund may borrow on a limited basis (up to a maximum of 10% of the value of the Fund). Leverage is not part of the investment strategy of the Fund.

The Fund's base currency is USD but its investments may be priced in other currencies. Derivatives may be used to convert the value of those investments into USD.

**You may buy or sell shares in the Fund each business day** (except bank holidays in the UK and Ireland).

**This Share Class is accumulating.** Your portion of any income received will be reinvested. This will be reflected in the value of your shares.

## Useful definitions

- **Bonds:** A Fixed Income debt investment (also known as 'Credit') in which the Fund lends money to a government or company, who is then obliged to pay a specified amount back to the purchaser of the Bond on a given future date. The amount to be repaid usually includes the original amount (the principal) plus interest (coupons).
- **Derivatives:** Investments whose value is linked to one or more underlying assets.
- **Leverage:** Use of various instruments or borrowed money that increases the exposure of the Fund to its investments – this has the potential to increase both the gain and loss of an investment.

## Risk and reward profile

### Narrative explanation of the indicator and its main limitations:

The value of investments and income may go down as well as up and you may not get back the original amount invested.

- Historical data may not be a reliable indication for the future
- Risk category shown is not guaranteed and may shift over time
- The lowest category does not mean 'risk free'
- This reflects volatility of the Fund based on historic movements of underlying investments.

### Particular risks not adequately captured by this indicator include:

- **Guarantee:** The value of your investment is not guaranteed and the Fund may not achieve its objective.
- **Equity Risk:** The value of equities (such as shares in a company) can be affected by market movements. Other influential factors include political and economic news, company earnings and significant corporate events.

- **Small and Mid-Cap Companies Risk:** Shares of small and medium-sized companies may be difficult to buy and sell, rely on less-diversified streams of revenue, and their prices are likely to rise and fall more often than those of larger companies.
- **Counterparty Risk:** The Fund will be exposed to any institutions providing custody of assets, deposits or acting as counterparty on financial Derivatives. In the event of a counterparty experiencing financial difficulties, the Fund may be exposed to financial loss.
- **Leverage Risk:** The use of leverage may result in large fluctuations in the net asset value of the Fund, amplifying either gains or losses.
- **Concentration Risk:** Investment risk is concentrated in specific sectors, regions, countries, currencies, companies or issuers. This means the Fund has an increased sensitivity to local economic, market, political or regulatory events.
- **Liquidity Risk:** In difficult market conditions, certain Fund investments may be harder to sell at the last quoted market price.
- **Operational Risk:** The potential loss resulting from error or failure arising from people, systems, controls/safeguards or service providers that the Fund relies on.

## Charges for this Fund

The charges you pay are used to pay the costs of running the Fund, including the costs of distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry charge	None
Exit charge	None
