FUND OVERVIEW

The BlackRock Global Event Driven Fund seeks to achieve a positive absolute return for investors regardless of market movements. The Fund seeks to achieve this investment objective by taking long, synthetic long and synthetic short investment exposures on a global basis. Under normal market conditions, the Fund will seek to gain at least 70% of its investment exposure through equities and equity-related securities. The Fund may also invest in fixed income transferable securities (including non-investment grade fixed income transferable securities), fixed income-related securities, units of undertakings for collective investment (including Exchange Traded Funds), derivatives and when determined appropriate, cash and near-cash instruments. The Fund intends to take full advantage of the ability to invest in derivatives providing synthetic long and synthetic short positions with the aim of maximising positive absolute returns. The Fund may also invest up to 10% of its Net Asset Value in Distressed Securities. The asset allocation of the Fund is intended to be flexible and the Fund will maintain the ability to adjust its exposures as market conditions and other factors dictate. The currency exposure of the Fund is flexibly managed. In order to achieve its investment objective and policy, the Fund will utilise a variety of investment strategies and instruments. In particular, the Fund will employ a fundamentallydriven investment process focussed on a broad spectrum of catalyst based investment opportunities. These catalysts range across a broad spectrum and include, but are not limited to, announced mergers and acquisitions, company offers, spinoffs and split-offs, financial and strategic restructuring and management changes.

Key Risks Continued: Compared to more established economies, the value of investments in developing Emerging Markets may be subject to greater volatility due to differences in generally accepted accounting principles or from economic or political instability. The fund invests in fixed interest securities issued by companies which, compared to bonds issued or guaranteed by governments, are exposed to greater risk of default in the repayment of the capital provided to the company or interest payments due to the fund. The fund investments may be subject to liquidity constraints, which means that shares may trade less frequently and in small volumes, for instance smaller companies. As a result, changes in the value of investments may be more unpredictable. In certain cases, it may not be possible to sell the security at the last market price quoted or at a value considered to be fairest. Investors in this Fund should understand that the Fund is not guaranteed to produce a positive return and as an absolute return product, performance may not move in line with general market trends or fully benefit from a positive market environment. The Manager employs a risk management process to oversee and manage derivative exposure within the Fund. The strategies utilised by the Fund involve the use of derivatives to facilitate certain investment management techniques including the establishment of both 'long' and 'synthetic short' positions and creation of market leverage for the purposes of increasing the economic exposure of a Fund beyond the value of its net assets.

The Morningstar Analyst Rating is not a credit or risk rating. It is a subjective evaluation performed by the manager research analysts of Morningstar. Morningstar evaluates funds based on five key pillars, which are process, performance, people, parent, and price. Analysts use this five pillar evaluation to determine how they believe funds are likely to perform over the long term on a risk-adjusted basis. They consider quantitative and qualitative factors in their research, and the weighting of each pillar may vary. The Analyst Rating scale is Gold, Silver, Bronze, Neutral, Negative. A Morningstar Analyst Rating of Gold, Silver, or Bronze reflect an Analyst's conviction in a fund's prospects for outperformance. Analyst Ratings are continuously monitored and reevaluated at least every 14 months. For more detailed information about Morningstar's Analyst Rating, including its methodology, please go to <http://corporate.morningstar.com/us/documents/Methodology/Documents/AnalystRatingforFundsMethodology.pdf>. The Morningstar Analyst Rating should not be used as the sole basis in evaluating a mutual fund. Morningstar Analyst Ratings are based on Morningstar's current expectations about future events; therefore, in no way does Morningstar represent ratings as a guarantee nor should they be viewed by an investor as such. Morningstar Analyst Ratings involve unknown risks and uncertainties which may cause Morningstar's expectations not to occur or to differ significantly from what we expected Morningstar rates mutual funds from one to five stars based on how well they've performed (after adjusting for risk and accounting for all sales charges) in comparison to similar funds. Within each Morningstar Category, the top 10% of funds receive five stars, the next 22.5% four stars, the middle 35% three stars, the next 22.5% two stars, and the bottom 10% receive one star. Funds are rated for up to three time periods—three-, five-, and 10 years--and these ratings are combined to produce an overall rating. Funds with less than three years of history are not rated. Ratings are objective, based entirely on a mathematical evaluation of past performance. They're a useful tool for identifying funds worthy of further research, but shouldn't be considered buy or sell recommendations. Morningstar Rating metrics. Morningstar, Inc.® 2018.
