Iberian Equity (the "Sub-Fund") is a sub-fund of Magallanes Value Investors UCITS (the "Fund")

Class R (the "Class") - ISIN: LU1330191898

The Fund has appointed FundPartner Solutions (Europe) S.A. as management company.

Objectives and investment policy

The Sub-Fund's objective is to deliver high performance in both absolute and relative term over the long term horizon. There can be no assurance that the investment objective will be achieved.

The Sub-Fund is actively managed. The benchmark index of the Sub-Fund is the IBEX 35 INDEX (80%) & PSI 20 INDEX (20%). It is mentioned only for performance comparison purposes. The Sub-Fund does not track the index and can deviate significantly or entirely from the benchmark index.

The Sub-Fund promotes certain environmental and social characteristics within the meaning of article 8 of SFDR, although no reference benchmark has been designated for the purpose of attaining the ESG characteristics.

To achieve this, the Sub-Fund will mainly invest in a select portfolio of Transferable Securities (including equity related securities such as ADRs and GDRs) of companies which are domiciled in Spain or in Portugal.

Except for the geographical focus, the choice of investments will neither be limited by an economic sector nor in terms of currencies in which investments will be denominated. However, depending on financial market conditions, a particular focus can be placed in a single country and/or in a single currency and/or in a single economic sector.

On an ancillary basis, the Sub-Fund may invest in any other type of Eligible Investments, such as debt securities including Money Market Instruments with an investment grade rating (i.e. with a rating of not less than BBB- by Standard & Poor's Corporation or its equivalent by Moody's). In case of two different ratings, the higher credit rating will apply). UCITS, other eligible UCIs and Liquid Assets (such as cash and deposits).

The Sub-Fund's investments in units or shares of UCIs (UCITS and/or other eligible UCIs) will not exceed 10% of the net assets of the Sub-Fund.

For hedging purposes, the Sub-Fund may use financial derivative instruments within the limits and descriptions set out in the prospectus. The use of derivative instrument may increase leverage, imply additional costs and risks.

If the Investment Manager considers this to be in the best interest of the Shareholders, on a temporary basis and for defensive purposes, the Sub-Fund may also hold Liquid Assets as among others cash deposits, money market funds (within the 10% limit above-mentioned) and Money Market Instruments for up to 100% of its net assets.

Risk and reward profile

Risk Disclaimer

- This current risk profile is based on historical data and may not be a reliable indication of the future risk profile of the Sub-Fund.
- The risk category shown is not guaranteed and may shift over time.
- The lowest category, which corresponds to Number 1, cannot be regarded as being risk-free.
- The Sub-Fund does not provide any capital guarantee or asset protection measures.

Why is this Sub-Fund in this category?

The portfolio of this Sub-Fund consists essentially of equities or equity related securities issued in Spain and Portugal. The objective of the Sub-Fund is to achieve capital growth by using absolute and relative return equity-linked investment strategies. Hence, the risk/reward profile of the Sub-Fund should correspond to the high risk category on the SRRI scale.

Are there any other particular Risks?

Risks that could affect fund performance and are not necessarily fully reflected in the risk and reward rating include:

- **Liquidity risks:** The Sub-Fund may invest part of its assets in less liquid securities. Those are securities that cannot easily be sold or exchanged for cash without a substantial loss in value in certain market conditions. Those securities also cannot be sold quickly because of a lack of ready and willing investors or speculators to purchase the asset.
- **Counterparty risks:** The Sub-Fund can conclude various transactions

with contractual partners. If a contractual partner becomes insolvent, it can no longer or can only partly settle unpaid debts owed to the Sub-Fund.

- **Credit risks:** The Sub-Fund may invest a portion of its assets in debt securities. The issuers of these debt securities may become insolvent, which will mean that the securities will lose all or some of their value.
- **Risks from the use of derivatives:** The Sub-Fund may use financial derivatives instruments which may result in the Sub-Fund being leveraged and may result in material fluctuations in the value of the Sub-Fund. Leverage on certain types of transactions including derivatives may impair the Sub-Fund's liquidity, cause it to liquidate positions at unfavourable times or otherwise cause the Sub-Fund not to achieve its intended objective.

Leverage occurs when the economic exposure created by the use of derivatives is greater than the amount invested resulting in the Sub-Fund being exposed to a greater loss than the initial investment.

- **Operational risks:** The Sub-Fund may fall victim to fraud or criminal acts. It may suffer losses as a result of misunderstandings or mistakes by employees of the Management Company or by external third parties or may be damaged by external events, such as natural disasters.
- **Sustainability risk:** This risk is any environmental social or governance event or condition that could impact the value of investments. The Investment Manager primarily relies on its ESG analysis and climate risk indicators to categorise the potential level of Sustainability risks in each fund. The level of sustainability risk may fluctuate depending on which investment opportunities the Investment Manager identifies. This means that the fund is exposed to Sustainability Risk which may impact the value of investments over the long term.
