SABADELL FUNDS SICAV - STERLING ACTIVE FUND PORTFOLIO 25 (LU1224621612)

a sub-fund of Sabadell Funds SICAV

Management Company: Sabadell Asset Management Luxembourg, S.A.

Objectives and investment policy

The sub-fund offers an investment solution through an active asset allocation of the portfolio by investing, mainly through UCIs within the meaning of the Directive 2009/65/EC, at least ½ of its net assets in a diversified fixed income portfolio and up to ½ of its net assets in equity securities. Fixed income securities will include bonds, other debt instruments and bank deposits. The investment in fixed income will seek capital growth over the long run. Equity securities will be issued by corporations located, listed or carrying out their business in Europe. To a lesser extent, these equity securities will be issued by corporations located, listed or carrying out their business in other developed countries.

The sub-fund is actively managed without reference to a benchmark.

The sub-fund is denominated in GBP.

Investors of the sub-fund have the right to redeem their shares. Redemption of shares takes place each business day in Luxembourg (Valuation Day). Redemption requests must be received by European Fund Administration no later than 17.00 (Luxembourg time) on the third business day in Luxembourg previous to the Valuation Day. The attention of investors

is drawn to the fact that, in exceptional circumstances, the possibility for investors to seek reimbursement may be limited or suspended.

In principle, income from shares in this sub-fund is re-invested (capitalised).

Recommendation

The sub-fund is suitable for investors who wish to invest in a concentrated portfolio of UCITS funds and other UCIs which provides exposure to a broadly diversified fixed income portfolio containing a significant portion of equity securities and to bear the corresponding investment risks in exchange of more attractive expected returns than those generated by GBP money market as well as to benefit from the strong growth potential of European corporations. In addition, the sub-Fund is targeted to investors with a basic knowledge and/or experience in this kind of investments and a medium risk tolerance, who can bear losses up to the amount invested, and are willing to hold their investment for a period over 5 years pursuing a capital growth investment objective.

Risk and reward profile

What does this synthetic indicator mean?

- The sub-fund SABADELL FUNDS SICAV - STERLING ACTIVE FUND PORTFOLIO 25 is classified in category 4 because the value of the share may be subject to moderate variations and consequently the risk of loss and the potential gain may be moderate.
- The risk category has been determined on the basis of historical and simulated data and may not be a reliable indication of the future risk profile. The risk and reward category shown does not necessarily remain unchanged and the categorisation of the sub-fund may shift over time.
- The lowest category does not mean a risk-free investment.
- Repayment of the initial investment is not guaranteed.

Which risks are not included in this synthetic indicator?

- **Market risk:** general risk associated to the volatility and to the fluctuations in the price of any type of asset. The price of securities specifically depends on the performance of financial markets, as well as on the economic evolution of the issuers, who, in turn, are affected by the global economy and by specific political and economic cir-

cumstances of its territory. In particular, investments are subject to the following risks: market risk for investment in equity, interest rate risk and currency risk.

- **Credit risk:** risk that the issuer of a fixed income security fails to reimburse principal and interests on time.
- **Liquidity risk:** risk of investing in securities with small capitalization and/or in markets of reduced size and low contracting volume, which can negatively affect the conditions under which the sub-fund can buy, sell or modify its positions.
- **Counterparty risk:** risk that the counterparty of a trade fails to comply with his obligations.
- **Operational risk:** risk of incorrect functioning of the organization in which the sub-fund operates.
- **Risk linked to the use of derivatives:** additional risks with respect to the spot market, as a result of leverage, which can multiply the effects of losses of value of the portfolios, and for those derivatives that are not negotiated in regulated markets, risks like the one consisting in a counterparty failing to comply, for not existing a centralized exchange that assures the correct functioning of the operations.

How can I get more information about the risks of the sub-fund?
