## Management Report

At the start of the reporting period, the third quarter of 2022, a noticeable deterioration of the economic situation in the United States took place, which was even more striking in Europe. Inflation at record highs reduced household purchasing power and led central banks to raise key rates. Europe was also suffering from a dramatic rise in gas prices as a result of the war between Russia and Ukraine. In China, the upturn that followed the relaxation of anti-Covid restrictions was short-lived and new issues emerged in the Property sector.

In quarter four of 2022, the global economy remained under pressure from very high inflation and tighter monetary policies, while some major regions were also hit hard by the negative effects of specific developments (pressures on natural gas supplies in Europe and Covid restrictions in China). Hence, most economic figures published during quarter four were slightly worse than expected.

In quarter one of 2023, the global economy slowed, but with strong regional divergences. In the United States and notably, in the Eurozone, the downturn was more moderate than expected. However, in March, tensions in the markets led to more uncertainty. China remained on an upward trajectory in the wake of its post-Covid reopening, helping to limit the deceleration of other emerging economies. While falling, inflation remained very high in most countries, with central banks continuing to raise key interest rates. Interest rate markets experienced high volatility, while equity markets posted positive performances, thanks in particular to a good January.

In quarter two of 2023, a large proportion of the global economy continued to experience stagflation (low growth and very high inflation). While any decline in inflation barely spread to underlying indices (excluding Energy and Food). Central banks continued to raise their key rates, but at a slower pace than in previous quarters. With regard to financial markets, equities rose while bonds were volatile, albeit to varying degrees, depending on regions and maturities.

## United States

In quarter three of 2022, the US economic recovery slowed down, as real household income fell (due to very high inflation) and interest rates rose. The main business indicators, such as the ISM, showed continued business growth, but at a much slower pace. Despite a slight rebound, household confidence indicators remained very poor. The figures for Real Estate, a sector very sensitive to interest rates, were particularly grave. On the other hand, US job creation remained strong, the unemployment rate low and the labour market witnessed the return of many workers who had given up looking for work during the pandemic. Inflation decreased slightly in July and August compared to June, but remained at a very high level (core inflation actually sped up again in August). The US Federal Reserve (Fed) continued its monetary tightening (two 0.75% increases in Fed Fund rates in July and September 2022) and was intent on prioritising the fight against inflation, despite the risk of negative consequences to the labour market.

US economic activity was still relatively strong in quarter four of 2022, despite experiencing a downturn. Sectors highly exposed to rising interest rates showed clear signs of erosion, starting with Real Estate. Manufacturing activity also weakened, with the ISM manufacturing index pointing to a contraction, in part due to the US dollar's high value. However, the ISM services index pointed to very strong economic activity. The labour market also remained buoyant, with strong job creation, despite the downward trends. Unemployment rates remained very low, which continued to fuel wage increases. Although inflation was still very high, it did nevertheless fall to 7.1% in November, with core inflation standing at 6.0%. The Fed continued to focus on combating inflation and raised the Fed Funds rate by 75 basis points in November and by 50 basis points in December (taking their target range to 4.25%-4.5%). Lastly, in politics, the midterm elections left the House of Representatives under Republican control, with Democrats retaining control of the Senate.

At the start of 2023 US economic surveys were mixed: the ISM manufacturing index settled in negative territory but, after a brief dip at the turn of the year, the ISM Services index recovered well, then fell close to neutral in March 2023. The US labour market remained very strong: job creation surprised on the upside in January 2023 and, to a lesser extent, in February. The US unemployment rate hit a historic low in January at 3.4%, it then rose to 3.6% in February, mainly due to people re-joining the labour force. US inflation continued to decline, albeit at a very moderate pace: the general index rose by 6.0%, over 12 months in February (6.4% in January), while the underlying index stood at 5.5% (after reaching 5.6%). At the end of the first quarter, recessionary fears proliferated following the bankruptcies of SVB and two smaller banks, which raised concerns about the financial stability and lending conditions of the real economy. Faced with the triple challenge of high inflation, declining growth and rising financial tensions, the Fed continued its monetary tightening, albeit at a slower pace. It raised the Fed Funds rate by 25 basis points in February and then again in March to widen the range to 4.75/5.00%.

Faced with the Fed's rapid rise in interest rates, the US economy slowed in quarter two of 2023, but more gradually than expected at the end of quarter one. In particular, the consequences of the bankruptcy of several regional banks in March remained limited, and fears of a financial crisis eased. Economic indicators weakened (more in industry than in services), but did not signal an imminent recession. Although the unemployment rate rose in May (3.7%, the highest rate seen since October 2022), the labour market nonetheless continued to create more jobs than expected. As for inflation, the general index continued to slow (4.0% over 12 months in May after reaching 5.0% in March and a peak of 9.1% in June 2022), especially under the effect of energy prices, but this trend was less marked on underlying inflation (5.3% in May after reaching 5.6% in March and a peak of 6.6% in September 2022). After raising Fed Funds rates by 25 basis points in May (to 5.0-5.25%), the Fed left them unchanged in June, while signalling a high probability of further increases by the end of the year.

## Eurozone

The Eurozone economic environment deteriorated significantly in quarter three of 2022. The Eurozone economy, already struggling with record inflation, monetary tightening and the fallout from the slowdown in China, was further challenged by the sharp rise in natural gas prices following the drastic reduction in Russian supplies. At the end of the third quarter, against the backdrop of the energy crisis, fears of a Eurozone recession proliferated. Business climate confidence indicators moved into slightly negative territory, while household confidence indicators, already at record lows, continued to fall. The Eurozone labour market, on the other hand, remained buoyant, with the unemployment rate at its lowest level since the creation of the Eurozone. The rise in inflation reached the 10% mark in September 2022.

After raising its key interest rates by 0.50% in July (the first increase since 2011), the European Central Bank (ECB) raised them again in September by 0.75% and stated its intention to continue this upward cycle to fight inflation despite the worsening outlook for growth.

In quarter four of 2022, the Eurozone economy remained under pressure from energy prices as a consequence of the Russia-Ukraine conflict, which was a source of major uncertainty as winter approached. However, despite pointing to a slowdown, economic figures were still slightly better than expected. As a result, Eurozone GDP, and German GDP in particular, continued to rise. Business climate indicators for quarter four (PMI, in particular) signalled a downturn in economic activity, but this downturn was modest in scope. Despite falling slightly in November (to 10.1%, with major differences between Eurozone countries), inflation hit staggering levels and continued to spread from Energy to multiple sectors. The ECB was keen to curb this inflationary trend and, as a result, announced a 75-basis-point hike in its key rates in October, followed by a 50-basis-point hike in December, taking the deposit facility rate to 2.0%. Lastly, after taking piecemeal measures, EU Member State governments made progress in finding joint measures to cap the price of natural gas at the end of the year.

Eurozone economic indicators surprised positively in quarter one of 2023, signalling a stagnation in economic activity rather than a sharp drop. Supporting factors were lower gas prices and the economic recovery in China. The Manufacturing PMI continued to point to a contraction, but its Services counterpart returned to positive territory. The labour market remained strong, with the unemployment rate at an all-time low (6.6%) in February. Inflationary pressures remained very strong: while the general inflation index slowed significantly (up 6.9% over 12 months in March after peaking at 10.6% in October 2022), mainly thanks to negative base effects on energy prices, this was not the case for the underlying index, which continued its acceleration (up 5.7% in February, the highest rate seen since the creation of the euro). Determined to bring inflation down, the ECB raised its key rates by 50 basis points in February, then again in March, to bring the deposit facility interest rate to 3.0% and the refinancing operations interest rate to 3.5%. However, in March, rising financial tensions in the United States, as well as its repercussions in Europe (Credit Suisse bankruptcy and temporary fears about Deutsche Bank) drew attention to new risks.

In quarter two of 2023, Eurozone economic activity remained hampered by the rise in interest rates, the effect of high inflation on household purchasing power as well as an economically sluggish international environment due to the slowdown in the United States and China. After two quarters of a slight decline in GDP in quarter four of 2022 and quarter one of 2023, indicators relating to quarter two were mostly below expectations. Economic surveys pointed to a very significant divergence between Industry (still in difficulty following the shocks of recent years) and Services (where activity remained vigorous, but slowing down). Eurozone inflation continued to fall: over 12 months, the general index was at 5.5% in June after reaching 6.9% in March after a peak of 10.6% in October 2022. However, this decline in inflation only spread very moderately to the underlying index: up 5.4% in June after peaking at 5.7% in March. In addition, wages rose sharply in quarter one. The ECB raised its rates by 25 basis points in May, then again by 25 basis points in June, bringing the deposit facility interest rate to 3.5%. The ECB also suggested a probable additional increase in July.

### Emerging Markets

In China, economic growth picked up again in the third quarter of 2022, with the easing of measures designed to contain the pandemic, as well as a softening of monetary and fiscal policy. However, Chinese authorities announced further restrictions of movement ahead of the Party Congress in mid-October, which raised investor fears regarding the impact of movement restrictions on economic growth. For the rest of the emerging markets, the third quarter was marked by downward revisions to growth prospects, against a backdrop of high inflation and tightening global and domestic monetary conditions, which were increasingly impacting on domestic demand; a slowdown in global trade, as well as forecasts of a recession in the Eurozone and weaker than expected growth in the US. Due to the European energy crisis and rising prices, the slowdown seemed more pronounced in Central and Eastern Europe than in Latin America. The economic situation in Asia remained stable. Inflation figures, on the other hand, were still very high and rising overall, despite some level of stabilisation in some countries, such as Brazil. Predictably, central banks in emerging countries continued to raise rates (except for Russia and Turkey), with some latecomers finally joining the trend (Thailand, Indonesia, etc.). However, although the scope of the interest rate hikes increased in Asia, in other countries (Brazil, Hungary, Czech Republic, etc.) the end of the cycle seemed near. However, in the Czech Republic and Hungary, inflation was still in double-digit figures.

In quarter four of 2022, growth in emerging economies generally held up. Signs of a slowdown were only observed in a small number of countries in Latin America (Chile) and Eastern Europe (Romania). At the same time, the Chinese economy reopened somewhat faster than expected, which improved the global growth outlook and the growth outlook for all emerging countries. Overall, inflation stabilised, despite continuing to rise in a number of countries. A tangible drop in inflation was only observed in Brazil, in the wake of the decline in commodity prices (energy, food and others) and vigorous monetary tightening. Central banks continued their cycles of interest rate rises, but these were not implemented identically across all countries. Central banks in Latin America and Central and Eastern Europe gave the impression that these rate hikes would slow down or even be paused, while in Asia (Indonesia and the Philippines, in particular), rapid tightening was adopted as a proactive stance against inflation.

Quarter one of 2023 was marked by stronger-than-expected activity in China, boosted by a strong upturn in housing sales and favourable budgetary measures. By contrast, the economic situation has been much worse in other emerging economies, although they have proven to be resilient. January's inflation figures showed lower-than-expected declines and even, in some cases, continued acceleration of underlying inflation due to wage indexing mechanisms. However, February's inflation figures then pointed to a more general downturn. In the wake of the sharp downward revision of their expectations regarding the trajectory of key rates in advanced economies, the markets also modified their forecasts for emerging economies. However, in these economies, monetary policy continued to be driven primarily according to the local context, seeking the right balance between interest rate rises and pauses in interest rate hikes, depending on inflation trends and expectations. In China, the Peoples Bank of China (PBoC) unexpectedly reduced the Reserve Requirement Rate (RRR) to stem the sharp rise in interbank rates and to maintain sufficient liquidity in the financial system.

In the second quarter of 2023, the publication of quarter one GDP figures indicated that economic activity had held up better than expected in most emerging countries, due to the slowdown in inflation, the easing of pressures on supply chains thanks to the reopening of China, expansionary budgetary policies in some countries and the greater resilience of European and American economies. High-frequency indicators confirmed a soft landing scenario without, however, suggesting a significant rebound. In China, quarter two growth data signalled a more pronounced than expected slowdown in the Construction and Manufacturing Production sectors. The PBoC reacted by reducing most of its rates by 10 basis points. Some central banks (South Africa, Colombia, Malaysia, Thailand, Philippines and Turkey) once again raised their rates due to inflation but also due to pressures on their currencies thanks to an upward revision of market expectations regarding the US Federal Reserve and the rise in geopolitical tensions. However, in May inflation figures overall surprised on the downside, and the tone of most central banks became more accommodating. Despite high market volatility, the main indices (GBI, EMBI, MSCI) outperformed in quarter two.

Luxembourg, 12 July, 2023  
The Board of Directors

The accompanying notes form an integral part of these financial statements

## 1 INTRODUCTION

Amundi Funds (the "Fund") is organised as a "Société d'Investissement à Capital Variable" ("SICAV") under the laws of the Grand Duchy of Luxembourg. The Fund, initially Groupe Indosuez Funds FCP, an unincorporated mutual investment fund ("Fonds Commun de Placement") created on 18 July 1985, was transformed, in accordance with Article 110 (2) of the law of 30 March 1988 on Undertakings for Collective Investment, and renamed GIF SICAV II on 15 March 1999. The deed of transformation and the Articles of Incorporation (the "Articles") were published in the Mémorial, Recueil des Sociétés et Associations on 28 April 1999. The name of the Fund was then changed to GIF SICAV on 1<sup>st</sup> December 1999, to Crédit Agricole Funds on 8 December 2000 and to CAAM Funds on 1<sup>st</sup> July 2007. As at 2 March 2010, in accordance with the decision taken by the shareholders in the framework of the Extraordinary General Meeting held on 23 November 2009 and with the decision of the Board of Directors taken on 23 December 2009, CAAM Funds was renamed Amundi Funds.

The amendments to the Articles have been published in the Mémorial, Recueil des Sociétés et Associations respectively on 14 January 2000, on 17 January 2001, and on 13 June 2007 for the first three name changes and on 3 April 2010 for the last one. A latest amendment to the Articles has been made on 14 March 2012 and has been published in the Mémorial, Recueil des Sociétés et Associations - C, number 943 and dated 12 April 2012. The Fund is subject to Part I of the amended law of 17 December 2010 on Undertakings for Collective Investment (the "2010 law").

The following Sub-Funds have been launched during the period:

Amundi Funds China A Shares on 22 July 2022  
 Amundi Funds Net Zero Ambition Global Corporate Bond on 07 November 2022  
 Amundi Funds Net Zero Ambition Global Equity on 14 November 2022  
 Amundi Funds China RMB Aggregate Bond on 05 December 2022  
 Amundi Funds Net Zero Ambition Pioneer US Corporate Bond on 08 December 2022  
 Amundi Funds Net Zero Ambition Emerging Markets Equity on 31 January 2023

The following Sub-Fund has been liquidated during the period:

Amundi Funds Absolute Return European Equity on 09 June 2023

The following Sub-Funds have been renamed during the period:

Amundi Funds Global Inflation Bond into Amundi Funds Global Inflation Short Duration Bond on 06 October 2022  
 Amundi Funds Sustainable Top European Players into Amundi Funds Net Zero Ambition Top European Players on 14 April 2023  
 Amundi Funds Sustainable Global Perspectives into Amundi Funds Net Zero Ambition Multi-Asset on 14 April 2023  
 Amundi Funds Emerging Europe and Mediterranean Equity into Amundi Funds Emerging Europe Middle East and Africa on 11 May 2023

The following Sub-Funds have been merged during the period:

The following Sub-Funds have been merged into Amundi Funds Global Multi-Asset Target Income on 25 November 2022:

SABADELL FUNDS SICAV - Global Equity  
 SABADELL FUNDS SICAV - Capital Appreciation 1  
 SABADELL FUNDS SICAV - Dollar Active Fund Portfolio 25  
 SABADELL FUNDS SICAV - Sterling Active Fund Portfolio 25

With effect from 06 October 2022, the target distribution of some share classes previously named as "MD" have been renamed as "MTD" to reflect an existing feature on target dividends, as set out on the website [www.amundi.com](http://www.amundi.com).

As per Depositary confirmation, the following balances are present as at 30 June 2023 for these liquidated Sub-Funds:

- Amundi Funds Equity Korea: USD 1,744,213.33  
 - Amundi Funds Equity Emerging Conservative: EUR 18,499.32  
 - Amundi Funds Absolute Return European Equity: EUR 48,924.64.

Considering the cumulated relevant portion of Russian and Ukrainian securities in portfolio and following decision of the Board of Directors of the SICAV:

- Amundi Funds Russian Equity: the NAV calculations has been suspended on 28 February 2022 and the last available official NAV is dated 25 February 2022. After that date, no further subscriptions or redemptions have been accepted for this Sub-Fund.

- Amundi Funds Emerging Europe and Mediterranean Equity (\*): the NAV calculations has been suspended between 01 March 2022 and 10 April 2023. On 11 April 2023, after the creation of the segregated class (ISIN LU2600584523 ) where all the illiquid Russian asset and liabilities have been transferred, the NAV suspension was lifted starting to calculate again the official NAV and accepting subscriptions and redemptions.

The newly created segregated class has been allocated pro-rata to the investors existing at the date of the suspension, and immediately put under liquidation. Subscriptions and redemptions are not accepted in this class and all the related fees are waived or borne by the Management Company.

In reference to the prospectus of May 2023, as at 30 June 2023, the Fund consisted of 110 Sub-Funds in activity, each investing in a specific market or group of markets. Amundi Funds Euroland Equity, Amundi Funds European Equity ESG Improvers, Amundi Funds Euroland Equity Small Cap, Amundi Funds European Equity Green Impact, Amundi Funds European Equity Value, Amundi Funds European Equity Sustainable Income, Amundi Funds European Equity Small Cap, Amundi Funds Equity Japan Target, Amundi Funds Global Ecology ESG, Amundi Funds Global Equity ESG Improvers, Amundi Funds Net Zero Ambition Global Equity, Amundi Funds Global Equity Sustainable Income, Amundi Funds Japan Equity Engagement, Amundi Funds Japan Equity Value, Amundi Funds Montpensier Great European Models SRI, Amundi Funds Montpensier M Climate Solutions, Amundi Funds Pioneer Global Equity, Amundi Funds Pioneer US Equity Dividend Growth, Amundi Funds Pioneer US Equity ESG Improvers, Amundi Funds Pioneer US Equity Fundamental Growth, Amundi Funds Pioneer US Equity Mid Cap, Amundi Funds Pioneer US Equity Research, Amundi Funds Pioneer US Equity Research Value, Amundi Funds Polen Capital Global Growth, Amundi Funds Net Zero Ambition Top European Players, Amundi Funds US Pioneer Fund, Amundi Funds Asia Equity Concentrated, Amundi Funds China A-Shares, Amundi Funds China Equity, Amundi Funds Emerging Europe Middle East and Africa, Amundi Funds Emerging Markets Equity Focus, Amundi Funds Emerging Markets Equity ESG Improvers, Amundi Funds Emerging World Equity, Amundi Funds Latin America Equity, Amundi Funds Equity MENA, Amundi Funds Net Zero Ambition Emerging Markets Equity, Amundi Funds New Silk Road, Amundi Funds Russian Equity, Amundi Funds SBI FM India Equity, Amundi Funds Euroland Equity Dynamic Multi Factors, Amundi Funds Euroland Equity Risk Parity, Amundi Funds European Equity Conservative, Amundi Funds European Equity Dynamic Multi Factors, Amundi Funds European Equity Risk Parity, Amundi Funds Global Equity Conservative, Amundi Funds Global Equity Dynamic Multi Factors, Amundi Funds European Convertible Bond, Amundi Funds Montpensier Global Convertible Bond, Amundi Funds Euro Aggregate Bond, Amundi Funds Euro Corporate Bond, Amundi Funds Euro Corporate Short Term Green Bond, Amundi Funds Euro Government Bond, Amundi Funds Euro Inflation Bond, Amundi Funds Strategic Bond, Amundi Funds Euro High Yield Bond, Amundi Funds Euro High Yield Short Term Bond, Amundi Funds Global Subordinated Bond, Amundi Funds Pioneer Global High Yield Bond, Amundi Funds Pioneer Global High Yield ESG Improvers Bond, Amundi Funds Pioneer US High Yield Bond, Amundi Funds European Subordinated Bond ESG, Amundi Funds Global Aggregate Bond, Amundi Funds Global Bond, Amundi Funds Global Corporate Bond, Amundi Funds Global Corporate ESG Improvers Bond, Amundi Funds Net Zero Ambition Global Corporate Bond, Amundi Funds Global High Yield Bond, Amundi Funds Global Inflation Short Duration Bond, Amundi Funds Global Total Return Bond, Amundi Funds Impact Green Bonds, Amundi Funds Optimal Yield, Amundi Funds Optimal Yield Short Term, Amundi Funds Pioneer Strategic Income, Amundi Funds Net Zero Ambition Pioneer US Corporate Bond, Amundi Funds Pioneer US Bond, Amundi Funds Pioneer US Corporate Bond, Amundi Funds Pioneer US Short Term Bond, Amundi Funds China RMB Aggregate Bond, Amundi Funds Emerging Markets Blended Bond, Amundi Funds Emerging Markets Bond, Amundi Funds Emerging Markets Corporate Bond, Amundi Funds Emerging Markets Green Bond, Amundi Funds Emerging Markets Corporate High Yield Bond, Amundi Funds Emerging Markets Hard Currency Bond, Amundi Funds Emerging Markets Local Currency Bond, Amundi Funds Emerging Markets Short Term Bond, Amundi Funds Euro Multi-Asset Target Income, Amundi Funds Global Multi-Asset, Amundi Funds Global Multi-Asset Conservative, Amundi Funds Global Multi-Asset Target Income, Amundi Funds Net Zero Ambition Multi-Asset, Amundi Funds Multi-Asset Real Return, Amundi Funds Multi-Asset Sustainable Future, Amundi Funds Pioneer Flexible Opportunities, Amundi Funds Pioneer Income

(\* Effective 11 May 2023, the Sub-Fund has been renamed into Amundi Funds Emerging Europe Middle East and Africa.

Opportunities, Amundi Funds Real Assets Target Income, Amundi Funds Target Coupon, Amundi Funds Absolute Return Credit, Amundi Funds Absolute Return Multi-Strategy, Amundi Funds Absolute Return Global Opportunities Bond, Amundi Funds Absolute Return Global Opportunities Bond Dynamic, Amundi Funds Global Macro Bonds & Currencies, Amundi Funds Global Macro Bonds & Currencies Low Vol, Amundi Funds Absolute Return Forex, Amundi Funds Multi-Strategy Growth, Amundi Funds Volatility Euro, Amundi Funds Volatility World, Amundi Funds Protect 90, Amundi Funds Cash EUR and Amundi Funds Cash USD.

Within each Sub-Fund, the SICAV can create and issue share classes with various characteristics and investor eligibility requirements. Each share class is identified first by one of the base share class labels (described in the table below) and then by any applicable suffixes.

Classes Label	Classes Label (as from June 1, 2019)	Investors	Board approval needed	Minimum initial investment <sup>1</sup>	Maximum subscription fees <sup>2</sup>	Maximum switch fees <sup>4</sup>	Maximum redemption fees

## 2 PRINCIPAL ACCOUNTING CONVENTIONS

### ■ PRESENTATION OF THE FINANCIAL STATEMENTS

The Fund's financial statements were prepared in accordance with the legal and regulatory provisions in force in Luxembourg concerning undertakings for collective investment.

The financial statements are presented on the basis of the latest Net Asset Value ("NAV") calculated during the financial period. In accordance with the prospectus dated May 2023, the NAVs were calculated using the latest market values and exchange rates known at the time of the calculation meaning:

- For all Sub-Funds except Amundi Funds Equity MENA: official NAV dated 30 June 2023;
- For Amundi Funds Equity MENA: non-official NAV dated 30 June 2023, as no official NAV was calculated on 30 June 2023 due to holidays in the main stock exchanges the Sub-Fund is invested.

In the annual report as at 30 June 2023, the Sub-Funds merged or liquidated during this year are shown separately in the Statement of Operations and Changes in Net Assets and are included in the combined figures.

The financial statements of the Fund and each of its Sub-Funds have been prepared on a going concern basis of accounting.

The objective of Amundi Funds Protect 90 is to provide a participation in financial markets evolution while also providing permanent partial protection of your investment over any given 3-year period. Specifically, the Sub-Fund is designed to ensure that its share price does not fall below 90% of the highest net asset value reached since the last business day of the preceding month of April, as per prospectus.

- **Cross Sub-Funds investments** - As at 30 June 2023, the value of the investments made by Sub-Funds in other Sub-Funds of the SICAV amounts to EUR 697,761,457 corresponding to 0.97% of the total net asset value. Therefore, the total combined NAV at the year end without those cross investments would amount to EUR 71,199,915,557.
- **Securities portfolio** - Transferable securities listed on a Stock Exchange or on a regulated market are valued at their last known price. When these prices are not representative or when securities are not listed, they are valued at their reasonably probable realisation value, determined with care and in good faith by the Board of Directors.

<sup>1</sup> For purposes of minimum initial investment, we aggregate the investments of a given investor (or group of entities fully owned by the same parent company) across the entire SICAV (all share classes and all Sub-Funds). Minimums apply in USD or equivalent amount in any other currency.

<sup>2</sup> For Volatility Euro and Volatility World, may be up to 2.00% higher if the board determines that new investments may adversely affect the interests of existing shareholders.

<sup>3</sup> In I2 and A2 share classes, Board approval is not required.

<sup>4</sup> For A4 share classes, switch is only possible between A4 share classes of another Sub-Fund of the UCITS.

- **Conversion of items expressed in foreign currencies** - The Fund's financial statements are expressed in Euro (EUR). Net assets of each Sub-Fund expressed in foreign currencies are therefore converted and combined in EUR at the exchange rate in force at the close of the financial year. Transactions and acquisition costs for portfolio securities expressed in foreign currencies are converted into the accounting currency of the Sub-Fund concerned at the exchange rate in force on the date of transaction or acquisition, as appropriate. Valuation values for securities in the portfolio and of other assets and liabilities expressed in foreign currencies are converted into the accounting currency of the Sub-Fund at the exchange rate in force at the end of the financial year. Currency differences resulting from these conversions are recorded under the caption "Revaluation of consolidated Net Assets" in the Statement of Operations and Changes in Net Assets.
- **Return on investments** - Dividends are entered as yields on the date when they are declared and in so far as the appropriate information can be obtained by the Fund. Interest is accrued on a daily basis.
- **Distribution of costs and expenses** - Each Sub-Fund is charged with costs or expenses specifically attributable to it. Costs and expenses not attributable to a specific Sub-Fund are distributed between the Sub-Funds on an equitable basis, in proportion to their respective Net Assets.
- **Repurchase agreements** - Repurchase agreements (Repos) are equivalent to borrowings guaranteed by underlying assets presented in the securities portfolio of the Sub-Fund which remains exposed to market risk. Reverse Repurchase agreements (Reverse Repos) are similar to guaranteed loans. In this case, the Sub-Fund is not subject to the risk of depreciation in the value of the underlying assets. Repos and Reverse Repos are regarded as borrowings and loans, respectively, of the sum of liquid assets received and/or paid.
- **Futures contracts** - Unexpired futures contracts are valued at their last known price on the date of valuation or on the closing date and unrealised appreciations or depreciations resulting from them are recorded in the Statement of Net Assets. Net realised and net change in unrealised gain/(loss) on futures contracts are recorded in the Statement of Operations and Changes in Net Assets.
- **Futures-style options contracts** - Futures-style options contracts are valued at the quoted price available on an official stock exchange. Initial margin deposits are paid in cash upon entering into the contract. Subsequent positive or negative cash-flows, referred to as variation margins, are paid or received by the Sub-Fund periodically and are based on changes in the market value of future-style options contracts. When the contract is closed, the concerned Sub-Fund records a realised gain or loss equal to the difference between the proceeds from (or cost of) the closing transaction and the opening transaction. Net unrealised appreciations or depreciations on futures-style options contracts are recorded in the Statement of Net Assets. Net realised and net change in unrealised gain/(loss) on futures-style options contracts are recorded in the Statement of Operations and Changes in Net Assets.
- **Forward foreign exchange contracts** - Unexpired forward foreign exchange contracts are valued at the exchange rates applicable on the valuation date or on the closing date and unrealised appreciations or depreciations resulting from them are recorded in the Statement of Net Assets. Net realised and net change in unrealised gain/(loss) on forward foreign exchange contracts are recorded in the Statement of Operations and Changes in Net Assets.
- **Valuation of options and swaptions** - Options officially listed on a stock market or any other regulated market, operating in a regular manner, recognised and open to the public, are valued on the basis of their closing prices on the valuation day or, in the absence of such prices, on the basis of the last-known prices available. OTC options including swaptions are marked-to-market based on the elements laid down in their contracts. If the last known prices for listed options or the calculated price for OTC options are not representative, the valuation will be based on the potential realisation value estimated by the Board of Directors of the SICAV with prudence and in good faith. Net realised and net change in unrealised gain/(loss) on OTC options and swaptions are recorded in the Statement of Operations and Changes in Net Assets.
- **Swaps** - The Fund is authorised to enter into variance swaps, credit default swaps, total return swaps, inflation swaps, asset swaps, interest rate swaps or currency swaps. Those swaps are recorded at market value based on the valuation elements laid down in the contracts. The unrealised net gain is included in the item "Unrealised net appreciation on swaps and CFD" in the Statement of Net Assets and the unrealised net loss is included in the item "Unrealised net depreciation on swaps and CFD" in the Statement of Net Assets. Net realised and net change in unrealised gain/(loss) on swaps are recorded in the Statement of Operations and Changes in Net Assets.
- **Money market instruments** - The money market is a financial instrument with high liquidity and very short maturities. It is used by participants as a means for borrowing and lending in the short term, with maturities that usually range from overnight to just under a year. For the money market instruments, the accretion (difference between cost and amortised value), is reported under "Net change in unrealised appreciation/(depreciation) on investments and on debts derived from reverse repurchase agreements" in the Statement of Operations and Changes in Net Assets for securities held at year end. If the instruments have been sold or reimbursed, this result is considered as "Net realised profit/(loss) on securities sold" in the Statement of Operations and Changes in Net Assets.
- **To Be Announced securities (TBAs)** - TBA positions refer to the common trading practice in the mortgage backed securities market in which a security is to be bought from a mortgage pool (e.g. Ginnie Mae, Fannie Mae or Freddie Mac) for a fixed price at a future date. At the time of purchase the exact security is not known, but the main characteristics of it are specified. Although the price has been established at the time of purchase, the principal value has not been finalised. TBA positions are disclosed in the Securities Portfolio. The purchase of this type of security has not been settled and as a consequence, the amount corresponding to the payable due when the transaction is settled, is disclosed under "Brokers payable" in the Statement of Net Assets. The realised profits/(losses) on TBAs and changes in unrealised appreciation/depreciation are disclosed in the Statement of Operations and Changes in Net Assets respectively under the headings "Net realised profit/(loss) on securities sold" and "Net change in unrealised appreciation/(depreciation) on investments and on debts derived from reverse repurchase agreements". MBS / ABS risk Mortgage-backed and asset-backed securities (MBSs and ABSs) typically carry prepayment and extension risk and can carry above-average liquidity, credit and interest rate risks.
- **Net realised profit/(loss) on securities sold** - The "Net realised profit/(loss) on securities sold" figure of the Statement of Operations and Changes in Net Assets reflects the difference between the cost and proceeds from securities sold, including the market as well as the currency impacts.
- **Transaction costs** - The transaction costs include broker fees and fees charged by the custodian for securities and derivatives transactions. The transaction fees are excluded from the cost of securities and derivatives purchased and sold. All these fees are recorded under caption "Broker and transaction fees" in Statement of Operations and Changes in Net Assets. Refer to note 23 which describes the reception and transmission of orders fees.
- **Contracts for difference (CFD)** - At each valuation date, the difference in price between the opening price and the current market price of the underlying security or index to the CFD is recorded as the market value (unrealised gain or loss) of the contract; when the Sub-Fund enters a closing transaction, the difference between the opening notional amount and the closing notional amount of the underlying security is recorded as a realised gain or loss under captions Net realised profit/(loss) on swaps and CFD in Statement of Operations and Changes in Net Assets. Initial margin deposits may be made in cash upon entering in CFD. Subsequent payments, referred to as variation margins, are made or received by the Sub-Fund periodically and are based on changes in the market value of open CFD contracts.
- **Securities lending** - In securities lending and borrowing transactions, a lender transfers securities or instruments to a borrower, subject to a commitment that the borrower will return equivalent securities or instruments on a future date or when requested by the lender. The borrower must provide a guarantee, in the form of collateral, that extends throughout the loan period and is at least equal to the global valuation of the securities lent, plus the value of any haircut considered appropriate in light of the collateral quality.

### 3 EXCHANGE RATES USED AS OF 30 JUNE 2023

The exchange rates used for the combined figures are the following:

1 JPY =	0.006342 EUR
1 USD =	0.916590 EUR

### 4 MANAGEMENT FEES, ADMINISTRATION FEES AND DISTRIBUTION FEES

Fee structure - The Administration fee is a fee expressed as a percentage of the NAV of the Sub-Funds and classes of shares, including all the administrative expenses of the Fund.

Such fee includes the remuneration of the Administrative Agent, Domiciliary Agent, Transfer Agent and Registrar Agent for their services rendered to the Fund, the remuneration of the Custodian for its services rendered to the Fund as well as all other administrative expenses incurred in the operation of the Fund including but not limited to:

- the fees of auditors and legal advisers of the Fund (including costs associated with compliance with legal and regulatory requirements);
- the cost of translation, printing and distribution to investors of the annual and semi-annual reports, of the prospectus of the Fund, of the Key Information Document of each class of shares and of any supplement thereto as well as of any notice sent to the Investors' attention;
- any costs related to the information of the shareholders including costs related to the publication of prices of shares in the financial press, the production of information material for the subscribers and distributors;
- any fees and expenses involved in registering and maintaining the registration of the Fund with any governmental agency or stock exchange and to comply with any regulatory requirements and the reimbursement of such fees and expenses incurred by any local representative;
- the fees of any local representative/correspondent, of which the services are required pursuant to the applicable law;
- the costs related to extraordinary measures, in particular any expertise or trial aiming at the protection of the shareholders' interests;
- the costs related to the translation, distribution and publication of any notice to the shareholders.

The Administration fee is paid in arrears to Amundi Luxembourg S.A., within a frequency defined by the Management Company and is calculated each day for each Sub-Fund and each class of shares.

The Management fees, expressed in percentages of the NAV, are paid in arrears to Amundi Luxembourg S.A., within a frequency defined by the Management Company and calculated each day for each Sub-Fund on the basis of the daily NAV of each class of shares.

Amundi Luxembourg S.A. is responsible for paying commissions to Investment Managers.

In addition to the management fees paid by the Fund to Amundi Luxembourg S.A., the Sub-Funds investing part of their assets in other UCIs are also subject to the management fees charged to those Sub-Funds, except for cross Sub-Funds investments.

The Distribution fees are calculated and accrued on each Dealing Day at the below rates per annum and are paid in arrears to Amundi Luxembourg S.A., within a frequency defined by the Management Company. Amundi Luxembourg S.A. is responsible for the payment of fees to Distributors.

The Management Company can further decide to pay remuneration to Distributors out of its own fees.

The Management fees, Administration fees and Distribution fees, expressed as a percentage of the NAV, applicable at 30 June 2023 are the maximum rates set out on the website [www.amundi.lu/Amundi-Funds](http://www.amundi.lu/Amundi-Funds), except for the Sub-Funds Amundi Funds Cash EUR and Amundi Funds Cash USD, for which the below rates per annum are applied:

AMUNDI FUNDS	Sub-Funds Base Currency	Other Share Classes NAV Currencies	Classes of Shares	Management Fees	Administration Fees	Distribution Fees

With effect from the NAV calculation suspensions for Amundi Funds Russian Equity, Amundi Luxembourg S.A. has decided to waive its management fees. For Amundi Funds Emerging Europe and Mediterranean Equity\*, the management fees has been waived from 01 March 2022 to 10 April 2023.

## 5 PERFORMANCE FEES

The performance fee is calculated separately for each Class of Shares. It shall be accrued daily, deducted and paid annually for each Class of Shares. The performance fee is calculated by comparing the NAV of the Sub-Fund relevant Class of Shares and the reference asset.

The mechanism applied is further detailed on the website [www.amundi.lu/Amundi-Funds](http://www.amundi.lu/Amundi-Funds)

The Sub-Funds and the Classes of Shares subject to a performance fee are listed on the website [www.amundi.lu/Amundi-Funds](http://www.amundi.lu/Amundi-Funds).

For all the classes authorized in Hong Kong please note that no performance fees are applied.

## 6 TAXATION OF THE FUND - TAXE D'ABONNEMENT

The Fund is further liable in Luxembourg to a tax of 0.05% per annum in respect of the Equity Sub-Funds, Bond Sub-Funds, Multi Asset Sub-Funds, Protected Sub-Funds and Absolute Return Sub-Funds (except on investments by these Sub-Funds in other undertakings for collective investment established in Luxembourg and already subject to the *taxe d'abonnement* as per law (for which no tax is applied) and of 0.01% per annum in respect of the Cash Sub-Funds, the H classes Category, the I classes Category, the J classes Category, the M classes Category, the O classes Category, the OR classes Category, the SE classes Category, the X classes Category and the Z classes Category of all the Sub-Funds ("Taxe d'Abonnement"), such tax being payable quarterly on the basis of the NAV of the Fund at the end of the relevant calendar quarter.

The benefit of the 0.01% per annum Taxe d'Abonnement is available to those Shareholders admitted in the H classes Category, the I classes Category, the J classes Category, the M classes Category, the O classes Category, the OR classes Category, the SE classes Category, the X classes Category and the Z classes Category on the basis of the Luxembourg legal, regulatory and tax provisions as these are known to the Fund at the time of admission of an Investor in such class of shares.

However, no guarantee can be given for the past and for the future and such assessment is subject to interpretations on the status of an eligible Investor in the H classes Category, the I classes Category, the J classes Category, the M classes Category, the O classes Category, the OR classes Category, the SE classes Category, the X classes Category and the Z classes Category by any competent authorities as will exist from time to time. Any such reclassification made by an authority as to the status of an Investor may submit the entire class of shares to a Taxe d'Abonnement rate of 0.05% per annum.

## 7 OTHER INCOME

Amounts of other income in the Statement of Operations and Changes in Net Assets include mainly revenues from securities lending and recovery of provisions on performance fees.

## 8 OTHER EXPENSES

Balances for other expenses in the Statement of Operations and Changes in Net Assets mainly include other taxes and costs from securities lending.

Amounts of other expenses in the Statements of Operations and Changes in Net Assets in the Sub-Funds Amundi Funds Asia Equity Concentrated, Amundi Funds Emerging Markets Equity Focus, Amundi Funds Emerging Markets Equity ESG Improvers, Amundi Funds Emerging World Equity, Amundi Funds New Silk Road, Amundi Funds SBI FM India Equity and Amundi Funds Global Multi-Asset mainly include Indian Tax.

(\*) Effective 11 May 2023, the Sub-Fund has been renamed into Amundi Funds Emerging Europe Middle East and Africa

## 9 REVERSE REPURCHASE AGREEMENTS

During the financial year ending 30 June 2023, certain Sub-Funds entered into reverse repurchase contracts, the amount of which being disclosed below in the Sub-Funds currency, by which they lend a certain amount to financial institutions, guaranteed by collateral. On 30 June 2023, loans granted in accordance with these agreements were guaranteed by the following underlying assets.

Counterparty's countries are listed following the ISO 3166-1 standard.

The amount of Investment Grade is referred to bonds rated at least BBB- by S&P, Baa3 by Moody's and/or BBB- (by Fitch).

Please refer to the note 17 for detailed collateral information.
