Benefits

This diversified bond portfolio can be used to participate in the opportunities on the Asian market for fixed-income securities, as well as the opportunity for appreciation of the local Asian currencies.

The fund is actively managed in accordance with market conditions. This allows the portfolio to be dynamically adjusted throughout market cycles.

Risks

The fund offers higher return potential than a high-quality bond portfolio and therefore bears a higher risk. In addition, emerging markets are at an early stage of development which can typically involve a high level of price volatility and other specific risks such as lower market transparency, regulatory hurdles, corporate governance and political and social challenges. Corresponding risk tolerance and capacity are required. All investments are subject to market fluctuations. The fund can invest in less liquid assets that may be difficult to sell in the case of distressed markets. Every fund has specific risks, which can significantly increase under unusual market conditions. The fund can use derivatives, which may result in additional risks (particularly counterparty risk).

Please note that additional fees (e.g. entry or exit fees) may be charged. Please refer to your financial adviser for more details. Investors should read the Key Investor Information Document (KIID), Prospectus and any applicable local offering document prior to investing. For a definition of financial terms refer to the glossary available at www.ubs.com/glossary.
