

Oaktree European High Yield Bond Fund

Class H USD IA

a subfund of Oaktree (Lux.) Funds

INVESTMENT POLICY

Oaktree's European high yield bond portfolios invest in bonds of European issuers and the euro-denominated bonds of non-European issuers. Oaktree's high yield bond portfolios do not invest in equity-like securities (such as convertibles and warrants) or emerging market debt, and are un-levered at the fund level. We approach high yield bond investing as long term lenders, not as traders or market timers. We have proven credit analysis methods, which emphasis fundamental, bottom-up investing. We have a disciplined review and control process to support our research efforts.

MARKET COMMENTARY

- The market rallied strongly in July - producing the second highest monthly return of the year to date. What is most surprising is this came the month after the UK voted to leave the European Union. The economic uncertainty that the vote creates appears to have been overridden by the belief that central banks will provide enough stimulus to overcome any potential weakness.
- We lagged the benchmark during the month. In anticipation of potential buying opportunities caused by the Brexit vote we were holding a slightly higher cash balance than usual entering the month, which accounted for all of the underperformance
- The July rally was universal across all rating categories with BB, B and CCC-rated bonds returning 2.53%, 2.21% and 2.69% respectively
- New issuers were still cautious in the early part of the month, although once it was clear the rally was more than just fleeting new issues that had been postponed post the Brexit vote started to come to the market
- Following the “exit” vote we are cautious of adding additional risk to the portfolio while such uncertainty remains. While we still believe over the medium term the European high yield market offers attractive returns compared to other asset classes it is hard to believe there will be no effect from the decision of the UK to leave the EU. It seems logical that the effect will be felt most in the UK, but as the second largest economy in Europe it also seems unlikely it will not have consequences for both the European economic and political landscape which may cause volatility over the forthcoming months as the full effects become clear.
