Benchmark uses and resemblance

- Performance comparison.

The Sub-Fund is actively managed. Though the majority of its holdings (excluding derivatives) are likely to be components of the benchmark, the Investment Manager has broad discretion to deviate from its securities, weightings and risk characteristics. The degree to which the Sub-Fund may resemble the composition and risk characteristics of the benchmark will vary over time and its performance may be meaningfully different.

POLICIES

Main investment exposure At least 67% of assets invested in convertible securities from issuers anywhere in the world, including emerging markets. The

portfolio will be conservatively constructed to achieve a portfolio delta of typically 10% to 40%.

Convertible securities may include any suitable convertible or exchangeable instruments such as convertible bonds, convertible notes or convertible preference shares.

Other investment exposures Debt securities, equities and warrants.
