

Fact Sheet

UBS Bond Global Opportunities Unconstrained

UBS Bond Funds > UBS Flexible Fixed Income Funds

Fund description

- The fund invests very flexibly across global fixed income markets and currencies striving to achieve an attractive return over the medium term under various market conditions whilst carefully managing risk.
- The fund actively takes long and short positions in global interest rates, credit and currencies using bonds and derivatives.
- The fund employs a comprehensive risk management approach striving to take market, sector, security or currency risks only if the respective compensation is deemed to be attractive.
- Note: The fund is managed with an expected volatility of 4-8% p.a. (no guarantee) over the medium term; periods of negative return may be possible.

Last 12 months (USD)	– high 98.93
	– low 93.56
Share class assets (USD m)	0.21
Management fee p.a.	0.78%
Total expense ratio (TER) p.a.	1.08% ¹

¹ as at 31.05.2016

	Q-acc
ISIN	LU1240775756
Bloomberg	UBGQACC LX
Launch date	09.09.2015
Theoretical yield to maturity (net)	1.01% ¹
Theoretical yield to worst (net)	0.93%
Option Adjusted Duration	0.46
Distribution	Reinvestment

¹ The fund's yield to maturity may from time to time become negative, mainly because of the variety of hedging strategies deployed in the global interest rate and credit markets. The yield to maturity shown may vary considerably depending on the fund's sensitivity to changes in interest rates, sector weighting and currency exposure.

Key benefits

- The fund offers an unconstrained global fixed income solution, which strives to achieve an attractive return over the medium term under various market conditions via active long and short positions whilst carefully managing risk.
- The fund offers a very flexible strategy seeking to profit as much from rising interest rates with falling bond prices as it does from rising bond prices when interest rates fall.
- The fund offers a performance pattern which is fairly uncorrelated with fixed income markets and driven by active portfolio management decisions.
- The fund offers a globally diversified portfolio that combines the insights and skills of a highly experienced portfolio management team leveraging their global reach.

Risks

The fund may employ higher-risk strategies within fixed income and currency markets, and may take both long and short positions utilizing derivatives. This may result in additional risks, particularly counterparty risk. Depending on the credit quality, default risk is higher with corporate bonds than with government bonds and higher with high-yield or emerging market bonds than with investment grade corporate and government bonds. Changes in interest rates, credit spreads and exchange rates may have an impact on the fund's value. Emerging markets are at an early stage of development, which may involve a high level of price volatility and other specific risks (transparency, regulatory hurdles, corporate governance, political and social challenges) and liquidity may be limited. Increased portfolio flexibility may increase the risk of PM decisions adversely impacting performance. All investments are subject to fluctuations. Every fund has specific risks, which can significantly increase under unusual market conditions. The above does require that investors have a corresponding risk tolerance and capacity.
