

# Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

## BlueBay Funds - BlueBay Emerging Market Absolute Return Bond Fund R - USD (CPerf) ISIN:LU1217274551, a class of a sub-fund of BlueBay Funds, managed by BlueBay Funds Management Company S.A.

### Objectives and investment policy

The fund aims to make a return for you regardless of any benchmark or market conditions through a mixture of generating income and growing the amount you originally invested. It mainly invests in bonds that pay a fixed interest

The fund will invest in bonds of any rating. Typically at least half of the fund's investments will be in fixed income bonds issued by governments, banks and corporates which are based in, or have substantial exposure to, emerging markets (which may include securities of issuers in financial distress). At least half of the fund's investments will be exposed to bonds from emerging market governments, currencies and/or interest rates (either directly or via financial instruments such as derivatives). The fund may invest up to 20% of its net assets in mainland China. The fund may use derivatives (such as futures, options and swaps, which are linked to the rise and fall of other assets) to obtain, increase or reduce exposure to underlying assets and may thus create gearing which may result in greater fluctuations of the value of the fund. The manager of the fund will ensure that the use of derivatives does not materially alter the overall risk profile of the fund. The fund will be actively exposed to both hard currency (generally, globally-traded currencies from economically and politically stable countries) and local currency (currencies of emerging market countries) investments.

For full details of the investment objective and policy of the fund, please refer to the prospectus.

If you hold shares in a class that pays dividends we expect that any income generated by the fund will be paid out to you on a regular basis. For other share classes, any income the fund makes will be reinvested to grow your investment.

You can buy and sell shares every day which is a business day in London and Luxembourg, subject to the terms in the General Information section of the prospectus.

The fund may not be appropriate for investors who plan to invest for less than three years.

### Risk and reward profile

The Risk and Reward Indicator table shows where the class ranks in terms of its potential risk and return. The higher the rank the greater the potential reward but the greater the risk of losing money. The table uses a standard calculation method that is used by all companies who offer such funds within the European Union.

The shaded area in the table above shows the class's ranking based on the Synthetic Risk and Reward Indicator. It is based upon how much the price of the class has moved up and down in the past. The class is ranked at 6, which is typically more than a class which invests in straight fixed income because this class may at times use derivatives and leverage in order to achieve a higher level of exposure to market movements, and similar to a class which invests in company shares. Please note that using such past information may not reliably predict how the class will perform in the future. Its ranking is not guaranteed to remain unchanged and may shift over time. Even the lowest risk class does not mean the investment is risk free.

The Risk and Reward Indicator does not take into account the following:

- At times, the market for emerging market bonds may dry up, which could make it difficult to sell these bonds, or the fund may only be able to sell them at a discount
- There may be cases where an organisation with which we trade assets or derivatives (usually a financial institution such as a bank) may be unable to fulfil its obligations, which could cause losses to the fund
- Investing in emerging market bonds offers you the chance to gain higher returns through growing your capital and generating income. Nevertheless, there is a greater risk that the organisation which issued the bond will fail, which would result in a loss of income to the fund along with its initial investment
- BlueBay could suffer from a failure of its processes, systems and controls – or from such a failure at an organisation on which we rely in order to deliver our services – which could lead to losses for the fund
- Emerging markets may be more volatile and it could be harder to sell or trade these bonds. There is also a greater risk of less government supervision, legal regulation and less well-defined tax laws and procedures than in countries with more developed trading markets. Emerging markets can be particularly sensitive to political instability, which can result in greater volatility and uncertainty, subjecting the fund to the risk of losses

## Charges

One-off charges taken before or after you invest	
Entry charge	5.00%
Exit charge	0.00%
This is the maximum that might be taken out of your money before it is invested / before the proceeds of your investment are paid out.	
Charges taken from the fund over a year	
Ongoing charges	1.40%
Charges taken from the fund under certain specific conditions	
Performance fee	10.00% a year of any returns the class achieves above the hurdle, the BofA Merrill Lynch US Dollar 3-Month Deposit Offered Rate Constant Maturity Index plus 3%. For the 12 months ending 30/06/2015, the actual performance fee charged was 0.00% of the share class average net asset value.

The charges you pay are used to pay the costs of running the class, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment. The entry and exit charges shown are maximum figures. In some cases you might pay less - you can find this out from your financial adviser.

The ongoing charges figure is based on fixed expenses. This figure may vary from year to year. It excludes:

- Performance fees
- Portfolio transaction costs, except in the case of an entry/exit charge paid by the UCITS when buying or selling units in another collective investment undertaking

This share class uses an unequalisation method to calculate performance fee.

For more information about charges, please see section 9 and Appendix 2 of the prospectus.

## Past performance

- The fund was launched in 2010. This class has not been launched yet.

## Practical information

- The fund's Depositary is Brown Brothers Harriman (Luxembourg) S.C.A.
