CSIF (Lux) Equity Canada

Class FB CAD

Investment policy

The fund is managed with an indexed method and is distinguished by broad diversification, low tracking errors, and low-cost management. The investment objective is to replicate the reference index as closely as possible and to minimize performance deviations from the benchmark.

The MSCI Canada Index is designed to measure the performance of the large and mid cap segments of the Canada market. The index covers approximately 85% of the free float-adjusted market capitalization in the Canadian equity universe.

Sweden, Switzerland, United Kingdom

Exclusion of controversial weapons producers ⁴⁾

Credit Suisse Index Funds will no longer invest in companies which are involved in the development or production of nuclear, biological, and chemical warfare agents, anti-personnel mines and cluster bombs.

Hence we position ourselves in line with the exclusion list from the Swiss Association for Responsible Investments (SVVK - ASIR). The tracking quality of our index funds remains broadly unchanged by these exclusions.

¹⁾ The calculation of the risk indicator is based on the Committee of European Securities Regulators/10-673 Directive. The risk indicator is based on historic and partly simulated data; it cannot be used to predict future developments. The classification of the Fund may change in future and does not represent a guarantee. A classification into category 1 is not a risk-free investment either.

²⁾ Historical performance indications and financial market scenarios are no reliable indicators of future performance. The performance data do not take into account the commissions and costs incurred on the issue and redemption of fund units.

³⁾ The calculation of the ongoing charge is based on the Committee of European Securities Regulators/10-674 Directive. For a maximum of 12 months from December 31, 2020, the ongoing charges figure is based on estimated expenses. From December 2021, the ongoing charges figure is based on last year's expenses for the year ending December 2021. It excludes performance fees and portfolio transaction costs, except in the case of an entry/exit charge paid by the Fund when buying or selling shares/units in another collective investment undertaking.

⁴⁾ The exclusions of the Swiss association for responsible investments (SVVK-ASIR) apply only to in-house funds and products. External funds, ETFs, and futures are not included.

Potential risks

The Fund's risk and reward profile does not reflect the risk inherent in future circumstances that differ from what the Fund has experienced in the recent past. This includes the following events which are rare but can have a large impact.

- Liquidity risk: Assets cannot necessarily be sold at limited cost in an adequately short timeframe. Part of the Fund's investments may be prone to limited liquidity. The Fund will endeavor to mitigate this risk by various measures.
- Operational risk: Deficient processes, technical failures or catastrophic events may cause losses.
- Political and Legal risks: Investments are exposed to changes of rules and standards applied by a specific country. This includes restrictions on currency convertibility, the imposing of taxes or controls on transactions, the limitations of property rights or other legal risks.

The product's investment objectives, risks, charges and expenses, as well as more complete information about the product, are provided in the prospectus (or relevant offering document), which should be read carefully before investing.
