

## Strategy

The portfolio managers aim to deliver capital preservation and liquidity, while delivering a competitive yield, through a multi-strategy approach to money market fund management. They seek to build well-diversified portfolios, where no single decision or investment has a dominant impact on the fund. Fidelity's tenets of money market fund management are: (1) using intensive fundamental credit research to independently identify the highest quality issuers; (2) portfolio issuer selection led by an approved list of issuers, carefully constructed by our experienced portfolio managers and credit analysts; (3) ensuring portfolios are well diversified across a number of different issuers, sectors and regions; (4) employing sophisticated quantitative research to guide portfolio interest rate sensitivity and yield curve strategies; (5) maintaining conservative liquidity buffers to facilitate any client redemptions with ease.

## Objectives & Investment Policy

- The fund aims to provide a return in line with money market rates, with capital security and liquidity being primary considerations.
- The fund will invest at least 70% in Australian Dollar denominated Money Market Instruments, reverse repurchase agreements and deposits.
- The fund has the freedom to invest in other assets permitted under the EU Money Market Fund regulation and ancillary liquid assets.
- The fund can use derivatives with the aim of risk or cost reduction.
- The fund is actively managed without reference to an index.
- Income earned by the fund is accumulated in the share price.
- The fund is a Variable Net Asset Value Money Market Fund and operates as a Short-Term Money Market Fund.

## Fund Facts

**Launch date:** 15.01.16  
**Portfolio manager:** Tim Foster, Christopher Ellinger  
**Appointed to fund:** 15.01.16, 01.01.19  
**Years at Fidelity:** 19, 11  
**Fund size:** A\$96m  
**Number of holdings:** 21  
**Fund reference currency:** Australian Dollar (AUD)  
**Fund domicile:** Luxembourg  
**Fund legal structure:** SICAV  
**Management company:** FIL Investment Management (Luxembourg) S.A.  
**Capital guarantee:** No

## Share Class Facts

Other share classes may be available. Please refer to the prospectus for more details.

**Launch date:** 15.01.16  
**NAV price in share class currency:** 10.3456  
**ISIN:** LU0766124985  
**SEDOL:** BYM2F84  
**WKN:** A142JJ  
**Bloomberg:** FFADAAU LX  
**Dealing cut-off:** 12:00 UK time (normally 13:00 Central European Time)  
**Distribution type:** Accumulating  
**Ongoing Charges Figure (OCF) per year:** 0.65% (30.04.21)  
**OCF takes into account annual management charge per year:** 0.4%

Where the OCF is lower than the annual management charge, this is because some fund charges including the annual management charge are currently being waived, or partially waived, for this fund. The OCF will vary from year to year and will increase when all fund charges are charged in full.

## Share Class Risk and Reward Profile

This risk indicator is taken from the key information document at the relevant month-end. Because it may be updated during a month, please refer to the key information document for the most up-to-date information.

- The risk category was calculated using historical performance data.
- The risk category may not be a reliable indication of the future risk profile of the fund, is not guaranteed and may change over time.
- The lowest category does not mean a "risk free" investment.
- The risk and reward profile is classified by the level of historical fluctuation of the Net Asset Values of the share class, and within this classification, categories 1-2 indicate a low level of historical fluctuations, 3-5 a medium level and 6-7 a high level.

## Important Information

The use of financial derivative instruments may result in increased gains or losses within the fund. The value of shares may be adversely affected by insolvency or other financial difficulties affecting any institution in which the Fund's cash has been deposited. A Money Market Fund (MMF) is not a guaranteed investment. Investment in an MMF is different from an investment in deposits. The principal invested may fluctuate, and the risk of loss of the principal is to be borne by the investor. The MMF does not rely on external support for guaranteeing the liquidity of the MMF or stabilising the NAV per share.

Past performance is not a reliable indicator of future results. The fund's returns can be affected by fluctuations in currency exchange rates.

## Performance Comparator(s)

Peer Group Universe

Morningstar EAA Fund Money Market - Other

Market index is for comparative purposes only unless specifically referenced in the Objectives & Investment Policy on page 1. The same index is used in the positioning tables on this factsheet.

Where the effective date for the current market index is after the share class launch date, full history is available from Fidelity.

## Cumulative performance in AUD (rebased to 100)

Performance is shown for the last five years (or since launch for funds launched within that period).

## Performance for 12 month periods in AUD (%)

## Performance for calendar years in AUD (%)

## Performance to 31.03.22 in AUD (%)

	1m	3m	YTD	1yr	3yr	5yr	Since 15.01.16*

<b>Ranking within Peer Group Universe</b>							
W-ACC-AUD	4	4	4	28	10	33	
Total number of funds	54	53	53	52	46	41	
Quartile ranking**	1	1	1	3	1	4	

Source of fund performance and volatility and risk measures is Fidelity. Performance is excluding initial charge. Basis: nav-nav with income reinvested, in AUD, net of fees. If you took an initial charge of 5.25% from an investment, this is the equivalent of reducing a growth rate of 6% per annum over 5 years to 4.9%. This is the highest initial charge applicable, if the initial charge you pay is less than 5.25%, the impact on the overall performance will be less. Market indices are sourced from RIMES and other data is sourced from third-party providers such as Morningstar.

\*Performance commencement date.

\*\*Quartile rank is for the fund's primary share class as identified by Morningstar, which may be different than the share class detailed in this factsheet and refers to performance over time rated on a scale of 1-4. A ranking of 1 indicates that the item being ranked is in the top 25% of the sample and so on. Rankings are based on a performance record that is included in the Peer Group Universe. In line with Investment Association methodology, this record may include a track record extension from a legacy share class and the record may not be the same class of this factsheet. Quartile ranking is an internal Fidelity International calculation. Ranking may vary by share class.

Figures may not always sum to totals due to rounding

Glossary / additional notes

**Ongoing charges**

The ongoing charges figure represents the charges taken from the fund over a year. It is calculated at the fund's financial year end and may vary from year to year. For classes of funds with fixed ongoing charges, this may not vary from year to year. For new classes of funds or classes undergoing corporate actions (eg amendment to annual management charge), the ongoing charges figure is estimated until the criteria are met for an actual ongoing charges figure to be published.

The types of charges included in the ongoing charges figure are management fees, administration fees, custodian and depositary fees and transaction charges, shareholder reporting costs, regulatory registration fees, Directors fees (where applicable) and bank charges.

It excludes: performance fees (where applicable); portfolio transaction costs, except in the case of an entry/exit charge paid by the fund when buying or selling units in another collective investment undertaking.

For more information about charges (including details of the fund's financial year end), please consult the charges section in the most recent Prospectus.

**Historic yield**

The historic yield for a fund is calculated based on the average of the last 30 days of annualised yields.

**Independent Assessment**

**Scope Fund Rating:** The rating measures how well a fund has balanced risk and reward relative to its peers. The rating is based solely on performance for funds with a five year track record. Funds with a shorter history also undergo qualitative assessment. For example, this may include looking at management style. The rating scale is A = very good, B = good, C = average, D = below average and E = poor.

**Morningstar Star Rating for Funds:** The rating measures how well a fund has balanced risk and reward relative to its peers. Star ratings are strictly based on past performance and Morningstar suggests investors use them to identify funds that are worthy for further research. The top 10% of funds in a category will receive a 5-star rating and the next 22.5% receive a 4-star rating. Only ratings of 4 or 5 stars are displayed on the factsheet.

**Primary share class:** is identified by Morningstar when the analysis calls for only one share class per fund to be in the peer group. It is the share class Morningstar recommends as the best proxy for the portfolio for the relevant market and category/GIF combination. In most cases the share class chosen will be the most retail version (based upon actual management charge, inception date, distribution status, currency and other factors) unless a share class that is less retailed focused has a much longer track record. It is different to the oldest share class data point in that it is on an available for sale level and not all markets will have the oldest share class for sale in that region. The Primary share class is also based on category so each available for sale/category combination for the fund will have its own primary share class.

**Portfolio Turnover Rate (PTR) and Portfolio Turnover Cost (PTC), where shown:** SRDII does not define a methodology for these values; ours is as follows: **PTR** = (purchases of securities + sales of securities) minus (subscriptions of units + redemptions of units), divided by average fund value over the prior 12 months multiplied by 100. Any funds' trading in Fidelity Institutional Liquidity Funds is excluded from the PTR calculation. **PTC** = PTR (capped at 100%) x transaction cost, where transaction cost is calculated as ex-post (i.e. prior 12 months) MiFID disclosure of portfolio transaction costs minus implicit costs.
