

KEY INVESTOR INFORMATION

This document provides you with key investor information about this Sub-Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Sub-Fund. You are advised to read it so you can make an informed decision about whether to invest.

LO Funds - CAT Bonds, Syst. NAV Hdg, (EUR), SA

(the "Sub-Fund") a Sub-Fund of Lombard Odier Funds (the "SICAV")

Category S, Class accumulated, Currency EUR, hedged, ISIN LU1349275690 (the "Class")

This Sub-Fund is managed by Lombard Odier Funds (Europe) S.A., part of Lombard Odier Group

Objectives and Investment Policy

Objectives and Investment Policy

The Sub-Fund is actively managed. The Sub-Fund is not managed in reference to an index.

The Sub-Fund's objective is to generate returns by investing across a diversified selection of catastrophe bonds "CAT Bonds"). The Sub-Fund seeks to achieve a low correlation to traditional asset classes such as bonds and equities.

CAT Bonds are financial securities that transfer insurance risk to the capital markets. The investor in such securities receives a coupon made up of a floating money market component and an insurance premium. The premium compensates the investor for bearing the risk of a partial or total loss of nominal value and interest resulting from the occurrence of extraordinary predefined events such as, but not limited to, an earthquake or a hurricane.

The Sub-Fund does not invest in instruments linked to life settlements. Financial derivative instruments are only used for hedging and efficient portfolio management purposes.

Information

- Recommendation: This Sub-Fund may not be appropriate for investors who plan to withdraw their money within 5 years.
- Dealing frequency: You may redeem shares in this Sub-Fund on demand on a weekly basis.
- The Sub-Fund is denominated in USD. This Class is in EUR. Currency risk is hedged. Currency risk is hedged between the base currency of the sub-fund and the reference currency of the share class. The hedging may not completely eliminate currency risk of positions at the portfolio level and performance may be affected.
- Distribution policy: Income accumulated.

Risk and Reward Profile

What does it mean?

This indicator (SRRI) represents the annualized historical volatility of the Sub-Fund over a 5-year period. Where there are less than 5 years worth of data, missing returns are simulated using an appropriate benchmark. The SRRI may change over time and should not be used as an indicator of future risk or returns. Even the lowest risk classification does not imply that the Sub-Fund is risk-free or that capital is necessarily guaranteed or protected.

Category

The Sub-Fund invests in CAT Bonds, but does not invest in financial derivative instruments as part of the investment strategy.

Are there any other particular risks?

The following risks may be materially relevant but may not always be adequately captured by the synthetic risk indicator and may cause additional loss:

- If a predefined loss event occurs, the investment amount is not repaid in full at maturity. An event can lead to delayed payments, a partial or even total default of the investment amount. The strategy is subject to the risk of insured events, which are in each case based on the probability of occurrence and claim amounts of insured events.
- Model risk arises if the probabilities of occurrence and claim amounts of the covered event are not properly reflected in the model. The event probability of CAT Bonds is based on risk models. These are constantly being revised and developed, but they only represent an approximation of reality. These models may be subject to uncertainty and errors. Consequently, event risks can be significantly under- or overestimated. Price risk is related to model risk to the extent that the value of CAT Bonds relies on the assessment of fundamentally unpredictable events whose probability the models seek to approximate.
- The proceeds of CAT Bond transactions are typically invested in money market funds or similar instruments backed by a government, governmental and/or supranational entity. Investors are exposed to the counterparty risk of these entities and, upon their potential default, to the market risk of the assets held as collateral.

For more details about risk, see appendix B "Risk Factors" of the prospectus.

Charges

One-off charges taken before or after you invest	
Entry charge	0.00%
