Loomis Sayles U.S. Core Plus Bond Fund (RE/A(USD) ISIN: LU1269967136), a sub-fund of Natixis International Funds (Lux) I SICAV

Management Company and Promoter: NGAM S.A., part of the Natixis group of companies
Investment Manager: Loomis, Sayles & Company, L.P., part of the Natixis group of companies

Objectives and Investment Policy

Investment objective:

The investment objective of Loomis Sayles U.S. Core Plus Bond Fund (the "Fund") is high total investment return through a combination of income and capital appreciation.

Investment policy:

The Fund invests primarily in debt securities of U.S. issuers. The Fund invests at least two-thirds of its total assets in debt securities of U.S. issuers. U.S. issuers include the U.S. government and its agencies, companies domiciled or which exercise the preponderant part of their economic activities in the U.S. and securitized instruments issued in the U.S. The Fund may invest any portion of its total assets in Regulation S and Rule 144A securities. The Fund may invest up to 60% in securitized instruments. Such instruments include mortgage-backed securities ("MBS", securities whose value and income payments are derived from and collateralized by a specified pool of mortgaged loans) including commercial MBS and non-agency residential MBS; and asset-backed securities (securities resulting from the securitization of underlying assets), including collateralized loan obligations and collateralized debt obligations (debt securities backed to a pool of various other securities such as commercial loans or bonds) and structured notes. With regard to collateralized loan obligations investments, the Fund will invest in issues that are sufficiently liquid and which include regular, verifiable valuations.

The Fund may invest up to 20% of its assets in securities of below investment grade quality. Below-investment grade securities are securities rated less than BBB- (Standard & Poor's Ratings Services), Baa3 (Moody's Investors Service, Inc.), an equivalent rating by Fitch Ratings or if unrated, determined by the Investment Manager to be equivalent.

The Fund may invest up to one-third of its total assets in securities other than those described above including securities issued by issuers domiciled

in countries other than the U.S. The Fund may invest up to 10% in convertible bonds.

The Fund may invest no more than 10% of its total assets in bank loans that qualify as money market instruments, and up to 10% of its total assets in undertakings for collective investment. The Fund may have up to 10% of its assets exposed to currencies other than the U.S. dollar, including the currencies of emerging markets countries.

The Fund is actively managed and uses a research-driven strategy in selecting sectors and securities as its primary return sources.

The Fund may use derivative instruments in order to expose its assets to, or hedge its assets against, risks linked to interest rates, exchange rates, credit and/or equities, within the limits described under "Use of Derivatives, Special Investment and Hedging Techniques" below. In order to achieve its management objectives, the Fund may engage in the credit derivatives market by entering into, among other things, credit default swaps (a bilateral financial contract in which one counterparty (protection buyer) pays a periodic fee in return for a contingent payment by the protection seller following a credit event of a reference issuer) in order to sell and buy protection. For more details, please refer to the chapter entitled "Principal Risks" in the prospectus.

The Reference Currency of the Fund is the U.S. dollar. The Fund is not managed relative to a specific reference index. However, for indicative purposes, the Fund's performance may be compared to the Barclays U.S. Aggregate Bond Index. Shareholders may redeem Shares on demand on any business day in Luxembourg. Income derived from the Fund is distributed for distributing Shares and reinvested for accumulating Shares, as further detailed in this document.

Please refer to the section entitled "Subscription, Transfer, Conversion and Redemption of shares" of the Prospectus for additional information.

Recommendation: this Fund may not be appropriate for investors who plan to withdraw their money within less than 3 years.

Risk and Reward Profile

1	2	3	4	5	6	7
---	---	---	---	---	---	---

The Fund is ranked 3 on the synthetic risk and reward indicator scale, which is based on historical data. Due to its exposure to fixed income markets, the Fund may experience medium volatility, as expressed by its rank on the above scale. Historical data may not be a reliable indication for the future. The risk category shown is not guaranteed and may shift over time. There is no capital guarantee or protection on the value of the Fund. The lowest category does not mean "risk free".

Special Risk Considerations

Credit Risk: Funds investing in debt securities issued by a corporate, bank or sovereign organization are exposed to the possibility that this issuer will not be able to reimburse debt holders (principal and interest payment). In addition, if after acquisition the perceived risk of failure increases, the value of such securities is likely to decrease.

Structured instruments risk (including securitizations): Funds investing in structured instruments (securities linked to the performance of underlying assets, foreign currencies, indices of securities, interest rates, or other financial indicators), including securitizations, may wish to be exposed to an underlying asset or to secure

their direct assets. Payments on such structured instruments may vary with changes of the value of the underlying assets. Funds investing in structured instruments issued by a corporate, bank or other organization are exposed to the possibility that this issuer will not be able to reimburse the holders. In addition, these instruments can involve significant economic leverage. As a result, funds may gain a higher market exposure than they would have otherwise, which may in some cases increase losses. Finally, funds may not be able to sell structured instruments quickly and easily. Securitizations result from complex financial configurations that may contain both legal and specific risks pertaining to the characteristics of the underlying assets.

Changing Interest rate: The value of fixed income securities held by a fund will rise or fall inversely with changes in interest rates. When interest rates decline, the market value of fixed income securities tends to increase. Interest rates typically vary from one country to the next for reasons including rapid fluctuations of a country's money supply, changes in demand by businesses and consumers to borrow money, and actual or anticipated changes in the rate of inflation.

Geographic concentration risk: Funds that concentrate investments in certain geographic regions may suffer losses, particularly when the economies of those regions experience difficulties or when investing in those regions become less attractive. Moreover, the markets in which the funds invest may be significantly affected by adverse political, economic or regulatory developments. Please refer to the section entitled "Specific Risks" of the Prospectus for additional details on risks.
