**Structured Investments SICAV
Investment Administrator's Report
For the Period Ended 31 May 2017**

Dear Shareholders:

Enclosed is the report for the period ended 31 May 2017.

A. Market Review

Global economic growth was positive but far from robust during the six months ended 31 May 2017. Looking back, the U.S. Department of Commerce reported that fourth quarter 2016 U.S. Gross Domestic Product ("GDP") growth was 2.1%. U.S. GDP growth then moderated to 1.4% during the first quarter of 2017. In its April 2017 World Economic Outlook Update, the International Monetary Fund ("IMF") said, "Global economic activity is picking up with a long-awaited cyclical recovery in investment, manufacturing, and trade." From a regional perspective, the IMF estimates 2017 growth in the Eurozone will be 1.7%, the same as in 2016. Japan's economy is expected to expand 1.2% in 2017, compared to 1.0% in 2016. Elsewhere, the IMF projects that overall growth in emerging market countries will accelerate to 4.5% in 2017, versus 4.1% in 2016. Finally, the U.S. Dollar weakened against other major currencies during the reporting period.

The global equity market generated strong results during the reporting period. The U.S. market rallied over the first three months of the period and reached several new all-time highs. This was driven by expectations for improving economic growth and increased fiscal spending under President Trump's administration. After largely trading water in March 2017, the market again rallied in April and May 2017, as first quarter 2017 corporate profits were generally better than expected. For the six months ended 31 May 2017, the S&P 500 Index gained 9.69%. International equities produced even stronger results, as economic growth exceeded expectations in a number of countries, monetary policy accommodation remained in place and there were fewer concerns over U.S. protectionism trade policies. During the period, international developed equities, as measured by the MSCI EAFE Index (net), returned 15.98%. Emerging market equities also generated strong results, with the MSCI Emerging Markets Index (net) gaining 17.51% during the reporting period.*

The global fixed income market generated positive results over the six months ended 31 May 2017. While U.S. Treasury yields moved sharply higher after the November 2016 elections, they then moderated after peaking in mid-March 2017. This turnaround occurred as investors scaled back their expectations for growth and inflation given several policy setbacks in the Trump administration. The U.S. Federal Reserve Board raised interest rates twice during the reporting period. However, the U.S. central bank indicated that a measured approach would be taken in terms of future rate hikes. Elsewhere, the European Central Bank and the Bank of Japan maintained their highly accommodative monetary policies. Finally, inflation was generally well contained during the reporting period. For the six months ended 31 May 2017, the Bloomberg Barclays U.S. Aggregate Bond Index and Bloomberg Barclays Global Aggregate Bond Index (hedged to USD) gained 2.52% and 4.02% respectively. Riskier fixed income securities generated stronger performance during the reporting period. The U.S. high yield bond market, as measured by the Bloomberg Barclays U.S. Corporate High Yield Bond Index, gained 6.72%, whereas the emerging market debt asset class, as measured by the JPMorgan EMBI Global Diversified Index, returned 7.76% during the reporting period.*

* All returns in US Dollar terms.

Structured Investments SICAV Notes to the Financial Statements For the Period Ended 31 May 2017

1. Organisation

Structured Investments SICAV (the "Fund") was incorporated on 2 February 2007 under the laws of the Grand Duchy of Luxembourg as a "Société d'Investissement à Capital Variable", for an unlimited period of time. The Fund is registered pursuant to Part I of the Law of 17 December 2010, as amended. As at 31 May 2017 the Fund is comprised of three different launched portfolios (the "Portfolios").

The following Portfolios are administered by Goldman Sachs International ("GSI") as Investment Administrator:

- GSQuartix Modified Strategy on the Bloomberg Commodity Index Total Return Portfolio (launched 4 March 2009)
- GSQuartix Multi-Asset Dynamic Protection Strategy Portfolio (launched 30 July 2013)
- Goldman Sachs EFI Long Short Risk Premia Portfolio (launched 10 November 2014)

The administration of each Portfolio does not involve the Investment Administrator actively buying and selling securities and/or actively using various investment techniques and/or efficient portfolio management techniques on the basis of investment judgment and/or economic, financial and market analysis. The Investment Administrator will use a largely passive strategy to replicate a performance corresponding generally to the performance of a relevant Index or Strategy.

2. Investment Objective

GSQuartix Modified Strategy on the Bloomberg Commodity Index Total Return Portfolio

The Portfolio's investment objective is to replicate the performance of the Modified Strategy Goldman Sachs E166 on the Bloomberg Commodity Index Total Return (the "Strategy") which seeks to outperform the Bloomberg Commodity Index Total Return (the "Benchmark Index") while keeping the same sector weights.

The Strategy is a "financial index" in the meaning of applicable UCITS Regulations. This implies that the Strategy will, at all times, satisfy the diversification, benchmark and publication criteria as applicable to financial indices under UCITS Regulations. Financial indices may make use of increased diversification limits: each component of a financial index may represent up to 20% of the index, except that one single component may represent up to 35% of the index where justified by exceptional market conditions, as may be the case for highly correlated commodities in the petroleum products sector.

GSQuartix Multi-Asset Dynamic Protection Strategy Portfolio

The Portfolio's investment objective is to provide investors with a return linked to the performance of a multi-asset investment strategy designed to maximise long term risk adjusted returns whilst having, on any day, a value not less than 80% of the highest daily NAV per Class A Share in the base currency up till that day.

Goldman Sachs EFI Long Short Risk Premia Portfolio

The Portfolio's investment objective is to provide a synthetic exposure to the performance of the Goldman Sachs Equity Risk Premia Long Short (the "Strategy") and to earn interest under the Reverse Repurchase Agreement and/or Asset Portfolio purchase as at a rate to be determined from time to time.

The Strategy aims to provide a synthetic exposure to the performance of a basket comprising three underlying assets (each, an "Asset"):

- (i) a long position in the Goldman Sachs Equity Factor Index World Basket Net Total Return USD;
- (ii) a short position in the MSCI Daily TR Gross World USD; and
- (iii) a short position in the USD Goldman Sachs Overnight Money Market Index.

Structured Investments SICAV
Notes to the Financial Statements
For the Period Ended 31 May 2017

2. Investment Objective (continued)

Goldman Sachs EFI Long Short Risk Premia Portfolio (continued)

The combination of the long position in (i) and the short position in (ii) is designed to extract the relative performance (which may be positive or negative) of the Goldman Sachs Equity Factor Index World Basket Net Total Return USD as compared with the MSCI Daily TR Gross World USD.

The Strategy is calculated on an "excess return" basis and accordingly does not include any synthetic interest that may be earned by notionally depositing USD cash at overnight rates. The Strategy is denominated in USD. No assurance can be given that the Strategy methodology will be successful in achieving its objective or producing positive returns or that the Strategy will outperform any alternative investment strategy.

GSI has created and maintains different versions of the Strategy, each version embedding a specified leverage factor ranging from one (1) to five (5) times, as further explained in the Prospectus. Daily closing values will be published separately for each version of the Strategy.

In order to achieve its investment objective, the Portfolio will issue different categories of Share classes. Each category of Share classes will provide exposure to a different version of the Strategy. Each Share class will differ from the others only in respect of the level of leverage embedded in the Strategy, its denomination and, where applicable, currency hedging arrangements. Each Share class presents a different risk profile determined inter alia by reference to these elements.

3. Significant Accounting Policies

The financial statements as at 31 May 2017 have been established based upon the last available NAV, which was 31 May 2017 for all Portfolios.

(a) Basis of Financial Statements

The financial statements of the individual Portfolios are presented in their base currency while the combined totals of all the Portfolios are presented in Euro. The financial statements have been prepared in accordance with the Luxembourg law on Undertakings for Collective Investment. The preparation of financial statements requires management to make estimates and assumptions that may affect the amounts reported in the financial statements and accompanying notes. Actual results may differ from these estimates.

The comparative figures are as at 30 November 2016 for the Statement of Assets and Liabilities, for the period from 1 December 2015 to 31 May 2016 for the Statement of Operations and for the period from 1 December 2015 to 30 November 2016 for the Statement of Changes in Shareholders' Equity.

(b) Investment Transactions, Related Investment Income and Operating Expenses

Dividend income is recorded on the ex-dividend date and interest income is recorded on the basis of interest accrued and discounts earned. Income, unrealised and realised gains and losses of the Portfolio are allocated to each share class based on their relative net assets at each valuation date.

Operating expenses are recognised on an accrual basis.

Transaction costs, when incurred, are recognised in net realised gain/(loss) on investment securities in the Statement of Operations.

Structured Investments SICAV
Notes to the Financial Statements
For the Period Ended 31 May 2017

3. Significant Accounting Policies (continued)

(c) Financial Investment in Securities and Valuation

(i) Recognition and Derecognition

The Portfolios recognise financial assets and financial liabilities on the date they become party to the contractual provisions of the instrument. Purchases and sales of financial assets and financial liabilities are recognised using trade date accounting plus one day. From trade date plus one day, any gains and losses arising from changes in the value of the financial assets or financial liabilities are recorded in the Statement of Operations.

Financial assets are derecognised when the rights to receive cash flows from the investments have expired or the Portfolio has transferred substantially all risks and rewards of ownership.

(ii) Market Value Measurement Principles

The value of all securities and derivatives is determined according to the following policies:

(ii 1) Debt Securities

Debt securities, comprising Government Bonds, are valued by using a third party pricing service.

When a debt security has been identified as being in default, the interest accrual on the defaulted security is stopped. On confirmation of default from relevant parties, the amount receivable may be written off.

Interest income on Government Bonds will be reflected in "Interest income from Investments" in the Statement of Operations, when earned.

(ii 2) Derivatives

A derivative is an instrument whose value is derived from an underlying instrument, index reference rate or a combination of these factors. Derivative instruments may be privately negotiated contracts which are often referred to as over-the-counter ("OTC") derivatives or they may be listed and traded on an exchange. Derivative contracts may involve future commitments to purchase or sell financial instruments or commodities at specified terms on a specified date, or to exchange interest payment streams or currencies based on a notional or contractual amount.

Derivative contracts are stated at fair value and recognised as assets and liabilities on the Statement of Assets and Liabilities. Gains and losses resulting from the change in the fair value are reflected on the Statement of Operations as a component of change in unrealised gain/(loss). Realised gains or losses are recorded on termination or from periodic cash flow payments.

(ii 2) (a) Swap Contracts

Swaps, comprising Total Return Swaps and Excess Return Swaps can be linked to any number of underlying investments and indexes, and swap terms can vary greatly. Cash flows are exchanged based on the underlying pay and receive leg of the swap, any payments to or received from the swap counterparty are disclosed in the Statement of Operations. Any payables or receivables from the swap counterparty are disclosed in the Statement of Assets and Liabilities. Swap agreements are carried at market value and the value of the swap agreement is based on a counterparty provided price, third party pricing service or valuation model. The model considers various inputs including the market value of the underlying, the risks associated with the underlying and the specific terms of the contract.

In connection with these agreements, securities or cash may be identified as collateral or margin in accordance with the terms of the respective swap agreements to provide assets of value and recourse in the event of default or bankruptcy/insolvency. This collateral or margin is denominated in Fund currency, and is paid from the depositary account to the counterparty broker.

Structured Investments SICAV
Notes to the Financial Statements
For the Period Ended 31 May 2017

3. Significant Accounting Policies (continued)

(c) Financial Investment in Securities and Valuation (continued)

(ii) Market Value Measurement Principles (continued)

(ii 2) (a) Swap Contracts (continued)

Total Return Swaps, Excess Return Swaps and more specifically OTC derivative transactions are entered into by the Portfolio under an International Swaps and Derivatives Associations, Inc Master Agreement (“ISDA Master Agreement”) or similar agreement. An ISDA Master Agreement is a bilateral agreement between the Portfolio and a counterparty that governs OTC derivative transactions (including total return swaps) entered into by the parties.

For period ending 31 May 2017 all collateral in relation to total return swaps was pledged in the form of cash.

All returns from OTC derivative transactions will accrue to the Portfolio and are not subject to any returns sharing agreement with the Portfolio’s Investment Administrator or any other third parties.

For Total Return Swaps and Excess Return Swaps, transactions costs are not separately identifiable. For these investments, transaction costs are included in the purchase and sales price and are part of the gross investment performance of each Portfolio. Returns are identified as the realized gains and change in unrealized gains on the swap contract during the reporting period.

To gain exposure to the Strategies mentioned in note 2, the Portfolios have each entered into swap agreements with GSI as counterparty, linking the value of the shares of the Portfolios to the total return performance of the Strategies respectively. The Strategies are algorithmic strategies, for which GSI acts as strategy sponsor and strategy calculation agent.

(ii 2) (b) Forward Foreign Exchange Contracts

In a forward foreign exchange contract, the Portfolio agrees to receive or deliver a fixed quantity of one currency for another, at a predetermined price at a future date. Purchases and sales of forward foreign exchange contracts having the same notional value, settlement date and counterparty and right to settle net are generally offset (which result in a net foreign currency position of zero with the counterparty) and any realised gains or losses are recognised on trade date plus one. The value of forward foreign exchange contracts is based on the price at which a new forward foreign exchange contract of the same notional value, currency and maturity could be affected at the close of business in the principal currency markets in which these currencies are traded.

(d) Cash

Cash is valued at cost, which approximates market value.

(e) Due from Brokers and due to Brokers

Due from brokers and due to brokers consists primarily of cash collateral receivable/payable from GSI. Due from brokers and due to brokers are valued at cost.

(f) Foreign Currency Translation

The books and records of all Portfolios are maintained in their base currency. Transactions in foreign currencies are translated at the foreign currency exchange rate in effect at the date of the transaction. Assets and liabilities denominated in foreign currencies are translated at the foreign currency closing exchange rate in effect at the period-end date.

Structured Investments SICAV
Notes to the Financial Statements
For the Period Ended 31 May 2017

3. Significant Accounting Policies (continued)

(f) Foreign Currency Translation (continued)

Foreign currency exchange differences arising on translation and realised gains and losses on disposals or settlements of assets and liabilities are recognised in the Statement of Operations. Foreign currency exchange gains or losses relating to investments, derivative financial instruments, and all other foreign currency exchange gains or losses relating to monetary items, including cash and cash equivalents, are reflected in the net realised gain/(loss) or net change in unrealised gain/(loss) on the Statement of Operations.

The reference currency of the Fund is Euro. The following exchange rates have been used to translate assets and liabilities in other currencies to Euro:

	31 May 2017	30 November 2016
1 EUR =	1.0880 CHF	1.0806 CHF
1 EUR =	0.8711 GBP	0.8490 GBP
1 EUR =	9.7550 SEK	9.7933 SEK
1 EUR =	1.1245 USD	1.0608 USD

(g) Expenses

Unless provided otherwise in the relevant supplement to the Prospectus, expenses incurred by the Fund that do not specifically relate to an individual Portfolio or Share Class of the Fund may be allocated to the relevant Portfolios or Share Classes based on their respective net assets or depending upon the nature of the charges. Expenses directly attributable to a Portfolio or Share Class are charged to that Portfolio or Share Class unless provided otherwise in the relevant supplement to the Prospectus.

(h) Alternative Net Asset Value Calculation Method (“Swing Pricing”)

On any Business Day the Management Company through their appointed delegate, GSI as Investment Administrator, in conformity with guidelines established by the Board of Directors, may determine to apply swing pricing (to include such reasonable factors as they see fit) to the NAV per Share. This calculation method is intended to pass the estimated costs of underlying investment activity of the Portfolio to the active Shareholders by adjusting the NAV of the relevant Share and thus to protect the Portfolio’s long-term Shareholders from costs associated with ongoing subscription and redemption activity.

Swing pricing may take account of trading spreads on the Portfolio’s investments, the value of any duties and charges incurred as a result of trading and may include an allowance for market impact.

Where GSI, based on the prevailing market conditions and the level of subscriptions or redemptions requested by Shareholders or potential Shareholders in relation to the size of the relevant Portfolio, have determined for a particular Portfolio to apply swing pricing, the Portfolio valuation does not change but the NAV is adjusted upward or downward and would include the factors referenced in the preceding paragraph.

Because the determination of whether to value the Portfolio’s NAV on an offer or bid basis is based on the net transaction activity of the relevant day, Shareholders transacting in the opposite direction of the Portfolio’s net transaction activity may benefit at the expense of the other Shareholders in the Portfolio. In addition, the Portfolio’s NAV and short-term performance may experience greater volatility as a result of this calculation method. Swing adjustments arising from swing pricing are disclosed in the Statement of Assets and Liabilities and the Statement of Changes in Shareholders’ Equity.

Structured Investments SICAV
Notes to the Financial Statements
For the Period Ended 31 May 2017

4. Taxation

Taxation - Luxembourg

The Fund is not liable for any Luxembourg tax on profits or income, nor are the dividends paid by a Portfolio liable to any Luxembourg withholding tax subject to the application of the Luxembourg laws dated 21 June 2005 (the "Laws") implementing Council Directive 2003/48/EC on taxation of savings income in the form of interest payments ("EU Savings Directive") and several agreements concluded between Luxembourg and certain associated territories of the EU (the "Associated Territories"). However, the Fund is as a rule liable in Luxembourg to a subscription tax (taxe d'abonnement) of 0.05% per annum. The tax is calculated at each NAV date and payable quarterly based upon the NAV of each class of Shares at each quarter end date.

This rate is however reduced to 0.01% per annum for:

- undertakings whose exclusive object is the collective investment in money market instruments and the placing of deposits with credit institutions;
- undertakings whose exclusive object is the collective investment in deposits with credit institutions; and
- individual compartments of undertakings for collective investment ("UCI") with multiple compartments referred to in the law dated 17 December 2010, as well as for individual classes of securities issued within a UCI or within a compartment of a UCI with multiple compartments, provided that the securities of such compartments or classes are reserved to one or more institutional investors.

The following entities are further exempt from the subscription tax:

- the value of the assets represented by units held in other UCI, provided such units have already been subject to the subscription tax in accordance with the law dated 17 December 2010;
- UCI, as well as individual compartments of umbrella funds (i) whose securities are reserved for institutional investors and (ii) whose exclusive object is the collective investment in money market instruments and the placing of deposits with credit institutions and (iii) whose weighted residual portfolio maturity must not exceed 90 days and (iv) which have obtained the highest possible rating from a recognised rating agency. Where several classes of securities exist within the UCI or the compartment, the exemption only applies to classes whose securities are reserved for institutional investors; and
- UCI whose securities are reserved for (i) institutions for occupational retirement provision, or similar investment vehicles, created on the initiative of a same group for the benefit of its employees and (ii) undertakings of this same group investing funds they hold, to provide retirement benefits to their employees.

Taxation - General

Each Portfolio may be subject to taxation on capital gains, interest and dividends in certain jurisdictions in which each Portfolio invests. It is the policy of each Portfolio to accrue for any such taxes on dividends and interest when the dividend is declared, interest is earned or capital gains are realised. At each valuation date, taxation on realised and unrealised appreciation of securities may be accrued for at statutory rates.

Prospective investors should consult their own taxation advisors regarding the tax implications of investing in the Fund in relation to their own individual circumstances as they may differ from the general statements that appear above.

Taxation - Austria

At the Fund's discretion, share classes are entered into Austrian tax transparent reporting. Where applicable, share class tax figures will be reported to investors via the following website <https://www.profitweb.at/login/index.jsp>.

Structured Investments SICAV
Notes to the Financial Statements
For the Period Ended 31 May 2017

4. Taxation (continued)

Taxation - General (continued)

Taxation - Belgium

The Fund may incur a liability to subscription tax at the rate of 0.0925% in respect of subscriptions made through intermediaries situated in Belgium to the extent that net shares are outstanding as of 31 December of the previous period.

Taxation - Germany

As a general proposition, share classes are entered into German tax transparent reporting. Where applicable, share class tax figures will be reported to investors via the following website <https://www.bundesanzeiger.de/ebanzwww/wexsservlet>.

Taxation - Switzerland

At the Fund's discretion, share classes are entered into Swiss tax reporting for each financial year. Where applicable, share class tax figures will be reported to investors via the following website <https://www.ictax.admin.ch/extern/en.html#/ratelist/2016>.

Taxation - United Kingdom

As a general proposition, the Fund makes an application to the HM Revenue & Customs ("HMRC") in the United Kingdom in respect of distributing share classes and a number of other share classes to be treated as reporting Share Classes. Reporting Share Classes are not required to make distributions, but are required to provide HMRC with full details of reportable income each period and publish those figures to those investors.

5. Significant Agreements

Management Company Fee

The Fund has appointed FundRock Management Company S.A. to serve as its designated management company (the "Management Company") in accordance with the Luxembourg law of 17 December 2010 (the "2010 Law") pursuant to a Fund Management Company Agreement dated as of 19 February 2007.

The Management Company will receive a Management Company fee per Portfolio of 0.025% per annum with an annual minimum fee of EUR30,000 per Portfolio for daily calculated Portfolios and 0.015% per annum with an annual minimum fee of EUR20,000 for weekly/fortnightly calculated Portfolios. The Management Company fee, payable in twelve monthly payments, will be calculated on the last NAV of the month of each portfolio.

Investment Administrator Fee

In order to implement the investment objective and policy of each Portfolio, the Management Company, with the consent of the Board of Directors of the Fund, has delegated the investment administration of the Portfolios listed below to GSI pursuant to an Investment Administration Agreement dated as of February 2007.

Structured Investments SICAV
Notes to the Financial Statements
For the Period Ended 31 May 2017

5. Significant Agreements (continued)

Investment Administrator Fee (continued)

The Investment Administrator receives a maximum fee payable per annum out of the net assets of each Portfolio as follows:

"Z (GBP Hedged) 5xS" Share Class	0.20%
"Z (USD Class) 5xS" Share Class	0.20%

The Investment Administrator undertakes swap transactions with GSI. All such transactions with GSI are entered into within the ordinary course of business and at normal commercial terms.

Directors' Remuneration

Mr. Claude Kremer, Mr. Patrick Zurstrassen and Mr Jean de Courrèges are Independent Directors and have no executive function with the Investment Administrator or its affiliated companies. The Fund pays each independent Director an annual fee for their services as Director of the Fund. Mr. Andreas Koernlein and Mr. Glenn Thorpe are affiliated with the Investment Administrator and receive no compensation from the Fund.

Fund Administration

The Management Company has appointed The Bank of New York Mellon (Luxembourg) S.A. as Fund Administrator for the Fund.

Structured Investments SICAV
Notes to the Financial Statements
For the Period Ended 31 May 2017

5. Significant Agreements (continued)

Registrar and Transfer Agency Fee

The Management Company has appointed RBC Investor Services Bank S.A. as Transfer Agent (the “Agent”) and Registrar for the Fund. The day-to-day services provided to the Fund by the Agent include receiving and processing subscription and redemption orders, allotting and issuing Shares and maintaining the Shareholder register for the Shares.

The Agent is entitled to a fee payable out of the net assets of each Portfolio at the rates shown in the table below

Portfolio Name	Per Annum
GSQuartix Modified Strategy on the Bloomberg Commodity Index Total Return Portfolio	0.045%
GSQuartix Multi-Asset Dynamic Protection Strategy Portfolio	0.045%
Goldman Sachs EFI Long Short Risk Premia Portfolio	the lower of 0.045% or USD 22,500

Depositary Fee

The Fund has appointed The Bank of New York Mellon (Luxembourg) S.A. as Depositary (the “Depositary”). The depositary fee is determined in accordance with the applicable market standards in Luxembourg and is reasonable and proportionate to the NAV of the Portfolio.

Such fee is payable on a monthly basis to the Depositary. The Depositary is paid 0.02% per annum of each Portfolio’s average NAV per year.

Domiciliary and Corporate Agent Fee

The Fund has appointed The Bank of New York Mellon (Luxembourg) S.A. as the Fund’s Domiciliary and Corporate Agent. The Domiciliary and Corporate Agent is entitled to receive a fee of EUR 5,000 per Portfolio per annum. These fees form part of the Fund Administration and Domiciliary fee expenses as documented in the Statement of Operations.

Hedging Agent Fee

The Management Company has appointed The Bank of New York Mellon as the Hedging Agent (the “Hedging Agent”).

The Hedging Agent is entitled to receive a Hedging Agent fee of a maximum of 0.015% per annum per hedged class of Shares with an annual minimum fee of USD 5,000 per Portfolio and USD 5,000 per hedged class of Shares. This fee will be payable by the Portfolio to the Hedging Agent on a semi-annual basis. These fees form part of the Fund Administration and Domiciliary fee expenses as documented in the Statement of Operations.

Waiver and Reimbursed Fees

To the extent that the actual Depositary, Registrar and Transfer Agency, Fund Administration fees and other operating expenses for each Portfolio exceed the cap level foreseen in the relevant Supplement to the Prospectus during the financial period, such excess amount will be paid by the Investment Administrator back to the Portfolios at the end of each period. Those amounts are disclosed under the caption “Fee waived/reimbursed by Investment Administrator” in the Statement of Operations.

The fees and expenses attributable to GSQuartix Modified Strategy on the Bloomberg Commodity Index Total Return Portfolio (except fees payable to the Investment Administrator) are capped to 0.15% per annum of the average NAV of the portfolio.

Structured Investments SICAV
Notes to the Financial Statements
For the Period Ended 31 May 2017

5. Significant Agreements (continued)

Waiver and Reimbursed Fees (continued)

The fees and expenses attributable to Goldman Sachs EFI Long Short Risk Premia Portfolio (except fees payable to the Investment Administrator) are capped to 0.25% per annum of the average NAV of the Portfolio.

As at 31 May 2017 there is no cap on the fees and expenses of the GSQuartix Multi-Asset Dynamic Protection Strategy Portfolio.

For information of the fees applicable for a specific period, please refer to the Prospectus and its relevant addenda.

6. Share Capital

Shares of the Portfolio's may be purchased through the Global Distributor and sub-distributor daily/fortnightly, at the NAV per share of the relevant class of shares of the Portfolio on such date, plus any applicable sales charge. The maximum sales charge and the minimum initial investment per class are detailed in the Fund's Prospectus.

The following table summarises the activity in the Portfolio's shares for the period ended 31 May 2017 .

Portfolio Share Class	Balance at 01-Dec-2016	Subscriptions	Redemptions	Balance at 31-May-2017

7. Distributions

The C (GBP Hedged) Distributing 3xS Share Class of Goldman Sachs EFI Long Short Risk Premia Portfolio made a distribution per share of GBP 0.1802, with an ex-date of 13 March 2017. The payment was made on 15 March 2017 for USD 3,360.

All other Portfolios intend that substantially all the net investment income, if any, will be capitalised for all Share classes.

Structured Investments SICAV
Notes to the Financial Statements
For the Period Ended 31 May 2017

8. Financial Investments and Associated Risks

The Portfolios' investing activities expose them to various types of risks that are associated with the financial investments and markets in which they invest (the "Investment Risks"). These may be both derivative and non-derivative financial investments. The Portfolios' investment portfolios are comprised of debt and derivative investments at the period end. The Board has appointed the Management Company to manage the Investment Risks of the Portfolios. The significant types of financial risks which the Portfolios are exposed to are market risk, liquidity risk and credit risk. The Prospectus provides details of these and other types of risk some of which are additional to the information provided in these financial statements.

Asset allocation is determined by the Portfolios' Investment Administrator who manages the allocation of assets to achieve the investment objectives as detailed in Note 2. Achievement of the investment objectives involves taking risks. Divergence from the benchmark and/or the target asset allocation and the composition of the Portfolio is monitored by the Portfolios' Investment Administrator.

The risk management policies employed by the Management Company are detailed below:

(a) Market Risk

The potential for changes in the market value of the Portfolio's investment portfolio is referred to as market risk. Commonly used categories of market risk include currency risk, interest rate risk and other price risk.

- (i) Currency risks may result from exposures to changes in spot prices, forward prices and volatilities of currency rates.
- (ii) Interest rate risks may result from exposures to changes in the level, slope and curvature of the various yield curves, the volatility of interest rates, mortgage prepayment speeds and credit spreads.
- (iii) Other price risks are the risk that the value of an investment will fluctuate as a result of changes in market prices other than those arising from currency risk or interest rate risk and may result from exposure to changes in the prices and volatilities of individual equities, equity baskets, equity indices, and commodities.

(i) Currency Risk

The Portfolios may invest in financial investments and enter into transactions denominated in currencies other than its Portfolios' base currencies. Consequently, a Portfolio may be exposed to the risk that the exchange rate of its base currency relative to other foreign currencies may change in a manner that has an adverse effect on the value of that portion of a Portfolio's assets or liabilities denominated in currencies other than the base currency.

When an investor invests into a Share Class which is in a different currency to the base currency of the Portfolio in which it invests, the currency risk of the investor will be different to the currency risk of the Portfolio.

(ii) Interest Rate Risk

The Portfolios may invest in fixed income securities and interest rate swaps contracts. Any change to relevant interest rates for particular securities may result in the Investment Administrator being unable to secure similar returns upon the expiry of contracts or the sale of securities. In addition, changes to prevailing interest rates or changes in expectations of future rates may result in an increase or decrease in the value of the securities held. In general, if interest rates rise, the value of fixed income securities will decline. A decline in interest rates will in general, have the opposite effect. All fixed income securities and floating rate securities, together with their coupon and maturity date are disclosed in the Schedule of Investments. The Portfolios may invest in instruments in desired currencies at fixed, floating and zero rates of interest.

Structured Investments SICAV
Notes to the Financial Statements
For the Period Ended 31 May 2017

8. Financial Investments and Associated Risks (continued)

(a) Market Risk (continued)

(iii) Other Price Risk

Other price risk is the risk that the value of a financial investment will fluctuate as a result of changes in market prices, other than those arising from currency risk or interest rate risk whether caused by factors specific to an individual investment, its issuer or any factor affecting financial investments traded in the market. As the Portfolios' financial investments are carried at market value with market value changes recognised in the Statement of Operations, all changes in market conditions will directly affect Shareholders' equity.

(b) Liquidity Risk

Liquidity risk is the risk that the Portfolios will encounter difficulty in meeting obligations associated with financial liabilities that are settled by delivering cash or another financial asset. Among other things liquidity could be impaired by an inability to access secured and/or unsecured sources of financing, an inability to sell assets or unforeseen outflows of cash or collateral or violations of Principal Trading Broker terms or covenants. This situation may arise due to circumstances outside of a Portfolio's control, such as a general market disruption or an operational problem affecting the Portfolio or third parties. Also, the ability to sell assets may be impaired if other market participants are seeking to sell similar assets at the same time.

The Portfolios' financial investments include investments in derivative contracts traded over-the-counter, which are not traded in an organised public market and which may be illiquid and in investments which may represent a significant percentage of issue size. As a result, the Portfolios may not be able to liquidate quickly some of these investments at an amount close to fair value in order to meet requirements, or to respond to specific events such as deterioration in the creditworthiness of any particular issuer. The forced liquidation of investment positions may cause financial losses.

The Portfolios provide for the subscription and redemption of Shares and it is therefore exposed to the liquidity risk associated with Shareholder redemptions in accordance with the terms in the Prospectus. The Portfolios are managed to include liquid investments which the Investment Administrator believes are sufficient to meet normal liquidity needs although substantial redemptions of Shares in the Portfolios could require the Portfolios to liquidate their investments more rapidly than otherwise desirable in order to raise cash for the redemptions and changes in the liquidity of the Portfolios' underlying investments once acquired can adversely impact its position in this respect. These factors could adversely affect the value of the Shares redeemed, the valuation of the shares that remain outstanding and the liquidity of the Portfolios' remaining assets if more liquid assets have been sold to meet redemptions.

(c) Credit Risk

Credit risk is the risk that one party to a financial investment will cause a financial loss for the other party by failing to discharge an obligation.

The Investment Administrator has adopted procedures to reduce credit risk related to its dealings with counterparties. Before transacting with any counterparty, the Investment Administrator or its affiliates evaluate both credit-worthiness and reputation by conducting a credit analysis of the party, their business and reputation. The credit risk of approved counterparties is then monitored on an ongoing basis, including periodic reviews of financial statements and interim financial reports as needed.

Debt securities are subject to the risk of issuers or a guarantor's inability to meet principal and interest payments on its obligations and are subject to price volatility due to factors such as interest rate sensitivity, market perception of the credit worthiness of the issuer and general market liquidity.

Structured Investments SICAV
Notes to the Financial Statements
For the Period Ended 31 May 2017

8. Financial Investments and Associated Risks (continued)

(c) Credit Risk (continued)

In order to reduce exposure to credit losses, some over-the-counter derivative agreements entered into by the Fund permit netting of transactions arising under such agreements, excluding those with counterparties executing only spot foreign exchange contracts. While such netting rights do not result in an offset of reported assets and liabilities, they do provide for the reduction of credit risk on favourable over-the-counter transactions with a single counterparty to the extent of the value of unfavourable over-the-counter transactions with the same counterparty upon the occurrence of an event of default or termination event as all over-the-counter transactions with the counterparty under such agreement are terminated and amounts owed from and amounts payable to the counterparty are settled on a net basis.

The Fund is subject to a number of risks relating to the insolvency, administration, liquidation or other formal protection from creditors ("Insolvency") of the Depositary. These risks include without limitation:

1. The loss of all cash held with the Depositary which is not being treated as client money both at the level of the Custodian and any sub-custodians ("client money").
2. The loss of all cash which the Depositary has failed to treat as client money in accordance with procedures (if any) agreed with the Fund.
3. The loss of some or all of any securities held on trust which have not been properly segregated and so identified both at the level of the Depositary and any sub-custodians ("trust assets") or client money held by or with the Depositary in connection with a reduction to pay for administrative costs of an Insolvency and/or the process of identifying and transferring the relevant trust assets and/or client money for other reasons according to the particular circumstances of the Insolvency.
4. Losses of some or all assets due to the incorrect operation of accounts by the Depositary.
5. Losses caused by prolonged delays in receiving transfers of balances and regaining control over the relevant assets.

An insolvency could cause severe disruption to the Fund's investment activity. In some circumstances, this could cause the Directors to temporarily suspend the calculation of the NAV and dealings in Shares.

(d) Additional Risks

(i) Concentration Risk

The Portfolios may invest in a limited number of investments and investment themes. A consequence of a limited number of investments is that performance may be more favourably or unfavourably affected by the performance of an individual investment.

(ii) Counterparty Risk

GSI performs several roles with respect to the Portfolios: it is acting as Investment Administrator on behalf of the Portfolios (refer to note 5) and it will also act as the counterparty to derivative transactions with the Portfolios and as the calculation agent in respect of those derivative transactions. GSI will make a profit from the price of the derivative instruments, which may not be the best price available in the market.

The ability of the Portfolios to meet their obligations to investors will depend on the receipt of payments owed to the Portfolios by GSI under the swap agreements. As a result, the Portfolios will be exposed to the creditworthiness of GSI. Returns on the swap agreements are collateralised.

Structured Investments SICAV
Notes to the Financial Statements
For the Period Ended 31 May 2017

8. Financial Investments and Associated Risks (continued)

(d) Additional Risks (continued)

(ii) Counterparty Risk (continued)

The table below shows amounts (pledged)/received as collateral for swap contracts as at 31 May 2017.

Portfolio	Collateral Type	Currency	Collateral Value
GSQuartix Modified Strategy on the Bloomberg Commodity Index Total Return Portfolio	Cash	USD	(7,020,000)
Goldman Sachs EFI Long Short Risk Premia Portfolio	Cash	USD	2,090,000

Cash received as collateral is not reinvested and is held at the Depository.

The table below shows the maturity profile of collateral (pledged)/received as at 31 May 2017.

Portfolio	Maturity Profile	Currency	Market Value of Collateral (Pledged)/Received
GSQuartix Modified Strategy on the Bloomberg Commodity Index Total Return Portfolio	Open Maturity	USD	(7,020,000)
Goldman Sachs EFI Long Short Risk Premia Portfolio	Open Maturity	USD	2,090,000
	Total	USD	(4,930,000)

As Calculation Agent, GSI will have the authority to make determinations that could affect the NAV of the Shares in Portfolios, and their discretion can make various determinations that may affect the value of the Shares of the Portfolios and the calculation of the amount due with respect to a subscription, conversion, redemption or termination of the Portfolios.

(iii) Operational Risk

Operational risk is the potential for loss caused by a deficiency in information, communications, transaction processing and settlement, and accounting systems. The Funds' service providers, including sub-custodians and others as shown on page 2, maintain controls and procedures for the purpose of helping to manage operational risk. Reviews of the service levels of service providers are performed on a regular basis by the Investment Administrator. No assurance is given that these measures will be 100% effective.

(iv) Legal, Tax and Regulatory Risks

Legal, tax and regulatory changes could occur during the duration of the Portfolios which may adversely affect the Portfolios.

With respect to tax, the Portfolios may be subject to taxation on capital gains, interest and dividends in certain jurisdictions where the Portfolios invest.

The interpretation and applicability of the tax law and regulations by tax authorities at times may not be clear or consistent. Tax obligations where probable and estimable are recorded as liabilities. However, some tax obligations are subject to uncertainty and may result in additional tax liabilities, interest and penalties based on future actions, interpretations or judgements of these authorities covering current and past positions. Accounting standards may also change, creating or removing an obligation for the Portfolios to accrue for a potential tax liability. Consequently, it is possible that certain potential tax obligations which currently are not probable may become so which may result in additional tax liabilities for the Portfolios in the future and these additional liabilities may be material.

Structured Investments SICAV
Notes to the Financial Statements
For the Period Ended 31 May 2017

8. Financial Investments and Associated Risks (continued)

(d) Additional Risks (continued)

(iv) Legal, Tax and Regulatory Risks (continued)

Because of the foregoing uncertainties, the NAV may not reflect the tax liabilities ultimately borne by the Fund, including at the time of any subscriptions, redemptions or exchanges of interest in the Fund, which could have an adverse impact on investors at that time.

(v) Indices and Strategies Risks

For those Portfolios that are designed to replicate a particular Index or Strategy, the associated risks are disclosed in detail in the Prospectus.

(vi) Share Class Risks

The European Securities and Markets Authority ("ESMA") issued a discussion paper on 6 April 2016 on UCITS share classes (ESMA/2016/570), in which ESMA seeks stakeholders views on the possibility for UCITS to issue differing share classes within the same fund or sub-fund. In this paper, ESMA has identified certain principles that should be followed when setting up different share classes, including that of having a "common investment objective": share classes of the same fund or sub-fund should have a common investment objective reflected by a common pool of assets. If ESMA issues regulations consistent with the above principles, there is a risk that certain UCITS issuing differing share classes will no longer be accepted by the regulator in the future. Considering the particularities of the different categories of share classes issued by the Portfolio, it is likely that the Portfolio will be impacted by such new regulations; in such case, the Board of Directors will either amend the terms of the Portfolio or decide to dissolve the Portfolio and liquidate the related assets in accordance with the provisions of the Prospectus. On 30 January 2017, ESMA issued an opinion paper upholding the principles stipulated in the discussion paper. The Board of Directors will assess the requirements with a view to complying with the conditions set out in the ESMA opinion paper. Investors will be informed in due time.

9. Statement of Changes in Portfolio

A Statement of Changes in Portfolio is available, free of charge, upon request from the Fund's Administrator.

10. Share Class Specific Forward Foreign Exchange Contracts

Certain Portfolios of the Fund engage in forward foreign exchange contracts for the purpose of hedging the currency exposure of certain Share Classes. Gains and losses on these forward exchange transactions are allocated to the respective Share Classes. For further details please refer to the Schedule of Investments from pages 5 to 8.

11. Transaction Costs

Transaction costs for fixed income investments, forward foreign exchange contracts, total return swaps and other derivative contracts are not separately identifiable. For these investments transaction costs will be included in the purchase and sales price. These transaction costs are part of the gross investment performance of each Portfolio. All Portfolios invest solely in forward foreign exchange contracts and other derivative contracts, and thus, no transaction costs are disclosed.

Note: Benchmark returns, with the exception of taxes at times, do not incorporate transaction costs.

Custodian transaction costs, when incurred, are recognised in net realised gain/(loss) on investment securities in the Statement of Operations.

Structured Investments SICAV
Notes to the Financial Statements
For the Period Ended 31 May 2017

12. Commissions for Research and/or Executions

The Fund did not enter into any third party commission arrangements, or pay commissions for research and/or execution for the period ended 31 May 2017.

13. Prospectus

The latest Prospectus for the Fund dated September 2016 is available, upon request, from the Fund's Administrator.

14. Currency Adjustment

The opening value of the Fund has been restated at the exchange rates ruling at 31 May 2017. The resulting loss of EUR (100,294,456) (30 November 2016: loss of EUR (18,483,411)) represents the movement in exchange rates between 30 November 2016 and 31 May 2017. This is a notional gain/(loss), which has no impact on the NAV of the individual Portfolios.

15. Related Party Transactions

For some of the Portfolios, GSI may be selected as the Approved Counterparty to OTC derivative transactions (including Swap Agreements) and act as the Calculation Agent in respect of those OTC derivative transactions.

Some of the OTC derivative instruments used by the Portfolios are highly specialised and there may be no counterparty other than GSI which provides such an OTC derivative instrument. The investment objectives of some Portfolios may relate to or be based on Indices or Strategies sponsored, maintained or administered by Goldman Sachs, as more fully described in the Prospectus. Where this is the case, it may be difficult to select Approved Counterparties other than GSI to enter into OTC derivative contracts, or to do so on terms that are competitive with terms offered by GSI.

GSI may have multiple roles in connection with a Portfolio and/or Indices or Strategies referenced by a Portfolio and/or their underlying components, as further described in the Prospectus. In particular, in connection with a Portfolio, GSI may act as Investment Administrator, Swap Counterparty, Reverse Repurchase Counterparty, calculation agent for OTC derivative transactions, Index or Strategy sponsor and/or Index or Strategy calculation agent.

Although GSI will perform its obligations in a commercially reasonable manner, investors should be aware that GSI may face conflicts between these roles and its own interests. However, GSI operates arrangements in order to mitigate such conflicts of interests and/or to facilitate that they do not affect the interests of the Fund: these roles are functionally separate; they are carried out by different personnel who are subject to different duties, operate independently of each other and have access to different information.

During the period under review, certain purchases and sales of swaps held by the Fund were carried out with GSI as a counterparty. See the Schedule of Investments for those Portfolios which held swap agreements with GSI as counterparty at period end.

16. Cross Liabilities

In accordance with Luxembourg law, each Portfolio is "ring-fenced" and considered to constitute a single pool of assets and liabilities, so that the rights of Shareholders and creditors in relation to each Portfolio should be limited to the assets of that Portfolio. As at 31 May 2017 there was no cross sub-fund investment within the Fund.

17. Contingent Liabilities

There are no contingent liabilities as at 31 May 2017.

19. Events During the Period

On 26 May 2017, the Board of Directors approved a change to the year-end date for the Fund from 30 November to 31 December. The first set of audited annual financial statements with the amended year end date will be prepared for the thirteen months ended 31 December 2017.

The below share classes have been liquidated during the period:

Goldman Sachs EFI Long Short Risk Premia Portfolio - "C (EUR Hedged) 1xS" Share Class on 7 December 2016 and "C (GBP Hedged) 3xS" Share Class on 07 December 2016.

The below share classes have been launched during the period:

GSQuartix Modified Strategy on the Bloomberg Commodity Index Total Return Portfolio - "Z (CHF Hedged)" Share Class on 20 March 2017, "Z (EUR Hedged)" Share Class on 20 March 2017 and "Z (GBP Hedged)" Share Class on 20 March 2017.

20. Subsequent Events

There were no significant events affecting the Fund since 31 May 2017.

21. Approval of the Financial Statements

The Board of Directors approved the annual financial statements on 20 July 2017.

Appendix II: Index Trading Portfolios
For the Period Ended 31 May 2017

The following disclosures are required for Index-Tracking Portfolios based on European Securities and Markets Authority (“ESMA”) guidelines on exchange traded funds (“ETFs”) and other UCITS issues (ESMA/2012/832), issued 18 December 2012:

I. Realised Tracking Error:

Portfolio	Benchmark	Realised Net Tracking Error¹
GSQuartix Modified Strategy on the Bloomberg Commodity Index Total Return Portfolio	Bloomberg Commodity Index Total Return	0.07%

In normal market conditions, it is anticipated that the Portfolio will replicate the performance of the Modified Strategy Goldman Sachs E166 on the Bloomberg Commodity Index Total Return Strategy (the “Strategy”) minus the amount of the ongoing charge for the relevant Share class, as stated in the key investor information document. Therefore, it is anticipated that the Portfolio will replicate the performance of the Strategy with no, or limited, Tracking Error. The primary driver of tracking difference is the effectiveness of foreign exchange transactions entered into for hedging purposes.

II. 1 period performance return for the Portfolio and Benchmark:

Portfolio	Fund	Benchmark²
GSQuartix Modified Strategy on the Bloomberg Commodity Index Total Return Portfolio	(2.60%)	(2.11%)

Past performance does not guarantee future results, which may vary.

¹ Tracking error is calculated as the volatility of the difference between the return of each Portfolio against the return of the respective Index that the Portfolio is seeking to track.

² All index returns are shown with income re-invested and, in contrast to the Portfolio, without the deduction of any fees or expenses. Returns of the Share Classes are shown net of fees and expenses and after the reinvestment of dividends using month end NAVs. For Share Classes where performance is shown relative to the index, it is for comparative purposes only. Reference to these benchmarks does not imply that the Share Classes will achieve returns, volatility or other results similar to the benchmark.

Additional Information
For the Period Ended 31 May 2017

Shares of the Portfolios are issued on the basis of information set out in the current Prospectus of the Fund, which is available, free of charge at the Fund's registered office.

Prospective investors should review the Prospectus and the Key Investor Information Document ("KIID") carefully in its entirety and consult their legal, tax and financial advisors in relation to (i) the legal requirements within their own countries for the subscription, holding, redemption or disposal of Shares (ii) any foreign exchange restrictions to which they are subject to in their own countries in relation to the subscription, holding, redemption or disposal of Shares; (iii) the legal, tax, financial or other consequences of subscribing for, holding, redeeming or disposing of Shares; and (iv) the suitability for them as an investment in Shares. Prospective investors should seek the advice of their legal, tax and financial advisors if they have any doubts regarding the contents of the Prospectus and each relevant supplement.

Some of the Portfolios will enter in a swap agreement with GSI.

Shares of the Portfolios have not been registered under the US Securities Act of 1933, as amended, or the securities laws of any of the States of the United States. Shares of the Portfolios may not be offered, sold or delivered directly or indirectly in the United States, or to or for the account or benefit of any "US Person". Any re-offer or resale of Shares in the United States or to US Persons may constitute a violation of United States Law. The Fund will not be registered under the United States Investment Company Act of 1940, as amended. Applicants for Shares will be required to certify that they are not US Persons. All Shareholders are required to notify the Fund of any change in their status as non-US Person.

Subscriptions are only valid if made on the basis of the current Prospectus and KIID supplemented by the most recent annual financial statements and the latest semi-annual financial statements if published thereafter. This document does not constitute a solicitation in any jurisdiction in which such a solicitation is unlawful to any person to whom it is unlawful. Moreover, this document neither constitutes an offer to enter into an investment agreement with the recipient of this document nor an invitation to respond to the document by making an offer to enter into an investment agreement. Opinions expressed are current opinions as of the date appearing in this material only.

Despite all measures taken by the Portfolio to reach its objectives, these are subject to independent risk factors like changes in the fiscal or commercial regulations. No guarantee whatsoever may be offered to the investor in this regard.

Management Company

FundRock Management Company S.A. acts as a Management Company for other investment funds. A list of these may be obtained, by request, at the Registered Office of the Management Company.

The Board of the Management Company adopted a Code of Conduct on 14 July 2011, based on the ALFI Code of Conduct issued in September 2009, which sets out the principles of good governance, and considers that the Management Company has been in compliance with it in all material respects throughout the financial period. Any subsequent amendment to the ALFI Code of Conduct will be considered by the Board of the Management Company prior to adoption and necessary disclosure will be made in the annual financial statements.
