

Description

The fund is an absolute return fund without a reference benchmark, with the objective of a return greater than the Eonia plus 3 % on an annual basis, without use of leverage. The applied strategy is the Global Macro one, which combines macroeconomic scenarios with tactical management techniques. The Management Team is specialized in the "top down" approach and consistently it applies its own interpretation of the economy to the financial markets seeking the fundamentals changes with a "global macro" style typical of the hedge funds. In order to reach the performance objective the Management Team searches investment opportunities in equity, bond and currency markets by assuming strategic, tactical and arbitrage positions, avoiding frequent trading operation and putting emphasis on market trends. Special attention is dedicated to decorrelate the portfolio from the equity markets. In the Global Macro strategy quantitative and qualitative approach complement each other, in a search of controlled volatility.
