

EUROPE SYNERGY (the "Sub-Fund"), a Sub-Fund of EDMOND DE ROTHSCHILD FUND (the "Fund")

Share Class N EUR (the "Class") - LU1161527624

Management Company : Edmond de Rothschild Asset Management (Luxembourg)

Objectives and Investment Policy

Objective: The Sub-Fund's objective is to outperform its benchmark through exposure to equity markets, of European markets by selecting securities on a discretionary basis in an investment scope comparable to its benchmark.

Environmental, social and governance (ESG) criteria are one of the components subject to management, although their weighting in the final decision is not defined beforehand.

Benchmark index: MSCI Europe, net dividends reinvested. The Sub-Fund is actively managed and is not designed to track the Index. Therefore, the composition of the portfolio holdings is not constrained by the composition of the Index and the deviation of portfolio holdings from the Index may be significant.

Investment policy: The Investment Manager will systematically include environmental, social and governance (ESG) factors in their financial analysis in order to select the highest-rated companies.

At least 90% of the companies in the portfolio will have an ESG rating. This will be either a proprietary ESG rating or a rating provided by an external non-financial rating agency. At the end of this process, the Sub-Fund will have an ESG rating that is greater than that of its investment universe.

Furthermore, the security selection process also includes a negative filter to exclude companies that contribute to the production of controversial weapons in compliance with international conventions in this area as well as companies that are exposed to activities related to thermal coal or tobacco in accordance with the exclusion policy of Edmond de Rothschild Group, which is available on its website.

The Sub-Fund classifies as Article 8(1) SFDR as it promotes a combination of ESG characteristics, although no reference benchmark has been designated for the purpose of attaining the environmental or social characteristics.

The Sub-Fund implements an active stock-picking management strategy, selecting stocks listed on European stock markets without stock market capitalisation distinctions.

The Investment Manager will seek to select stocks of companies subject to take-overs or engaged in a restructuring process. These companies are usually smaller in size than their competitors or belong to a sector in undergoing consolidation. They could also have an attractive specific status or have a poor controlled capital.

Between 75% and 110% of the Sub-Fund's net assets will be invested in equities issued by companies headquartered in the European Union, in other countries of the European Economic Area (EEA) or, until 30 September 2021, in the United Kingdom, directly and/or via UCIs.

The Sub-Fund may also invest up to 25% of its net assets in European securities from outside the European Union, notably member countries of the European Free Trade Association (EFTA), European Economic Area member countries, European countries that are candidates for membership in the European Union and, as of 1 October 2021, the United Kingdom.

For cash management purposes, the Sub-Fund may invest up to 25% of its net assets in transferable debt securities, Money Market Instruments and Money Market Funds. The Sub-Fund will seek issues from public or private issuers that are rated Investment Grade at the time of purchase (i.e. which rating are higher than or equal to BBB- according to Standard & Poor's, or an equivalent rating attributed by another independent agency, or a deemed equivalent rating attributed by the Investment Manager for non-rated securities), with a short-term maturity of less than three months.

The Sub-Fund may use financial derivative instruments to achieve its investment objective in accordance with the restrictions and limits set out in Chapter 5. "Investment restrictions". Such instruments may also be used for the purpose of hedging. These instruments may include, but are not limited to:

- currency forward contracts (forward foreign exchange or foreign exchange futures)
- currency swaps;
- equities-index futures contracts;
- equity swaps including equity TRS; or
- equity options and equity index contracts, to reduce equity volatility.

The Sub-Fund will enter into TRS for such percentage of assets as set out in the table in section D.(9) of Chapter 5

Investment Restrictions.

The Sub-Fund will not use SFT.

The Sub-Fund will not invest in securities with embedded derivatives.

Up to the limit of 10% of its net assets, the Sub-Fund may invest in units or shares of UCITS or other Investment Funds.

Recommended holding period of more than 5 years

Frequency of share buying or selling: Every Luxembourg and France bank business day except for Good Friday, 24 December (Christmas Eve) and the days on which the French markets are closed (official calendar of Euronext Paris S.A.) for orders received by the transfer agent on each NAV calculation day before 12:30 p.m. and processed on the basis of that day's net asset value.

Risk and Reward Profile

1	2	3	4	5	6	7
---	---	---	---	---	---	---

The definition of the risk and reward category is based on the historical performance data and/or the risk limit indicated in the Sub-Fund's investment policy. It may not be a reliable indication of the future risk profile of the Sub-Fund. The risk and reward category shown may change over time. Category 1 does not mean that an investment is risk-free. Investors should note that the Sub-Fund is not guaranteed or capital protected.

This Sub-Fund is rated in category 6, in line with the type of securities and geographic regions detailed under the heading "Objectives and investment policy", as well as the currency of the unit.

Significant risks not taken into account in this indicator:

Credit risk : When a significant level of investment is made in debt securities.

Liquidity risk : The markets for some securities and instruments may have limited liquidity. This limited liquidity could be a disadvantage to the Sub-Fund, both in the realisation of the prices quoted and the execution of orders at desired prices.

Impact of techniques such as derivative contracts : The use of derivatives instruments can infer a decrease of the asset more significant than the decrease of the invested underlying assets or markets.

Counterparty risk : Where a Fund is backed by collateral or has significant investment exposure through contracts with a third party.

Operational risk : The Sub-Fund may suffer losses due to the failure of operational processes, including those related to the safekeeping of assets.

The occurrence of any of these risks may negatively impact the net asset value.
