

Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Credit Duration Hedged EUR

A subfund of DPAM Bonds L Class BLU0874386435

The subfund is managed by Degroof Petercam Asset Services S.A.

Objectives and investment policy

Objectives

- Increasing the value of your investment in the medium term, while minimising the risk of loss.

Investment portfolio

- The subfund invests primarily in a diversified portfolio of bonds denominated in euros and rated 'investment grade' or lower. Investments in other currencies are fully or partly hedged against currency fluctuations against the euro.
- The subfund may use derivatives to exploit or hedge against market fluctuations, or for efficient portfolio management.

Investment process

- The manager defines the investment policy, in particular as regards the duration of investments, on the basis of an analysis of the political, financial and economic situations.
- The sub-fund is actively managed and no benchmark is used.

Investor profile

- This subfund is suitable for investors who understand the risks of the subfund and who have a minimum investment horizon of 4 years.

Reference currency of the subfund EUR

You can buy or sell shares in the subfund on any Luxembourg working day.

This subfund issues accumulation shares (shares for which all income is reinvested in the subfund) and distribution shares (shares that pay out income to holders).

Key terms

- Derivative instrument** Any financial security whose value is linked to one or more interest rates, an index, equity, currency, commodity or another underlying asset.
- 'Investment grade' bond** A financial security issued by a company, government or entity that generally entitles the holder to receive interest. Issuers of 'investment grade' bonds are expected to represent a higher capacity for repayment than the issuers of lower level bonds or bonds with no official rating.

Risk and reward profile

- The value of an investment in a fund increases or decreases over time. At the time of resale, the price of your shares may be less than the original price, representing a loss. If you invest in a subfund whose currency is different from your own, exchange rate fluctuations can also reduce your gains or increase your losses.
- The above risk level is calculated on the basis of the subfund's volatility over the medium term (i.e. on the basis of actual changes in its value over the last five years or on a simulation, if the subfund was created within that period). The volatility of the subfund may increase or decrease over time, which may change its risk level.
- The subfund's risk level reflects the following factor(s):
 - Investments in bonds are less volatile and less risky than equities.

The risk level does not reflect the potential impact of unusual market conditions or unforeseen events that may increase risk or trigger other risks such as:

- Credit risk** Risk associated with bonds becoming worthless when the issuer of the bond is not able to repay its debt on maturity.
- Liquidity risk** Some financial securities may be impossible to sell quickly at a given instant or may have to be sold at a discount.
- Management risk** Under abnormal market conditions, the usual management techniques may be ineffective or unfavourable.
- Derivative risk** Some derivatives may increase the volatility of the subfund or expose the subfund to losses that are higher than the price of the derivatives.
- Operational risk** In any market, and especially in emerging markets, the subfund may lose some or all of its money if there is a failure in the custody of assets or in the event of fraud, corruption, political actions or any other adverse event.
- Counterparty risk** The subfund can lose money as a result of the failure of a market player with which it does business.

Charges

The charges and costs you pay are used to pay the costs of running the subfund, including the costs of marketing and distributing units. These charges reduce the potential growth of investments.
