

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Global Corporate Bond Mid Yield

ISIN: LU1395536839, share class: HC (hedged), currency: EUR

a sub-fund of Vontobel Fund

This fund is managed by Vontobel Asset Management S.A., which is part of Vontobel Group.

This fund is authorised in Luxembourg and regulated by the Commission de Surveillance du Secteur Financier (CSSF).

Objectives and investment policy

The sub-fund's investment policy aims to achieve the best-possible investment return in USD.

- The sub-fund mainly invests in interest-bearing securities, including up to 25% of its assets in convertible bonds. Up to 20% may be invested in asset-backed and mortgage-backed securities. The sub-fund may also hold cash.
- The sub-fund mainly invests in securities issued by private borrowers, which are denominated in freely convertible currencies and are of medium quality.
- The sub-fund can use derivatives to achieve the investment objective and for hedging purposes.
- The currency of this class is continually hedged against the sub-fund's main currency. This hedging does not

necessarily cover all currency risks. It entails costs which in turn reduce the share class' return.

- The portfolio manager can make investments for the sub-fund at his or her own discretion within the predefined investment limits.
- Any income generated will be reinvested and included in the value of your shares.
- The charges for buying and selling securities are paid by the sub-fund. They are payable in addition to the charges listed and reduce the sub-fund's return.
- You can redeem shares in the sub-fund on any working day. The only exceptions are on public holidays in Luxembourg or if a large number of stock exchanges and markets in which the sub-fund invests are closed.

Risk and reward profile

The indicator above does not signal the risk of a potential loss, but indicates the fluctuations in the sub-fund's share price in the past.

- The share class is assigned to this category because its share price can fluctuate moderately due to the investment policy applied.
- The historical data used to calculate the profile cannot be used as a reliable guide to the future risk profile of the sub-fund.
- The risk category shown is not guaranteed and may change.
- Even the lowest risk category is not entirely free of risk.

When assigning a sub-fund's share class to a risk category, it may be the case that not all risks are taken into account, due to the calculation model used. Such risks include those in connection with exceptional market conditions, operational errors or legal and political events. You can find a detailed list of the risks in the "Notice regarding special risks" section in the general part of the sales prospectus. The following risks have no direct influence on this category, but may still be important:

- The credit quality of the securities that the sub-fund invests in can deteriorate. This means there is a risk that the issuer of the securities cannot meet its obligations. The value of this investment may fall if an issuer's credit rating is downgraded.
- Using derivatives results in corresponding counterparty risks.
- The use of derivatives generally creates leverage. The sub-fund is also subject to corresponding valuation risks and operational risks.
- Asset-backed and mortgage-backed securities, and their underlying receivables are often intransparent. The sub-fund may also be subject to a higher credit and/or prepayment risk.
- This share class of the sub-fund is issued in EUR. The sub-fund can invest extensively in securities denominated in other currencies, which means that the class may be exposed to a higher currency risk.

Charges

The charges you pay are used to pay the costs of running the fund, including the costs for managing, marketing and distributing it. These charges reduce the return on your investment.

| One-off charges taken before or after you invest | |
|--|-------------|
| Entry charge | 5.00% |
| Exit charge | 0.30% |
| Additional conversion charges | 1.00% |
| This is the maximum that might be taken out of your money before it is invested / before the proceeds of your investment are paid out. | |
| Charges taken from the fund over a year | |
| Ongoing charges | 1.97 % |
| Charges taken from the fund under certain specific conditions | |
| Performance fee: | not charged |

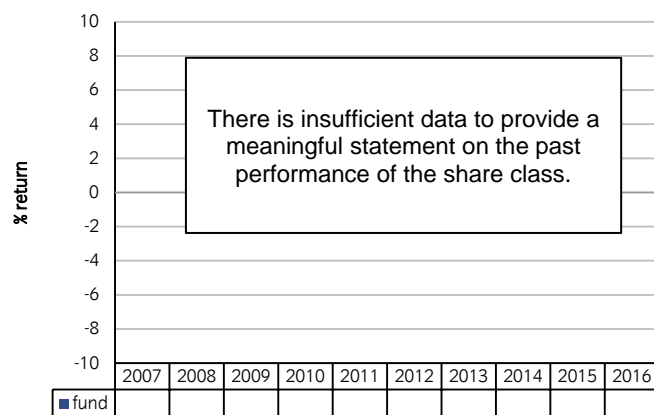

The one-off charges shown are maximum figures. In some cases, you might pay less – you can find this out from your financial advisor.

The figure for ongoing charges is an estimate as no meaningful data is available for this share class. This figure may vary from year to year. It does not include:

- The fund's transaction costs except for those paid by the fund when buying or selling shares of other collective investment schemes.

You can find more information on costs in the "Fees and expenses" section of the general part of the sales prospectus, available at www.vontobel.com/AM.

Past performance

- Shares were first issued for this share class in 2016. Sub-fund launch year: 2015.
