RISK CONSIDERATIONS

- Historical data, such as is used in calculating the synthetic indicator, may not be a reliable indication of the future risk profile of the Share Class.
- The risk category shown is not a target or a guarantee and may change over time.
- The lowest risk category does not mean a risk-free investment.
- Equity investments are subject to high price volatility (variations in the net asset value of the Share Class), but they may offer rewards proportionate to the risks taken, which is why they are in this risk category.
- This value is affected by various factors, including:
 - The Compartment offers no capital guarantee or asset protection measures.
 - The Compartment may invest in emerging markets.
 - This asset class is subject to political and economic risks which may have a significant impact on the Compartment's performance and volatility.
- Because of our investment approach, the Compartment may be exposed to currency risk.
- The Share class also bears the following risks that are not explained by the synthetic risk indicator:
 - Liquidity risk: when market conditions are unusual or a market is characterised by particularly low volumes, the Compartment may encounter difficulties in valuing and/or trading some of its assets, particularly to satisfy large redemption requests.
 - Operational risk: the Compartment is subject to the risk of material losses resulting from human error or system failures or incorrect valuation of the underlying securities.
 - Counterparty risk: the use of derivatives in the form of contracts with counterparties may imply significant losses if a counterparty defaults and cannot honour its liabilities.
