

CS (Lux) Europe Equity Absolute Return Fund

a subfund of CS Investment Funds 2 - Class BH USD

Investment policy

This Equity Fund invests long and short in European equities using a fundamental, bottom-up investment approach. The aim is to achieve positive absolute returns irrespective of the market environment and to maintain a low correlation to general equity markets. With a broadly diversified portfolio and a low market exposure, volatility is likely to be lower than in traditional equity funds.

Market commentary

Positioning of the fund compared to July has not materially changed. With net exposure at -5% at the end of August and a cash and cash equivalent position of 9%, it was an uphill struggle against a market moving 2.2% upwards. August saw market dynamics following many of the trends identified at the beginning of the year, i.e. weak development on PMIs, downward revision of real GDP growth with Sweden the biggest negative swing, and estimations of interest rates signaling a dovish stance by central banks. There are plenty of data points which point to a "late cycle" and thus imply a recessionary environment which is not encouraging for small- and mid-cap companies. The fund is positioned with a net short in industrials, materials, and financials with focus on quality growth and quality value (high FCF yield stocks with solid balance sheets) in information technology and health care. The last dovish move by central bankers has hit the fund on insurance groups although our names carry a high solvency ratio and decent dividend cover. Our positioning with long and short quality/lower quality names was successful despite the overall sector being under pressure, as seen from the contributions from short positions in Aegon and Admiral, and a long position in FincoBank.

With the sharpest bond sell-offs since January 4th, we start September asking ourselves if we will ever see bond yields going beyond 4% again. With regard to this major issue, we also expect more turbulence owing to the news flow around the US-China trade dispute, US tariff threats against the EU, Brexit, and the political upheaval in Hong Kong. Hopes for the V-shaped recovery in the second half of 2019 as assumed by the market are vanishing. Below-average net exposure and focus on structural long-term plays in the small- and mid-cap space represent our best answer for investors with a half-decent investment horizon.

¹⁾ The calculation of the risk indicator is based on the CESR/10-673 Directive. The risk indicator is based on historic and partly simulated data; it cannot be used to predict future developments. The classification of the Fund may change in future and does not represent a guarantee. A classification into category 1 is not a risk-free investment either.

²⁾ Historical performance indications and financial market scenarios are not reliable indicators of future performance. The performance data do not take into account the commissions and costs incurred on the issue and redemption of fund units.

Sector Exposure

Potential risks

The Fund's risk and reward profile does not reflect the risk inherent in future circumstances that differ from what the Fund has experienced in the recent past. This includes the following events which are rare but can have a large impact.

- Credit risk: Issuers of assets held by the Fund may not pay income or repay capital when due. The Fund's investments generally have low credit risk.
- Liquidity risk: Assets cannot necessarily be sold at limited cost in an adequately short timeframe. The Fund's investments may be prone to limited liquidity. The Fund will endeavor to mitigate this risk by various measures. In addition, short selling of securities may expose the Fund to particular liquidity risk.
- Counterparty risk: Bankruptcy or insolvency of the Fund's derivative counterparties may lead to payment or delivery default.
- Operational risk: Deficient processes, technical failures or catastrophic events may cause losses.
- Political and Legal risks: Investments are exposed to changes of rules and standards applied by a specific country. This includes restrictions on currency convertibility, the imposing of taxes or controls on transactions, the limitations of property rights or other legal risks.

This section is not exhaustive, for more risks, please refer to the Prospectus.

Alternative investments (e.g. Hedge Funds or Private Equity) are complex instruments and may carry a very high degree of risk. Such risks can arise from extensive use of short sales, derivatives and debt capital. Furthermore, the minimum investment periods can be long. Hedge Funds are intended only for investors who understand and accept the associated risks. The primary characteristic that an investment in Non-Traditional Funds entails is the broad use of financial derivatives. Acquiring derivative financial instruments may involve elevated financial leverage. More financial leverage may be created through debt and short-position transactions, and this additional financial leverage may potentially involve considerably greater losses than the sum invested in the financial derivative itself. Non-Traditional Funds may invest in securities in unusual situations, i.e. securities of companies that are involved in the process of reorganization and liquidation, which may generate higher returns, but which imply a high level of risk and less liquidity than other investments. Non-Traditional Funds usually tend to be domiciled in offshore countries or territories whose regulatory standards and, in particular, supervision standards are not as strict as the respective standards in Spain. Many Non-Traditional Funds do not adopt fixed diversification guidelines for their investments and, therefore, may be highly focused on certain sectors or markets. The Fund may make investments in emerging markets, which entails the risks associated with a certain degree of political instability and some relatively unpredictable financial markets and economic growth patterns, such as an increased risk of confiscation and nationalization, confiscatory taxation, restrictions on the repatriation of funds, etc. Investments in Non-Traditional Funds are subject to restrictions on transfers and redemptions. The transfer of investments is normally subject to approval by the Fund, and redemption of the investment is usually only authorized after an initial period of non-transferability. The redemption of holdings normally requires long periods of advance notice. In most cases, there is no liquid market for investments in Non-Traditional Funds. In addition, it is important to note the enormous quantity of subcategories of funds of this type that exist on the market. One risk factor that should be considered is the dependence on key employees of the Fund (Portfolio Managers). The remuneration of the portfolio managers may include incentives based on performance which, combined with the fact that the level of Management transparency may not be as high as with other more regulated markets, may prompt these managers to make riskier or more speculative investments. The levels of experience of the managers may differ from one to another. Potential investors in Non-Traditional Funds should carefully consider the various risk factors when evaluating the suitability of their investment. This document does not contain an exhaustive listing of all of the risks associated with investments in Non-Traditional Funds. Investors should also assess the aforementioned risk factors by reading the prospectus of the fund in which they intend to invest. Investments in Non-Traditional Funds entails a high level of risk and are only suitable for experienced investors who completely understand and are willing to assume the risks that these investments entail and the exposure to potential losses that could affect the total investment.

CS (Lux) Europe Equity Absolute Return Fund BH USD: This fund is domiciled in Luxembourg. The representative in Switzerland is Credit Suisse Funds AG, Zurich. The paying agent in Switzerland is Credit Suisse (Schweiz) AG, Zurich. The prospectus, the simplified prospectus and/or the Key Investor Information Document (KIID) and the annual and half-yearly reports may be obtained free of charge from the representative or from any branch of Credit Suisse AG in Switzerland.
