Past performance is not a reliable indicator of future results. Source for performance figures - Legg Mason. Performance is calculated on a NAV to NAV, with gross income reinvested without initial charges but reflecting annual management fees. Sales charges, taxes and other locally applied costs have not been deducted. From 23 July 2019, the pricing of securities held in the Fund will use the mean (or mid) value of the bid and ask prices, to calculate the Fund's Net Asset Values ("NAV"). The Fund previously used a bid price methodology for fixed income securities, and last traded price for equity securities.

EnTrust Global

Alternative Income Strategy Class A Acc. (USD)

Investment manager

EnTrust Global, one of the world's largest hedge fund investors, has the scale and resources for innovation in a dynamic industry. With nearly 200 manager relationships across all alternative investment strategies, EnTrust Global is a global leader in structuring comprehensive alternative approaches for institutional and high net worth clients. EnTrust Global also does business as EnTrustPermal.

Investment risks

The fund is subject to the following risks which are materially relevant but may not be adequately captured by the indicator:

Manager of advisers: The fund's performance is subject to the performance of the underlying Sub-Advisers to which the investment manager has allocated investment.

Bonds: There is a risk that issuers of bonds held by the Sub-Advisers may not be able to repay the bond or pay the interest due on it, leading to losses for the Underlying Fund. The Sub-Advisers may invest in lower rated or unrated bonds, which carry a higher degree of risk than higher rated bonds.

Derivatives: The Sub-Advisers make significant use of derivatives. The use of derivatives can result in greater fluctuations of the fund's value and may cause the fund to lose as much as or more than the amount invested.

Asset-backed securities: The Sub-Advisers may invest in asset-backed securities. The timing and size of the cash-flow from these are not fully assured and could result in losses for the Underlying Fund.

Real Estate Investment Trusts: The Sub-Advisers may invest in REITs. Investment in REITs poses similar risks as investing directly in real estate, including changing values, tax rules and other laws. The value of investments in REITs and the level of cash flow generated for distributions to investors may be affected by defaults by borrowers and tenants.

Hedging: The Sub-Advisers may use derivatives to reduce the risk of movements in exchange rates between the currency of the investments held and the base currency of the fund itself (hedging). However, hedging transactions can also expose the fund to additional risks.

Liquidity: In certain circumstances it may be difficult to sell the fund's investments because there may not be enough demand for them in the markets, in which case the fund may not be able to minimise a loss on such investments.

Performance fee: The fund's performance fee structure may result in a performance fee being paid even though the expected growth of the fund's net assets has not been realised.

Fund counterparties: The fund may suffer losses if the parties that it trades with cannot meet their financial obligations.

Definitions

Risk and reward profile: There is no guarantee that the fund will remain in the indicator category shown above and the categorisation of the fund may shift over time. Historical data, which is used in calculating the indicator, may not be a reliable indicator of the future risk profile of this fund. The lowest category does not mean a risk-free investment. The fund does not offer any capital guarantee or protection.
