Dear Shareholder,

We are pleased to provide you with the Annual Report for the PIMCO Funds: Global Investors Series plc covering the twelve-month reporting period ended 31 December 2017. On the following pages, please find specific details as to each Fund's investment performance and a discussion of those factors that affected performance.

As an update, in the financial markets over the twelve-month reporting period:

- During the first half of the reporting period, geopolitics dominated headlines and contributed to brief periods of market volatility, but most risk assets generally gained as risk sentiment remained strong. In the US, the Federal Reserve (Fed) raised the Federal Funds Rate in March by 0.25% to a range of 0.75% to 1.00% and again in June by 0.25% to a range of 1.00% to 1.25%. Elsewhere, a perceived hawkish shift in tone from other major central banks, including the European Central Bank (ECB), the Bank of England (BOE), and the Bank of Canada (BOC), helped move most developed market yields higher even as longer-term US interest rates actually fell during this part of the reporting period.
- During the second half of the reporting period, geopolitical concerns continued but the global economy provided a solid fundamental backdrop with robust consumer confidence in both the eurozone and the US. This environment gave room for developed market central banks to adopt a more "dovish taper". The ECB, for example, announced a tapering in its monthly asset purchases, but President Mario Draghi emphasised the ECB's accommodative stance overall. In September, the Fed provided details on its plan to unwind its balance sheet but kept rates on hold through its November meeting, but raised the Federal Funds Rate in December by 0.25% to a range of 1.25% to 1.50%. The BOE raised its policy rate and suggested reduced stimulus on the horizon and the BOC raised interest rates twice after a seven year gap. Furthermore, President Xi Jinping was extended a second five-year term following the 19th National Party Congress in China, while Japan's Prime Minister Shinzo Abe won a decisive victory in snap elections.
- Over the full reporting period, many developed market yield curves flattened, as front-end rates moved higher alongside less accommodative monetary policy and longer-term rates generally remained steady and/or moved slightly lower. In the US, solid growth momentum and the Fed's three rate hikes throughout the year pushed US two-year yields higher, while the 10-year Treasury yield remained little changed. This drove the spread between two-year and 10-year rates to its narrowest level since November 2007. Front-end yields also moved higher in the UK and Canada as the BOE and the BOC both raised policy rates for the first time in years. In a similar vein, the ECB announced plans to taper its monthly purchases which contributed to rates generally rising in the region.
- Global investment grade credit, as represented by the Bloomberg Barclays Global Aggregate Credit Index (USD Hedged), returned 5.36% over the reporting period, amid continued synchronised global growth, low market volatility, and a strong technical backdrop. Developed market global high yield bonds, as measured by the ICE BofA Merrill Lynch Developed Markets High Yield Constrained Index (USD Hedged), returned 7.84% over the reporting period. Performance was strong and reflected meaningfully less dispersion across sectors, given the improving stability of commodities and generally supportive fundamentals.
- Global inflation-linked bonds (ILBs), as represented by the Bloomberg Barclays World Government Inflation-Linked Bond Index (USD Hedged), returned 3.31% over the reporting period. In the US, front-end real interest rates climbed higher and the curve flattened over the period, as the Fed continued on its tightening cycle by raising rates three times in 2017 and announcing detailed plans to reduce its balance sheet by tapering reinvestments. US inflation expectations slid lower over the first half of the year but rebounded strongly in the latter half on the back of the surging crude oil prices, which resulted from reports of lower global inventories and Organization of the Petroleum Exporting Countries (OPEC)-led output cuts taking effect. In the UK, the real yield curve flattened over the period, as the BOE turned to a hawkish tone and raised rates in November for the first time in a decade. UK inflation expectations broadly moved lower, weighed by tepid inflation readings and a stronger pound. Within emerging markets, Brazilian ILBs rallied in response to a series of central bank rate cuts that sent the benchmark rate to a historic low to counter weak economic conditions and political turmoil subsided.
- Emerging markets (EM) external debt, as represented by the JPMorgan Emerging Markets Bond Index (EMBI) Global, returned 9.32% over the reporting period. EM local bonds, as represented by the JPMorgan Government Bond Index-Emerging Markets Global Diversified Index (Unhedged), returned 15.21% over the reporting period. Growth dynamics broadly improved across the EM universe, with developing economies benefiting from the synchronised global recovery, while inflationary pressures remained muted, allowing key EM central banks to conduct monetary easing. EM currencies broadly appreciated against the US dollar, as commodity prices continued to strengthen and developed market central banks looked to remove accommodation on a more gradual trajectory.
- Diversified commodities, as represented by the Bloomberg Commodity Index Total Return, returned 1.70% over the reporting period. Within energy, oil prices rebounded over the latter half of the year on healthier demand, continued oil output management by OPEC, and elevated geopolitical risk. Natural gas prices experienced early-year pressure from a warm US winter and continued to underperform based on high production and inventory data. Returns in the agriculture sector were mixed, with soybeans and wheat ending the year in negative territory on competitively high inventories, while sugar posted gains, supported by positive fundamentals and market technicals. Base metals pushed higher over the year

from continued production investment restraint and overall positive global growth demand. Gold rallied over the span of the year on the back of safe-haven demand, geopolitical tensions, lower real yields and a weakening US dollar.

Global stock markets reached new highs as increasingly solid economic data, rising corporate earnings and non-restrictive central bank policy underpinned robust risk sentiment. US equities, as represented by the S&P 500 Index, returned 21.83% over the reporting period. Developed market equities outside the US, as represented by the MSCI EAFE Net Dividend Index (USD Hedged) and the MSCI EAFE Net Dividend Index (USD Unhedged), returned 16.84% and 25.03%, respectively, over the reporting period. EM equities, as represented by the MSCI Emerging Markets Index (Net Dividends in USD), returned 37.28% over the same period. Japanese equities, as represented by the Nikkei 225 Index in JPY, returned 21.30% over the reporting period and European equities, as represented by the MSCI Europe Index in EUR, returned 10.24% over the reporting period.

Important Information About the Funds

This material is authorised for use only when preceded or accompanied by the current PIMCO Funds: Global Investors Series plc Prospectus. Investors should consider the investment objectives, risks, charges and expenses of these Funds carefully before investing. This and other information is contained in the Prospectus. Please read the Prospectus carefully before you invest or send money.

We believe that bond funds have an important role to play in a well diversified investment portfolio. It is important to note, however, that in an environment where interest rates may trend upward, rising rates will negatively impact the performance of most bond funds, and fixed-income securities held by a Fund are likely to decrease in value. The price volatility of fixed-income securities can also increase during periods of rising interest rates, resulting in increased losses to a Fund. Bond funds and individual bonds with a longer duration (a measure of the expected life of a security) tend to be more sensitive to changes in interest rates, usually making them more volatile than securities or funds with shorter durations. The longer-term performance of most bond funds has benefited from capital gains in part resulting from an extended period of declining interest rates. In the event interest rates increase, these capital gains should not be expected to recur.

The Funds may be subject to various risks in addition to those described above. Some of these risks may include, but are not limited to, the following: real rate risk, derivative risk, small company risk, foreign security risk, high-yield security risk and specific sector investment risks. The Funds may use derivative instruments for hedging purposes or as part of an investment strategy. Use of these instruments may involve certain costs and risks such as liquidity risk, interest rate risk, market risk, credit risk, management risk and the risk that a Fund could not close out a position when it would be most advantageous to do so. Funds investing in derivatives could lose more than the principal amount invested in these instruments. Investing in foreign securities may entail risk due to foreign economic and political developments; this risk may be enhanced when investing in emerging markets. High-yield bonds typically have a lower credit rating than other bonds. Lower rated bonds generally involve a greater risk to principal than higher rated bonds. Smaller companies may be more volatile than larger companies and may entail more risk. Concentrating investments in individual sectors may add additional risk and volatility compared to a diversified fund.

Past performance is no guarantee of future results. On each individual Fund summary page in this Report, the Total Return Investment Performance table measures performance assuming that all dividend and capital gain distributions were reinvested. Investment return and principal value will fluctuate so that Fund shares, when redeemed, may be worth more or less than their original cost. Returns do not reflect the deduction of taxes that a shareholder would pay (i) on Fund distributions or (ii) the redemption of Fund shares. Current performance may be lower or higher than the performance data guoted. All Fund returns are net of fees and expenses.

An investment in a Fund is not a deposit in a bank and is not guaranteed or insured by any government agency. The value of and income from Shares in the Fund may go up or down and you may not get back the amount you have invested in the Funds.

PIMCO Capital Securities Fund seeks to provide focused exposure to attractively priced Capital Securities (as defined in the Prospectus) together with maximum total return, consistent with preservation of capital and prudent investment management, by investing in an actively managed portfolio of Fixed Income Instruments (as defined in the Prospectus) and other securities of which at least 80% will be invested in Capital Securities in accordance with the policies set out in the Fund's Prospectus.

Fund Insights

- » Long exposure to Contingent Capital Tier 1 contributed, as the sector posted positive returns during the period.
- » Long exposure to bank stocks contributed, as financial equities posted positive returns during the period.
- » Long exposure to Senior Bank Debt contributed, as the sector posted positive returns during the period.
- » Exposure to subordinated debt issued by Banco Popular detracted, as the subordinated debt was written off following the resolution of the bank.
- » Buy protection on the iTraxx Europe Subordinated Financials Index detracted from performance, as spreads tightened.

Commodity Real Return Fund seeks to maximise total return consistent with prudent investment management by investing in derivative instruments (which may be listed or OTC), including swap agreements, futures, options on futures and structured notes and commodity index-linked notes, which enable it to gain exposures to any of the indices and sub-indices referencing commodities (including but not limited to any index within the Bloomberg Commodity family of indices) which meet with the requirements of and have, where necessary, been cleared by the Central Bank of Ireland. Details of any indices utilised by the Fund and the types of commodities they reference will be available from the Investment Advisors upon request. These instruments will provide exposure to the investment returns of the commodities markets without investing directly in physical commodities, and will be backed by an actively managed portfolio of global Fixed Income Instruments (as defined in the Prospectus). The Fund may also invest in common and preferred stocks as well as convertible securities of issuers in commodity-related industries.

Fund Insights

- » Exposure to commodity markets contributed to performance, as prices rose.

Emerging Markets 2018 Fund seeks maximum total return, consistent with prudent investment management and the Fund Maturity Date (as defined in the Fund's Prospectus as in or around 30 November 2018), by investing under normal circumstances at least 80% of its net assets in Fixed Income Instruments (as defined in the Prospectus) with varying maturities and of issuers that are economically tied to emerging market countries issued by governments, their agencies or instrumentalities and corporations. Such instruments may be denominated in non-US currencies, including currencies of emerging markets. The Investment Advisors may achieve the desired exposure by direct investment in Fixed Income Securities (as defined in the Prospectus) and/or by investing in derivatives as further outlined in the Prospectus. The Fund may also invest in securities not tied to emerging market countries. During the twelve month period prior to the Fund Maturity Date, the Investment Advisors may determine at its discretion that it is not in the best interests of the Fund to acquire Fixed Income Instruments tied to emerging market countries (e.g. where market conditions are unfavourable). In such circumstances and during the final twelve month period only, the Investment Advisors may seek to invest in Fixed Income Instruments not tied to emerging market countries and shall not be subject to the abovementioned 80% limit. However, any Fixed Income Instruments purchased during this period shall not have a maturity beyond that of the Fund Maturity Date.

Investment Objective and Strategy Overview

Emerging Markets Short-Term Local Currency Fund seeks maximum total return, consistent with preservation of capital and prudent investment management, by investing at least 80% of its assets in currencies of, or in Fixed Income Instruments (as defined in the Prospectus) denominated in currencies of, emerging markets. The Investment Advisors have broad discretion to identify countries that it considers to qualify as emerging markets. The Investment Advisors will select the Fund's country and currency composition based on its evaluation of relative interest rates, inflation rates, exchange rates, monetary and fiscal policies, trade and current account balances, and other specific factors the Investment Advisors believe to be relevant. The Fund is likely to concentrate its investments in Asia, Africa, the Middle East, Latin America and the emerging countries of Europe. The Fund may invest in instruments whose return is based on the return of an emerging market security such as a derivative instrument, rather than investing directly in emerging market securities. The average portfolio duration of this Fund varies based on the Investment Advisors' forecast for interest rates and, under normal market conditions, is not expected to exceed two years. The Fund may invest all of its assets in high yield securities, subject to a maximum of 15% of its assets in securities rated lower than B by Moody's or S&P or equivalently rated by Fitch (or, if unrated, determined by the Investment Advisors to be of comparable quality).

Fund Insights

- » Exposure to non-agency mortgage-backed securities (MBS) contributed to relative performance, as total returns in these securities were positive.
- » Exposure to high yield corporate spread risk added to relative performance, as spreads narrowed.
- » US interest rate strategies contributed to relative performance, primarily due to carry, with curve positioning being approximately neutral given the flattening of the yield curve.
- » An overweight to European covered bonds, including exposure to Danish callable mortgages, was positive for relative performance as these securities posted positive total returns.
- » An underweight to investment grade credit spread risk detracted from relative performance, as spreads narrowed.
- » Exposure to Brazilian duration was negative for relative performance, as yields rose during the first half of the year.
- » Short exposure to the Singapore Dollar detracted from relative performance, as the currency appreciated versus the US Dollar.

Global Libor Plus Bond Fund seeks to maximise long-term return, consistent with preservation of capital and prudent investment management by investing at least two-thirds of its assets in a diversified portfolio of Fixed Income Instruments (as defined in the Prospectus) of varying maturities. The Fund will seek to achieve returns in excess of the 1 Month USD LIBOR (a measure of return in money market securities) over the medium to long term by flexibly investing in a variety of Fixed Income Instruments based on the Investment Advisors' views on global fixed income market securities.

Fund Insights

- » US interest rate strategies contributed to performance, primarily due to carry over the reporting period, given longduration exposure.
- » Exposure to non-agency mortgage-backed securities (MBS) contributed to performance, as total returns on these securities were positive, as evidenced by the BAML Fixed Rate Home Equity Index, which generally tracks the price performance of non-agency mortgages.
- » Long exposure to investment grade corporate credit contributed to performance, as total returns on these securities were positive, as evidenced by the Bloomberg Barclays global aggregate corporate index.
- » Long exposure to high yield corporate credit contributed to performance, as total returns on these securities were positive, as evidenced by the Bloomberg Barclays global high yield index.
- » Short exposure to the Singapore Dollar, Korean Won and Taiwanese Dollar detracted from performance, as the currencies appreciated versus the US Dollar.
- » Long exposure to the Russian Ruble contributed to performance, as the currency appreciated versus the US Dollar.

Global Multi-Asset Fund seeks to maximise total return, consistent with preservation of capital and prudent investment management, by taking exposure to a wide range of asset classes, including equities, fixed income, commodities and property (as described in the Prospectus). The Fund can also invest in other PIMCO Funds and other collective investment schemes (in accordance with the Prospectus).

Fund Insights

- » An overweight to securitised debt, specifically non-agency MBS, added to relative performance, as these securities generally posted positive returns.
- » An overweight to Japanese equities added to relative performance, as these securities generally posted positive returns.
- » An overweight to US inflation-linked investments added to relative performance. While real duration positioning was a slight detractor, the total return contribution from yields was enough to offset.
- » An overweight to emerging market spread added to relative performance, as these securities generally gained value.
- » An underweight to US equities detracted from relative performance, as these securities generally posted positive returns.
- » An underweight exposure to investment grade credit detracted from relative performance, as these securities generally gained value.

Global Real Return Fund seeks to maximise real return, consistent with preservation of real capital and prudent investment management. The Fund seeks to achieve its investment objective by investing at least two-thirds of its assets in a diversified portfolio of inflationindexed Fixed Income Instruments (as defined in the Prospectus) of varying maturities issued by governments, their agencies, or instrumentalities and corporations.

Fund Insights

- » Exposure to global inflation-linked bonds (ILBs) benefited absolute performance, as global ILBs, measured by Bloomberg Barclays World Government ILB Index, posted positive returns.
- » An overweight long-duration UK indexlinked Gilts benefited relative performance, as long-end UK rates fell.
- » An overweight to the belly of US real duration curve over the latter half of the year benefited relative performance, as respective rates fell during the period.
- » An underweight to French linkers contributed to relative performance, as real yields rose.
- » Exposure to residential mortgage-backed securities (RMBS) benefited relative performance, as these securities posted positive returns.
- » Exposure to external emerging market debt benefited relative performance, as these securities posted positive returns.

Inflation Strategy Fund seeks to preserve the real value of capital through prudent investment management. The Fund will be managed actively and will predominantly invest in a diversified portfolio of inflation-related assets. The Fund seeks to achieve its objective by investing in a combination of global inflation-related Fixed Income Instruments (as defined in the Prospectus), emerging market bonds and currencies, equities and equity-related securities, and commodity and property-related instruments. Exposure to such assets may be achieved through direct investment or through the use of financial derivative instruments as detailed in the Prospectus. The Fund will pursue a multi-asset-oriented investment strategy in accordance with its investment policies. The objective of the strategy is to achieve real capital preservation over time by allocating to a range of inflation-related asset classes. As part of its investment strategy, the Investment Advisors will use a global secular forecast of interest and inflation rates across economies and an integrated investment process as set out in the Prospectus.

Investment Objective and Strategy Overview

PIMCO MLP & Energy Infrastructure Fund seeks to maximise total return, consistent with prudent investment management. The "total return' sought by the Fund consists of income and capital appreciation. The Fund seeks to achieve its investment objective by investing under normal circumstances at least two-thirds of its net assets either directly or indirectly in a portfolio of equity investments which are linked to (i) publicly traded partnerships, which are also known as master limited partnerships ("MLPs"), (ii) the general partners that own or manage MLPs, (iii) spin-offs (companies which separate from the MLPs or general partner after divestitures or restructuring) from MLPs, (iv) companies that are similar to MLPs by virtue of operating in the same industry or competing with MLPs, (v) other entities that may not be structured as a publicly traded partnership but operate in the mid-stream energy sector (the transportation component of the energy infrastructure sector such as pipeline, rail and oil tankers) and (vi) special purpose entities (i.e., entities established for a specific purpose which may be used as an investment vehicle to gain access to investments outlined in the Prospectus). The Fund may invest in these instruments either in the secondary market or during an initial public offering.

Fund Insights

- » Exposure to MLP and energy infrastructurerelated equities detracted from absolute returns, as MLPs, as measured by the Alerian MLP Index, posted negative returns.
- » Overweight exposure to the pipeline transportation of natural gas industry contributed to relative returns, as the industry outperformed the benchmark index.
- » Holdings of cash-equivalent securities contributed to absolute returns, as the securities generated positive returns.
- » Holdings of Energy sector corporate bonds contributed to absolute returns, as the sector generated positive returns.
- » Exposure to the pipeline transportation of crude industry detracted from absolute returns, as the industry generated negative returns.

Mortgage Opportunities Fund seeks to maximise long-term return, consistent with prudent investment management, by investing under normal circumstances at least 80% of its net assets in a diversified portfolio of mortgagerelated Fixed Income Instruments (as defined in the Prospectus), including but not limited to agency and non-agency residential and commercial mortgage-backed securities and credit risk transfer securities.

The Fund commenced operations on 25 January 2017.

Fund Insights

- » Exposure to non-agency residential mortgage-backed securities (RMBS) benefited performance, as the asset class outperformed like-duration Treasuries.
- » Exposure to non-agency commercial mortgage-backed securities (CMBS) benefited performance, as the asset class outperformed like-duration Treasuries.
- » Exposure to agency mortgage-backed securities (MBS) spread benefited performance, as agency MBS spreads tightened during the reporting period.
- » Exposure to collateralised loan obligations (CLOs) benefited performance, as the asset class outperformed the benchmark.
- » Exposure to the front-end portion of the US yield curve detracted from performance, as short-term rates increased during the period.

Investment Objective and Strategy Overview

Socially Responsible Emerging Markets Bond Fund seeks to maximise total return, consistent with the preservation of capital and prudent investment management, by investing at least 80% of its assets in an actively-managed diversified portfolio of Fixed Income Instruments (as defined in the Prospectus) of issuers that are economically tied to countries with emerging securities markets. Exposure to such issuers may be achieved through direct investment in Fixed Income Securities (as defined in the Prospectus) or through the use of financial derivative instruments (as further set out in the Prospectus). All securities will be selected by the Investment Advisors according to an ethical screening process provided by the Socially Responsible Advisor (as defined in the Prospectus) on a periodic basis.

StocksPLUS[™] Fund seeks to achieve a return which exceeds the total return performance of the Standard & Poor's 500 Composite Stock Price Index ("S&P 500") by employing a proprietary portfolio management strategy, which combines an actively managed portfolio of Fixed Income Securities (as defined in the Prospectus) with an exposure to the S&P 500. The Fund may invest without limit in equity securities and securities that are convertible into equity securities.

Fund Insights

- » The Fund's exposure to equity index derivatives linked to the S&P 500 contributed to absolute returns over the 12 months ended 31 December 2017, as the S&P 500 returned 21.8%.
- » The portfolio's bond alpha strategy added to returns. Highlights about the drivers of performance include the following:
- » US duration exposure detracted from performance driven by long exposure to the front end of the curve where yields increased.
- » Holdings of securitised bonds enhanced performance, as these holdings generated positive returns.
- » Holdings of investment grade corporate bonds added to returns, as the sector generated positive returns.

Investment Objective and Strategy Overview

Strategic Income Fund seeks to provide an attractive level of current income, consistent with prudent investment management, while also seeking to provide long-term capital appreciation as a secondary objective. The Fund will utilise a global multi-sector strategy that seeks to combine the Investment Advisors' total return investment process and philosophy with income maximisation. Portfolio construction is founded on the principle of diversification across a broad range of global fixed income and equity securities.

Fund Insights

- » Positions in non-agency mortgage-backed securities (MBS) contributed to performance, as total returns in these securities were positive.
- » Tactical exposure to US interest rates contributed to performance, as yields fluctuated and the cash rate increased.
- » Exposure to high yield corporate spread duration contributed to performance, as the sector generally posted positive excess returns.
- » A long US Dollar versus the Australian Dollar detracted, as the Australian Dollar appreciated.
- » Selection in Industrials contributed to relative returns, as the Fund's holdings outperformed the benchmark index.
- » Underweight and selection in Information Technology detracted from relative returns, as the Fund's holdings and the sector underperformed the benchmark index.
- » Overweight in Energy detracted from relative returns, as the sector underperformed the benchmark index

PIMCO TRENDS Managed Futures Strategy Fund seeks positive, risk-adjusted returns, consistent with prudent investment management by investing under normal circumstances in derivatives on interest rates, currencies, mortgage-related securities (as outlined in the Fund's Prospectus), credit, equity indices, volatility-related instruments (including, but not limited to, futures on volatility-related indices) and commodity-related instruments (as outlined in the Fund's Prospectus).

Fund Insights

- » Long positions in global equity indices, which rallied during the reporting period, contributed to performance.
- » Short positions in US equity implied volatility contributed to performance, as implied volatility declined to record lows.
- » Long positions in the Brazilian Real, Hungarian Forint (with brief position reversal in September and October), Mexican Peso, and Polish Zloty contributed to performance.
- » The Fund held long positions in Australian, US (March to November), and UK duration, which detracted from performance driven by sharp reversals in these regions during the second half of 2017.
- » Positioning within the British Pound, the Japanese Yen, the New Zealand Dollar, and the Swedish Krona detracted from performance due to sharp price reversals.
- » The collateral portfolio contributed to returns, driven by gains from short-term corporate bonds.

Unconstrained Bond Fund seeks maximum longterm return, consistent with preservation of capital and prudent investment management. The Fund seeks to achieve its investment objective by investing at least two-thirds of its assets in a diversified portfolio of Fixed Income Instruments (as defined in the Prospectus) of varying maturities. The Fund will not be constrained by fixed income market indexrelated investment restrictions or tracking error targets. The average portfolio duration of this Fund will normally vary from negative 3 years to positive 8 years based on the Investment Advisors' forecast for interest rates.

Fund Insights

- » US interest rate strategies contributed to performance, primarily due to carry from overall long-duration exposure, as well as curve positioning around the two-year maturity, given predominantly short exposure, where yields rose.
- » Exposure to non-agency mortgage-backed securities (MBS) contributed to performance, as total returns on these securities were positive, as evidenced by the BAML Fixed Rate Home Equity Index, which generally tracks the price performance of nonagency mortgages.
- » Long exposure to investment grade corporate credit contributed to performance as total returns on these securities were positive, as evidenced by the Bloomberg Barclays global aggregate corporate index.
- » Exposure to subordinated debt issued by Banco Popular detracted from performance, as subordinated debt was written off following the resolution of the bank.
- » Short exposure to the Singapore Dollar, Korean Won and Taiwanese Dollar detracted from performance, as the currencies appreciated versus the US Dollar.
- » Long exposure to the Russian Ruble contributed to performance, as the currency appreciated versus the US Dollar.

Index Description

The JPMorgan Corporate Emerging Markets Bond Index Diversified (CEMBI) is a uniquely weighted version of the CEMBI index. It limits the weights of those index countries with larger corporate debt stocks by only including a specified portion of these countries' eligible current face amounts of debt outstanding. The CEMBI Diversified results in well-distributed, more balanced weightings for countries included in the index. The countries covered in the CEMBI Diversified are identical to those covered by the CEMBI.

JPMorgan Emerging Local Markets Index Plus (Unhedged) tracks total returns for local-currency-denominated money market instruments in 22 emerging markets countries with at least US\$10 billion of external trade.

JPMorgan Emerging Markets Bond Index (EMBI) Global tracks total returns for United States Dollardenominated debt instruments issued by emerging market sovereign and quasi-sovereign entities: Brady bonds, loans, and Eurobonds.

JPMorgan Emerging Markets Bond Index (EMBI) Global adjusted for Socially Responsible Investment (SRI) filter tracks total returns for US Dollar-denominated debt instruments issued by emerging market sovereign and quasisovereign entities: Brady bonds, loans, Eurobonds and local market instruments — excluding issuers not permitted by SRI Advisor.

JPMorgan Government Bond Index-Emerging Markets Global Diversified Index (Unhedged) is a comprehensive global local emerging markets index, and consists of regularly traded, liquid fixed-rate, domestic currency government bonds to which international investors can gain exposure.

The MSCI Emerging Markets Index (Net Dividends in USD) Index is a free float-adjusted market capitalisation index that is designed to measure equity market performance of emerging markets. It is not possible to invest directly in the index.

The MSCI Europe Index is a free float-adjusted market capitalisation weighted index that is designed to measure the equity market performance of the developed markets in Europe. Since June 2007, the MSCI Europe Index consisted of 16 developed market country indices. The index represents the unhedged performance of the constituent stocks in Euros.

The MSCI World Index is a free float-adjusted market capitalisation weighted index that is designed to measure the equity market performance of developed markets. The MSCI World Index consists of 23 developed market country indices.

OECD CPI +3% (3 Month Lag) benchmark is created by adding 3% to the annual percentage change in the Consumer Price Index ("CPI") for 34 OECD member countries. The OECD Consumer Price Index is an unmanaged index representing an aggregate rate of inflation of consumer prices across 34 international countries as determined by the Organisation for Economic Co-operation and Development. There can be no guarantee that the OECD CPI or other indexes will reflect the exact level of inflation at any given time.

The PIMCO Global Advantage Bond Index (GLADI) (London Close) is a diversified global index that covers a wide spectrum of global fixed income opportunities and sectors, from developed to emerging markets, nominal to real asset, and cash to derivative instruments. Unlike traditional indices, which are frequently comprised of bonds weighted according to their market capitalisation, GLADI uses GDP-weighting which puts an emphasis on faster-growing areas of the world and thus makes the index forward-looking in nature. PIMCO's GLADI methodology is intellectual property covered by US Patent No. 8,306,892. GLOBAL ADVANTAGE and GLADI are trademarks of Pacific Investment Management Company LLC.

PIMCO Global Advantage Inflation-Linked Bond Index (USD Unhedged). The PIMCO GLADI ILB represents the global bond market for inflation-linked government debt encompassing both developed and emerging markets. The index adheres to the principals of the PIMCO Global Advantage Indices when applicable to the global inflation-linked bond market.

S&P 500 Index is an unmanaged market index generally considered representative of the stock market as a whole. The Index focuses on the large-cap segment of the US equities market.

⁽a) The PIMCO Credit Absolute Return Fund is investing in shares of an affiliated fund.

Significant portfolio changes are defined as the value of purchases exceeding 1% of total cost of purchases, and sales exceeding 1% of total proceeds. At a minimum the twenty largest purchases and twenty largest sales must be shown. Should there have been less than that amount of transactions, all such transactions have been disclosed.

Overnight investments and Repurchase Agreements of uninvested Fund cash which usually mature the next business day have been excluded from the Significant Changes in Portfolio Composition.

(a) The Diversified Income Fund is investing in shares of an affiliated fund.

Significant portfolio changes are defined as the value of purchases exceeding 1% of total cost of purchases, and sales exceeding 1% of total proceeds. At a minimum the twenty largest purchases and twenty largest sales must be shown. Should there have been less than that amount of transactions, all such transactions have been disclosed.

Overnight investments and Repurchase Agreements of uninvested Fund cash which usually mature the next business day have been excluded from the Significant Changes in Portfolio Composition.

⁽¹⁾ If the Fund is a seller of protection and a credit event occurs, as defined under the terms of that particular swap agreement, the Fund will either (i) pay to the buyer of protection an amount equal to the notional amount of the swap and take delivery of the referenced obligation or underlying securities comprising the referenced index or (ii) pay a net settlement amount in the form of cash, securities or other deliverable obligations equal to the notional amount of the swap less the recovery value of the referenced obligation or underlying securities comprising the referenced index.

⁽²⁾ The maximum potential amount the Fund could be required to pay as a seller of credit protection or receive as a buyer of credit protection if a credit event occurs as defined under the terms of that particular swap agreement.

⁽¹⁾ If the Fund is a seller of protection and a credit event occurs, as defined under the terms of that particular swap agreement, the Fund will either (i) pay to the buyer of protection an amount equal to the notional amount of the swap and take delivery of the referenced obligation or underlying securities comprising the referenced index or (ii) pay a net settlement amount in the form of cash, securities or other deliverable obligations equal to the notional amount of the swap less the recovery value of the referenced obligation or underlying securities comprising the referenced index.

⁽²⁾ The maximum potential amount the Fund could be required to pay as a seller of credit protection or receive as a buyer of credit protection if a credit event occurs as defined under the terms of that particular swap agreement.

(a) The Emerging Markets Short-Term Local Currency Fund is investing in shares of an affiliated fund.

Significant portfolio changes are defined as the value of purchases exceeding 1% of total cost of purchases, and sales exceeding 1% of total proceeds. At a minimum the twenty largest purchases and twenty largest sales must be shown. Should there have been less than that amount of transactions, all such transactions have been disclosed.

Overnight investments and Repurchase Agreements of uninvested Fund cash which usually mature the next business day have been excluded from the Significant Changes in Portfolio Composition.

- (a) The Composition Euro Bond Fund is investing in shares of an affiliated fund.
- (b) Principal amount of security is adjusted for inflation.

Significant portfolio changes are defined as the value of purchases exceeding 1% of total cost of purchases, and sales exceeding 1% of total proceeds. At a minimum the twenty largest purchases and twenty largest sales must be shown. Should there have been less than that amount of transactions, all such transactions have been disclosed.

Overnight investments and Repurchase Agreements of uninvested Fund cash which usually mature the next business day have been excluded from the Significant Changes in Portfolio Composition.

(a) The Euro Long Average Duration Fund is investing in shares of an affiliated fund.

Significant portfolio changes are defined as the value of purchases exceeding 1% of total cost of purchases, and sales exceeding 1% of total proceeds. At a minimum the twenty largest purchases and twenty largest sales must be shown. Should there have been less than that amount of transactions, all such transactions have been disclosed.

Overnight investments and Repurchase Agreements of uninvested Fund cash which usually mature the next business day have been excluded from the Significant Changes in Portfolio Composition.

(a) The Euro Low Duration Fund is investing in shares of an affiliated fund.

Significant portfolio changes are defined as the value of purchases exceeding 1% of total cost of purchases, and sales exceeding 1% of total proceeds. At a minimum the twenty largest purchases and twenty largest sales must be shown. Should there have been less than that amount of transactions, all such transactions have been disclosed.

Overnight investments and Repurchase Agreements of uninvested Fund cash which usually mature the next business day have been excluded from the Significant Changes in Portfolio Composition.

- (a) The Global Advantage Fund is investing in shares of an affiliated fund.
- (b) Principal amount of security is adjusted for inflation.

Significant portfolio changes are defined as the value of purchases exceeding 1% of total cost of purchases, and sales exceeding 1% of total proceeds. At a minimum the twenty largest purchases and twenty largest sales must be shown. Should there have been less than that amount of transactions, all such transactions have been disclosed.

Overnight investments and Repurchase Agreements of uninvested Fund cash which usually mature the next business day have been excluded from the Significant Changes in Portfolio Composition.

- (1) If the Fund is a seller of protection and a credit event occurs, as defined under the terms of that particular swap agreement, the Fund will either (i) pay to the buyer of protection an amount equal to the notional amount of the swap and take delivery of the referenced obligation or underlying securities comprising the referenced index or (ii) pay a net settlement amount in the form of cash, securities or other deliverable obligations equal to the notional amount of the swap less the recovery value of the referenced obligation or underlying securities comprising the referenced index.
- (2) If the Fund is a buyer of protection and a credit event occurs, as defined under the terms of that particular swap agreement, the Fund will either (i) receive from the seller of protection an amount equal to the notional amount of the swap and deliver the referenced obligation or underlying securities comprising the referenced index or (ii) receive a net settlement amount in the form of cash, securities or other deliverable obligations equal to the notional amount of the swap less the recovery value of the referenced obligation or underlying securities comprising the referenced index.
- (3) The maximum potential amount the Fund could be required to pay as a seller of credit protection or receive as a buyer of credit protection if a credit event occurs as defined under the terms of that particular swap agreement.
- (4) This instrument has a forward starting effective date. See Note 2, Securities Transactions and Investment Income, in the Notes to Financial Statements for further information.

⁽a) The Global Advantage Real Return Fund is investing in shares of an affiliated fund.

Significant portfolio changes are defined as the value of purchases exceeding 1% of total cost of purchases, and sales exceeding 1% of total proceeds. At a minimum the twenty largest purchases and twenty largest sales must be shown. Should there have been less than that amount of transactions, all such transactions have been disclosed.

Overnight investments and Repurchase Agreements of uninvested Fund cash which usually mature the next business day have been excluded from the Significant Changes in Portfolio Composition.

⁽b) Principal amount of security is adjusted for inflation.

- (a) The Global Bond ESG is investing in shares of an affiliated fund.
- (b) Principal amount of security is adjusted for inflation.

Significant portfolio changes are defined as the value of purchases exceeding 1% of total cost of purchases, and sales exceeding 1% of total proceeds. At a minimum the twenty largest purchases and twenty largest sales must be shown. Should there have been less than that amount of transactions, all such transactions have been disclosed.

Overnight investments and Repurchase Agreements of uninvested Fund cash which usually mature the next business day have been excluded from the Significant Changes in Portfolio Composition.

- (1) If the Fund is a buyer of protection and a credit event occurs, as defined under the terms of that particular swap agreement, the Fund will either (i) receive from the seller of protection an amount equal to the notional amount of the swap and deliver the referenced obligation or underlying securities comprising the referenced index or (ii) receive a net settlement amount in the form of cash, securities or other deliverable obligations equal to the notional amount of the swap less the recovery value of the referenced obligation or underlying securities comprising the referenced index.
- (2) If the Fund is a seller of protection and a credit event occurs, as defined under the terms of that particular swap agreement, the Fund will either (i) pay to the buyer of protection an amount equal to the notional amount of the swap and take delivery of the referenced obligation or underlying securities comprising the referenced index or (ii) pay a net settlement amount in the form of cash, securities or other deliverable obligations equal to the notional amount of the swap less the recovery value of the referenced obligation or underlying securities comprising the referenced index.
- (3) The maximum potential amount the Fund could be required to pay as a seller of credit protection or receive as a buyer of credit protection if a credit event occurs as defined under the terms of that particular swap agreement.
- (4) This instrument has a forward starting effective date. See Note 2, Securities Transactions and Investment Income, in the Notes to Financial Statements for further information.

(a) The Global High Yield Bond Fund is investing in shares of an affiliated fund.

Significant portfolio changes are defined as the value of purchases exceeding 1% of total cost of purchases, and sales exceeding 1% of total proceeds. At a minimum the twenty largest purchases and twenty largest sales must be shown. Should there have been less than that amount of transactions, all such transactions have been disclosed.

Overnight investments and Repurchase Agreements of uninvested Fund cash which usually mature the next business day have been excluded from the Significant Changes in Portfolio Composition.

- (1) If the Fund is a buyer of protection and a credit event occurs, as defined under the terms of that particular swap agreement, the Fund will either (i) receive from the seller of protection an amount equal to the notional amount of the swap and deliver the referenced obligation or underlying securities comprising the referenced index or (ii) receive a net settlement amount in the form of cash, securities or other deliverable obligations equal to the notional amount of the swap less the recovery value of the referenced obligation or underlying securities comprising the referenced index.
- (2) If the Fund is a seller of protection and a credit event occurs, as defined under the terms of that particular swap agreement, the Fund will either (i) pay to the buyer of protection an amount equal to the notional amount of the swap and take delivery of the referenced obligation or underlying securities comprising the referenced index or (ii) pay a net settlement amount in the form of cash, securities or other deliverable obligations equal to the notional amount of the swap less the recovery value of the referenced obligation or underlying securities comprising the referenced index.
- (3) The maximum potential amount the Fund could be required to pay as a seller of credit protection or receive as a buyer of credit protection if a credit event occurs as defined under the terms of that particular swap agreement.
- (4) This instrument has a forward starting effective date. See Note 2, Securities Transactions and Investment Income, in the Notes to Financial Statements for further information.

- (1) If the Fund is a buyer of protection and a credit event occurs, as defined under the terms of that particular swap agreement, the Fund will either (i) receive from the seller of protection an amount equal to the notional amount of the swap and deliver the referenced obligation or underlying securities comprising the referenced index or (ii) receive a net settlement amount in the form of cash, securities or other deliverable obligations equal to the notional amount of the swap less the recovery value of the referenced obligation or underlying securities comprising the referenced index.
- (2) If the Fund is a seller of protection and a credit event occurs, as defined under the terms of that particular swap agreement, the Fund will either (i) pay to the buyer of protection an amount equal to the notional amount of the swap and take delivery of the referenced obligation or underlying securities comprising the referenced index or (ii) pay a net settlement amount in the form of cash, securities or other deliverable obligations equal to the notional amount of the swap less the recovery value of the referenced obligation or underlying securities comprising the referenced index.
- (3) The maximum potential amount the Fund could be required to pay as a seller of credit protection or receive as a buyer of credit protection if a credit event occurs as defined under the terms of that particular swap agreement.

⁽a) The Global Low Duration Real Return Fund is investing in shares of an affiliated fund.

Significant portfolio changes are defined as the value of purchases exceeding 1% of total cost of purchases, and sales exceeding 1% of total proceeds. At a minimum the twenty largest purchases and twenty largest sales must be shown. Should there have been less than that amount of transactions, all such transactions have been disclosed.

Overnight investments and Repurchase Agreements of uninvested Fund cash which usually mature the next business day have been excluded from the Significant Changes in Portfolio Composition.

⁽b) Principal amount of security is adjusted for inflation.

- (a) The Global Multi-Asset Fund is investing in shares of an affiliated fund.
- (b) Principal amount of security is adjusted for inflation.

Significant portfolio changes are defined as the value of purchases exceeding 1% of total cost of purchases, and sales exceeding 1% of total proceeds. At a minimum the twenty largest purchases and twenty largest sales must be shown. Should there have been less than that amount of transactions, all such transactions have been disclosed.

Overnight investments and Repurchase Agreements of uninvested Fund cash which usually mature the next business day have been excluded from the Significant Changes in Portfolio Composition.
