This Annual Report and Audited Financial Statements (the "Reports and Accounts") may be translated into other languages. Any such translation shall only contain the same information and have the same meaning as the English language Report and Accounts. To the extent that there is any inconsistency between the English language Report and Accounts and the Report and Accounts in another language, the English language Report and Accounts will prevail, except to the extent (and only to the extent) that it is required by law of any jurisdiction where the shares are sold, that in an action based upon disclosure in a Report and Accounts in a language other than English, the language of the Report and Accounts on which such action is based shall prevail. Any disputes as to the terms of the Report and Accounts, regardless of the language of the Report and Accounts, shall be governed by and construed in accordance with the laws of Ireland.

<sup>\*</sup> Independent Directors.

<sup>\*\*</sup> Members of the Audit Committee.

# **Directors' Report**

The Board of Directors (the "Directors") present their annual report together with the audited financial statements for the financial year ended 31 March 2019. Lazard Global Investment Funds plc (the "Company") is an open ended investment company with variable capital structured as an umbrella fund with segregated liability between sub-funds (individually referred to as the "Fund" and collectively as the "Funds"), which at the year-end had 15 Funds (31 March 2018: 8 Funds) in existence.

### Statement of Directors' Responsibilities

The Directors are responsible for preparing the Directors' report and the financial statements in accordance with Irish law.

Irish law requires the Directors to prepare financial statements for each financial year that gives a true and fair view of the Company's assets, liabilities and financial position as at the end of the financial year and of the profit or loss of the Company for the financial year. Under that law the Directors have prepared the financial statements in accordance with Generally Accepted Accounting Practice in Ireland (accounting standards issued by the Financial Reporting Council including Financial Reporting Standard 102 "The Financial Reporting Standard applicable in the United Kingdom and Republic of Ireland" ("FRS102").

Under Irish law, the Directors shall not approve the financial statements unless they are satisfied that they give a true and fair view of the Company's assets, liabilities and financial position as at the end of the financial year and the profit or loss of the Company for the financial year.

In preparing these financial statements, the Directors are required to:

- select suitable accounting policies and then apply them consistently;
- · make judgements and estimates that are reasonable and prudent;
- state whether the financial statements have been prepared in accordance with applicable accounting standards and identify the standards in question, subject to any material departures from those standards being disclosed and explained in the notes to the financial statements; and
- prepare the financial statements on the going concern basis unless it is inappropriate to presume that the Company will continue
  in business.

The Directors are responsible for keeping adequate accounting records that are sufficient to:

- · correctly record and explain the transactions of the Company;
- enable, at any time, the assets, liabilities, financial position and profit or loss of the Company to be determined with reasonable accuracy; and
- enable the Directors to ensure that the financial statements comply with the Irish Companies Act 2014 and enable those financial statements to be audited.

The Directors are also responsible for safeguarding the assets of the Company and hence for taking reasonable steps for the prevention and detection of fraud and other irregularities.

The measures taken by the Directors to ensure compliance with the Company's obligation to keep adequate accounting records are through the appointment of an experienced administrator, State Street Fund Services (Ireland) Limited, (the "Administrator"), and through such appointment, the use of appropriate systems and procedures. The accounting records are held at the office of the Administrator. Under the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 (as amended), (the "UCITS Regulations") and the Central Bank's (Supervision and Enforcement) Act 2013 (section 48(1)) UCITS Regulations 2015 (as amended), (the "Central Bank UCITS Regulations"), the Directors are required to entrust the assets of the Company to a depositary for safe-keeping. In carrying out this duty, the Company has delegated custody of the Company's assets to State Street Custodial Services (Ireland) Limited, (the "Depositary"). Both the Administrator and the Depositary are regulated by and under the supervision of the Central Bank of Ireland (the "Central Bank").

Audited annual reports and unaudited interim reports are available on www.lazardassetmanagement.com. The Directors are responsible for the maintenance and integrity of the financial statements published on this website. Information published on the internet is accessible in many countries with different legal requirements. Legislation in the Republic of Ireland governing the preparation and dissemination of financial statements may differ from legislation in other jurisdictions.

### **Statement of Directors' Compliance**

The Directors acknowledge that they are responsible for securing the Company's compliance with the relevant obligations as set out in Section 225 of the Companies Act 2014 and all tax law within the Republic of Ireland (the "relevant obligations").

The Directors confirm that:

- 1. A compliance policy statement has been drawn up that sets out policies, which in the Directors' opinion are appropriate to the Company, respecting compliance by the Company with its relevant obligations.
- 2. Appropriate arrangements or structures are in place that, in the Directors' opinion, are designed to secure material compliance with the Company's relevant obligations; and
- 3. During the financial year, the arrangements or structures referred to in (2) have been reviewed.

In formulating and putting in place those arrangements and structures designed to provide the Directors with reasonable assurance of material compliance with those relevant obligations, the Directors have relied upon advice, guidance and assistance of employees and advisers who the Directors believe have the requisite knowledge and experience to undertake this.

These relevant obligations as set out in Section 225 of the Companies Act 2014 are separate from and additional to the legal and regulatory requirements to which the Company is subject by virtue of its regulation by the Central Bank.

#### **Connected Person Transactions**

In accordance with the requirements of the Central Bank UCITS Regulations 41(1), any transaction carried out with the Company by its management company or depositary, and the delegates or sub-delegates of such a management company or depositary (excluding any non-group company sub-custodians appointed by a depositary), and any associated or group company of such a management company, depositary, delegate or sub-delegate ("connected persons") must be carried out as if negotiated at arm's length. Such transactions must be in the best interests of the shareholders. In addition to those transactions, there are also transactions carried out by connected persons on behalf of the Company to which the Directors have no direct access and in respect of which the Directors must rely upon assurances from its delegates that the connected persons carrying out those transactions do carry them out on a similar basis.

Shareholders should have regard to the governance structure of the Company as more particularly described in the Corporate Governance Statement section of this Directors' Report and the roles and responsibilities of the Company's respective delegates subject to the overall supervision of the Board. Further, shareholders should refer to the Prospectus which identifies many of the connected person transactions and the general nature of the contractual arrangements with the principal connected persons but it is not exhaustive of all connected person transactions. Shareholders should also refer to the provisions of the Prospectus dealing with conflicts of interest.

Therefore, having regard to confirmations from the Company's management and its relevant delegates, the Directors of the Company are satisfied that:

- (i) there are arrangements (as evidenced by written procedures documented by Lazard Fund Managers (Ireland) Limited (the "Manager")) in place to ensure that the obligations described above are applied to all transactions with connected persons; and
- (ii) transactions with connected persons entered into during the financial year complied with these obligations, as attested by the Manager and where relevant the Depositary, through regular updates to the Directors.

Details of fees paid to related parties and certain connected persons are set out in Note 3 and Note 12 to the financial statements. However, shareholders should understand that not all "connected persons" are related parties as such latter expression is defined by Section 33 of FRS 102.

### **Principal Activities**

The investment objectives of each Fund within the Company are set out in the Prospectus. The Company is authorised by the Central Bank as a UCITS pursuant to the UCITS Regulations and the Central Bank UCITS Regulations.

### **Review of Business and Future Developments**

The Investment Managers' Reports contain a review of the factors which contributed to the performance for the financial year. The Directors do not anticipate any changes in the structure of the Company or investment objectives of any of the Funds in the immediate future. Lazard Emerging Markets Corporate Debt Fund has been approved by the Central Bank, but this Fund has not yet launched. Lazard European High Yield Fund was noted by the Central Bank however it has not yet launched. Lazard Opportunities Fund was fully redeemed on 7 November 2016, Lazard Global Hexagon Equity Fund was fully redeemed on 18 August 2017 and Lazard US Fundamental Alternative Fund was fully redeemed on 13 September 2018. Lazard Rathmore Alternative Fund launched on 1 May 2018, Lazard Commodities Fund launched on 23 July 2018 and Lazard Scandinavian High Quality Bond Fund launched on 7 January 2019.

### **Potential Implication of Brexit**

Following the UK's decision to leave the EU after the referendum held on 23 June 2016, the Company has been considering the impact that this decision will have on its business. Whilst the medium to long-term consequences of the decision to leave the EU remain uncertain, there could be some short term volatility which could have a negative impact on general economic conditions in the UK, which in turn may have a negative impact elsewhere in the EU and more widely. Until the terms of the UK exit from the EU are clearer, it is not yet possible to determine with certainty the precise impact it may have on the Company although preparations have been made for certain eventualities.

### **Risk Management Objectives and Policies**

Information in relation to the Company's risk management objectives and policies are included in Note 9 to the financial statements.

#### **Results and Dividends**

The results and distributions for the financial year are set out in the Statement of Comprehensive Income on pages 32, 33, 34 and 35. Please see Notes 14 and 16 for details of any distributions paid and payable during the financial year ended 31 March 2019.

### Significant Events During the Financial Year and Since the Financial Year End

Please see Notes 15 and 16 for details of any significant events during the financial year and since the financial year end.

#### **Directors**

The names of the persons who were Directors of the Company during the financial year ended 31 March 2019 are set out below:

Michael Allen (British)\*\* (Resigned 25 June 2019) Gavin Caldwell (Irish)\*/\*\* Andreas Hübner (German) Daniel Morrissey (Irish)\*/\*\* William Smith (British) (Resigned 30 April 2018) Jeremy Taylor (British)\*\* (Appointed 30 April 2018)

All Directors are Non-Executive.

All Directors of the Company are also Directors of the Manager.

# **Directors' and Secretary's Interests**

Andreas Hübner and Jeremy Taylor are full time executives, and up to 28 June 2019, Michael Allen was a full time executive, of the Lazard group as well as Directors of the Company. Michael Allen, Andreas Hübner and Jeremy Taylor are not entitled to any Directors' fees from the Company. William Smith was a full time executive of the Lazard Group and resigned as a Director on 30 April 2018. William Smith was not entitled to any Directors' fees from the Company. Some of the Directors of the Company hold indirectly through employee benefit schemes a non material amount of Shares in the Company at the financial year ended 31 March 2019 and 31 March 2018.

Directors' fees payable by the Company are disclosed in Note 3 to the financial statements.

# **Transactions Involving Directors**

As contemplated by the Corporate Governance Code issued by Irish Funds (see below), Letters of Appointment have been entered into between the Company and each of the Directors, all terminable after three months notice.

<sup>\*</sup> Independent Directors.

<sup>\*\*</sup> Members of the Audit Committee.

### **Transactions Involving Directors (continued)**

Daniel Morrissey is a Director of the Company and is also a partner of William Fry (the Company's legal advisers as to Irish Law and who also provide Global Foreign Registration Services to the Company). The partners of William Fry own Wilton Secretarial Limited (the "Secretary"). Accordingly, Daniel Morrissey has a beneficial interest under the Irish Companies Act 2014 in legal and secretarial fees paid to William Fry and the Secretary and amounts of USD 267,706 were paid for the financial year ended 31 March 2019 (31 March 2018: USD 396,491).

John Donohoe was a Director of the Company until his resignation effective 5 August 2017 and is a founder and group CEO of Carne Global Financial Services Limited who provided directors support and MLRO services to the Manager and the Company. There were payments made to Carne Global Financial Services Limited for directors support and MLRO services of USD Nil and USD 9,727 respectively for the financial year ended 31 March 2019 (31 March 2018: USD 2,045 and USD 9,953 respectively).

All of the Directors are also directors of the Manager and have an interest in fees paid by the Company to the Manager.

The Directors are not aware of any other contracts or arrangements of any significance in relation to the business of the Company, other than what is disclosed above in the Directors' and Secretary's Interests section.

### **UK Reporting Status**

An application has been submitted and approved by Her Majesty's Revenue and Customs ("HMRC") for offshore fund reporting status. This is relevant to UK tax payers only.

### **Corporate Governance Statement**

Although there is no specific statutory corporate governance code applicable to Irish investment funds, the Company is subject to corporate governance practices imposed by:

- The Irish Companies Act 2014 which is available for inspection at the registered office of the Company and may also be obtained at www.irishstatutebook.ie.
- The Constitution (formerly known as the memorandum and articles of association) which is available for inspection at the registered office of the Company at 2 Grand Canal Square, Dublin 2, D02 A342, Ireland and at the Companies Registration Office in Ireland.
- The Central Bank in their Central Bank UCITS Regulations which can be obtained from the Central Bank's website at: www.centralbank.ie and which are available for inspection at the registered office of the Company.

A corporate governance code (the "IF Code") was issued by Irish Funds in December 2011 that can be adopted on a voluntary basis by Irish authorised investment funds. The IF Code may be inspected on/obtained from www.irishfunds.ie. In December 2012, the Directors adopted the IF Code having regard for certain other key pillars of governance within the investment fund governance structure, including:

- the role of the Lazard Asset Management Limited (the "Promoter") unique within the investment fund structure (which is, or a related company of which is, normally the investment manager of the investment fund), as recognised by the Central Bank, in supporting the corporate governance culture of the Company; and
- the uniqueness of the independent segregation of duties between the Investment Managers, the Administrator (with responsibility for the calculation of the net asset value, amongst other duties) and the independent Depositary (with responsibility for safeguarding the assets of the Company and overseeing how the Company is managed, amongst other duties), such segregation of duties/functions being achieved through delegation of respective responsibilities to and appointment of suitably qualified regulated third party entities which are subject to regulatory supervision.

The Company has no employees and the Directors are all non-executive. Consistent with the regulatory framework applicable to investment fund companies such as the Company (and in contrast to normal operating companies with a full time executive management and employees), the Company, consequently, operates under the delegated model whereby it has delegated management (including investment management), administration, depositary/safekeeping of assets and distribution functions to third parties without abrogating the Directors' overall responsibility. The Directors have in place mechanisms for monitoring the exercise of such delegated functions, which are always subject to the supervision and direction of the Directors.

### **Corporate Governance Statement (continued)**

These delegations of functions and the appointment of regulated third party entities are detailed in the Company's Prospectus. In summary, they are:

- 1. The Company has appointed the Manager as its Manager pursuant to the Management Agreement. Under the terms of the Management Agreement, the Manager has responsibility for the management and administration of the Company's affairs and the distribution of the Shares of the Funds. The Manager is regulated by and under the supervision of the Central Bank;
- 2. The Manager has delegated the performance of the investment management functions in respect of the Company and of its Funds to Lazard Asset Management LLC and to Lazard Asset Management (Deutschland) GmbH ("the Investment Managers"). The Investment Managers have direct responsibility for the decisions relating to the day-to-day running of the Funds which they manage and are accountable to the Directors of the Company for the investment performance of the Funds. The Investment Managers have internal controls and risk management processes in place to ensure that all applicable risks pertaining to the management of the Funds are identified, monitored and managed at all times and appropriate reporting is made to the Directors on a regular basis. The Investment Managers are regulated by and under the supervision of the regulator of their respective operating jurisdiction, namely the Securities and Exchange Commission of the United States and the Bundesanstalt für Finanzdienstleistungsaufsicht (BaFin);
- 3. The Manager has delegated its responsibility as Administrator, Registrar and Transfer Agent to the Administrator. This entity has responsibility for the day-to-day administration of the Company and the Funds including the calculation of the net asset values. The Administrator is regulated by and under the supervision of the Central Bank;
- 4. In addition to the Manager's own distribution activities, the Manager has delegated the distribution of the Funds of the Company to the entities described in the Prospectus. These entities are regulated by and subject to the supervision of the regulators of their respective operating jurisdictions.
- 5. The Company also has appointed the Depositary as depositary of its assets. This entity has responsibility for the safekeeping of such assets in accordance with the UCITS Regulations and for exercising independent oversight over how the Company is managed. The Depositary is regulated by and under the supervision of the Central Bank.

The Directors receive reports on a regular (and at least quarterly) basis from each of its delegate service providers and the Depositary which enable them to assess the performance of the delegate service providers and the Depositary (as the case may be).

#### Financial Reporting Process - description of main features

The Directors are ultimately responsible for overseeing the establishment and maintenance of adequate internal control and risk management systems of the Company in relation to the financial reporting process. As the Company has no employees and all directors serve in a non-executive capacity, all functions relating to the Company's financial reporting process, including the preparation of the Company's financial statements, have been outsourced to the Administrator.

The Manager has appointed the Administrator to maintain the accounting records of the Company independently of the Investment Managers and the Depositary and through this appointment the Directors have procedures in place to ensure that all relevant accounting records are properly maintained and are readily available, including production of annual and half yearly financial statements.

Subject to the supervision of the Directors and the Manager, the appointment of the Administrator is intended to manage rather than eliminate the risk of failure to achieve the Company's financial reporting objectives and can only provide reasonable and not absolute assurance against material misstatement or loss.

The Directors are responsible for assessing the risk of irregularities whether caused by fraud or error in financial reporting and for ensuring that processes are in place for the timely identification of internal and external matters with a potential effect on financial reporting. The appointment of an administrator (which is regulated by the Central Bank) independent of the investment managers to the Company is intended to mitigate though not eliminate the risk of fraud or irregularities which may impact the financial statements of the Company.

During the financial year of these financial statements, the Directors were responsible for the review and approval of the annual financial statements as set out in the Statement of Directors' Responsibilities. The statutory financial statements are required to be audited by independent auditors who report annually to the Directors on their findings. The Directors monitor and evaluate the independent auditor's performance, qualifications and independence. As part of their review procedures, the Directors receive presentations from relevant parties including consideration of Irish accounting standards and their impact on the annual financial statements, and presentations and reports on the audit process. The Directors evaluate and discuss significant accounting and reporting issues as the need arises.

### **Corporate Governance Statement (continued)**

#### **Audit Committee**

An Audit Committee, currently consisting of Daniel Morrissey, Gavin Caldwell and, up to 25 June 2019, Michael Allen, and as of 25 June 2019 Jeremy Taylor, who are all non-executive directors, has been formed for quite some years now and it is charged with oversight of the Company's audit and financial control functions.

The Directors acknowledge that they are required, under Section 167 of the Companies Act 2014, to consider the establishment of an audit committee which meets the requirements of that Section. Section 167 requires, amongst other things, that the members of such an audit committee shall include at least one independent director, meaning a person who is

- (i) a non-executive director;
- (ii) possesses the required degree of independence so as to enable the director to contribute effectively to the committee's functions (being a director who has not, or in the period of the three years preceding his or her appointment to the committee, did not have, a material business relationship with the company); and
- (iii) is a person who has competence in accounting or auditing.

As noted under the heading "Transactions Involving Directors", Daniel Morrissey is a partner in William Fry who provide legal services to the Company. Michael Allen was up to 28 June 2019 and Jeremy Taylor is a full time executive of the Lazard group. All of these Directors may be considered as not meeting the relevant independence criteria prescribed in Section 167. However, the Directors believe that Michael Allen, being a full time executive of the Lazard group, up to 28 June 2019 and Jeremy Taylor being a full time executive of the Lazard Group creates an additional connectivity between the Directors and the Lazard group which has the responsibility to manage the Company in accordance with all legal and regulatory requirements of the UCITS regime (including, in particular here, the management function of capital and financial control) and that, accordingly, this connectivity enhances the control environment of the Company. Daniel Morrissey and Gavin Caldwell are fully independent of the financial statement production process and of decisions related to the valuation of the assets held by the Company. Gavin Caldwell holds a Business Studies degree from Trinity College, Dublin, Ireland and along with Daniel Morrissey has significant and lengthy experience in a directorship capacity of companies and therefore is well seasoned in reviewing and approving the financial statements of companies.

Having given the matter due consideration, the Directors have decided not to establish an audit committee which meets the specific requirements of Section 167, in particular the requirements at (iii) above, as in the Directors' opinion, at this time, the responsibilities of an audit committee under Section 167 are already being competently fulfilled by virtue of the Board's existing and long established Audit Committee and by virtue of the corporate governance regime and the existing arrangements and structures in place designed to secure compliance with the extensive legal and regulatory obligations imposed on UCITS investment companies in relation to the Company's management, including the Company's financial reporting process as outlined above.

The audited annual financial statements of the Company are required to be approved by the Directors and filed with the Central Bank.

#### **Composition of the Board of Directors**

For the appointment and replacement of Directors, the Company is governed by its Constitution and Irish statute comprising the Irish Companies Act 2014 as applicable to investment funds. The Constitution may be amended by special resolution of the shareholders. The Constitution does not provide for retirement of Directors by rotation. However, the Directors may be removed by the shareholders by ordinary resolution in accordance with the procedures established under the Irish Companies Act 2014. A Director may also be removed upon notice from the Company in accordance with the Letter of Appointment between him and the Company.

The Directors are responsible for managing the business affairs of the Company in accordance with the Constitution. There are currently four directors (refer to page 8 for details), all of whom are non-executive. Each of Michael Allen (until 28 June 2019), Andreas Hübner and Jeremy Taylor are full time executives of the Lazard Group. Each of Gavin Caldwell and Daniel Morrissey are regarded as independent directors having regard to the terms of the IF Code on Independence and Independent Directors although a firm in which Daniel Morrissey has an interest is in receipt of professional fees from the Company. Consequently, Daniel Morrissey does not meet the requirements of paragraph 4.1 of the IF Code which requirements are required to be met by one Director and which requirements are met by Gavin Caldwell. All related party transactions during the financial year are detailed in the notes to the financial statements.

The Directors meet at least quarterly. Other than the Audit Committee, there are no permanent sub-committees of the Directors.

### **Corporate Governance Statement (continued)**

#### **Disclosure of Information to the Auditors**

So far as each person who was a Director at the date of approving this report is aware, there is no relevant audit information, being information needed by the auditors in connection with preparing their report, which they have not disclosed to the auditors. Each Director has taken all the steps that they are obliged to take as a Director in order to make themselves aware of any relevant audit information and to ensure that it is disclosed to the auditors.

#### **Independent Auditors**

The independent auditors, PricewaterhouseCoopers have indicated their willingness to remain in office in accordance with Section 383 of the Irish Companies Act 2014.

#### On behalf on the Board of Directors

Director: Daniel Morrissey Director: Gavin Caldwell

Date: 3 July 2019

# **Investment Manager's Report**

# **Lazard Emerging Markets Bond Fund**

#### **Investment Review**

Over the twelve-month period ending 31 March 2019, the Lazard Emerging Markets Bond Fund (the "Fund") returned 2.30% in US dollar terms, against the J.P. Morgan EMBI Global Diversified Index, which returned 4.21%<sup>1</sup>.

#### **Market Review**

Hard currency emerging market credit spreads widened during 2018, and rallied significantly in the first quarter of 2019, as the asset class registered its largest quarterly gain since 2010. Credit spreads ended the period 48 basis points (bps) wider at 351 bps. Returns were boosted by the rally in US Treasuries, with the yield on the 10-year ending the period roughly 35 bps lower as the US Federal Reserve (the Fed) lowered its inflation expectations, and indicated it would refrain from raising interest rates in 2019. Consistent with the market environment of spreads widening and lower US Treasury yields, investment grade countries outperformed high yield countries by over 2.5% during the period.

#### **Portfolio Review**

#### What Contributed to Returns:

- An overweight position in Angolan sovereign credit outperformed as President João Lourenço pursued reforms and initiated discussions with the International Monetary Fund
- A modest overweight position in the stressed debt of Mozambique was also beneficial, due to positive developments in that country's restructuring process
- The portfolio's off-index allocation to corporate credit also helped, as corporate credit outperformed sovereign credit during the period

#### What Detracted from Returns:

- Within the overweight allocation to high yield countries, Argentina was the largest detractor from relative performance against the backdrop of a less favourable global economic environment, high domestic inflation, and policy missteps
- Several other top active risk positions including Egypt, Kenya, and Venezuela also lagged amid the general risk-off environment, weakness in oil prices and, in certain cases, negative idiosyncratic developments
- A tactical overweight position in Lebanon early in the period also detracted, as the country underperformed on Prime Minister Saad Hariri's weakened mandate following parliamentary elections during the second quarter of 2018

#### **Outlook**

While yields for hard currency emerging markets debt have eased somewhat from the post global financial crisis highs at the start of 2019, we believe the asset class is still poised to deliver attractive returns both on an absolute basis and relative to other fixed income alternatives. Hard currency debt continues to provide an attractive source of returns and a healthy cushion against future volatility. With few exceptions, fundamentals are solid across the investment universe. While we still see value in the asset class, we have reduced the strategy's overall risk as markets have rallied and valuations have approached our targets. We have reduced exposure to certain high yield credits which in our view, provide less compensation for the risks. Meanwhile, we have added exposure to more defensive credits, such as Panama, the Philippines, Peru, Chile, and Hungary. With the Fed's capitulation, we are less concerned about rising rates and, accordingly, are more comfortable with the risk-return profile of investment grade credits in general. As markets rally, we will look to reduce exposure to certain high yield credits, where the risk-return profile has become less favourable. We continue to look for bottom-up opportunities that provide attractive valuations, especially as new issuance moves through the primary market pipeline. We remain positive on certain off-index short-dated corporates, which look attractive compared to similar maturity sovereigns.

# **Lazard Emerging Markets Local Debt Fund**

#### **Investment Review**

Over the twelve-month period ending 31 March 2019, the Lazard Emerging Markets Local Debt Fund (the "Fund") returned -8.86% in US dollar terms, against the J.P. Morgan GBI-EM Global Diversified Index, which returned -7.58%.

#### **Market Review**

During the period, local currency emerging markets debt fell 7.58%, as measured in US dollar terms. The decline in the asset class was mainly driven by spot depreciation in emerging markets currencies, which ended the period almost 11% lower versus the US dollar on a spot basis. Meanwhile, local yields ended the period 16 basis points (bps) higher at 6.16%, in contrast to the roughly 35 bps decline for the 10-year US Treasury yield. The entire loss for the period occurred in the second quarter of 2018, when the index posted its second-largest quarterly drawdown since inception in 2002. US dollar strength and tighter financial conditions exposed vulnerabilities in certain countries, namely Argentina and Turkey, which suffered from large external financing needs and weak policy credibility.

#### **Portfolio Review**

#### **What Contributed to Returns:**

- The portfolio's duration positioning in individual countries
- In local rates, underweight duration positioning in Europe was beneficial
- In local rates, overweight positions in select markets such as Peru and Mexico helped

#### What Detracted from Returns:

- · An overweight position in the Russian rouble which was dragged down mainly by the heightened risk of additional US sanctions
- An overweight position in the Brazilian Real which underperformed due to the uncertainty in the lead-up to the October 2018 presidential election
- Modest tactical exposure to the Argentine peso detracted, primarily during the second quarter of 2018

#### Outlook

We continue to deploy relatively low levels of beta risk, and are instead focusing more on bottom-up alpha opportunities. In general, low inflation, particularly in the higher yielding countries, should allow for countercyclical monetary policies, and lower real yields across most emerging markets. From a bottom-up perspective, we generally see the best duration opportunities in select higher yielding countries, such as Brazil, Indonesia, and Mexico. We also see attractive opportunities in Peru, which is currently the portfolio's largest overweight duration position as the country benefits from a steep yield curve, low inflation, and a favourable fiscal outlook. Our primary duration underweights continue to be in Central and Eastern Europe, including Hungary and Poland, and in Asia, Thailand. Real rates in these regions are among the lowest in our investment universe, and are in fact negative in Hungary.

In currencies, we see opportunities in both high and low-yielding countries. The Brazilian real remains our top active overweight among the high yielders. Within Europe, we hold an overweight in the Hungarian forint, held primarily against the euro, based on our view that Hungary's central bank is moving away from its highly accommodative stance, in which it effectively followed the European Central Bank's lead. It has shifted to a policy that is more hawkish, in recognition of rising core inflation. In Asia, we remain overweight the Philippine peso, primarily against the Taiwan dollar.

# Lazard Emerging Markets Total Return Debt Fund

#### **Investment Review**

Over the twelve-month period ending 31 March 2019, the Lazard Emerging Markets Total Return Debt Fund (the "Fund") returned -5.31% in US dollar terms<sup>1</sup>.

#### **Market Review**

For comparison purposes, emerging markets debt, as measured by the 50% J.P. Morgan EMBI Global Diversified/50% J.P. Morgan GBI-EM Global Diversified Index fell 1.78% as measured in US dollar terms during the period; local currency debt declined 7.58% and external debt returned 4.21%. The entire loss for the period came in the second quarter of 2018, when the index posted the largest quarterly drawdown in its 15-year history of -7%. US dollar strength and tighter financial conditions exposed vulnerabilities in certain countries, namely Argentina and Turkey, which suffered from large external financing needs and weak policy credibility. The decline in local currency debt was mainly driven by spot depreciation in emerging markets currencies, which ended the period almost 11% lower versus the US dollar on a spot basis. Meanwhile, external debt posted a positive return during the period, primarily driven by carry, as external credit spreads ended the period 48 basis points (bps) wider at 351 bps.

#### **Portfolio Review**

#### **What Contributed to Returns:**

- The fund's idiosyncratic local rates positions contributed to absolute returns, particularly in Brazil and Mexico
- The allocation to defensive corporates added to absolute returns as corporate credit generated absolute gains of 4.6% during the period
- Gains in key sovereign credit long positions, including Angola and Brazil

#### What Detracted from Returns:

- The fund's outright long position in emerging market currencies, particularly during the second quarter of 2018
- · Long positions in the Brazilian real, Russian rouble and South African rand were among the most notable detractors
- Losses from long positions in select higher yielding sovereign credit, most notably Argentina, which sold off amid a less favourable global economic environment, high domestic inflation, and policy missteps

#### **Outlook**

We continue to believe emerging markets debt provides an attractive source of returns and a potentially healthy cushion against future volatility, but we have reduced risk since the beginning of the year as valuations have converged with our targets. This decrease has mainly come in high yield sovereign credit. Meanwhile, we have increased exposure to investment grade credits with solid fundamentals and attractive yields, such as Panama and Chile. We have maintained our short risk position in Mexican credit default swaps (CDS) and built a short risk positions in Russian and South African CDS. All are relatively cheap hedges for our long credit positions, in our view, given the low carry on these positions. Moreover, we believe Mexico and South Africa are likely to experience deteriorating fundamentals over the medium term. We continue to hold a roughly 20% exposure to defensive corporates, which provide a modicum of yield with relatively low credit and interest rate risk.

In local rates, we continue to emphasise Mexico and Brazil. In Mexico, we favour local rates as real yields are attractive and valuations have adjusted to reflect the increased political risks. We see room for monetary easing as we expect growth to slow and inflation to ease. In contrast, we are short Mexico on the credit side as we expect fundamentals to gradually deteriorate over the medium term, due to risks from the newly elected populist government and troubled state-owned entities, such as Pemex. With spreads at approximately 130 bps, we view the Mexican CDS position as a relatively inexpensive source of protection with limited downside risk as we see little room for spread tightening.

# **Lazard Emerging Markets Total Return Debt Fund (continued)**

### **Outlook (continued)**

In currencies, we are currently long the Hungarian forint against the euro, as Hungary's central bank has taken a more hawkish stance. The fund currently yields nearly 5%, providing more than adequate compensation for the risks, in our view. We have a high degree of conviction in the portfolio's current positioning and believe that the portfolio is well positioned to earn attractive risk-adjusted returns over the medium term, while protecting against future bouts of volatility.

# Lazard Emerging Markets Debt Blend Fund

#### **Investment Review**

Over the twelve-month period ending 31 March 2019, the Lazard Emerging Markets Debt Blend Fund (the "Fund") returned -4.48% in US dollar terms, against the 50% J.P. Morgan EMBI Global Diversified ex-CCC/50% J.P. Morgan GBI-EM Global Diversified Index, which returned  $-1.58\%^1$ .

#### **Market Review**

During the year under review, local currency emerging market debt declined -7.58% in US dollar terms, while external emerging market debt returned 4.21%. The entire loss for the period was generated in the second quarter of 2018, when the benchmark posted a return of -7%, the largest quarterly drawdown in its 15-year history. US dollar strength and tighter financial conditions exposed vulnerabilities in certain countries, primarily Argentina and Turkey, which suffered from large external financing needs and weak policy credibility. The decline in local currency debt was mainly driven by spot depreciation in emerging markets currencies, which ended the period down almost 11% on a spot basis versus the US dollar. Meanwhile, external debt posted a positive return during the period, primarily driven by carry, as external credit spreads ended the period 48 basis points (bps) wider at 351 bps.

#### **Portfolio Review**

#### **What Contributed to Returns:**

- An overweight position in Angolan sovereign credit outperformed as President João Lourenço pursued reforms, and initiated discussions with the International Monetary Fund
- In local currency debt, bottom-up duration positioning was beneficial. This included underweights in Central and European countries, and overweight positioning in a number of select markets, including Peru and Mexico
- The portfolio's off-index allocation to corporate credit outperformed the overall asset class during the period

#### What Detracted from Returns:

- Bottom-up sovereign credit selection was the primary driver of underperformance. Among high yield countries, Argentina underperformed amid a less favourable global economic environment, high domestic inflation, and policy missteps
- Several other top active risk positions including Egypt and Kenya also lagged amid the general risk-off environment, the weakness in oil prices and, in certain cases, negative idiosyncratic developments
- Overweight positions in select higher yielding currencies, including the Russian rouble and the Brazilian real detracted, as did modest tactical exposure to the Argentine peso

#### **Outlook**

From a top-down perspective, we have generally maintained a neutral asset allocation as we project both hard and local currency debt to earn equity-like returns over the next 12 months. We have brought down the portfolio's overall risk profile in recent months by reducing exposure to high yield countries such as Turkey, Argentina, and Brazil, while increasing investment grade exposure. Within investment grade, we have added to countries we believe possess solid fundamentals and attractive yields relative to other investment grade alternatives, such as Panama; we also pared our underweights to some of the most fundamentally stable countries, such as the Philippines, Peru, Chile, and Hungary.

# Lazard Emerging Markets Debt Blend Fund (continued)

### **Outlook (continued)**

In local debt, we continue to see idiosyncratic opportunities for falling yields and/or spot currency appreciation among a select group of countries. We continue to favour duration overweights in Peru, Mexico, and Brazil, against underweights in low-yielding Asian and Central and Eastern European countries. We also see further upside potential in the Brazilian real, although we have pared our position as valuations have approached our targets. We also see attractive relative value opportunities in currencies within Asia and Europe.

All data contained herein is sourced by Lazard Asset Management unless otherwise noted.

<sup>1</sup> Source: Lazard, NAV to NAV Price, Gross Income Reinvested in US dollars, 'A' accumulation share class Net of fees, to 31 March 2019. Index returns shown on a total return basis.

# Lazard Emerging Markets Debt Unrestricted Blend Fund

#### **Investment Review**

Over the twelve-month period ending 31 March 2019, the Lazard Emerging Markets Debt Unrestricted Blend Fund returned -4.59% in US dollar terms, against the 50% J.P. Morgan EMBI Global Diversified Index/50% J.P. Morgan GBI-EM Global Diversified Index, which returned -1.78% 1.

#### **Market Review**

During the year under review, local currency emerging market debt declined -7.58% in US dollar terms, while external emerging market debt returned 4.21%. The entire loss for the period was generated in the second quarter of 2018, when the benchmark posted a return of -7%, the largest quarterly drawdown in its 15-year history. US dollar strength and tighter financial conditions exposed vulnerabilities in certain countries, primarily Argentina and Turkey, which suffered from large external financing needs and weak policy credibility. The decline in local currency debt was mainly driven by spot depreciation in emerging markets currencies, which ended the period down almost 11% on a spot basis versus the US dollar. Meanwhile, external debt posted a positive return during the period, primarily driven by carry, as external credit spreads ended the period 48 basis points (bps) wider at 351 bps.

#### **Portfolio Review**

#### **What Contributed to Returns**

- In local currency debt, bottom-up duration positioning was beneficial. Within this allocation, underweight duration positioning in Europe contributed to positive performance, as did overweight positions in select markets including Peru and Mexico
- A modest overweight position in the stressed debt of Mozambique was also beneficial due to positive developments in the country's restructuring process
- The portfolio's off-index allocation to corporate credit also helped, as corporate credit outperformed sovereign credit during the period

#### What Detracted from Returns

- The primary driver of underperformance was bottom-up sovereign credit selection. Argentina was the largest detractor from relative performance against the backdrop of a less favourable global economic environment, high domestic inflation, and policy missteps
- Several other top active risk positions including Egypt, Kenya, and Venezuela also lagged amid the general risk-off environment, weakness in oil prices and, in certain cases, negative idiosyncratic developments
- Positioning in individual currencies detracted, and in particular, overweight holdings in select higher yielding currencies including
  the Russian rouble and Brazilian real. A modest tactical exposure to the Argentine peso also detracted, primarily during the
  second quarter of 2018

#### **Outlook**

From a top-down perspective, we have generally maintained a neutral asset allocation as we project both hard and local currency debt to earn equity-like returns over the next 12 months. We have lowered the portfolio's overall risk profile in recent months by reducing exposure to high yield countries such as Turkey, Argentina, and Brazil, while increasing investment grade exposure. Within investment grade, we have added to countries that we believe have solid fundamentals and attractive yields relative to other investment grade alternatives, such as Panama, while also paring our underweights in some of the most fundamentally stable countries, such as the Philippines, Peru, Chile, and Hungary.

# Lazard Emerging Markets Debt Unrestricted Blend Fund (continued)

### Outlook (continued)

In local debt, we continue to see idiosyncratic opportunities for falling yields and/or spot currency appreciation among a select group of countries. We continue to favour duration overweights in Peru, Mexico, and Brazil against underweights in low-yielding Asian and Central and Eastern European countries. We also see further upside potential in the Brazilian real, although we have pared our position as valuations have approached our targets. We also see attractive relative value opportunities in currencies within Asia and Europe.

### **Lazard Diversified Return Fund**

#### **Investment Review**

Over the twelve-month period ending 31 March 2019, the Lazard Diversified Return Fund (the "Fund") returned -1.09% in US dollar terms<sup>1</sup>.

#### **Market Review**

Global developed equities rose 4% in US dollar term during the period under review. This masked a period of volatility, with a particularly steep drawdown in the fourth quarter of 2018. A pause in US Federal Reserve (the Fed) rate hikes and some progress in US-China trade negotiations helped equity markets surge in early 2019, helping to recover some losses. US stocks led among major regions during the year, comfortably outpacing Europe, the United Kingdom, and Japan, all of which posted negative returns. Emerging markets equities were under pressure for much of the year, retreating almost 7%.

In fixed income, the bellwether US 10-year Treasury yield closed the period at 2.41%, after peaking near 3.25% in early November. Similar maturity Japanese and German bonds ended the year with yields below zero, as the bond rally in recent months was insufficient to offset the decline in the early part of the year. In this environment, the global fixed income market ended with slightly negative total returns. Together with equities, global corporate and high yield bonds rallied strongly in the first quarter of 2019, leading to a positive performance for these asset classes. Over the period, the currency market were characterised by US dollar strength against virtually all other major currencies.

#### **Portfolio Review**

#### **What Contributed to Returns:**

- · Stock selection in the consumer staples and health care sectors, and in Australia, Hong Kong and Norway
- Fixed income country allocation: overweight exposure to bonds in Australia, Canada, New Zealand, Poland, Hungary, Chile and the United States
- Currency management within fixed income: overweight exposure to the Canadian dollar and British pound; underweight exposure to the Malaysian ringgit, Russian rouble, and Swedish krona
- Within the Diversifiers allocation, contributors included the European long/short basket, the US basket, and convertibles

#### What Detracted from Returns:

- Stock selection in the consumer discretionary, industrials, information technology and materials sectors, and in Canada, Japan, Singapore and the United States. Underweight exposure to US equities and overweight exposure to Japanese equities
- · Fixed income country allocation: underweight exposure to bonds in core Europe, Japan and South Korea
- · Currency management within fixed income: overweight exposure to the Japanese yen, Mexican peso, and Australian dollar
- Within the Diversifiers allocation, the main detractor was the quantitative emerging markets long/short basket

# **Lazard Diversified Return Fund (continued)**

### **Outlook (continued)**

While the pause in the Fed's rate normalisation policy in January has increased the chances of extending the economic cycle in the United States, economic stresses in Europe, China, and Japan will have an impact on global growth. The US economy is also coming off a period of cyclically high growth. So, while corporate profits are healthy, the rate of growth has diminished significantly, which could be a headwind for markets as expectations moderate. Euro zone economies are suffering weak or negative growth, even before any potential dislocation caused by the United Kingdom leaving the European Union. Confidence and investment has been sapped by this tortured process, which will likely have further negative consequences for the region over our forecast period. US trade policy will be watched carefully as we move past negotiations with China, and on to potential reciprocal tariffs on automotive imports into the United States, which could directly impact Europe, Japan, and South Korea. In this environment, the US dollar will likely continue to be supported despite its recent strength.

All data contained herein is sourced by Lazard Asset Management unless otherwise noted.

# **Lazard European Alternative Fund**

#### **Investment Review**

Over the twelve-month period ending 31 March 2019, the Lazard European Alternative Fund (the "Fund") returned -1.51% in euro terms 1.

#### **Market Review**

Worries about the consequences of a trade war between the United States and China, the downturn in emerging markets and the end of quantitative easing overshadowed much of the period under review. A major headwind for Europe was the weakening in emerging markets, and in particular faltering economic activity in China, which is an important end market for European exports. In spite of broadly supportive economic data, there was a sharp sell-off in global markets during the fourth quarter of 2018, reflecting concerns about the direction of future world trade and tighter monetary conditions in the United States following the US Federal Reserve's December rate rise. For Europe, regional political concerns remained heightened and worries over European Union stability, particularly concerning the Italian budget, affected some stocks in Europe, especially in financials.

Global markets, including those in Europe recovered in the first quarter of 2019, delivering their best quarterly performance for four years, helped by progress on the US-China talks, and expectations that monetary policy from the major central banks will remain supportive. Technology stocks rose strongly, benefitting from the US-led rise in sector valuations and performance. Oil & gas stocks were helped by the continuing strength in the oil price which enjoyed its best quarter in almost 10 years. Despite German bund yields slipping into negative territory during March for the first time in over two years, financials reacted favourably to European Central Bank (ECB) President Mario Draghi's comments that the ECB would seek to maintain a healthy earnings environment for the sector.

#### **Portfolio Review**

#### **What Contributed to Returns:**

- · Notable gains were in the information technology sector
- By country, France was the largest contributor
- Chemical and biotechnology company Lonza

#### What Detracted from Returns:

- Financials was the worst performing sector
- Exposure to Portugal detracted the most by country
- · German delivery company Deutsche Post

#### **Outlook**

There are many conflicting messages in the market at this stage. The message from companies remains positive, reflecting the view that the first half of 2019 will be soft, but the second half will be better. So far, it seems that the first half is proving a bit weaker than expected, with a higher than usual number of profit warnings across a number of sectors, and despite the fact that many of these companies provided guidance just a few weeks previously with their 2018 results. The message from the bond market appears more negative as the US yield curve is hovering around inversion, which is a bad omen, as it is one of the most accurate indicators of an impending recession. Reassuring economic news from China is balanced at this stage by signs that the US economy is slowing from a very high level. As for us, we admit that the outlook has rarely been more uncertain, but we notice that expecting a recession is now very consensual and seems priced in by the stock market.

All data contained herein is sourced by Lazard Asset Management unless otherwise noted.

<sup>1</sup> Source: Lazard Asset Management. Performance data are on a NAV to NAV Price, Net Income Reinvested in euro terms. 'C' Accumulation share class to 31 March 2019. Index returns shown on a total return basis.

Fund Manager: Leopold Arminjon and team.

Figures refer to past performance which is not a reliable indicator of future results.

### **Lazard US Fundamental Alternative Fund**

The Lazard US Fundamental Alternative Fund closed on 13 September 2018.

#### **Market Review**

Following a selloff in the first quarter of the year, markets rallied and volatility fell, as broader comfort around the sustainability of economic growth and the outlook for US interest rates offset ongoing uncertainty about US trade policy. Economic data and corporate earnings continued to be impressive, while first and second quarter annualised GDP growth figures both exceeded expectations, and jobs growth maintained its strong pace. Late in the period, the US Federal Reserve announced that it was raising interest rates by 0.25%, and that it planned another hike before year-end.

#### Portfolio Review

#### **What Contributed to Returns:**

- A long position in information security provider CyberArk helped returns, as shares rose after the company reported broadly strong quarterly results, driven by an acceleration in product revenues
- The portfolio was also helped by a long position in railroad operator Norfolk Southern, as shares rose after the company reported broadly strong quarterly earnings, driven by favourable pricing
- Positions in exploration and production companies EOG Resources and ConocoPhillips also helped returns, as shares rose amid
  a rally in oil prices during the period

#### What Detracted from Returns:

- A long position in restaurant operator Cheesecake Factory, as the shares fell after second-quarter results were negatively affected by rising labour costs. We sold our position after the announcement in August
- The portfolio was also hurt by a short position in enterprise software company BlackLine, as the shares rose after the company reported quarterly results broadly above expectations, driven by higher subscription revenues
- A long position in chipmaker Skyworks, as shares fell along with its peers amid concerns about trade tariffs and smartphone demand trends

All data contained herein is sourced by Lazard Asset Management unless otherwise noted as at 13 September 2018

## **Lazard Commodities Fund**

#### **Investment Review**

Over the period since inception on 23 July 2018 - 31 March 2019, the Lazard Commodities Fund (the "Fund") returned -5.02% in US dollar terms, against the Bloomberg Commodity Total Return Index (BCOMTR), which returned -1.50%<sup>1</sup>.

#### **Market Review**

The period under review was one of significant volatility for commodities and global market. During the fourth quarter of 2018, tighter US monetary policy and the persistent threat of a trade war between the United States and China accelerated fears of a global slowdown. The oil price was almost 40% lower during the final quarter and the broader commodity complex, as represented by the Bloomberg Commodity Index, was down by 9.4%.

Investors quickly reversed their negative perspective to one of cautious optimism when the US Federal Reserve (the Fed) indicated that interest rate hikes would no longer be necessary for the remainder of 2019. As a consequence, commodity demand remained poor for much of the first quarter, which served to reinforce supply-side discipline.

#### Portfolio Review

#### **What Contributed to Returns:**

- Positions in gold and gold equities contributed the most to performance
- · Overweight in industrial metals, and iron ore in particular
- · Underweight positions in a number of agricultural commodities, including coffee and wheat

#### What Detracted from Returns:

- An underweight in livestock was the most significant detractor from performance
- · Equity positions in energy, although this was marginally offset by an underweight in gasoline and heating oil
- · Holdings in chemical stocks, including chlor-alkali

#### **Outlook**

Commodity cycles are driven both by supply and demand, so increased uncertainty regarding economic growth tends to increase discipline towards spending on new supply. In short, commodity producers spend less on supply and focus more on returns.

Despite the apparent about-turn by the Fed regarding interest rates, we believe that the days of free money are coming to an end, and may already be over for commodity producers. As they become more capital constrained, inventories may draw down more quickly, which should result in higher commodity prices. Any accommodation from the Fed will likely weaken the dollar, in our view, providing a further tailwind for commodity pricing.

<sup>1</sup> Source: Lazard Asset Management Limited. Performance data are on a NAV to NAV Price, Net Income Reinvested in US dollar terms, 'A' accumulation share class Net of fees, to 31 March 2019. Index returns shown on a total return basis.

Fund Manager: Terence Brennan and team.

Figures refer to past performance which is not a reliable indicator of future results.

## **Lazard Rathmore Alternative Fund**

#### **Investment Review**

Over the period since inception on 1 May 2018 - 31 March 2019, the Lazard Rathmore Alternative Fund (the "Fund") returned 2.78%<sup>1</sup>.

#### **Market Review**

Risk assets experienced numerous, significant re-pricings throughout 2018, and the S&P 500 Index (the S&P 500) experienced a draw-down of greater than -10% on three occasions during the year.

Risk appetite varied throughout the period under review, and mirrored global growth expectations, which initially were very constructive, but weakened markedly in the fourth quarter of 2018. Geopolitical events, trade tariff deliberations, Chinese growth prospects, central bank policies, recession fears and the path of global interest rates, among other considerations, were significant drivers of volatility. European, Japanese and US sovereign yields were particularly volatile. Convertible new issuance exceeded \$74 billion globally, well above last year's total.

Equities steadily improved throughout the first quarter of 2019, helped by a change in the US Federal Reserve's view on inflation expectations, and stable economic growth trends. Also contributing were improved prospects for a US/China trade deal and an increasingly accommodative European Central Bank. The S&P 500 rose 13.6% in the first quarter of 2019, with broad-based gains in most sectors. The still constructive global economic landscape, reasonably good corporate fundamentals, and fluid credit markets, supported convertible valuations broadly. It is worth noting, that while volatility declined across the board, single-name volatility remained high, particularly in select sectors, including technology, healthcare and many cyclicals.

#### **Portfolio Review**

#### What Contributed to Returns:

- Portfolio hedges, volatility monetisation, numerous special situation trades and idiosyncratic developments, including mergers & acquisitions
- Volatility broadly increased in the fourth quarter of 2018, which carried over into the first quarter of 2019. While not necessarily reflected in the VIX Index, single-name volatility remained quite high throughout the period
- The primary market remained active, and pricing in most cases favoured investors (versus issuers). In most instances, bonds traded higher on a dollar-neutral basis, on the first day of trading

### **What Detracted from Returns:**

- Mark-to-market on selected credit trades
- Mark-to-market on selected hedges
- Portfolio level hedges, including a modest interest-rate hedge

### **Outlook**

We believe, for a variety of reasons, the marked uptick in volatility witnessed since the lows of 2017 is likely to be sustained for some time. Given the convex nature of the convertible product, this should benefit the asset class, in our view. The repricing of equities in the fourth quarter of 2018, and the significant levels of new issuance have broadened the opportunity set, and significantly increased the number of issues with balanced profiles.

Interest rates also remain in focus, and more recently we have begun to see an uptick in both interest rate and equity volatility. We believe lingering questions related to US trade policy, geopolitical events, and uncertainty as it relates to 2019 corporate earnings should keep volatility elevated in the near term. That said, credit markets remain well supported and capital markets fluid, both of which are broadly supportive of the convertible asset class, in our view.

All data contained herein is sourced by Lazard Asset Management unless otherwise noted.

<sup>1</sup> Source: Lazard Asset Management Limited. Performance data are on a NAV to NAV Price, Net Income Reinvested in US dollars, 'EA' acc share class Net of fees, to 31 March 2019. Index returns shown on a total return basis.

Fund Manager: Sean Reynolds and team.

# Lazard Scandinavian High Quality Bond Fund

#### **Investment Review**

Over the period since inception on 8 January 2019 - 31 March 2019, the Lazard Scandinavian High Quality Bond Fund (the "Fund") returned -1.15% in Euro terms<sup>1</sup>.

#### **Market Review**

In the first quarter of 2019, yields in Scandinavia trended lower as the US Federal Reserve indicated it would refrain from raising interest rates in 2019. Similarly, the European Central Bank announced another round of targeted longer-term refinancing operations (TLTROs) and indicated that it was considering a tiered deposit rate system. In line with German Bunds, yield curves in Sweden and Denmark, and to a lesser extend in Norway, saw 10 year yields decline and converge with short-term rates, by approximately 20-30 basis points (bps). Norwegian rates decoupled somewhat, as the Norwegian central bank adopted a surprising hawkish stance, as a result of higher domestic inflation. In that overall yield environment, prepayment expectations on Danish callable covered bonds rose moderately. On the credit side, spreads tightened helped by an easing of global trade tensions.

#### **Portfolio Review**

#### What Contributed to Returns:

- Positioning in Danish, Swedish and Finnish bonds benefited from falling yields in those regions, amid expectations that the monetary policy of major central banks around the world would remain supportive
- While the prepayment expectations of Danish callable bonds rose moderately in the first quarter of 2019, investors were overcompensated by the premium these securities offered
- The portfolio's allocation to credit also helped, as credit spreads tightened during the first quarter of 2019 on progress in the US-China trade talks

#### What Detracted from Returns:

- Positioning at the short end of the Norwegian yield curve detracted from returns, as the Norwegian central bank indicated that it would continue to raise rates amid higher inflation as the Norwegian central bank indicated that it would continue to raise rates amid higher inflation
- The strategy induced a conservative approach towards duration, i.e. our short interest rate risk positioning led to opportunity costs as yields fell in most markets

### **Outlook**

The current macro outlook and the ongoing tensions between the United States and China on trade indicate that the current yield environment will likely persist for months to come. With constant or slightly rising interest rates, callable mortgage covered bonds offer a higher performance potential than "regular" bonds due to their substantial yield premium, and so we will maintain our allocation to Danish callable bonds. As central banks are likely to diverge within Scandinavia, we will adjust the geographical allocation accordingly. Maintaining a highly diversified, high quality portfolio combined with a low duration approach remains the cornerstone of our investment strategy.

#### Lazard Asset Management (Deutschland) GmbH

# **Depositary's Report**

### Report of the Depositary to the Shareholders

We have enquired into the conduct of Lazard Global Investment Funds plc ("the Company") for the financial year ended 31 March 2019, in our capacity as Depositary to the Company.

This report including the opinion has been prepared for and solely for the shareholders in the Company in accordance with Regulation 34, (1), (3) and (4) in Part 5 of the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011, as amended, ('the UCITS Regulations'), and for no other purpose. We do not, in giving this opinion, accept or assume responsibility for any other purpose or to any other person to whom this report is shown.

### Responsibilities of the Depositary

Our duties and responsibilities are outlined in Regulation 34, (1), (3) and (4) in Part 5 of the UCITS Regulations. One of those duties is to enquire into the conduct of the Company in each annual accounting period and report thereon to the shareholders.

Our report shall state whether, in our opinion, the Company has been managed in that period in accordance with the provisions of the Company's Constitution and the UCITS Regulations. It is the overall responsibility of the Company to comply with these provisions. If the Company has not so complied, we as Depositary must state why this is the case and outline the steps which we have taken to rectify the situation.

### **Basis of Depositary Opinion**

The Depositary conducts such reviews as it, in its reasonable opinion, considers necessary in order to comply with its duties as outlined in Regulation 34, (1), (3) and (4) in Part 5 of the UCITS Regulations and to ensure that, in all material respects, the Company has been managed (i) in accordance with the limitations imposed on its investment and borrowing powers by the provisions of the Company's Constitution and the UCITS Regulations and (ii) otherwise in accordance with the Company's constitution documentation and the appropriate regulations.

### **Opinion**

In our opinion, the Company has been managed during the financial year, in all material respects:

- (i) in accordance with the limitations imposed on the investment and borrowing powers of the Company by the Constitution, the UCITS Regulations and the Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2015 (as amended) ('the Central Bank UCITS Regulations'); and
- (ii) otherwise in accordance with the provisions of the Constitution, the UCITS Regulations and the Central Bank UCITS Regulations.

State Street Custodial Services (Ireland) Limited 78 Sir John Rogerson's Quay Dublin 2 Ireland

Date: 3 July 2019

# **Independent Auditors' Report**

# Independent auditors' report to the members of Lazard Global Investment Funds plc

# Report on the audit of the financial statements

### **Opinion**

In our opinion, Lazard Global Investment Funds plc's financial statements:

- give a true and fair view of the Company's and Funds' assets, liabilities and financial position as at 31 March 2019 and of their results for the year then ended;
- have been properly prepared in accordance with Generally Accepted Accounting Practice in Ireland (accounting standards issued by the Financial Reporting Council of the UK, including Financial Reporting Standard 102 "The Financial Reporting Standard applicable in the UK and Republic of Ireland" and Irish law); and
- have been properly prepared in accordance with the requirements of the Companies Act 2014 and the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011 (as amended).

We have audited the financial statements, included within the Annual Report and Audited Financial Statements, which comprise:

- the Statement of Financial Position as at 31 March 2019;
- the Statement of Comprehensive Income for the year then ended;
- · the Statement of Changes in Net Assets Attributable to Redeemable Participating Shareholders for the year then ended;
- · the Portfolios of Investments for each of the Funds as at 31 March 2019; and
- the notes to the financial statements for the Company and for each of its Funds, which include a description of the significant accounting policies

### **Basis for opinion**

We conducted our audit in accordance with International Standards on Auditing (Ireland) ("ISAs (Ireland)") and applicable law.

Our responsibilities under ISAs (Ireland) are further described in the Auditors' responsibilities for the audit of the financial statements section of our report. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

#### Independence

We remained independent of the Company in accordance with the ethical requirements that are relevant to our audit of the financial statements in Ireland, which includes IAASA's Ethical Standard, and we have fulfilled our other ethical responsibilities in accordance with these requirements.

### Conclusions relating to going concern

We have nothing to report in respect of the following matters in relation to which ISAs (Ireland) require us to report to you where:

- · the directors' use of the going concern basis of accounting in the preparation of the financial statements is not appropriate; or
- the directors have not disclosed in the financial statements any identified material uncertainties that may cast significant doubt about the Company's and Funds' ability to continue to adopt the going concern basis of accounting for a period of at least twelve months from the date when the financial statements are authorised for issue.

However, because not all future events or conditions can be predicted, this statement is not a guarantee as to the Company's and Funds' ability to continue as going concerns.

# Independent Auditors' Report (continued)

# Independent auditors' report to the members of Lazard Global Investment Funds plc (continued)

### Reporting on other information

The other information comprises all of the information in the Annual Report and Audited Financial Statements other than the financial statements and our auditors' report thereon. The directors are responsible for the other information. Our opinion on the financial statements does not cover the other information and, accordingly, we do not express an audit opinion or, except to the extent otherwise explicitly stated in this report, any form of assurance thereon. In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated. If we identify an apparent material inconsistency or material misstatement, we are required to perform procedures to conclude whether there is a material misstatement of the other information. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report based on these responsibilities.

With respect to the Directors' Report, we also considered whether the disclosures required by the Companies Act 2014 have been included.

Based on the responsibilities described above and our work undertaken in the course of the audit, ISAs (Ireland) and the Companies Act 2014 require us to also report certain opinions and matters as described below:

- In our opinion, based on the work undertaken in the course of the audit, the information given in the Directors' Report for the
  year ended 31 March 2019 is consistent with the financial statements and has been prepared in accordance with applicable legal
  requirements.
- Based on our knowledge and understanding of the Company and its environment obtained in the course of the audit, we have not identified any material misstatements in the Directors' Report.

#### Responsibilities for the financial statements and the audit

#### Responsibilities of the directors for the financial statements

As explained more fully in the Statement of Directors' Responsibilities set out on page 6, the directors are responsible for the preparation of the financial statements in accordance with the applicable framework and for being satisfied that they give a true and fair view.

The directors are also responsible for such internal control as they determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the directors are responsible for assessing the Company's and Funds' ability to continue as going concerns, disclosing as applicable, matters related to going concern and using the going concern basis of accounting unless the directors either intend to liquidate the Company or to cease operations, or have no realistic alternative but to do so.

#### Auditors' responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs (Ireland) will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

A further description of our responsibilities for the audit of the financial statements is located on the IAASA website at:

https://www.iaasa.ie/getmedia/b2389013-1cf6-458b-9b8f-a98202dc9c3a/Description\_of\_auditors\_responsibilities\_for\_audit.pdf.

This description forms part of our auditors' report.

# Independent Auditors' Report (continued)

# Independent auditors' report to the members of Lazard Global Investment Funds plc (continued)

#### Use of this report

This report, including the opinions, has been prepared for and only for the Company's members as a body in accordance with section 391 of the Companies Act 2014 and for no other purpose. We do not, in giving these opinions, accept or assume responsibility for any other purpose or to any other person to whom this report is shown or into whose hands it may come save where expressly agreed by our prior consent in writing.

### Other required reporting

### Companies Act 2014 opinions on other matters

- We have obtained all the information and explanations which we consider necessary for the purposes of our audit.
- In our opinion the accounting records of the Company were sufficient to permit the financial statements to be readily and properly audited.
- The financial statements are in agreement with the accounting records.

### **Companies Act 2014 exception reporting**

#### Directors' remuneration and transactions

Under the Companies Act 2014 we are required to report to you if, in our opinion, the disclosures of directors' remuneration and transactions specified by sections 305 to 312 of that Act have not been made. We have no exceptions to report arising from this responsibility.

Jonathan O'Connell for and on behalf of PricewaterhouseCoopers Chartered Accountants and Statutory Audit Firm Dublin 3 July 2019

The accompanying notes are an integral part of the financial statements.

<sup>\*\*\*</sup> Lazard US Fundamental Alternative Fund was fully redeemed on 13 September 2018.

<sup>\*\*\*\*</sup> Lazard Rathmore Alternative Fund launched on 1 May 2018, therefore there are no comparatives for this Fund.

<sup>\*\*\*\*\*</sup> Lazard Commodities Fund launched on 23 July 2018, therefore there are no comparatives for this Fund.

<sup>\*\*\*\*\*\*</sup> Lazard Scandinavian High Quality Bond Fund launched on 7 January 2019, therefore there are no comparatives for this Fund.

### **Notes to the Financial Statements**

### 1. General

Lazard Global Investment Funds plc (the "Company") was incorporated on 3 February 2009 as an open-ended investment company with variable capital structured as an umbrella fund and with segregated liability between its sub-funds (individually referred to as the "Fund" and collectively the "Funds") organised under the laws of Ireland. The Company qualifies and is authorised in Ireland by the Central Bank of Ireland (the "Central Bank") as an Undertaking for Collective Investment in Transferable Securities under the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 (as amended) (the "UCITS Regulations") and the Central Bank's (Supervision and Enforcement) Act 2013 (section 48(1)) UCITS Regulations 2015 (as amended), (the "Central Bank UCITS Regulations"). The Company is structured as an umbrella fund in that the Share capital of the Company may be divided into different classes of Shares with one or more classes representing a separate Fund of the Company.

The Company currently has fifteen Funds in existence. As at 31 March 2019, Lazard Emerging Markets Bond Fund, Lazard Emerging Markets Local Debt Fund, Lazard Emerging Markets Total Return Debt Fund, Lazard Emerging Markets Debt Blend Fund, Lazard Emerging Markets Debt Unrestricted Blend Fund, Lazard Diversified Return Fund, Lazard European Alternative Fund, Lazard Commodities Fund, which launched on 23 July 2018, Lazard Rathmore Alternative Fund, which launched on 1 May 2018 and Lazard Scandinavian High Quality Bond Fund, which launched on 7 January 2019, were funded. The investment objectives of each Fund within the Company are set out in the Prospectus and relevant Supplements for the Funds. Lazard Opportunities Fund fully redeemed on 7 November 2016, Lazard Global Hexagon Equity Fund fully redeemed on 18 August 2017 and Lazard US Fundamental Alternative Fund fully redeemed on 13 September 2018. Lazard Emerging Markets Corporate Debt Fund has been approved by the Central Bank, but it has not yet launched. Lazard European High Yield Fund was noted by the Central Bank but it has not yet launched.

### 2. Significant Accounting Policies

The significant accounting policies and estimation techniques adopted by the Company in the preparation of the financial statements are set out below. All references to net assets throughout the financial statements refer to net assets attributable to holders of Redeemable Participating Shares unless otherwise stated.

### Statement of compliance

The financial statements for the financial year ended 31 March 2019 have been prepared in accordance with Financial Reporting Standard 102 "The Financial Reporting Standard applicable in the UK and Republic of Ireland" ("FRS 102")" and Irish statute comprising the Companies Act 2014 and the UCITS Regulations.

### **Basis of preparation**

The financial statements are prepared under the historical cost convention as modified by the revaluation of financial assets and financial liabilities held at fair value through profit or loss.

The financial statements have been prepared on a going concern basis and in accordance with accounting standards generally accepted in Ireland and the provisions of the Irish Companies Act, 2014 and the UCITS Regulations. Accounting standards generally accepted in Ireland, that give a true and fair view in preparing financial statements, are those accounting standards issued by the Financial Reporting Council. The financial statements of Lazard Opportunities Fund, Lazard Global Hexagon Equity Fund and Lazard US Fundamental Alternative Fund have been prepared on a non going concern basis of accounting as these Funds closed on 7 November 2016, 18 August 2017 and 13 September 2018 respectively.

The Company has availed of the exemption available to open-ended investment funds under FRS 102, Section 7 "Statement of Cash Flows" not to prepare a cash flow statement on the basis that substantially all of the Company's investments are highly liquid and carried at fair value, and the Company provides a statement of changes in net assets attributable to redeemable participating shareholders.

### Foreign Exchange Translation

(a) Functional and presentation currency: Items included in the Company's financial statements are measured using the currency of the primary economic environment in which it operates (the "functional currency"). This is USD except for Lazard Opportunities Fund which is GBP and for Lazard European Alternative Fund and Lazard Scandinavian High Quality Bond Fund which is EUR. The Company has adopted the functional currency of each Fund as the presentation currency for these financial statements. The functional currency has been adopted as the presentation currency at Fund level and at Company level, USD is the presentational currency.

For the purpose of combining the financial statements of each Fund to arrive at the consolidated figures, the financial assets and financial liabilities in the financial statements have been translated to USD at the exchange rate at 31 March 2019. The amounts in the Statement of Comprehensive Income and in the Statement of Changes in Net Assets Attributable to Redeemable Participating Shareholders have been translated to USD using an average rate for the financial year as an approximation for actual. This has no effect on the net asset value per Share attributable to the individual Fund. All exchange rates are disclosed in Note 7.

### 2. Significant Accounting Policies (continued)

### Foreign Exchange Translation (continued)

The foreign currency translation adjustment of USD (61,293,705) (31 March 2018: USD 74,150,753) included in the "Statement of Changes in Net Assets Attributable to Redeemable Participating Shareholders" reflects the movement in exchange rates for the financial year. This is a notional amount which has no impact on the results of the individual Funds.

(b) Assets and liabilities other than those denominated in the functional currency of each Fund are translated into the functional currency at the exchange rate ruling at the financial year end. Transactions in foreign currencies are translated into the functional currency at the exchange rates ruling at the dates of the transactions. The resulting gain or loss arising on translation of securities and other assets and liabilities is included in net movement in unrealised gains and losses on investments/currency. Forward currency contracts which are outstanding at the financial year end are valued at financial year end forward rates. The resulting unrealised gain or loss is included in net movement in unrealised gains and losses on investments/currency. Realised gains and losses arising between the transaction and settlement dates on purchases or sales of securities denominated in the non-base currencies and on settled forward foreign currency exchange contracts are included in net realised gains and losses on investments/currency.

### Accounting estimates and judgements

The preparation of the financial statements, in accordance with accounting standards generally accepted in Ireland, requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of income and expenses during the financial year. Actual results could differ from those estimates.

### Going concern

The Company's management has made an assessment of the Company's ability to continue as a going concern and is satisfied that the Company has the resources to continue in business for the foreseeable future. Furthermore, the management is not aware of any material uncertainties that may cast significant doubt upon the Company's ability to continue as a going concern. Therefore, the financial statements continue to be prepared on a going concern basis. The financial statements of Lazard Opportunities Fund, Lazard Global Hexagon Equity Fund and Lazard US Fundamental Alternative Fund have been prepared on a non going concern basis of accounting as these Funds closed on 7 November 2016, 18 August 2017 and 13 September 2018 respectively.

### **Financial instruments**

### (i) Classification

The Company classifies its financial instruments as financial assets or financial liabilities at fair value through profit or loss. These financial assets and financial liabilities are classified as held for trading or designated by the Directors at fair value through profit or loss at inception. Financial assets and financial liabilities designated at fair value through profit or loss at inception are those that are managed and their performance evaluated on a fair value basis in accordance with the Company's documented investment strategy. The Company's policy is for the Investment Managers and the Directors to evaluate the information about these financial assets and liabilities on a fair value basis together with other related financial information.

### (ii) Recognition and Derecognition

Regular-way purchases and sales of investments are recognised on trade date – the date on which the Company commits to purchase or sell the asset. Investments are initially recognised at fair value, and transaction costs for all financial assets carried at fair value through profit or loss are expensed immediately. Investments are derecognised when the rights to receive cash flows from the investments have expired or the Company has transferred substantially all risks and rewards of ownership.

### (iii) Measurement

Financial assets and financial liabilities at fair value through profit or loss are initially recognised at fair value. Subsequent to initial recognition, all financial assets and financial liabilities at fair value through profit or loss are measured at fair value. Gains and losses arising from changes in the fair value of the financial assets or financial liabilities at fair value through profit or loss category are presented in the Statement of Comprehensive Income in the financial year in which they arise.

### 2. Significant Accounting Policies (continued)

### Financial instruments (continued)

### (iv) Fair Value Estimation

In accordance with FRS 102, the Company has elected to apply the recognition and measurement provisions of International Accounting Standards 39 "Financial Instruments: Recognition and Measurement" as adopted for use in the European Union and the disclosure requirements of Sections 11 and 12 of FRS 102. Accordingly, the fair valuation input utilised for both financial assets and financial liabilities is the last traded price where the investment is an equity security and mid-market price where the investment is a fixed income security.

Securities listed on a recognised stock exchange or traded on any other organised market are valued at the last traded price where the investment is an equity security and where the investment is a fixed income security, at the mid-market price on the stock exchange or market which constitutes the principal market for such securities. If for specific assets the last traded price or mid-market price does not, in the opinion of the Directors, reflect their fair value or are not available, the value shall be the probable realisable value estimated with care and in good faith by the competent person who has been appointed by the Directors and approved by the Depositary.

The fair value of financial instruments that are not traded in an active market is determined by using valuation techniques. The Company uses a variety of methods and makes assumptions that are based on market conditions existing at each Statement of Financial Position date. Valuation techniques used include the use of comparable recent arm's length transactions, discounted cash flow analysis, option pricing models and other valuation techniques commonly used by market participants. Unlisted securities and thinly traded securities are valued in good faith by the competent person who has been appointed by the Directors and approved by the Depositary, based on quotations received from third parties including relevant brokers, however no securities were valued in this manner as at 31 March 2019 with the exception of four securities held on Lazard Emerging Markets Total Return Debt Fund which were valued at level 3 during the financial year ended 31 March 2019. These securities were fair valued at Nil as at 31 March 2019 (31 March 2018: USD1,457,000). Please refer to Note 9.

Investments in open-ended investment funds are valued at fair value at the latest available unaudited Net Asset Value for the Shares or units obtained from the relevant Administrator. The change in the daily Net Asset Value of these Shares is recognised as net gain/ (loss) on investments and foreign currency in the Statement of Comprehensive Income.

Each of the Funds may employ investment techniques and financial derivative instruments for efficient portfolio management and/or investment purposes subject to the conditions and within the limits laid down by the Prospectus and the Central Bank and these are as follows:

#### **Futures Contracts**

Initial margin deposits are made upon entering into futures contracts and are generally made in cash or cash equivalents. The fair value of futures contracts is based upon their current quoted daily settlement prices on the relevant exchange as of the Statement of Financial Position date. Changes in the value of open futures contracts are recognised as unrealised gains or losses on futures contracts until the contracts are terminated, at which time realised gains and losses are recognised. For each relevant Fund, gains or losses on open futures contracts are shown in the Portfolio of Investments of each relevant Fund and as appropriate, on the Statement of Financial Position as financial assets or liabilities at fair value through profit or loss.

### Forward foreign currency exchange contracts

The unrealised appreciation or depreciation on open forward foreign exchange contracts is calculated by reference to the difference between the contracted rate and the forward rate to close out the contract as at the financial year end. Unrealised appreciation or depreciation on forward contracts is reported in the Statement of Financial Position and the Statement of Comprehensive Income. Realised gains and losses are reported with all other foreign currency gains and losses in the Statement of Comprehensive Income.

### **Contracts for Difference**

Open Contracts for Difference ("CFDs") are carried at the net amount due to/from the counterparty under the terms of the agreement, including unrealised gains and losses from changes in fair value of the notional equities, and are recorded as derivative assets/liabilities at fair value on the Statement of Financial Position. Realised and unrealised gains and losses are recognised in the Statement of Comprehensive Income. When the Funds hold long CFDs they receive the dividends relating to the underlying equity and pays interest to the third party. When the CFDs are sold short, the Funds pay the dividends relating to the underlying equity and receive interest on the contract value. The contracts are valued based on the market value of the underlying security. Initial margin deposits are made upon entering into CFDs and are generally made in cash or cash equivalents.

### 2. Significant Accounting Policies (continued)

### **Financial instruments (continued)**

### (iv) Fair Value Estimation (continued)

#### **Options**

The premium on purchased put options exercised is subtracted from the proceeds of the sale of the underlying security or foreign currency in determining the realised gain or loss. The premium on purchased call options exercised is included in determining initial fair value of the securities or foreign currency purchased. Premiums paid from the purchase of options which expire unexercised are treated as realised losses. The premium on written call options exercised is added to the proceeds from the sale of the underlying security or foreign currency in determining the realised gain or loss. The premium on written put options exercised is included in determining initial fair value of securities or foreign currencies purchased. Premiums received from written options which expire unexercised are treated as realised gains. The over-the-counter ("OTC") options are valued at close of business daily. The valuation is based off a comparison of three sources agreed with Lazard in the Price Source Agreement (the "PSA"): the counterparty (the Primary Source), the vendor (the Secondary Source) and the Investment Manager (the Tertiary Source). The differences in the prices are reviewed against the tolerances outlined in the PSA to determine the price to be applied. Exchange traded options are valued at settlement price.

#### Credit default swaps

Credit default swaps involve, to varying degrees, elements of credit and counterparty risk in excess of the amount recognised in the Statement of Financial Position. Valuation of the credit default swap is an estimate of a credit default event happening at a particular point in time. Notional principal amounts are used to express the extent of involvement in these transactions, but the amounts potentially subject to credit risk are much smaller. The fair values of credit default swaps are calculated using standard net present value methodologies whereby all future cashflows of the fixed side of the swap are discounted to their present value using the appropriate interest rate and whereby all future cashflows of the default side of the swap are discounted to their present value based on the cost of default to the default payer. This cost is determined by the recovery rate, notional amount of the contract, and default probability among other factors.

Credit default swap contracts are valued at close of business daily. The valuation is based off a comparison of three sources agreed with Lazard in the Price Source Agreement (the "PSA"): the counterparty (the Primary Source), the vendor (the Secondary Source) and the Investment Manager (the Tertiary Source). The differences in the prices are reviewed against the tolerances outlined in the PSA to determine the price to be applied. Payments received or made as a result of a credit event or termination of the contract are recognised, net of a proportional amount of the upfront payment, as realised gains or losses.

#### Interest rate swaps

The fair value of interest rate swaps is calculated using standard net present value methodologies whereby all future cash flows of the interest rate swaps are discounted to their present value using the appropriate interest rate. Interest rate swap contracts are valued at close of business daily. The valuation is based off a comparison of three sources agreed with Lazard in the Price Source Agreement (the "PSA"): the counterparty (the Primary Source), the vendor (the Secondary Source) and the Investment Manager (the Tertiary Source). The differences in the prices are reviewed against the tolerances outlined in the PSA to determine the price to be applied. Payments received or made are recorded as realised gains or losses.

#### Total return swaps

A total return swap is an agreement in which one party makes payments based on a set rate, either fixed or variable, while the other party makes payments based on the return of an underlying asset. The total return swap may be applied to any underlying asset but is most commonly used with equity indices, single stocks, bonds and defined portfolios of loans and mortgages. The fair value of the swap is reported as an asset or liability as appropriate on the Statement of Financial Position and movements in the fair value are recorded in the Statement of Comprehensive Income as part of net gain/(loss) on financial assets and financial liabilities at fair value through profit or loss and foreign currencies. Total return swaps are marked-to market daily based upon a Bloomberg valuation (the Primary Source) and validated against quotations received from the counterparty (the Secondary Source). The Bloomberg valuation is applied (provided it is in line with the counterparty). The pricing source hierarchy for each derivative instrument is outlined in the PSA.

### Cash at Bank, Bank Overdrafts and Margin Cash

Cash at bank and bank overdrafts are valued at face value, with interest accrued where applicable at the relevant valuation point on the relevant business day. Cash is also deposited by or on behalf of the Funds for initial margin purposes with brokers for options, open futures contracts and contracts for difference.

### 2. Significant Accounting Policies (continued)

### **Broker Cash**

Counterparty cash received by a Fund as collateral for financial derivative instrument transactions is recorded as an asset on the Statement of Financial Position within "Broker cash held as collateral for financial derivative instrument transactions" and a related liability to repay the collateral is disclosed within "Broker cash due to counterparties for financial derivative instrument transactions". Cash pledged by a Fund as collateral is recognised on the Statement of Financial Position within "Broker cash due to counterparties for financial derivative instrument transactions".

### Receivables and payables

Receivables and payables for investments sold and purchased awaiting settlement represent receivables for securities sold and purchased. Receivables and payables for subscriptions and redemptions represent Shares subscribed or redeemed that have been contracted for but not yet settled on the Statement of Financial Position. These amounts are recognised initially at fair value and subsequently measured at amortised cost.

### Accrued income and expenses

Accrued income and expenses comprise of investments income receivable, other assets, distribution payable and expenses payable. These amounts are recognised initially at fair value and subsequently measured at amortised cost.

### Realised and unrealised gains and losses on investments

Realised gains and losses are calculated based on a FIFO basis. Realised and unrealised gains and losses arising from changes in the fair value of financial assets and financial liabilities at fair value through profit or loss category are included in the Statement of Comprehensive Income in the financial year in which they arise.

### Interest income and expense

Interest income and expense are recognised in the Statement of Comprehensive Income for all debt instruments using the effective interest method. The effective interest method is a method of calculating the amortised cost of a financial asset or financial liability and of allocating the interest income or interest expense over the relevant financial year. Bond interest income is reported gross of irrecoverable withholding tax, which is disclosed separately in the Statement of Comprehensive Income, and net of any tax credits.

The effective interest rate is the rate that exactly discounts estimated future cash payments or receipts throughout the expected life of the financial instrument, or a shorter period where appropriate, to the net carrying amount of the financial asset or financial liability.

### **Dividend income**

Dividend income is recognised through profit and loss on an ex-dividend basis. Dividend income is shown gross of any non-recoverable withholding taxes, which are disclosed separately in the Statement of Comprehensive Income.

#### **Expenses**

Expenses are accounted for on an accruals basis.

### Offsetting financial instruments

Financial assets and financial liabilities are offset and the net amount reported in the Statement of Financial Position where there is a legally enforceable right to offset the recognised amounts and there is an intention to settle on a net basis or realise the asset and settle the liability simultaneously.

### **Distributions**

Distributions, if declared, will only be paid out of a Fund's net investment income return.

Distributions with an ex date during the financial year are included as a finance cost in the Statement of Comprehensive Income. Dividends will not be paid in respect of any class of Share which is an accumulating class. Income and profits, if any, attributable to an accumulating Share class will be accumulated, reinvested in the relevant Fund on behalf of the Shareholders of that class and will be reflected in the Net Asset Value of the relevant accumulating Share class. Please see Note 14 for details of any distributions paid during the financial year ended 31 March 2019 and 31 March 2018.

### 2. Significant Accounting Policies (continued)

### **Equalisation**

Income equalisation arrangements apply to each Fund. The arrangements are intended to ensure that the income per Share which is distributed in respect of the distribution period is not affected by changes in the number of Shares in issue during the period. The arrangements have no effect on the Net Asset Value of any Share class. The calculation of equalisation is based on total accumulated undistributed net income.

### **Anti-Dilution Levy**

The anti-dilution levy is paid to the Funds and is used to defray the cost related to the associated purchase or sale of securities within the Funds as a result of shareholder transactions. Anti-dilution levies are included in the movement in net assets resulting from Share transactions in the Statement of Changes in Net Assets Attributable to Redeemable Participating Shareholders.

### **Transaction costs**

Transaction costs are incremental costs that are directly attributable to the acquisition, issue or disposal of a financial asset or financial liability. An incremental cost is one that would not have been incurred if the entity had not acquired, issued or disposed of the financial instrument. When a financial asset or financial liability is recognised initially, an entity shall measure it at its fair value through profit or loss plus transaction costs that are directly attributable to the acquisition or issue of the financial asset or financial liability. Transaction costs on the purchase and sale of fixed income securities, money market instruments, forward foreign exchange currency contracts and swaps are included in the purchase and sale price of the investment and are not separately identifiable. Transaction costs on purchases and sales of equities, futures contracts, options contracts and investment funds are included in net gains/(losses) on financial instruments at fair value through profit or loss in the Statement of Comprehensive Income for each Fund.

Depositary transaction costs include transaction costs paid to the depositary and the sub-custodian. Purchases and sales transaction costs include identifiable brokerage charges, commissions, transaction related taxes and other market charges. Depositary transaction costs are included in depositary fees as disclosed in Note 3. These costs are separately identifiable transaction costs and the total costs incurred by each Fund during the financial year are disclosed in Note 3.

### 3. Fees

### **Management Fees**

The Manager has responsibility for the management and administration of the Company's affairs and the distribution of the Shares, subject to the overall supervision and control of the Directors.

The Manager is entitled to a charge per annum of the Net Asset Value attributable respectively to each of the following Share classes.

Such fees as detailed below shall accrue daily and be payable monthly in arrears. The Manager shall also be entitled to be reimbursed by the Funds for its reasonable out-of-pocket expenses.

<sup>\*</sup> Lazard Opportunities Fund was fully redeemed on 7 November 2016.

See Note 15 for information on the launch and termination dates of the above Share classes.

Investors are only permitted to hold units in the X Share class where Lazard or an Affiliate are appointed as the Investment Managers to carry out investment management or advisory services on their behalf. Shareholders in the class will be subject to a fee with regard to their investment in the Fund based on the Investment Management Agreement between themselves and the Investment Managers or a Lazard Affiliate. Shares in the M Classes are available only to other Funds managed or advised by an affiliate or to such other persons as the Manager may determine from time to time.

The Manager has delegated the performance of the investment management function in respect of the Funds to the Investment Managers. The Manager will be responsible for discharging the fees and expenses of the Investment Managers, the Promoter and the Distributor out of its fee. For the financial year ended 31 March 2019, management fees of USD 27,691,099 (31 March 2018: USD 27,162,633) were charged of which USD 4,197,594 (31 March 2018: USD 2,648,591) remained payable at the financial year end.

### **Performance Fees**

The Manager is entitled to receive a performance fee in respect of Lazard Emerging Markets Total Return Debt Fund, Lazard European Alternative Fund and Lazard Rathmore Alternative Fund. The Manager was entitled to receive a performance fee in respect of Lazard Opportunities Fund, this Fund was fully redeemed on 7 November 2016, Lazard Global Hexagon Equity Fund, this Fund was fully redeemed on 18 August 2017 and Lazard US Fundamental Alternative Fund, this Fund was fully redeemed on 13 September 2018. Below is a description of how this fee is calculated for each Fund.

#### **Lazard Emerging Markets Total Return Debt Fund**

The Manager is entitled to receive a performance fee, accrued daily and payable monthly, in respect of each of the Share classes in the Fund, excluding the D Classes, the X Classes and the M Classes, equal to 20% of the Net Gain, if any, during the relevant Performance Period (the "Performance Fee"). No Performance Fee shall be charged to the assets of the D Classes, the X Classes or the M Classes. A Performance Fee in respect of each relevant Share class shall accrue and become due and payable only in the event that both of the conditions below are met:

- the Ending NAV per Share for any Performance Period during the year has exceeded the Hurdle NAV per Share; and
- the Ending NAV per Share for the applicable Performance Period exceeds the High Water Mark.

<sup>\*\*</sup> Lazard Global Hexagon Equity Fund was fully redeemed on 18 August 2017.

<sup>\*\*\*</sup> Lazard US Fundamental Alternative Fund was fully redeemed on 13 September 2018.

<sup>\*\*\*\*</sup> Lazard Rathmore Alternative Fund launched on 1 May 2018.

<sup>\*\*\*\*\*</sup> Lazard Commodities Fund launched on 23 July 2018.

<sup>\*\*\*\*\*\*\*</sup> Lazard Scandinavian High Quality Bond Fund launched on 7 January 2019.

### 3. Fees (continued)

### **Performance Fees (continued)**

### Lazard Emerging Markets Total Return Debt Fund (continued)

#### **Performance Period**

A Performance Period will end on the last Business Day of each calendar month and will begin on the earlier of (i) the end of the last Business Day of the previous month or (ii) the last Business Day that a Performance Fee was payable or, for a Share class' initial Performance Period, the first Business Day following closure of that Share class' Initial Offer Period.

### **Ending NAV per Share**

With respect to each class of Shares apart from the Unhedged Share classes, the Ending NAV per Share is the Net Asset Value per Share of the relevant class, prior to the accrual of any applicable Performance Fee and deduction of any applicable dividend, as at the last Valuation Point for the current Performance Period.

With respect to each Unhedged Share class, the Ending NAV per Share is the Net Asset Value per Share of the relevant class as described in the preceding paragraph, but expressed in the Fund Base Currency as calculated using the Prevailing Exchange Rate on the relevant date.

### **Hurdle NAV per Share**

The Hurdle NAV per Share is calculated with respect to each Share class using an annualised hurdle rate of 5% (the "Hurdle Rate"). For the calendar year in which a Share class is first issued, the Hurdle NAV per Share of the relevant class (apart from the Unhedged Share Classes) will be calculated by multiplying the Initial Offer Price per Share of that class by a pro rata portion of Hurdle Rate for the remainder of the year (i.e., 5% divided by 365 and multiplied by the number of days following the closure of the Initial Offer Period for the relevant Share class until the end of the relevant calendar year) and adding the result to the Initial Offer Price per Share of the relevant class. For each subsequent year following the year in which the relevant Share class first issued, the Hurdle NAV per Share will be calculated with respect to that Share class by multiplying the Net Asset Value per Share of the relevant class on the last Valuation Point of the prior calendar year by the Hurdle Rate (i.e. 5% as defined above) and adding the result to such Net Asset Value per Share. In each case, the Hurdle NAV per Share will be adjusted for any dividends paid during the relevant calendar year.

For all Unhedged Share Classes, the Hurdle NAV per Share is calculated in the same manner as set out in the immediately preceding paragraph except that all values (i.e. for the Initial Offer Price per Share or the Net Asset Value per Share of the relevant class as the case may be) are, for the purpose of calculating the Hurdle NAV per Share, converted into the Fund Base Currency using the Prevailing Exchange Rate in each instance on the relevant date. For all Unhedged Share Classes, the Hurdle NAV per Share is calculated in the same manner as set out in the immediately preceding paragraph except that all values (i.e. for the Initial Offer Price per Share or the Net Asset Value per Share of the relevant class as the case may be) are, for the purpose of calculating the Hurdle NAV per Share, converted into the Fund Base Currency using the Prevailing Exchange Rate in each instance on the relevant date.

### **High Water Mark**

With respect to each class of Shares apart from the Unhedged Share Classes, the High Water Mark is the greater of: (i) the highest Net Asset Value per Share of the relevant Share class (after deduction of any applicable Performance Fee and any applicable dividend) on the last Valuation Point for any previous Performance Period for which a Performance Fee was payable; or (ii) the Initial Offer Price per Share of the relevant Share class.

With respect to each Unhedged Share Class, the High Water Mark is the greater of (i) or (ii) above each as expressed in the Fund Base Currency using the Prevailing Exchange Rate on the relevant date.

The High Water Mark will be adjusted for any appropriate dividend paid.

"Prevailing Exchange Rate" means the exchange rate prevailing as between the currency in which the relevant Unhedged Share Class is denominated and the Fund Base Currency.

#### **Net Gain**

With respect to each relevant Share class, the "Net Gain per Share" is the difference between the Ending NAV per Share and the higher of (1) the Hurdle NAV per Share and (2) the High Water Mark. "Net Gain" is the Net Gain per Share multiplied by the closing number of Shares of the relevant class in issue for the relevant Performance Period.

### 3. Fees (continued)

### **Performance Fees (continued)**

#### Lazard Emerging Markets Total Return Debt Fund (continued)

#### General

For each Share class, the Performance Fee will be calculated by taking the Net Gain per Share of the relevant class for the applicable Performance Period, and multiplying this by the closing number of Shares of the relevant class in issue and multiplying the resultant figure by 20%. Any Performance Fee accrued in respect of Shares redeemed during a Performance Period shall be realized and become payable at the point of redemption. The Performance Fee will be accrued daily and payable as of the end of the relevant Performance Period. The Performance Fee shall be calculated independently by the Administrator and verified by the Depositary. The Performance Fee will be divided between the Manager and the Investment Managers in such proportions as shall be agreed between the Manager and the Investment Managers from time to time. For the financial year ended 31 March 2019, performance fees of USD Nil (31 March 2018: USD 161,107) were charged and USD Nil (31 March 2018: USD Nil) were payable at the financial year end.

### **Lazard European Alternative Fund**

The Manager is entitled to receive a performance fee (the "Performance Fee"), accrued daily and payable annually (or otherwise on redemption of the relevant Shares), in respect of each of the Share classes in the Fund (excluding the EA Classes, the M Class and the X Class), equal to 20% of the Net Gain, if any, during the relevant Performance Period. The Manager is also entitled to receive a Performance Fee, accrued daily and payable annually (or otherwise on redemption of the relevant Shares), in respect of each of the EA Classes equal to 10% of the Net Gain, if any, during the relevant Performance Period. No Performance Fee shall be charged to the assets of the M Class and the X Class. A Performance Fee shall accrue and become due and payable in respect of Shares of any relevant class only in the event that both of the conditions below are met:

- the Ending NAV per Share for any Performance Period has exceeded the Hurdle NAV per Share; and
- the Ending NAV per Share for the applicable Performance Period (or as at the date the relevant Shares are redeemed) exceeds the High Water Mark.

### **Lazard Rathmore Alternative Fund**

The Manager is entitled to receive a performance fee (the "Performance Fee"), accrued daily and payable annually (or otherwise on redemption of the relevant Shares), in respect of each of the Share classes in the Fund (excluding the EA Classes, the M Classes and the X Class), equal to 20% of the Net Gain, if any, during the relevant Performance Period. The Manager is also entitled to receive a Performance Fee, accrued daily and payable annually (or otherwise on redemption of the relevant Shares), in respect of each of the EA Classes equal to 15% of the Net Gain, if any, during the relevant Performance Period. No Performance Fee shall be charged to the assets of the M Class and the X Class. A Performance Fee shall accrue and become due and payable in respect of Shares of any relevant class only in the event that both of the conditions below are met:

- the Ending NAV per Share for any Performance Period has exceeded the Hurdle NAV per Share; and
- the Ending NAV per Share for the applicable Performance Period (or as at the date the relevant Shares are redeemed) exceeds the High Water Mark.

### Lazard European Alternative Fund and Lazard Rathmore Alternative Fund

#### **Performance Period**

The first "Performance Period" for each relevant Share class shall commence as of the first Business Day following the closure of the Initial Offer Period for that class and end on the last Valuation Point of the then current calendar year. Each subsequent Performance Period shall commence immediately on the end of the prior Performance Period and end on the last Valuation Point of the next following calendar year (or otherwise on the date by reference to which the last Net Asset Value for the relevant Share class is calculated).

### **Ending NAV per Share**

With respect to each class of Shares apart from the Unhedged Share Classes, the Ending NAV per Share is the Net Asset Value per Share of the relevant class, prior to the accrual of any applicable Performance Fee and deduction of any applicable dividend, as at the last Valuation Point for the relevant Performance Period (or otherwise on the date by reference to which the price at which the relevant Shares are redeemed is calculated).

With respect to each Unhedged Share Class, the Ending NAV per Share is the Net Asset Value per Share of the relevant class as described in the preceding paragraph, but expressed in the Fund Base Currency as calculated using the Prevailing Exchange Rate on the relevant date.

### 3. Fees (continued)

### **Performance Fees (continued)**

#### Lazard European Alternative Fund and Lazard Rathmore Alternative Fund (continued)

#### **Hurdle NAV per Share**

The Hurdle NAV per Share is calculated by applying the prevailing 3 month Euribor rate and 3 month US Dollar Libor rate for Lazard European Alternative Fund and Lazard Rathmore Alternative Fund respectively (provided such rate is not a negative number and subject to a cap of 5%) as at the date of accrual of the Performance Fee (the "Hurdle Rate") to:

- (i) the opening Net Asset Value per Share of the relevant class for the then current Performance Period or, where the relevant class is an Unhedged Share Class, to the opening Net Asset Value per Share of the relevant class for the then current Performance Period as expressed in the Fund Base Currency (using the Prevailing Exchange Rate on the relevant date) (the "Opening NAV per Share"), or
- (ii) where the current Performance Period is the first Performance Period for the relevant class, to the Initial Offer Price per Share for the relevant Shares or, where the relevant class is an Unhedged Share Class, to the Initial Offer Price per Share for the relevant Shares as expressed in the Fund Base Currency (using the Prevailing Exchange Rate on the relevant date).

Where the 3 month Euribor rate prevailing at the relevant time is a negative number, the Hurdle NAV per Share shall, as the case may be, be the Opening NAV per Share or the Initial Offer Price per Share for the relevant class (such price being, where the class in question is an Unhedged Share Class, the Initial Offer Price per Share of the relevant class as expressed in the Fund Base Currency (using the Prevailing Exchange Rate on the relevant date).

The Hurdle Rate will be prorated for Performance Periods less than one year.

### **High Water Mark**

With respect to each class of Shares apart from the Unhedged Share Classes, the High Water Mark is the greater of: (i) the highest Net Asset Value per Share of the relevant Share class (after deduction of any applicable Performance Fee and any applicable dividend) on the last Valuation Point for any previous Performance Period for which a Performance Fee was payable; or (ii) the Initial Offer Price per Share of the relevant Share class. With respect to each Unhedged Share Class, the High Water Mark is the greater of (i) or (ii) above each as expressed in the Fund Base Currency using the Prevailing Exchange Rate on the relevant date.

The High Water Mark will be adjusted for any appropriate dividend paid.

"Prevailing Exchange Rate" means the exchange rate prevailing as between the currency in which the relevant Unhedged Share Class is denominated and the Fund Base Currency.

### **Net Gain**

With respect to the Shares of each relevant class, the Net Gain per Share is the difference between the Ending NAV per Share and the higher of (1) the Hurdle NAV per Share and (2) the High Water Mark. "Net Gain" is the Net Gain per Share multiplied by the average number of Shares of the relevant class in issue during the period commencing on the date on which the then current Performance Period began and ending on the accrual date. The average number of Shares may be adjusted to take account of redemptions during the relevant period.

### General

For each Share class (excluding the EA Classes, the M Classes and the X Class) the Performance Fee will be calculated by taking the Net Gain for the relevant Share class for the applicable Performance Period and multiplying this by the average number of Shares of the relevant class in issue and multiplying the resultant figure by 20% and 20% for Lazard European Alternative Fund and Lazard Rathmore Alternative Fund. For each of the EA Classes the Performance Fee will be calculated by taking the Net Gain for the relevant EA Class for the applicable Performance Period and multiplying the resultant figure by 10% and 15% for Lazard European Alternative Fund and Lazard Rathmore Alternative Fund respectively. Each Share shall bear its pro-rata Share of the Performance Fee, if any, payable in respect of the relevant class. The Performance Fee will be accrued daily and, provided the relevant Shares have not been redeemed, will be payable as of the end of the relevant Performance Period. Any Performance Fee accrued in respect of Shares redeemed during a Performance Period shall be realised and become payable at the point of redemption. The Performance Fee shall be calculated independently by the Administrator and verified by the Depositary. For Lazard European Alternative Fund, for the financial year ended 31 March 2019, performance fees of EUR 1,300,623 (31 March 2018: EUR 1,201,215) were charged and EUR 1,736 (31 March 2018: EUR 350,475) were payable at the financial year end. For Lazard Rathmore Alternative Fund, for the financial year ended 31 March 2019, performance fees of USD 174,460 were charged and USD 166,385 were payable at the financial year ended.

### 3. Fees (continued)

### **Performance Fees (continued)**

Lazard European Alternative Fund and Lazard Rathmore Alternative Fund (continued)

### **General (continued)**

There is no performance fee charged in relation to any of Lazard Emerging Markets Bond Fund, Lazard Emerging Markets Local Debt Fund, Lazard Emerging Markets Debt Blend Fund, Lazard Emerging Markets Debt Unrestricted Blend Fund, Lazard Diversified Return Fund, Lazard Commodities Fund and Lazard Scandinavian High Quality Bond Fund.

### **Reimbursement from Manager**

Each class of Shares of each Fund shall bear its attributable portion of the other expenses of the Company, (as set out in detail under the heading "Other Expenses" in the section of the Prospectus entitled "Fees and Expenses"), subject to an overall cap on expenses of 0.23% per annum of the Net Asset Value of the Funds with respect to Lazard Emerging Markets Bond Fund, Lazard Emerging Markets Local Debt Fund, Lazard Emerging Markets Total Return Debt Fund, Lazard Emerging Markets Debt Blend Fund, Lazard Emerging Market Debt Unrestricted Blend Fund and Lazard Scandinavian High Quality Bond Fund. In the case of Lazard Diversified Return Fund, the cap is 0.25%, in the case of Lazard European Alternative Fund and Lazard Rathmore Alternative Fund, the cap is 0.30% and in the case of Lazard Commodities Fund, the cap is 0.15%. As at the 31 March 2019, the above caps on expenses are in effect on all of the Funds except for Lazard Diversified Return Fund, Lazard Commodities Fund, Lazard Rathmore Alternative Fund and Lazard Scandinavian High Quality Bond Fund. The Manager will be responsible for any such expenses in excess of this limit with the exception of the expenses of acquiring and disposing of Investments (including brokerage expenses, custodial and sub-custodial transaction charges, stamp duties and other relevant taxes). For the Lazard European Alternative Fund, Lazard US Fundamental Alternative Fund and Lazard Diversified Return Fund, the custodial and sub-custodial transactions charges are included in the cap. For the avoidance of doubt, the Manager will not be responsible for the costs of hedging the currency exposure for the benefit of any particular Share class of the Fund, which costs shall be attributable exclusively to the relevant Share class. For the financial year ended 31 March 2019, reimbursement from the Manager was USD 351,111 (31 March 2018: USD 221,690) of which USD 102,007 (31 March 2018: USD 26,349) remained receivable at the financial year end.

### **Administration, Transfer Agency and Depositary Fees**

Effective 1 July 2018, the Administrator is entitled to an annual administration fee payable by the Funds of up to 0.065% of the Funds' Net Asset Value. Up to the 30 June 2018, the Administrator was entitled to an annual administration fee payable by the Funds of up to 0.09% of the Funds' Net Asset Value. Such fees shall accrue daily and be payable monthly in arrears. The Administrator shall also be entitled to recover from the Funds its reasonable out-of-pocket expenses.

Effective 1 July 2018, Shareholder and transfer agency services fees which will be charged at commercial rates subject to a minimum annual fee of USD 4,000 for each Share class that has issued in the Funds (exclusive of transaction charges, which shall be at normal commercial rates). Up to the 30 June 2018 Shareholder and transfer agency services fees which shall be charged at normal commercial rates subject to a minimum monthly fee of USD 750 for each Share class that has issued in the Funds (exclusive of transaction charges, which shall be at normal commercial rates).

Effective 1 July 2018, the Depositary is entitled to an annual depositary fee payable by the Fund of up to 0.02% of the Funds' Net Asset Value. Up to the 30 June 2018, the Depositary was entitled to be paid by the Funds an annual fee for the performance of its trustee functions of up to 0.04% of the Funds' NAV. Such fees shall accrue daily and be paid by the Funds monthly in arrears. The Depositary is also entitled to charge the Funds transaction costs, which shall be at normal commercial rates, and to be reimbursed by the Funds for the fees and transactions charges of any sub-custodian (which shall also be at normal commercial rates), together with its reasonable, out-of-pocket expenses.

For the financial year ended 31 March 2019, administration, transfer agency and depositary fees of USD 5,393,599 (31 March 2018: USD 6,397,608) were charged of which USD 1,204,175 (31 March 2018: USD 2,712,479) remained payable at the financial year end.

For twelve months from the date of launch of each Fund, fees payable to State Street for provision of Administration and Depositary services shall be subject to a cap of 18.5 basis points. Custodial fees related to safekeeping and related transaction costs are excluded from this cap, as are all relevant out of pocket expenses, whether payable to the Depositary, Administrator or other third party.

### 3. Fees (continued)

### **Currency Manager's Fees**

The Funds shall pay State Street Bank Europe Limited (the "Currency Manager") an annual fee, calculated and accrued daily and payable quarterly in arrears, not in excess of 0.06% per annum of the Net Asset Value of each hedged Share class in issue, such fee to accrue solely to the hedged Share class in respect of which it is incurred. The foregoing fee is subject to the Currency Manager being entitled to a minimum annual service fee, calculated and accrued daily and payable quarterly in arrears, of USD 75,000 charged pro rata to all relevant hedged Share classes in issue per Fund. For the financial year ended 31 March 2019, Currency Manager's fees of USD 440,523 (31 March 2018: USD 451,449) were charged of which USD 208,029 (31 March 2018: USD 113,253) remained payable at the financial year end.

### **Directors' Fees**

Directors' fees charged over the financial year were USD 101,122 (31 March 2018: USD 109,052), of which USD 26,978 (31 March 2018: USD 28,719) were outstanding at 31 March 2019. The Company paid USD 2,045 for the year ended 31 March 2018 to Carne Global Financial Services Limited in respect of Director support service fees for John Donohoe.

### **Auditors' Fees**

Fees and expenses paid to the statutory auditors, PricewaterhouseCoopers (Ireland), in respect of the financial year, entirely relate to the audit of the financial statements of the Company. There were no fees and expenses paid in respect of other assurance, tax advisory or non-audit services provided by the auditors for the financial years ended 31 March 2019 or 31 March 2018.

Auditors' remuneration for the financial year was USD 112,747 (31 March 2018: USD 102,330), of which USD 112,747 was outstanding at 31 March 2019 (31 March 2018: USD 102,330). These fees include out of pocket audit expenses and are exclusive of VAT.

### **Transaction Costs**

As disclosed in Note 2, transaction costs are incremental costs that are directly attributable to the acquisition, issue or disposal of the financial asset or financial liability. Under purchases and sales transaction costs detailed below are the transaction costs on the purchase and sales of equities, futures contracts, options contracts and investment funds. Commission/brokerage costs on the purchase and sale of fixed income securities, money market instruments, contracts for difference, forward foreign exchange currency contracts and swaps, transaction costs on these instruments cannot be separately identified. They are included in the purchase and sale price of the investment, and therefore not disclosed separately in this note.

The following tables show the transaction costs for the financial year ended 31 March 2019 and 31 March 2018:

#### 31 March 2019

	Lazard Emerging Markets Bond Fund	Lazard Emerging Markets Local Debt Fund	Lazard Emerging Markets Total Return Debt Fund	Lazard Emerging Markets Debt Blend Fund	Lazard Emerging Markets Debt Unrestricted Blend Fund	Lazard Diversified Return Fund

<sup>\*</sup> Lazard Opportunities Fund was fully redeemed on 7 November 2016.

### 4. Taxation

Under current law and practice, the Company qualifies as an investment undertaking as defined in Section 739B of the Taxes Consolidation Act, 1997, as amended. On that basis the Company will not be liable to taxation in respect of its income and gains, other than on the occurrence of a chargeable event. Generally a chargeable event arises on any distribution, redemption, repurchase, cancellation, transfer of Shares or on the ending of a 'relevant period', a 'relevant period' being an eight year period beginning with the acquisition of the Shares by the shareholders and each subsequent period of eight years beginning immediately after the preceding relevant period.

A chargeable event does not include:

- a) any transactions in relation to Shares held in a recognised clearing system as designated by order of the Revenue Commissioners of Ireland: or
- b) an exchange of Shares representing a Fund for another Fund: or
- c) an exchange of Shares arising on a qualifying amalgamation or reconstruction of a Fund with another Fund: or
- d) certain exchanges of Shares between spouses and former spouses.

A chargeable event will not occur in respect of shareholders who are neither resident nor ordinarily resident in Ireland and who have provided the Company with a relevant declaration to that effect.

In the absence of an appropriate declaration, the Company will be liable to Irish Tax on the occurrence of a chargeable event. There were no chargeable events during the period under review.

Capital gains, dividends and interest received may be subject to withholding taxes imposed by the country of origin and such taxes may not be recoverable by a Fund or its shareholders.

### 5. Capital and Reserves

The Company has a variable share capital.

### **Management Shares**

The authorised share capital of the Company was two Subscriber Shares of par value of £1.00 each. The two Subscriber Shares are held by the Manager and the Promoter. The subscriber Shares do not form part of the net asset value of the Company.

<sup>\*\*</sup> Lazard Global Hexagon Equity Fund was fully redeemed on 18 August 2017.

### 5. Capital and Reserves (continued)

### **Redeemable Participating Shares**

The Company also has an authorised share capital of 5,000,000,000,000 Shares of no par value which are available for issue as fully paid Participating Shares in each of the Company's Funds ("Redeemable Participating Shares"). They may be redeemed by the Company at the request of the shareholder. The value of Shares issued and redeemed during the financial year is set out in the Statement of Changes in Net Assets Attributable to Redeemable Participating Shareholders. Each Fund issues redeemable participating Shares, which are redeemable at the holder's option and are classified as financial liabilities. Redeemable participating Shares can be put back to the Fund at any time for cash equal to a proportionate Share of the Fund's net asset value. The redeemable participating Share is carried at the redemption amount that is payable at the Statement of Financial Position date if the holder exercises the right to put the Share back to the Fund.

The activity on redeemable participating Shares for the financial year ended 31 March 2019 and 31 March 2018 is as follows:

### 5. Capital and Reserves (continued)

### **Redeemable Participating Shares (continued)**

- \* Lazard Global Hexagon Equity Fund was fully redeemed on 18 August 2017.
- \*\* Lazard US Fundamental Alternative Fund was fully redeemed on 13 September 2018.
- \*\*\* Lazard Rathmore Alternative Fund launched on 1 May 2018.
- \*\*\*\* Lazard Commodities Fund launched on 23 July 2018.
- \*\*\*\*\* Lazard Scandinavian High Quality Bond Fund launched on 7 January 2019.

See Note 15 for information on the launch and termination dates of the above Share classes.

### 6. Net Asset Value

The net asset value per share of any class of Shares in a portfolio is determined by dividing the value of net assets of the Fund by the total number of Redeemable Participating Shares in issue at 31 March 2019, 31 March 2018 and 31 March 2017. The net asset value and net asset value per share in the following tables are stated in the currency of the relevant class.

	Net Asset Value at 31 March 2019	Number of Redeemable Participating shares in issue at 31 March 2019	Net Asset Value per Share at 31 March 2019	Net Asset Value at 31 March 2018	Number of Redeemable Participating shares in issue at 31 March 2018	Net Asset Value per Share at 31 March 2018	Net Asset Value at 31 March 2017	Number of Redeemable Participating shares in issue at 31 March 2017	Net Asset Value per Share at 31 March 2017

Turkish Lira	5.6496	3.9614
Uruguayan Peso	33.4850	28.3400

The following year end exchange rates have been used to translate assets and liabilities in other currencies to GBP:

Exchange Rates against GBP Pound	31 March 2019	31 March 2018
US Dollar	1.3031	1.4028

### 7. Exchange Rates (continued)

The following year end exchange rates have been used to translate assets and liabilities in other currencies to EUR:

Exchange Rates against EUR	31 March 2019	31 March 2018
British Pound	0.8617	0.8767
Danish Krone	7.4654	7.4540
Norwegian Krone	9.6695	9.6555
Swedish Krona	10.4148	10.2998
Swiss Franc	1.1182	1.1777
US Dollar	1.1228	1.2299

The following average exchange rates have been used to translate Statement of Comprehensive Income and Statement of Changes in Net Assets Attributable to Redeemable Participating Shareholders balances in other currencies to GBP:

Average Exchange Rates against GBP Pound	31 March 2019	31 March 2018
US Dollar	1.3132	1.3267

The following average exchange rates have been used to translate the Statement of Comprehensive Income and Statement of Changes in Net Assets Attributable to Redeemable Participating Shareholders balances in other currencies to EUR:

Average Exchange Rates against EUR	31 March 2019	31 March 2018
US Dollar	1.1579	1.1705

### 8. Cash and Cash Equivalents

Cash and cash equivalents as at 31 March 2019 and 31 March 2018 comprises cash at bank. The Depositary may utilise one or more sub-custodians for holding cash of the Funds. Substantially all of the cash and bank overdrafts are held with the Depositary's global sub-custodian, State Street Bank and Trust Company. Cash collateral is held with Bank of America Merrill Lynch, Barclays Bank Plc, CIBC World Markets, Citibank NA, Goldman Sachs, HSBC Bank Plc, JP Morgan Chase and Company, Morgan Stanley, Standard Chartered Bank and UBS AG and is subject to the counterparty risk of those entities. Cash is also deposited by or on behalf of the Funds for initial margin purposes with brokers for options, open futures contracts and contracts for difference, this cash is held with Bank of America Merrill Lynch, BNP Paribas, Morgan Stanley, Royal Bank of Scotland Plc and UBS AG at the financial year end. (See Note 9, Counterparty/Issuer Risk and Credit Risk).

Investor Money Regulations ("IMR") took effect from 1 July 2016.

Cash account arrangements are in place in respect of the Company and the Funds as a consequence of the introduction of the requirements relating to the subscription and redemption collection accounts pursuant to the Central Bank of Ireland (Supervision and Enforcement) Act 2013 (Section 48 (i)) Investor Money Regulations 2015 for Fund Service Providers (the 'Investor Money Regulations').

These cash accounts, held with Bank of America for collection of subscriptions, payment of redemptions and dividends for the Company are deemed assets of the Company and are included in the Statement of Financial Position.

### 9. Risk Management Policies and Procedures

The Funds' investment activities expose them to the various types of risk which are associated with the financial instruments and markets in which they invest. The following information is not intended to be a comprehensive summary of all risks and investors should refer to the Prospectus and Supplements for a more detailed discussion of the risks inherent in investing in the Funds.

The Directors review reports from the Investment Managers on a quarterly basis and more frequently as required in relation to the Funds' performance and risk profile. The Investment Managers are also responsible for ensuring that the Funds are managed within the terms of the Funds' investment guidelines and limits set out in the Prospectus' and Supplements as well as the Investment Managers' own internal investment guidelines and limits. The Directors delegate to the Manager who in turn delegates to the Investment Managers responsibility for the monitoring and managing of risk for the Funds.

### 9. Risk Management Policies And Procedures (continued)

There is a Risk Management Team responsible for overseeing the risk management process of the Investment Managers. The Head of Risk, reports into the Oversight Committee. The Oversight Committee is the central management body for the Investment Managers' investment platform. It reviews and monitors all Funds to ensure that they remain consistent with their stated goals and objectives in terms of product characteristics, performance and risk, meaning that the Funds are managed in line with client expectations and their legal and constitutional regulations.

The following paragraphs outline procedures undertaken to manage the market, credit and liquidity risks of the Funds. These are consistent with the risks that existed at 31 March 2018. There have been no material updates in the risk management process since 31 March 2018.

#### **Market Risk**

Market risk arises mainly from uncertainty about future values of financial instruments held specifically from price, currency and interest rate movements. It represents the potential loss the Funds might suffer through holding market positions in the face of market movements.

The global exposure will be calculated using an advanced risk measurement approach. The investment management team use value-at-risk ("VaR") and commitment approach as an integral part of their ongoing monitoring and management of the Funds' market risk. For Lazard Commodities Fund, the Company uses the commitment approach to measure global exposure. The Lazard Commodities Fund holds forward foreign currency exchange contracts and total return swaps. For Lazard Scandinavian High Quality Bond Fund, the Company also uses the commitment approach to measure global exposure. The Lazard Scandinavian High Quality Bond Fund holds forward foreign currency exchange contracts and futures contracts. VaR is used for monitoring the risk for the remaining Funds.

Each Fund's global exposure will be calculated daily by way of an absolute VaR model using the Bloomberg Alpha Portfolio Analytics and Risk application. Bloomberg Alpha is used for all the required calculations and reporting for VaR. VaR is a category of risk measures which, unlike market risk metrics such as the Greeks, duration and convexity, can be applied to all asset types and can cover all sources of market risk. VaR summarizes the maximum expected loss over a target horizon with a given level of confidence. VaR is a useful measure in that it can summarize the maximum loss in a single monetary value or a percentage of the overall portfolio. The Investment Managers will also be using Algorithmics system for VaR calculations and risk analyses. Analytics from Algorithmics are also used in Bloomberg Alpha. The VaR model will use the following quantitative standards:

- The confidence level should be 99%;
- The holding period should be 1 trading day; and
- The historical observation period should not be less than 1 year; however, a shorter observation period may be used if justified, for example, as a result of significant recent changes in price volatility.

There are three popular approaches for calculating VaR, namely Historical Simulation, analytical Variance-Covariance method and Monte Carlo Simulation. The investment management team uses the simple yet powerful approach of the historical simulation method which assumes that historical return distribution is a good representation of future returns. The Investment Managers believes that this method is one of the more reliable methods as it requires making the minimum number of assumptions. It also incorporates the volatilities and correlations explicitly by using the real market returns. As the VaR reports generated by Bloomberg Alpha are based on 99% confidence interval and 1 day holding period, the 20% 20-day limit is scaled down according to appropriate factors. The absolute 1-day 99% VaR limit is 20% / sqrt(20) = 4.47%.

In case the VaR for certain holdings does not get calculated by the system due to data errors or modelling limitation, the Risk Management Team will assess the VaR impact of those holdings and incorporate that figure as an add-on to the VaR. This approach may ignore possible diversification benefits, and will provide a conservative VaR level for the portfolio.

Stress testing will be performed on a monthly and as required basis. Back testing results will be recorded daily and analysed monthly. The data in the VaR model is updated on a daily basis and contains one year's market data.

Bloomberg Alpha is used for stress testing to evaluate the market risk inherent in the portfolio under abnormal market conditions. The risk methodology used in stress tests is similar to the one used in calculating VaR. The portfolio Profit and Loss (P&L) or % return is generated by calculating a projected portfolio market value, based on a change in Risk Factors. To generate the market value, a "Full Valuation Methodology" is used to theoretically value every security within the Fund or the sensitivities to rates and spreads are used to assess the impact of larger market moves.

### 9. Risk Management Policies And Procedures (continued)

### **Market Risk (continued)**

Since VaR cannot incorporate all possible scenarios, stress testing helps capture sudden and dramatic changes in the portfolio's value given atypical market circumstances. Stress testing is utilised monthly and on an ad hoc basis. Daily monitoring of the sensitivities to interest rates, FX and credit spreads gives a better picture of how the portfolio might react to sudden market moves.

Some limitations of VaR are:

- the models are based on historical data and cannot take account of the fact that future market price movements, correlations between markets and levels of market liquidity in conditions of market stress may bear no relation to historical patterns;
- the market price risk information is a relative estimate of risk rather than a precise and accurate number;
- the market price information represents a hypothetical outcome and is not intended to be predictive (in the case of probability-based methods, such as VaR, profits and losses are almost certain to exceed the reported amount with a frequency depending on the confidence interval chosen); and
- future market conditions could vary significantly from those experienced in the past.

The tables below for 31 March 2019 and 31 March 2018 detail the lowest, the highest and the average VaR and also the utilization of the VaR limit calculated during the financial year of the daily VaR limit (4.47%) of each of the Funds. The utilization of the VaR limit is calculated as the VaR divided by the daily VaR limit.

#### For the financial year ended 31 March 2019

Portfolio Fund	Lowest VaR (%)	Lowest utilisation of VaR Limit (%)	Highest VaR (%)	Highest utilisation of VaR Limit (%)	Average VaR (%)	Average utilisation of VaR Limit (%)
Lazard Emerging Markets Bond Fund	0.67	14.99	1.17	26.17	0.90	20.13

Lazard Global Hexagon Equity Fund	0.59	13.20	2.14	47.87	1.20	26.85
Lazard European Alternative Fund	0.43	9.62	1.70	38.03	0.75	16.78
Lazard US Fundamental Alternative Fund	0.63	14.09	1.50	33.56	0.90	20.13

The average level of leverage figures provided below are calculated as the sum of the absolute value of notionals of the derivatives used as is required by the UCITS Regulations. This figure does not take into account any netting and hedging arrangements that the Funds may have in place at any time even though these netting and hedging arrangements are used for risk reduction purposes. As these netting and hedging arrangements, if taken into account, may reduce the level of leverage, this calculation may not provide an accurate measure of the Funds' actual leverage position.

### 9. Risk Management Policies And Procedures (continued)

### **Market Risk (continued)**

Below is the daily average level of leverage for each Fund during the one year period ending 31 March 2019 and 31 March 2018.

Level of Leverage	Average Level of Leverage (%)	Average Level of Leverage (%)
Fund Name	31 March 2019	31 March 2018
Lazard Emerging Markets Bond Fund	99	99
Lazard Emerging Markets Local Debt Fund	183	179
Lazard Emerging Markets Total Return Debt Fund	200	283
Lazard Emerging Markets Debt Blend Fund	173	162
Lazard Emerging Markets Debt Unrestricted Blend Fund	158	153
Lazard Diversified Return Fund	145	127
Lazard Global Hexagon Equity Fund	-	160
Lazard European Alternative Fund	97	123
Lazard US Fundamental Alternative Fund	123	138
Lazard Rathmore Alternative	175	-

### (i) Market Price Risk

Market price risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices (other than those arising from interest rate risk or currency risk), whether those changes are caused by factors specific to the individual financial instrument or its issuer, or factors affecting similar financial instruments traded in the market. The Funds are exposed to market price risk arising from its investments in securities. By diversifying the portfolio, the risk that a price change of a particular investment will have a material impact on the Funds is minimised. The Investment Managers manage the Funds' market risk on a daily basis in accordance with the respective Fund's investment objective, policies and core philosophy. The core philosophy of total performance measurement entails the active management of return, risk and cost. Relative-to-benchmark risk is controlled through the construction of diversified portfolios where exposures to certain market features (such as capitalisation or industry) are limited. As at 31 March 2019 and 31 March 2018 all of the securities (excluding derivatives) were designated at fair value through profit or loss.

Refer to the Portfolio of Investments on pages 100 to 153 for details of the fair value of the securities held on each Fund.

### (ii) Foreign Currency Risk

The Funds may invest in securities denominated in currencies other than its functional currency (or, indeed, the currency of the investor). Furthermore, the Funds may invest in forward foreign currency exchange contracts for the purpose of implementing investment views as well as hedging. Consequently, the Funds are exposed to risks that the exchange rate of its reporting currency relative to other currencies may change in a manner that has an adverse effect on the value of the portion of a Fund's assets that are denominated in currencies other than its own currency. Currencies may also move in such a way as to cause losses on currency forward foreign currency exchange contracts.

For portfolios in which currency risk is hedged out, the currency risk is managed by regular rebalancing of the forward foreign currency exchange contracts to maintain zero (or close to zero) currency exposure. For those portfolios for which currency exposure is a critical source of return, exposures are managed relative to the appropriate benchmark. For other portfolios, there is no explicit currency-management policy.

The tables immediately below provide the exposure to different currencies as at 31 March 2019 and 31 March 2018:

Lazard Emerging Markets Bond Fund	2019 Net Monetary Assets USD	Lazard Emerging Markets Bond Fund	2018 Net Monetary Assets USD

### 9. Risk Management Policies And Procedures (continued)

#### **Market Risk (continued)**

#### (ii) Foreign Currency Risk (continued)

#### (iii) Interest Rate Risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in prevailing interest rates. The Funds are exposed to interest rate risk through investments in securities with fixed and floating rates of interest, held within the Funds and their respective cash balances. The Investment Managers manages the Funds' interest rate risk on a daily basis in accordance with the respective Fund's investment objective, policies and core philosophy.

The interest rate profile of the financial assets and liabilities of the Funds at 31 March 2019 and 31 March 2018 was as follows:

2019	Up to 1 year	1 - 5 years	Over 5 years	Non-Interest Bearing	Total
Lazard Emerging Markets Bond Fund	USD	USD	USD	USD	USD

#### **Credit Risk**

Credit risk is the risk that the counterparty or issuer to a financial instrument will fail to discharge an obligation or commitment that it has entered into with a Fund. The Funds' main credit risk concentrations arise from trading equity and debt securities, investment funds and financial derivative instruments ("FDIs") in addition to cash balances held at the Depositary. Refer to the Portfolio of Investments on pages 100 to 153 for details of the monetary values relating to the above.

All transactions involving transferable securities are settled upon delivery using approved brokers. The risk of default is considered minimal, as delivery of securities sold is only made once the broker has received payment. Payment is made on a purchase once the securities have been received by the broker. The trade will fail if either party fails to meet their obligations.

The tables below detail the Portfolio of Investments by rating category for the Funds which invest in fixed-income securities and money market instruments as at 31 March 2019 and 31 March 2018:

<sup>\*</sup> Moody's credit rating.

For the year ended 31 March 2019, Lazard US Fundamental Alternative Fund was not included in the above tables as this Fund was fully redeemed on 13 September 2018.

For the year ended 31 March 2018, Lazard US Fundamental Alternative Fund was not included in the above tables as this Fund comprised solely of securities that did not have a credit rating.

Substantially all of the cash and securities held by the Funds are held via the Depositary except for the FDI that are held with counterparties as disclosed on the Portfolio of Investments. State Street Bank and Trust Company act as the Global Sub-Custodian for the Depositary.

While cash held by the global sub-custodian and the Depositary is identifiable as belonging to the Funds, the Funds will be exposed to the credit risk of the financial institution where cash is deposited. In the event of insolvency of the financial institution, the Funds will be treated as a general creditor of the financial institution in relation to cash holdings of the Funds.

In circumstances such as the insolvency of a sub-custodian or registrar, or retro-active application of legislation, the Funds may not, in all cases, be able to establish title to investments made and may suffer losses as a result. The Funds may find it impossible to enforce their rights against third parties. In addition, as the Funds may invest in markets where custodial and/or settlement systems are not fully developed, there is a transaction and custody risk involved in dealing in such markets. In certain circumstances, a Fund may not be able to recover some of its assets. Such circumstances may include any acts or omissions or the liquidation, bankruptcy or insolvency of a sub-custodian, retroactive application of legislation and fraud or improper registration of title. The costs borne by a Fund in investing and holding investments in such markets will generally be higher than in organised securities markets.

<sup>\*\*</sup> Lazard Rathmore Alternative Fund launched on 1 May 2018, therefore there are no comparatives for this Fund.

<sup>\*\*\*</sup> Lazard Commodities Fund launched on 23 July 2018, therefore there are no comparatives for this Fund.

<sup>\*\*\*\*</sup> Lazard Scandinavian High Quality Bond Fund launched on 7 January 2019, therefore there are no comparatives for this Fund.

### 9. Risk Management Policies And Procedures (continued)

#### **Credit Risk (continued)**

The Funds' securities are always separately identified on the accounting records of State Street Bank and Trust Company, therefore the rights, with respect to those securities, are preserved. Thus in the event of insolvency or bankruptcy of the Depositary, the Funds' assets are segregated and protected and this further reduces counterparty risk.

Bankruptcy or insolvency by the Depositary may cause the Funds' rights with respect to the cash and the securities held by the Depositary to be delayed or limited. The Funds monitor their risk by monitoring the credit quality and financial position of the Depositary that the Funds use. The long term credit rating of the parent company of the Depositary and Global Sub-Custodian, State Street Corporation, is A1 (31 March 2018: A1) based on the Moody's Rating Agency. The Depositary has a general lien in the normal course of business over the assets of the Funds.

The extent of the Funds' exposure to credit risk in respect of the financial statements approximates the carrying value as recorded in the Statement of Financial Position on pages 36, 37, 38 and 39. There were no past due or impaired assets as of 31 March 2019 and 31 March 2018.

#### Counterparty/Issuer Risk

The Funds are exposed to a credit risk to parties with whom they trade and will bear the risk of settlement default. Counterparty/issuer risk is monitored and managed by a formal counterparty or issuer exposure management program within the Investment Managers. The Investment Managers' approved list of counterparties is generally limited to the most highly rated and recognised dealers in their sectors. The Investment Managers perform ongoing monitoring of this list. Counterparty/issuer risk is monitored on an ongoing basis in the following manner:

- Approved broker selection the trading system only permits trading with approved brokers. New brokers are added, subject to
  a formal review process that includes a review of the broker's creditworthiness, financial strength, ability to enter into legally
  enforceable arrangements and standing in the financial community.
- Broker monitoring performed through a variety of ongoing activities, including the assessment of certain regulatory filings and financial statements.
- · Measurement and monitoring of counterparty or issuer trade exposure a daily review of outstanding positions is performed.

A Fund is exposed to a credit risk on the over the counter ("OTC") counterparties with whom it trades, that these counterparties may not perform their obligations and that settlement of transactions may not occur. All OTC counterparties must meet the following criteria as set out in the UCITS Regulations namely:

- (i) A credit institution in accordance with Central Bank UCITS Regulations, or
- (ii) Have a minimum credit rating of A2 or equivalent, or in the opinion of the Investment Managers, an implied credit minimum rating of A2 or equivalent.

Exposures to individual counterparties are limited to 10% of Net Asset Value in the case of (i) above and 5% of Net Asset Value in the case of (ii) above.

Cash collateral is held with Bank of America Merrill Lynch, Barclays Bank Plc, CIBC World Markets, Citibank NA, Goldman Sachs, HSBC Bank Plc, JP Morgan Chase and Company, Morgan Stanley, Standard Chartered Bank and UBS AG. Counterparty cash received by a Fund as collateral for financial derivative instrument transactions is recorded as an asset on the Statement of Financial Position within "Broker cash held as collateral for financial derivative instrument transactions" and a related liability to repay the collateral is disclosed within "Broker cash due to counterparties for financial derivative instrument transactions". A Fund's assets may be deposited by or on behalf of a Fund for collateral purposes with counterparties for financial derivative instruments held on the Fund. Such assets remain in the ownership of the relevant Fund and are recorded as an asset on the Statement of Financial Position. Cash pledged by a Fund as collateral is recognised on the Statement of Financial Position within "Broker cash held as collateral for financial derivative instrument transactions". Non cash collateral does not form part of the Net Asset Value of the Fund and is recorded at the base of each relevant Portfolio of Investments for reference purposes only (please refer to pages 143 and 151 on the Portfolio of Investments for Lazard European Alternative Fund and Lazard Rathmore Alternative Fund respectively).

Cash is also deposited by or on behalf of the Funds for initial margin purposes with brokers for options, open futures contracts and contracts for difference, this cash is held with Bank of America Merrill Lynch, BNP Paribas, Morgan Stanley, Royal Bank of Scotland Plc and UBS AG at the financial year end and is subject to the credit risk of Bank of America Merrill Lynch, BNP Paribas, Morgan Stanley, Royal Bank of Scotland Plc and UBS AG respectively.

### 9. Risk Management Policies And Procedures (continued)

Client cash held

#### Counterparty/Issuer Risk (continued)

Investments pledged by the Funds as collateral are recognised at fair value in the relevant Fund's Portfolio of Investments and such investments are referenced accordingly at the base of the Portfolio of Investments. See the following for details of OTC counterparty exposure for the Funds as at 31 March 2019 and 31 March 2018.

<sup>\*</sup> Moody's credit rating.

The Funds have an ISDA agreement and/or Credit Support Annex in place with all the counterparties. The Portfolio of Investments includes details of the open forward foreign currency exchange contracts and the counterparties as at the financial year end.

#### **Liquidity Risk**

The Funds' assets comprise mainly realisable securities which can be readily sold. The main liability of the Funds is the redemption of any Shares that investors wish to sell. Shareholders have the right to require the Funds to redeem their Shares in the Funds on any business day subject to restrictions set out in the prospectus. If total requests for redemption and/or switching on any dealing day for any Fund exceed 10% of the Net Asset Value of that Fund, each redemption or switching request in respect of Shares in such Fund may, at the discretion of the Directors, be reduced pro rata so that the total number of Shares of such Fund for redemption or switching on that dealing day shall not exceed 10% of the Net Asset Value of that Fund. Any redemption or switching request so reduced shall be carried forward to the next dealing day and effected to subsequent redemption or switching requests on the following dealing day(s). The Funds have the ability to borrow in the short term to ensure settlement. No such borrowings have arisen during the financial years ended 31 March 2019 and 31 March 2018.

The Funds' financial liabilities due for payment within one month relate in the most part, to security purchases awaiting settlements, redemptions of redeemable participating shares and payment of expenses and bank overdraft interest. Details of these amounts where relevant, can be found in the Statement of Financial Position. There are no financial liabilities that fall due over 3 months except for the FDIs which are outlined on the Portfolios of Investments at 31 March 2019 or at 31 March 2018.

#### **Concentration Risk**

The Funds may be exposed to concentration risk when a shareholder holds a significant portion of the issued share capital of the Funds.

Please see Note 12.

<sup>\*\*</sup> The net exposure represents the unrealised of the mark-to-market value with the counterparty as at financial year end.

<sup>\*\*\*</sup> Lazard Rathmore Alternative Fund launched on 1 May 2018, therefore there are no comparatives for this Fund.

<sup>\*\*\*\*</sup> Lazard Commodities Fund launched on 23 July 2018, therefore there are no comparatives for this Fund.

### 9. Risk Management Policies And Procedures (continued)

#### **Fair Value Measurement**

The Company is required to classify financial assets and financial liabilities at fair value through profit or loss as follows:

Level 1 inputs are unadjusted quoted prices in active markets for identical assets or liabilities that the reporting entity has the ability to access at the valuation date. An active market for the asset or liability is a market in which transactions for the asset or liability occur with sufficient frequency and volume to provide pricing information on an ongoing basis.

Level 2 inputs are inputs other than quoted prices in active markets included within level 1 that are observable for the asset or liability, either directly or indirectly. Fair value is determined through the use of models or other valuation methodologies. Level 2 inputs include the following:

- a) Quoted prices for similar assets or liabilities in active markets.
- b) Quoted prices for identical or similar assets or liabilities in markets that are not active, that is, markets in which there are few transactions for the asset or liability, the prices are not current, or price quotations vary substantially either over time or among market makers, or in which little information is released publicly.
- c) Inputs other than quoted prices that are observable for the asset or liability (e.g. interest rate and yield curves observable at commonly quoted intervals, volatilities, prepayment speeds, loss severities, credit risks and default rates).
- d) Inputs that are derived principally from or corroborated by observable market data by correlation or other means.

Level 3 inputs are unobservable inputs for the asset or liability. Unobservable inputs reflect the Company's own assumptions about how market participants would be expected to value the asset or liability. Unobservable inputs are developed based on the best information available in the circumstances, other than market data obtained from sources independent of the Company and might include the Company's own data.

An investment is always categorised as level 1, 2 or 3 in its entirety. In certain cases, the fair value measurement for an investment may use a number of different inputs that fall into different levels of the fair value hierarchy. In such cases, an investment's level within the fair value hierarchy is based on the lowest level of input that is significant to the fair value measurement. The assessment of the significance of a particular input to the fair value measurement requires judgment and is specific to the investment.

The following tables provide a breakdown of the financial instruments of each Fund by valuation category at 31 March 2019 and 31 March 2018:

Lazard Emerging Markets Bond Fund	Level 1	Level 2	Total

<sup>\*</sup> Lazard US Fundamental Alternative Fund was fully redeemed on 13 September 2018.

There were no level 3 securities held on the Funds with the exception of securities held on Lazard Emerging Markets Total Return Debt Fund during the financial year ended 31 March 2019 and no level 3 securities held on the Funds with the exception of a security held on Lazard Emerging Markets Total Return Debt Fund during the financial year ended 31 March 2018.

The securities classified as Level 3 as at 31 March 2019 were classified as Level 3 because they were priced using unobservable inputs. The level 3 securities are corporate bonds incorporated in the Cayman Islands, G3 Exploration Ltd, which had a fair value of USD Nil as at 31 March 2019.

The security classified as Level 3 as at 31 March 2018 was classified as Level 3 because it was priced using unobservable inputs. The level 3 security is a corporate bond incorporated in the Cayman Islands, 3 G Exploration Ltd, which had a fair value of USD 1,457,000 as at 31 March 2018.

Investments, whose values are based on quoted market prices in active markets, and therefore classified within level 1, include active listed equities and exchange traded derivatives. The Funds do not adjust the quoted price for these instruments.

<sup>\*\*</sup> Lazard Rathmore Alternative Fund launched on 1 May 2018, therefore there are no comparatives for this Fund.

<sup>\*\*\*</sup> Lazard Commodities Fund launched on 23 July 2018, therefore there are no comparatives for this Fund.

<sup>\*\*\*\*</sup> Lazard Scandinavian High Quality Bond Fund launched on 7 January 2019, therefore no comparatives for this Fund.

### 9. Risk Management Policies And Procedures (continued)

#### **Fair Value Measurement (continued)**

Financial instruments that do not have quoted market prices but are valued based on market prices, dealer quotations or alternative pricing sources supported by observable inputs are classified within level 2, these include bonds and over-the-counter derivatives.

### 10. Securities Financing Transactions Regulation

Article 13 of Regulation (EU) 2015/2365 on transparency of securities financing transactions ("SFTs") and of reuse and amending Regulation (EU) No 648/2012, requires UCITS investment companies to provide the following information on the use made of SFTs.

Securities Financing Transactions Regulation (Regulation (EU) 2015/2365) ("SFTR") came into force on 12 January 2016 and, amongst other requirements, introduces new disclosure requirements in the Company's financial statements published after 13 January 2017 detailing the Fund's use of securities financing transactions and total return swaps. As a result, additional disclosures have been included in the notes to the financial statements.

Below is the market value of assets engaged in securities financing transactions as at 31 March 2019 and 31 March 2018. The assets which are engaged in securities financing transactions at this date are contracts for difference and total return swaps, which are settled tri-party respectively.

- ix) an amendment to the Investment Policy section of the Supplement for Lazard Emerging Markets Bond Fund, Lazard Emerging Markets Local Debt Fund and Lazard Emerging Markets Total Return Debt Fund to provide for flexibility to invest in securities listed or traded on the Regulated Markets of Russia;
- x) amendments to the Performance Fee section of the Supplement for Lazard European Alternative Fund;
- xi) the addition of a further index, namely, the Bloomberg Commodity Gas Oil Capped Excess Return Index (the "Index") to the Commodity Indices section of the Supplement for Lazard Commodities Fund;
- xii) the addition of a concentration risk factor to the Supplement for Lazard Scandinavian High Quality Bond Fund.

There were no other significant events during the financial year.

### 16. Significant Events Since The Financial Year End

Distributions will not be paid in respect of any class of Share which is an accumulating class. Income and profits, if any, attributable to an accumulating Share class will be accumulated and reinvested in the relevant Fund on behalf of the Shareholders of that class and will be reflected in the Net Asset Value of the relevant accumulating Share class. Distributions were declared on the below share classes on Lazard Emerging Markets Local Debt Fund, Lazard Emerging Markets Total Return Debt Fund, Lazard Emerging Markets Debt Blend Fund, Lazard Commodities Fund and Lazard Scandinavian High Quality Bond Fund in respect of the year from 1 April 2018 to 31 March 2019. These were paid to the Shareholders of that class in the relevant Fund on 9 April 2019 and details of these distributions are as follows:

### 16. Significant Events Since The Financial Year End (continued)

Michael Allen resigned as a Director of the Company and also resigned from the Audit Committee on 25 June 2019. Jeremy Taylor was appointed to the Audit Committee on 25 June 2019.

There were no other significant events since the financial year end.

#### 17. Reconciliation Of Financial Statements NAV To Published NAV

All fees and expenses of establishing Lazard Commodities Fund, Lazard Rathmore Alternative Fund and Lazard Scandinavian High Quality Bond Fund, as well as the fees of the professional advisers to the Funds (establishment expenses) not exceeding USD 100,000 are borne by the Fund and amortised over the first 60 months of the lifetime of the Funds. However, for the purpose of these financial statements, the organisational fees have been expensed to the Fund in their entirety in line with FRS 102. Due to the difference in the treatment of these fees, there is a difference in the NAV per the financial statements and the NAV as calculated in accordance with the Prospectus (published NAV). The NAV per the financial statements for all of the other Lazard Funds as at 31 March 2019 and 31 March 2018 are in line with the NAV as calculated in accordance with the Prospectus (published NAV).

Lazard Commodities Fund at 31 March 2019	Total
	USD
NAV per financial statements	36,528,662
Organisational fees written off	86,303
Published NAV (in accordance with the Prospectus)	36,614,965
Lazard Rathmore Alternative Fund at 31 March 2019	Total
	USD
NAV per financial statements	114,703,167
Organisational fees written off	81,765
Published NAV (in accordance with the Prospectus)	114,784,932
Lazard Scandinavian High Quality Bond Fund at 31 March 2019	Total
	EUR
NAV per financial statements	45,765,408
Organisational fees written off	23,896
Published NAV (in accordance with the Prospectus)	45,789,304

### 18. Approval Of The Financial Statements

The financial statements were approved by the Directors on 3 July 2019.

#### Statements of Major Changes in Investments (unaudited)

#### **Lazard Emerging Markets Bond Fund**

In accordance with the Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertaking for Collective Investment in Transferable Securities) Regulations 2015 (as amended), a statement of largest changes in the composition of the Portfolios of Investments during the reporting year is provided to ensure that shareholders can identify changes in the investments held by the Funds. These are defined as the aggregate purchases and sales of an investment (including maturities but excluding repurchase agreements, overnight discount notes and time deposits, which are employed chiefly as a means of seeking to ensure efficient portfolio management) exceeding 1.00% of the total value of purchases and sales for the financial year. At a minimum the largest 20 purchases and sales are listed.

### **UCITS V Remuneration Disclosure** (unaudited)

As a result of the implementation of the UCITS V Directive in March 2016, all authorised UCITS Management Companies must make certain disclosures in relation to the remuneration of 'UCITS Code Staff' (broadly defined as those staff whose professional activities have a material impact on the risk profiles of the funds managed by that UCITS Management Company).

Lazard Global Investment Funds plc (the "Company") is managed by Lazard Fund Managers (Ireland) Limited (the "Manager"), which is a subsidiary of the Lazard Asset Management LLC ("LAM Group").

The table below provides an overview of the following;

- · Aggregate total remuneration paid by the Manager to its staff; and
- · Aggregate total remuneration paid by the Manager to its UCITS Code Staff for activities in respect of the Fund.

	Headcount	Total Remuneration USD
Remuneration paid to staff of the Manager	92	14,330,678
of which		
Fixed remuneration	92	3,405,985
Variable remuneration	92	10,924,693
Aggregate remuneration paid to UCITS Remuneration Code staff	84	13,418,575
of which		
Senior Management	7	7,302,431
Other code staff/risk takers	77	6,116,144

- 1) 'UCITS Remuneration Code Staff' relates to the total number of UCITS Code Staff who are employed by the Manager, including directors and similar. It also includes employees of other entities within the LAM Group to whom certain functions in respect of the Fund (in particular investment management) have been delegated.
- 2) Please note, because of the global way in which LAM operates, the majority of these staff members provide services to more than one LAM Group entity.
- 3) The remuneration disclosed above only relates to the provision of services by these employees to the Fund (on a pro rata basis) rather than the total remuneration paid to those employees in the year. Remuneration is pro-rated on the basis of assets under management within the Fund.

Remuneration is made up of fixed pay (i.e. salary and benefits such as pension contributions) and performance-related pay (annual and long-term incentives). Annual incentives are designed to reward performance in line with the business strategy, objectives, values and long-term interests of the Manager and LAM. The annual incentive earned by an individual is dependent on the achievement of financial and non-financial objectives, including adherence to effective risk management practices. The Manager provides long-term incentives which are designed to link reward with long-term success and recognise the responsibility participants have in driving future success and delivering value. The structure of remuneration packages is such that the fixed element is sufficiently large to enable a flexible incentive policy to be operated.

Employees are eligible for an annual incentive based on their individual performance, and depending on their role, the performance of their business unit and/or the LAM Group. These incentives are managed within a strict risk framework. The LAM Group actively manages risks associated with delivering and measuring performance. Employee activities are carefully managed within the LAM risk management framework, and individual incentive outcomes are reviewed and may be reduced in light of any associated risk management issues.

LAM's Remuneration Committee operates on a global basis, across the Lazard Group as a whole. It reports to the Board of the Lazard Group. This Committee reviews risk and compliance issues in relation to remuneration (including deferred awards) for all employees.

These remuneration processes and oversight arrangements apply to all entities within the LAM Group, including those to which investment management of UCITS funds has been delegated. Those delegates are subject to contractual arrangements to ensure that policies which are regarded as equivalent are applied.

The general principles of the applicable remuneration policies, and the implementation of the remuneration policies is reviewed at least annually.
