

Key investor information

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

Most Diversified Portfolio SICAV - TOBAM Anti-Benchmark Emerging Markets Equity Fund, a compartment of Most Diversified Portfolio SICAV

Class: A3, (Accumulation) LU1185970016

This SICAV is managed by TOBAM (hereafter the « Management Company »)

Objectives and investment policy

The Fund's primary investment objective is to be exposed to global emerging market equities, by systematically applying the investment process developed by the Management Company.

Equity selection is based on the quantitative and systematic models, which aim to optimize the level of diversification achieved relative to the benchmark indicator. These models determine the optimal model portfolio, including both the list of eligible stocks and their portfolio weightings.

Net asset appreciations may be compared to the MSCI Daily TR Net Emerging Markets Index (dividends reinvested). Under normal market conditions, at least 90% of the Fund's assets are exposed to emerging equity markets, including the small, mid and large-cap emerging markets. The Fund reserves the option to invest up to 100% of its assets in mono-underlying Contracts for Differences (CFDs), if justified by market conditions. CFDs are futures contracts entered into with a counterparty and settled through cash payments rather than through physical delivery of financial instruments.

For the purpose of diversification, the Fund may invest up to 20% of its net assets in Real Estate Investment Trusts (REIT). In order to be continually exposed as closely as possible to the result of the model, the Fund may build or add to its exposure through American Depository Receipts (ADRs) and Global Depository Receipts (GDRs), for up to 100% of its net assets, and/or through other OTC contracts in order to enhance risk control and minimize transaction costs.

The Fund may also use different markets or assets, including derivative instruments to hedge and/or expose the portfolio to equity risk and/or hedge currency risk.

The recommended minimum investment horizon is more than five years. The minimum initial subscription per shareholder stands at one thousand and five hundred shares. The Fund capitalizes its income. Investors may request redemptions of shares held daily, in line with the procedure described in the Fund's prospectus.

Risk and reward profile

With lower risk, With higher risk,

 potentially lower rewards potentially higher rewards

This indicator represents the annual historical volatility of the Fund over a 5-year period.

The risk indicator of level 6 reflects the volatility of the stock markets in which the Fund invests with respect to its investment strategy.

Historical data such as that used to calculate the synthetic indicator cannot be considered as a reliable indication of the Fund's future risk profile.

The risk category associated with the Fund is not guaranteed and may change over time.

The lowest risk category does not mean "risk free".

Your initial investment is not guaranteed.

Significant risk(s) for the Fund not taken into account in this indicator include the following:

Risk associated with emerging market equities: The equities of emerging countries may be less liquid than equities of developed countries. Consequently, holding these securities may increase the level of portfolio risk. For example, market declines may be greater and faster than in developed countries, so the Fund's net asset value may decline more sharply and quickly.

Risks associated with discretionary management: The Management Company has implemented the investment strategies described above to create a well-diversified Fund. It can therefore not be excluded that the Management Company does not choose the most profitable assets.

Foreign exchange risk: It represents the risk of a decrease in the exchange rate of investments as compared with the reference currency of the Fund which could lead to a noticeable fall in the net asset value.

Counterparty risk: The Fund may incur a loss in the event of the default of a counterparty with which certain transactions were conducted, leading to a decline in the Fund's net asset value.

Charges

The charges and commissions are used to cover the Fund's operating costs, including marketing and distribution of shares. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry charge	0.50%
Exit charge	1.00%
The percentage shown is the maximum amount that can be paid out of your investment. Your financial advisor or distributor can inform you of the associated entry and exit charges.	
Charges taken from the Fund over a year	
Ongoing charges	0.97%
Charges taken from the Fund under specific conditions	
Performance fee:	None

The entry and exit charges shown are maximum rates. In certain cases, the charges paid may be lower.

The indicated ongoing charges are an estimate based on the expected total amount of charges. This percentage may vary from year to year. It excludes outperformance charges and intermediation charges, with the exception of entry and exit charges paid by the Fund when it buys or sells shares of another Fund.

For more information about Fund charges, please refer to the relevant sections of the prospectus, which is available at www.tobam.fr.

Past performance

Share class with periods of inactivity.
