

DB Platinum MCP Terra Grove Pan Asia

Investment Strategy

DB Platinum MCP Terra Grove Pan Asia (the "Fund") is an open-ended UCITS compliant fund that seeks capital appreciation by generating consistent absolute returns with a relatively high Sharpe ratio and low drawdowns over the long term. The Investment Manager of the Fund is MCP Asset Management Company Limited ("MCP"). To achieve this objective, the Investment Manager will follow a market neutral equity long/short trading strategy based on a proven self-developed Multi-Factor Quants Model with 10-year track record that is fully quantitative and non-discretionary. The model captures markets inefficiencies in the equity markets: it calculates the expected return and the risk exposures based on multiple factors and uniquely optimizes the expected return and risk exposure of a single stock with market impact. The Fund invests predominantly in publicly-traded equities, mainly in Pan-Asian equities, including markets of Japan, Hong Kong, Korea and Taiwan, but may invest a portion of its assets globally and is not limited to any particular industry or sector. The investment universe excludes low liquidity and high credit risk stocks. The gross leverage is not expected to exceed 800% of the value of the Fund.

Fund Assets under Management: \$ 8,346,708

Performance History (06.07.17 – 29.06.18)⁽¹⁾

Monthly Return Last 12 Months (%)⁽¹⁾

Key Benefits

- The Fund complies with UCITS restrictions for portfolio diversification and risk spreading, offering weekly liquidity at NAV with no subscription/redemption fees.
- The Fund provides access to a UCITS compliant version of MCP's flagship strategy ("Terra Grove Pan Asia") managed by Masakatsu Hayashi⁽³⁾.
- Terra Grove Pan Asia Fund has generated annualised returns of 5.0% since inception, with an attractive Sharpe ratio of 1.10 (maximum drawdown:- 8.95%)⁽⁴⁾.
- An independent third party will calculate NAVs and publish these daily.
- One month rolling currency hedges are effected for share classes not denominated in USD to partly protect against fluctuations of exchange rate⁽⁵⁾.

Key Risks

- The Fund provides exposure to equity markets and may also provide exposure to other asset classes, which may be highly volatile and result in losses.
- The Fund may enter into one or more derivatives with a number of counterparties. If any of the counterparties fail to make payments (for example, it becomes insolvent) this may result in your investment suffering a loss.
- The Fund is not guaranteed and your investment is at risk. The value of your investment may go down as well as up. The Fund has been designed for investors who are looking for long term capital growth through exposure to alternative investment strategies. As the Fund may therefore employ complex strategies (including the use of derivatives), it is intended only for knowledgeable and experienced investors who are able to understand and evaluate both the investment strategy and its inherent risks (such understanding and evaluation may be gained through advice from a professional advisor).
- The Fund relies upon the performance of the Investment Manager and the successful implementation of the Strategy. If the Investment Manager performs poorly or the Strategy is not successful, the value of your investment is likely to be adversely affected.
- Movements in exchange rates can impact the value of your investment. If the currency of your country of origin is different from the currency in which the underlying investments of the Fund are made (USD), the value of your investment may increase or decrease subject to movements in exchange rates.
- The Fund is complex and may use derivatives to take long or short positions on various markets. The use of derivatives involves a high level of risk as derivatives can be highly leveraged, highly volatile, and may magnify gains as well as losses.
- The Investment Manager may, subject at all times to the Investment Restrictions, use financial leverage in managing the Fund, including increasing investment capacity, covering operating expenses and making withdrawal payments or for clearance of transactions. Financial leverage includes, but is not limited to, buying securities on margin.
- The Fund offers weekly liquidity only. Due to the limited liquidity further losses may be incurred until the execution of a redemption order.

Commentary - MCP Asset Management Company Limited – June 2018 ⁽²³⁾

Japan

Result of the US employment numbers set a weaker tone for the Japanese Yen and the market in Japan got off to a strong start in June. Receding concerns over North Korea and a rate hike by the FOMC made the Yen even weaker and export related names were actively bought, giving support to the market. The tide turned later in the month when tensions aroused over a US-China trade war, leading to a sell-off in export related names, followed by higher crude oil price, causing economically sensitive names to plummet. Quarter end position unwinding flow grew towards the month end but ETF buying by the BOJ, day in and day out, prevented a further sell off and TOPIX managed to close just -0.9% vs the previous month.

Value factor which deteriorated towards the end of May, saw a rebound as individual investors made a move to buy laggard undervalued stocks on the dips. Sentiment factor also performed well as analysts continued to make forecast changes. Profitability factor, especially in large cap space, also saw an upturn as investors turned to export related names and profit grew steadily early in the month. Profit took a turn for the worse when the sell-off in Banks sector stocks, on the back of lower US 10-year treasury yield, made laggard undervalued stocks a target for sellers and as a result, Value factor deteriorated massively causing a big loss later in the month. Profit looked to recover towards the month end when a peak level Value factor spread started to narrow down, but the quarter end unwind flow worsened Profitability factor, mainly in large cap space, and the Japan book suffered a -102bps (gross) loss this month.

Hong Kong

An optimistic view for the global economy, based on US employment data and other US macro numbers, got the Hong Kong market off to a strong start. Receding concerns over North Korea added tail wind for buyers and the momentum carried on but when the FOMC announced a rate hike, concerns for an outflow of cash from emerging markets set a risk off mode and the market dropped. Tensions building around a US-China trade war led to concerns for a slowdown in China's economy and profit taking sellers in H shares and names highly dependent on Chinese economy led the market down. As a result, the Hang Seng Index dropped -5.0% and the Hang Seng China Enterprise Index dropped drastically, -7.6% vs the previous month.

The shift from undervalued stocks to blue chip stocks continued for another month and Profitability factor and Growth factor both had a solid performance this month. Widening of Value factor spread reversed its move when the rate hike by the FOMC triggered an upturn in undervalued stocks led by Banks sector stocks while Flow Value and Yield Value also showed a recovery and all contributed to profit. Once profit taking on China related names accelerated, Profitability factor and Value factor deteriorated, mainly in large cap space, and loss was incurred. Although performance kept up in small-to-mid cap space, loss in large cap names grew towards the month end and the Hong Kong book saw a small gain of +9bps this month.

Taiwan

The upward momentum from Nasdaq in the US carried over to Taiwan and the market enjoyed a comfortable gain early on but when the FOMC announced a rate hike, concerns for a cash outflow led to a sell-off in major stocks. Retaliation of trade tariffs between the US and China raised concerns for an escalation for a trade friction and major high-tech stocks were sold off but the month end rebound by Nasdaq helped the market recover and TAIEX managed to get away with just a small drop of -0.3% vs the previous month.

Individual investors who were active in the hunt for undervalued stocks went into a wait and see mode and Value factor slowed down as a result. Major loss was incurred early in the month as highly profitable, high-growth stocks, which had been leading the way, were a target to profit takers and Profitability factor and Growth factor suffered. Buyers on the dips went for undervalued stocks caused by the sell-off and Profitability factor and Growth factor saw a recovery later in the month but the struggle in Value factor weighed down and the Taiwan book marked a loss of -58bps this month.

Korea

High-tech stocks led the way earlier in the month in Korea following a strong move from Nasdaq in the US. However, once the FOMC announced a rate hike, concerns for a cash outflow out of emerging markets led to a sell-off in major stocks, causing the market to plummet. The market continued its fall as major high-tech stocks became a target to sellers when concerns increased for a US-China trade friction later in the month, and KOSPI fell for the second consecutive month for a -4.0% drop vs the previous month.

Profitability factor and Growth factor in large cap space, which took a major beating last month end, recovered as foreign investors were back as buyers earlier in the month. At the same time, individual investors who were active in undervalued small-to-mid cap names took a break, causing Value factor to slide, slowing down the momentum in profit. Profitability factor and Growth factor continued to perform as profit takers centered around low-profit and low-growth names when the market took a nose dive later in the month. A shift from undervalued stocks to high profit stocks, which looked cheaper after the sell off, accelerated in small-to-mid cap space, adding momentum to Profitability factor and the Korea book had a solid +20bps gain this month.

Important Information for investors in Singapore:

The offer or invitation of the shares (the "Shares") of the Fund, which are the subject of this document, does not relate to collective investment schemes which are authorised under Section 286 of the Securities and Futures Act, Chapter 289 of Singapore (the "SFA") or recognised under Section 287 of the SFA. The Fund is not authorised or recognised by the Monetary Authority of Singapore (the "MAS") and the Shares are not allowed to be offered to the retail public. This document and any other document or material issued in connection with the offer or sale is not a prospectus as defined in the SFA. Accordingly, statutory liability under the SFA in relation to the content of prospectuses does not apply. You should consider carefully whether the investment is suitable for you.

This document has not been registered as a prospectus with the MAS. Accordingly, this document and any other document or material in connection with the offer or sale, or invitation for subscription or purchase, of Shares may not be circulated or distributed, nor may Shares be offered or sold, or be made the subject of an invitation for subscription or purchase, whether directly or indirectly, to persons in Singapore other than (i) to an institutional investor under Section 304 of the SFA, (ii) to a relevant person pursuant to Section 305(1), or any person pursuant to Section 305(2), and in accordance with the conditions specified in Section 305, of the SFA, or (iii) otherwise pursuant to, and in accordance with the conditions of, any other applicable provision of the SFA.

Where Shares are subscribed or purchased under Section 305 of the SFA by a relevant person which is:

- (a) a corporation (which is not an accredited investor (as defined in Section 4A of the SFA)) the sole business of which is to hold investments and the entire share capital of which is owned by one or more individuals, each of whom is an accredited investor; or
- (b) a trust (where the trustee is not an accredited investor) whose sole purpose is to hold investments and each beneficiary of the trust is an individual who is an accredited investor, securities (as defined in Section 239(1) of the SFA) of that corporation or the beneficiaries' rights and interest (howsoever described) in that trust shall not be transferred within six months after that corporation or that trust has acquired the Shares pursuant to an offer made under Section 305 of the SFA except:
 - (1) to an institutional investor or to a relevant person defined in Section 305(5) of the SFA, or to any person arising from an offer referred to in Section 275(1A) or Section 305A(3)(i)(B) of the SFA;
 - (2) where no consideration is or will be given for the transfer;
 - (3) where the transfer is by operation of law;
 - (4) as specified in Section 305A(5) of the SFA;
 - (5) as specified in Regulation 36 of the Securities and Futures (Offers of Investments) (Collective Investment Schemes) Regulations 2005 of Singapore.
