Bantleon Dividend AR, a sub-fund of BANTLEON SELECT SICAV, class PT, EUR

WKN / ISIN: A14Q85 / LU1210057359

This sub-fund is managed by the BANTLEON AG (the »Management Company«), which belongs to the BANTLEON BANK Gruppe.

Objectives and investment policy

Bantleon Dividend AR is an equity fund that aims to achieve constantly high dividend income and reduced price fluctuations. The fund invests globally in equities of leading firms with above-average dividend yields. The equity selection is based on criteria including size and sustainability of dividend, low volatility and low debt. Equities from the financial sector are avoided in favour of those with a basis in the real economy. Foreign-currency risks are hedged as much as possible. The individual equities are weighted according to their Price volatility, so the fund's price follows a more even trend than the overall equity market. Performance is stabilised in particular by reducing equity risk in line with the macroeconomic situation. To this end, the investment management can temporarily hedge equity positions by entering into derivatives transactions up to a maximum of 100% of the fund's assets.

Derivatives transactions may be made to hedge investments, to achieve additional returns, to efficiently implement the equity allocation and the hedge against currency risks.

The sub-fund is actively managed. It is not managed in reference to a benchmark.

Income shall remain in the sub-fund (or: in this unit class) and shall increase the value of the shares.

Investors may demand to redeem their units every normal bank business day in Luxembourg.

Risk and reward profile

This indicator relies on historic data and cannot be used for a prediction of future developments. The categorisation of the sub-fund may change in the future and is not a guarantee. Even a fund in category 1 is not an entirely risk-free investment.

The sub-fund has been placed in category 4 because its share value fluctuates moderately and therefore the chance of profit but also the risk of loss can be moderate.

It may be that due to the calculation model not all risks are accounted for when placing the sub-fund in a risk category. An extensive description of the risks is included in the section »Risks of Investment« in the prospectus. The following risks have no direct bearing on the categorisation but may nevertheless be of relevance to the sub-fund:

- **Currency risks:** If the fund holds assets in a currency other than its reference currency, investors are exposed to a currency risk. This can be reduced by means of hedging transactions.
- **Counterparty risks:** The fund may engage in transactions/derivative transactions with third parties (contracting partners). Any contracting partner that becomes insolvent will either no longer be able, or will only partially be able, to settle the fund's outstanding claims.
- **Risks from the use of derivatives:** The sub-fund may use derivatives. This does result in both increased opportunities and increased risk of loss. The use of derivatives to hedge against losses may also reduce the profit opportunities of the sub-fund.
- **Custody risks:** Assets held in custody for safekeeping – particularly in other countries – may be subject to a risk of loss in connection with insolvency, violations of due diligence requirements or market abuse on the part of the custodian or a sub-custodian.
- **Operational risks:** The sub-fund may become a victim of fraud or other criminal actions. It may also suffer losses caused by misunderstandings or mistakes of employees of the management company or third parties or it may suffer damages caused by external occurrences such as natural disasters.
