AXA World Funds - Global Inflation Short Duration Bonds

A Sub-Fund of AXA World Funds SICAV

Share class: AXA World Funds - Global Inflation Short Duration Bonds A Capitalisation USD (ISIN : LU1353950568)

This Sub-Fund is managed by AXA Funds Management S.A., part of the AXA IM Group

Objective and Investment Policy

Investment Objective

The Sub-Fund's investment objective is to seek performance by investing mainly in short duration inflation-linked bonds issued in OECD countries, over a medium term period.

Investment Policy

The Sub-Fund is actively managed in order to capture opportunities in the short duration inflation-linked bonds market.

The following investment decisions are undertaken after comprehensive macroeconomic and microeconomic analysis of the market:

- positioning on the inflation-linked yield curve (the inflation-linked yield curve illustrates the relationship between the investment term and the inflation-linked bond yield)
- management of duration for inflation linked-bonds (duration measures, in numbers of years, the portfolio's sensitivity to interest rate variations)
- positioning according to inflation expectations
- geographical allocation

The Sub-Fund invests mainly in a diversified portfolio consisting of short duration inflation-linked bonds rated investment grade or sub-investment grade issued by OECD governments, corporations or public institutions worldwide. The Investment Manager may invest the remaining net assets in any other debt securities rated investment grade or sub-investment grade which are not inflation-linked to reduce its exposure to inflation-linked bonds in anticipation of periods of lower inflation. The Sub-Fund may invest 100% of its net assets in sovereign debt securities but it is not intended that the Sub-Fund will invest more than 10% of its net assets in securities issued by or guaranteed by any single country (including its government, a public or local authority of that country) with a credit rating sub-investment grade. Investment grade securities will be rated at least BBB- by Standard & Poor's or equivalent rating by Moody's or Fitch or if unrated then deemed to be so by the Investment Manager. Sub-investment grade securities will be rated between BB+ and B- by Standard & Poor's or equivalent rating by Moody's or Fitch or if unrated then deemed to be so by the Investment Manager.

In case of downgrade below B- by Standard & Poor's or equivalent rating by Moody's or Fitch or if unrated then deemed to be so by the Investment Manager, securities will be sold within 6 months.

If two different ratings of rating agencies exist, the lower rating will be considered, if more than two different ratings of rating agencies exist, the second highest rating will be considered.

The selection of credit instruments is not exclusively and mechanically based on their publicly available credit ratings but also on an internal credit or market risk analysis. The decision to buy or sell assets is also based on other analysis criteria of the Investment Manager.

Furthermore, the Sub-Fund may invest in Money Market Instruments.

The Sub-Fund applies AXA IM Environmental, Social and Governance (ESG)

Standards available on www.axa-im.com/en/responsible-investing.

The Sub-Fund will invest not more than 10% of its net assets in units of UCITS and/or other UCIs.

The Sub-Fund may invest up to 5% of net assets in contingent convertible bonds (CoCos).

Within the limit of 200% of the Sub-Fund's net assets, the investment strategy may be achieved by direct investments and/or through derivatives, especially by entering into Credit Default Swaps. Derivatives may also be used for hedging purposes.

Income

For Capitalisation share classes (Cap), the dividend is reinvested.

Sub-Fund Currency

The reference currency of the Sub-Fund is USD.

Investment Horizon

This Sub-Fund may not be suitable for investors who plan to withdraw their contribution within 3 years.

Processing of subscription and redemption orders

Orders will be processed at the Net Asset Value applicable to such Valuation Day. The investor's attention is drawn to the existence of potential additional processing time due to the possible involvement of intermediaries such as Financial Advisers or distributors.

The Net Asset Value of this Sub-Fund is calculated on a daily basis.

Risk and Reward Profile

The risk category is calculated using historical performance data and may not be a reliable indicator of the Sub-Fund's future risk profile.

The risk category shown is not guaranteed and may shift over time.

The lowest category does not mean risk free.

Why is this Sub-Fund in this category?

The capital of the Sub-Fund is not guaranteed. The Sub-Fund is invested in financial markets and uses techniques and instruments which are subject to low levels of variation under normal market conditions but, which may still result in losses.

Additional Risks

Counterparty Risk: Risk of bankruptcy, insolvency, or payment or delivery failure of any of the Sub-Fund's counterparties, leading to a payment or delivery default.

Liquidity Risk: risk of low liquidity level in certain market conditions that might lead the Sub-Fund to face difficulties valuing, purchasing or selling all/part of its assets and resulting in potential impact on its net asset value.

Credit Risk: Risk that issuers of debt securities held in the Sub-Fund may default on their obligations or have their credit rating downgraded, resulting in a decrease in the Net Asset Value.

Impact of any techniques such as derivatives: Certain management strategies involve specific risks, such as liquidity risk, credit risk, counterparty risk, legal risk, valuation risk, operational risk and risks related to the underlying assets.

The use of such strategies may also involve leverage, which may increase the effect of market movements on the Sub-Fund and may result in significant risk of losses.
