

KEY INVESTOR INFORMATION

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Investec All China Equity Fund

A sub-fund of Investec Global Strategy Fund
Managed by Investec Asset Management Luxembourg S.A.

Class A Income shares in US dollars
ISIN: LU1303224171

Objectives and investment policy

The Fund aims to grow the value of your investment over the long term.

The Fund invests primarily in the equities (e.g. shares) or equity-related investments of Chinese companies.

Investment may be directly in the equities of Chinese companies (including China A Shares) or indirectly through derivatives (financial contracts whose value is linked to the price of an underlying asset) or other funds.

The Fund can also invest in other assets including cash and other derivatives. Derivatives may be used in order to achieve the Fund's investment objectives or for efficient portfolio management purposes e.g. with the aim of either managing the Fund risks or reducing the costs of managing the Fund.

The Investment Manager is free to choose how the Fund is invested and does not manage it with reference to an index.

Any income due from your investment is paid out to you annually.

You can buy or sell shares in the Fund on any business day in both the UK and Luxembourg, as defined in the Investec Global Strategy Fund's ("IGSF") prospectus (section 3).

Recommendation: this Fund may not be appropriate for investors who plan to withdraw their money within the short to medium term.

Risk and reward profile

This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund. The risk and reward category shown is not guaranteed to remain unchanged and may shift over time. The lowest category does not mean 'risk free'.

The value of your investment and any income from it can fall as well as rise and you are not certain of making profits; losses may be made.

The Fund appears towards the higher end of the Risk and Reward Indicator scale. This is because it invests in the shares of companies, whose values tend to fluctuate more widely.

Risks that may not be fully captured by the Risk and Reward Indicator:

Concentration: Investments may be primarily concentrated in specific areas (e.g. countries/geographical regions and/or industry sectors), in terms of investment style (e.g. income or growth), in individual holdings and/or in a number of other ways. This may mean the value of the Fund may decrease whilst more broadly invested funds might grow.

Derivatives: The use of derivatives is not intended to increase the overall level of risk in the Fund. However, the use of derivatives may still lead to large changes in the value of the Fund and includes the potential for large financial loss.

Developing market: Some of the countries in which the Fund invests may have less developed legal, political, economic and/or other systems. These markets carry a higher risk of financial loss than those in countries generally regarded as being more developed.

Equity investment: The value of equities (e.g. shares) and equity-related investments may vary according to company profits and future prospects as well as more general market factors. In the event of a company default (e.g. bankruptcy), the owners of their equity rank last in terms of any financial payment from that company.

Investing in China: Investment in mainland China may involve a higher risk of financial loss when compared with countries generally regarded as being more developed.

Liquidity: There may be insufficient buyers or sellers of particular investments giving rise to delays in trading and being able to make settlements from the Fund and/or large fluctuations in the value of the Fund which may lead to larger financial losses than might be anticipated.

Third party operational: The Fund's operations depend on third parties. Investors in the Fund may suffer disruption or financial loss in the event of third-party operational failure.

The full list of the Fund's risks are contained in Appendix 1 of the IGSF prospectus.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment. The entry charge shown is the most you might pay, in some cases you might pay less. You can find out actual entry charges from your financial adviser.

The ongoing charges figure shown here is an estimate of the charges. The Fund's annual report for each financial year will include detail on the exact charges made. The figure excludes any performance fee and portfolio transaction costs, except in the case of an entry or exit charge paid by the Fund when buying or selling units in another fund. Ongoing charges may vary from year to year.

For more information about charges, please see Appendix 1 of the IGSF prospectus.

Past performance

Past performance is not a guide to future performance. The value of your investment and income from it may go down as well as up and you may not get back the amount you invested.

The Fund was launched on 19 May 2015 and this share class on 29 October 2015.

There is insufficient data to provide a useful indication of past performance.

Practical information

The Fund's custodian is State Street Bank Luxembourg S.C.A. The latest published prices for shares in the Fund are available on www.fundsquare.net. Other share classes are available for this Fund as described in the IGSF prospectus. Luxembourg tax legislation may have an impact on your personal tax position.

The Fund is a sub-fund of IGSF. You may switch between other IGSF sub-funds or share classes of the same sub-fund at no extra charge (unless the other share class has a higher entry charge, in which case the difference may be payable). Details on switching are contained in section 5 of the IGSF prospectus. The assets of the Fund are ring-fenced and cannot be used to pay the debts of other IGSF sub-funds.
