

## KEY INVESTOR INFORMATION

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

# Investec Emerging Markets Local Currency Dynamic Debt Fund

A sub-fund of Investec Global Strategy Fund  
Managed by Investec Asset Management Luxembourg S.A.

Class IX Accumulation shares in euros  
ISIN: LU1328178717

### Objectives and investment policy

The Fund aims to provide an income and grow the value of your investment over the long term.

The Fund invests primarily in bonds (contracts to repay borrowed money which typically pay interest at fixed times). These are issued by governments, institutions or companies in emerging markets (countries that are in economic terms less developed than the major Western countries). These bonds are issued in the currencies of the issuing country.

The Fund invests primarily in more liquid investment opportunities - i.e. those which are more easily traded.

The Fund can also invest in other assets including cash and derivatives (financial contracts whose value is linked to the price of an underlying asset). Derivatives may be used in order to achieve the Fund's investment objectives or for efficient portfolio management purposes e.g. with the aim of either managing the Fund risks or reducing the costs of managing the Fund.

The Investment Manager is free to choose how the Fund is invested. However, the JPMorgan GBI-EM Global Diversified Composite EUR Index is currently taken into account when the Fund's investments are selected.

Any income due from your investment is reflected in the value of your shares rather than being paid out.

You can buy or sell shares in the Fund on any business day in Luxembourg and the UK, as defined in the Investec Global Strategy Fund's ("IGSF") prospectus (section 3).

Recommendation: this Fund may not be appropriate for investors who plan to withdraw their money within the short to medium term.

### Risk and reward profile

This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund. The risk and reward category shown is not guaranteed to remain unchanged and may shift over time. The lowest category does not mean 'risk free'.

The value of your investment and any income from it can fall as well as rise and you are not certain of making profits; losses may be made.

The Fund appears towards the middle of the Risk and Reward Indicator scale. This is because it invests in bonds whose returns tend to fluctuate more than those of cash funds but less than those of funds which invest in the shares of companies.

#### Risks that may not be fully captured by the Risk and Reward Indicator:

**Currency exchange:** Changes in the relative values of different currencies may adversely affect the value of the Fund's investments and any related income.

**Default:** There is a risk that the issuers of fixed income investments (e.g. bonds) may not be able to meet interest payments nor repay the money they have borrowed. The worse the credit quality of the issuer, the greater the risk of default and therefore investment loss.

**Derivative counterparty:** A counterparty to a derivative transaction may fail to meet its obligations to the Fund thereby leading to financial loss.

**Derivatives:** The use of derivatives may increase the overall risk in the Fund by multiplying the effect of both gains and losses. This may lead to large changes in the value of the Fund and potentially large financial loss.

**Developing market:** Some of the countries in which the Fund invests may have less developed legal, political, economic and/or other systems. These markets carry a higher risk of financial loss than those in countries generally regarded as being more developed.

**Interest rate:** The value of fixed income investments (e.g. bonds) tends to decrease when interest rates and/or inflation rises.

**Liquidity:** There may be insufficient buyers or sellers of particular investments giving rise to delays in trading and being able to make settlements from the Fund and/or large fluctuations in the value of the Fund which may lead to larger financial losses than might be anticipated.

**Third party operational:** The Fund's operations depend on third parties. Investors in the Fund may suffer disruption or financial loss in the event of third-party operational failure.

The full list of the Fund's risks are contained in Appendix 1 of the IGSF prospectus.

## Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment. The entry charge shown is the most you might pay, in some cases you might pay less. You can find out actual entry charges from your financial adviser.

The ongoing charges figure shown here is an estimate of the charges. The Fund's annual report for each financial year will include detail on the exact charges made. The figure excludes any performance fee and portfolio transaction costs, except in the case of an entry or exit charge paid by the Fund when buying or selling units in another fund. Ongoing charges may vary from year to year.

For more information about charges, please see Appendix 1 of the IGSF prospectus.

### One-off charges taken before or after you invest

Entry charge	5.00%
Exit charge	None

This is the maximum that might be taken out of your money before it is invested.

### Charges taken from the fund over a year

Ongoing charge	1.11%
----------------	-------

### Charges taken from the fund under certain specific conditions

Performance fee	None
-----------------	------

## Past performance

Past performance is not a guide to future performance. The value of your investment and income from it may go down as well as up and you may not get back the amount you invested.

The Fund was launched on 31 January 2011 and this share class on 17 December 2015.

There is insufficient data to provide a useful indication of past performance.

## Practical information

The Fund's custodian is State Street Bank Luxembourg S.C.A. The latest published prices for shares in the Fund are available on [www.fundsquare.net](http://www.fundsquare.net). Other share classes are available for this Fund as described in the IGSF prospectus. Luxembourg tax legislation may have an impact on your personal tax position.

The Fund is a sub-fund of IGSF. You may switch between other IGSF sub-funds or share classes of the same sub-fund at no extra charge (unless the other share class has a higher entry charge, in which case the difference may be payable). Details on switching are contained in section 5 of the IGSF prospectus. The assets of the Fund are ring-fenced and cannot be used to pay the debts of other IGSF sub-funds.

Investec Asset Management Luxembourg S.A. may be held liable solely on the basis of any statement contained in this document that is misleading, inaccurate or inconsistent with the relevant parts of the IGSF prospectus.

The latest remuneration policy relating to Investec Asset Management Luxembourg S.A. is available free of charge on request from the address below or from:
