## RISK CONSIDERATIONS

Economies in Emerging Markets are generally less well regulated and may be adversely affected by trade barriers, exchange controls, protectionist measures and political / social instability. There is a risk of volatility due to lower liquidity and the availability of reliable information.

Debt securities of Emerging Market Countries may be subject to greater risk of loss of principal and interest than debt securities issued by obligors in developed countries and may be considered to be predominantly speculative with respect to the issuer's capacity to pay interest and repay principal.

Investors who subscribe in a currency other than the base currency of the Fund are exposed to currency risk. Fluctuations in these exchange rates may affect the return on investment.
