The management company is JPMorgan Asset Management (Europe) S.à r.l.

Objectives and Investment Policy

Investment Objective: The Sub-Fund aims to achieve a return in line with the benchmark by investing primarily in a portfolio of global government debt securities.

Investment Policy: At least 67% of the Sub-Fund's assets (excluding cash and cash equivalents) will be invested in debt securities issued or guaranteed by governments globally, excluding supranationals, local governments and agencies.

The Sub-Fund may use financial derivative instruments for the purposes of hedging and efficient portfolio management.

The Sub-Fund will not invest in convertible bonds, equities or other participation rights.

This Share Class seeks to minimise the effect of currency fluctuations between the Reference Currency of the Sub-Fund (EUR) and the Reference Currency of this Share Class (USD).

Management Discretion: The Investment Manager has the discretion to buy and sell investments on behalf of the Sub-Fund within the limits of the Objective and Investment Policy.

Risk and Reward Profile

The above rating is based on the historic volatility of the simulated Net Asset Value of this Share Class over the last five years and may not be a reliable indication of the future risk profile of this Share Class.

The risk and reward category shown above is not guaranteed to remain unchanged and may change over time.

A Share Class with the lowest risk rating does not mean a risk-free investment.

Why is this Share Class in this category? This Share Class is classified in category 3 because its simulated Net Asset Value has shown low to medium fluctuations historically.

Other material risks:

- The value of your investment may fall as well as rise and you may get back less than you originally invested.
- The value of debt securities may change significantly depending on economic and interest rate conditions as well as the credit worthiness of the issuer.
- Movements in currency exchange rates can adversely affect the return of your investment. The currency hedging used to minimise the effect of currency fluctuations may not always be successful. Investors may have exposure to currencies other than the currency of their Share Class.
- Further information about risks can be found in "Appendix IV - Risk Factors" of the Prospectus.
