AXA World Funds - Optimal Absolute

A Sub-Fund of AXA World Funds SICAV

Share class: AXA World Funds - Optimal Absolute A Distribution EUR pf (ISIN: LU0645149112)

This Sub-Fund is managed by AXA Funds Management S.A., part of the AXA IM Group

Objective and Investment Policy

Investment Objective

The Sub-Fund seeks to generate positive absolute returns measured in Euro on an annual basis irrespective of market conditions by investing in, or getting long or short exposure to, a wide range of asset classes on all global markets.

Investment Policy

The Sub-Fund is actively and discretionarily managed in order to capture opportunities across different market conditions by taking long or short net positions in a wide range of asset classes including fixed income securities, equities, commodities (notably through commodity indices) and currencies on all global markets, including emerging markets. Investment decisions are based on a combination of investment strategies that are lowly correlated, encompassing security picking, asset allocation, thematic and relative value opportunities. The diversification of the portfolio is achieved through the combination of a macroeconomic, sector and company specific analysis. The Investment Manager will manage the Sub-Fund in accordance with a yearly risk budget at the overall portfolio level and at each individual strategy level. The investment policy may be achieved by direct investments and through derivatives, especially by entering for instance into total return swaps on equities, bonds or indices, futures, forwards, or options.

The Sub-Fund's global exposure will be monitored by using the absolute Value-at-Risk (VaR) measurement with a maximum VaR of 5% with a five (5) Business Days horizon and 95% confidence level which corresponds to a VaR of 14.16% with a twenty (20) Business Days horizon and 99% confidence level under VaR normal distribution assumptions. This means that there is a probability of 5% that a loss experienced by the Sub-Fund within the five (5) Business Days horizon may be higher than 5% of the Sub-Fund's Net Asset Value, under normal market conditions. The Investment Manager expects that the level of leverage of the Sub-Fund based on the sum of the notional approach will be between 0 and 3. However, the attention of any investor in the Sub-Fund is drawn to the fact that the effective level of leverage of the Sub-Fund may be higher than the expected level of leverage set forth above from time to time due to market conditions.

Derivatives may also be used for hedging purposes.

The Sub-Fund may invest up to 5% of net assets in contingent convertible bonds (CoCos).

Income

For Distribution share classes (Dis), the dividend is distributed.

Sub-Fund Currency

The reference currency of the Sub-Fund is EUR.

Orders will be processed at the Net Asset Value applicable to the following Valuation Day. The investor's attention is drawn to the existence of potential additional processing time due to the possible involvement of intermediaries such as Financial Advisers or distributors.

The Net Asset Value of this Sub-Fund is calculated on a daily basis.
