A Sub-Fund of TREA SICAV Class A LU1028505649

Sub-Fund managed by: Degroof Gestion Institutionnelle - Luxembourg

Objectives and Investment Policy

Objective To increase the value of your investment over the long term.

Portfolio Securities Under normal conditions, the Sub-Fund mainly invests in shares and related securities issued by European companies of any size.

The Sub-Fund may use derivatives to reduce its exposure to various investment risks (hedging), for efficient portfolio management, and to directly seek investment gains.

Investment Process The investment manager uses economic data to narrow the possible list of sectors, then uses research into individual issuers to determine which companies' securities to invest in (top-down strategy).

Designed For Investors who want to invest in European equity markets, understand the fund's risks and have an investment horizon of at least 5 years.

Sub-Fund Reference Currency EUR

Orders to buy and sell shares will be processed each week on Wednesday or, in case of holidays, on the next day that is a Luxembourg banking day. Orders received before noon Luxembourg time three Luxembourg banking days before a processing day will be processed at the share price in effect on that processing day.

The Sub-Fund issues accumulation shares (shares in which any income earned is added to the share price) as well as income shares (shares that pay out net income to you).

Terms to understand

Shares Securities that represent a share in the business results of a company.

Derivatives Financial instruments whose value is linked to one or more rates, indexes, share prices or other values.

Risk and Reward Profile

Lower potential risk/reward
Not risk-free.

Higher potential risk/reward

The value of an investment in the Sub-Fund can go up and down. When you sell your shares, they may be worth less than what you paid for them. If your currency as an investor is different from the subscription currency of the Sub-Fund, changes in currency exchange rates could reduce any investment gains or increase any investment losses.

The risk/reward rating above is based on medium-term volatility (actual or estimated variations in the Sub-Fund's share price over five years). Going forward, the Sub-Fund's actual volatility could be lower or higher, and its rated risk/reward level may be changed.

The Sub-Fund's risk level reflects the following:

- The Sub-Fund invests mainly in shares, which generally are more volatile than bonds or money market instruments

The rating does not reflect the possible effects of unusual market conditions or large unpredictable events, which could amplify everyday risks and could trigger other risks, such as:

Counterparty risk The Sub-Fund could lose money if an entity with which it does business becomes unwilling or unable to honor its commitments to the Sub-Fund.

Derivatives risk Certain derivatives could increase Sub-Fund volatility or expose the Sub-Fund to losses greater than the cost of the derivative.

Liquidity risk Certain securities could become hard to sell at a desired time and price.

Management risk Portfolio management techniques that have worked well in normal market conditions could prove ineffective or detrimental during unusual conditions.

The charges you pay as an investor in the Sub-Fund go to cover Sub-Fund operating costs, including marketing and distribution costs. These charges reduce the performance of your investment.
