FUND OVERVIEW

The Fund aims to provide a return on your investment through a combination of capital growth and income commensurate with a moderate level of risk. The Fund will seek to achieve its investment objective by obtaining indirect exposure to equity securities (e.g. shares), equity-related (ER) securities, fixed income (FI) securities (such as bonds) and FI-related securities, alternative assets (such as property and commodities), cash and deposits. FI securities include money market instruments (MMIs) (i.e. debt securities with short term maturities). ER securities and FI-related securities include financial derivative instruments (FDIs) (i.e. investments the prices of which are based on one or more underlying assets).

Exposure to these asset classes will be achieved through the Fund's investments in other funds, including exchange traded funds and other index funds managed by the BlackRock Group and, when determined appropriate, the Fund may invest directly in FI-related securities, MMIs, cash and deposits.

Performance is not shown as the Share Class has a performance history of less than 1 year.

Key Risks: The value of your investment and the income from it will vary and your initial investment amount cannot be guaranteed. The fund is a fund of funds structure which may invest up to 100% of NAV in other collective investment schemes. The fund may also invest in emerging markets. Emerging markets are generally more sensitive to economic and political conditions than developed markets. Other factors include greater liquidity risk restrictions on investment or transfer of assets and failed/delayed delivery of securities or payments to the Fund.
