a sub fund of Flab Funds SICAV

managed by Link Fund Solutions (Luxembourg) S.A.

Objectives and Investment Policy

Objective

Octogone Europe S.A. manages the investments of this Fund.

We aim to achieve long term growth in your capital. We implement a strategic allocation of the portfolio between bonds (loans), shares and cash.

Investment Policy

We mainly invest in Government bonds, short term bonds issued by governments and companies ("money market instruments") and shares of companies. We have no geographic, sectorial or currency constraint. Indirect exposure to Emerging Markets may occur up to 20% maximum, as described in the Fund's Prospectus. Finally, we may invest in other investment funds which themselves invest in the aforementioned asset classes.

We may use complex financial instruments in order to invest in the above asset classes or to protect the value of your investment. Given their characteristics, these instruments may have a significant influence on the return of the Fund.

This Fund is actively managed, meaning that the investment manager has, subject to the stated investment objectives and policy, discretion over its portfolio, with no reference or constraint to a benchmark.

Essential features of the fund:

You can buy and sell shares of this class every bank business day in Luxembourg, provided you buy through an intermediary duly authorised by the Board of directors of the Fund.

This share class does not distribute any income to you.

Your first investment must be equal or amount to more than 10 euros.

In accordance with article 8 of EU regulation 2019/2088, the Sub-Fund promotes environmental or social characteristics, taking into account environmental, social and governance criteria in its investment process. Further details are available in the "Sub-Funds Details" caption of its Prospectus.

Risk and reward profile

The above indicator reflects the historical level of risk and reward of this share class over the last 5 years. As it is based on its historical behaviour, it does not necessarily reflect your future risk, nor reward. In particular, financial instruments we use have specific characteristics that cannot be adequately reflected in the indicator above.

This share class is classified as above, since it has experienced moderate movements in its price. This classification is solely valid as of the date of this document; it can change in the future.

If you invest in a fund in the category "1" above, you may sustain a loss. A fund in this category is not risk-free at all times.

This fund does not provide you with any guarantee on performance nor on the value of your investment in it. The latter may consequently go up, as well as down.

The indicator captures the impacts on the Fund of adverse movements in financial markets and currencies, under normal market conditions.

The following other risks can be significant to the Fund:

- The bonds, money market instruments, shares and funds in which we invest may be easily sold under normal market conditions. Exceptional circumstances may lead to situations where those can only be sold at a loss for you.

- Investment positions may be relatively focused on one particular economic sector or country.

- Investing in emerging economies can present risks inherent to political stability, economic conditions, and/or regulatory and fiscal environments that may adversely affect the price of the Fund.

More details on the risks you may face when investing in this Fund are described in the "Risk Factors" and "Risk Management Process" sections of the Prospectus, as well as in the "Sub-Funds Details" section thereof.
