Investment risks

For complete information on risks, refer to the legal documents. The value of investments and any income will fluctuate (this may partly be the result of exchange rate fluctuations) and investors may not get back the full amount invested. The fund may invest in certain securities listed in China which can involve significant regulatory constraints that may affect the liquidity and/or the investment performance of the fund. The fund invests in a limited number of holdings and is less diversified. This may result in large fluctuations in the value of the fund. As a portion of the Fund may be exposed to less developed countries, you should be prepared to accept large fluctuations in the value of the Fund.

Fund Strategy

The fund has a thematic founder-owner strategy and seeks to invest in a concentrated portfolio of companies where the company founder(s) or (an) individual(s) with material share ownership are represented on the company management team or on the board of directors. We seek what we believe to be the best investment ideas from across the world, building a portfolio of high conviction stocks that we think has the potential to deliver attractive returns over the long term.
