

Capital Group Investment Company of America (LUX)

Objective

The fund seeks to achieve long-term growth of capital and income by investing primarily in common stocks, most of which have a history of paying dividends. In the selection of these companies, potential for capital growth and future dividends are given more weight than current yield.

The Capital Advantage

Since 1931 our firm, Capital Group, has been singularly focused on delivering superior, consistent results for long-term investors using high-conviction portfolios, rigorous research and individual accountability.

Fund results are shown after fees and expenses and are calculated as the increase or decrease in net asset value of the fund over the relevant period. The net asset value is calculated based on close-of-business prices for performance and fee calculation purposes only. No dealing activity can be based on such net asset value. Please refer to capitalgroup.com/europe for further information on net asset value applicable to any dealing activity in the fund, and for other share classes; these have different fees and expenses, and returns will differ. Results data does not take account of costs incurred on the issue of shares. Inception of the fund share class on 27 June 2016. Results prior to this relate to the older share classes, adjusted where necessary to reflect the management fee of the recipient share class. Past results are not a guarantee of future results. Fund essentials

Launch date	17 June 2016
Fund size	US\$ 431 million
Number of holdings	169
Turnover	41.5%
Gross income yield	2.5%
Net income yield	2.0%

Turnover is calculated over the last 12 months as the lesser of monthly purchases and sales divided by average net assets.

Yield is calculated over the same period as income earned by the fund, on both a before (gross) as well as an after (net) withholding taxes basis (in each case before fees), divided by average total net assets. This differs from the yield of each share class.

Risk statistics (ZLd shares)

Lifetime risk statistics	
Standard deviation	10.8
Tracking error	2.8
Information ratio	-1.1

Risk statistics are based on close of market returns (T+1).

Standard deviation (absolute volatility) is a measure of the absolute variability of returns and the larger the standard deviation, the greater the likelihood (and risk) that a fund's results will fluctuate from the average return. It is based on monthly observations using a population standard deviation calculation.

Tracking error (volatility relative to benchmark) measures the volatility of the difference between a portfolio's results and the benchmark.

Information ratio (risk adjusted relative return) represents the value added of the manager (excess return) divided by the tracking error.

Share class information (further share classes available at capitalgroup.com/europe)

Class	NAV	Management fee p.a.	TER	Dividend yield	Min. investment	Bloomberg	ISIN	SEDOL
ZLd (Inc)	US\$ 13.20	0.600%	0.75%	1.1%	65 million	CGIZLDU LX	LU1438154558	BD37YK6
ZLgd (Inc)	US\$ 12.82	0.600%	0.75%	1.9%	65 million	CGCAZLU LX	LU1401127128	BD9Y069

Dividend yield is the income return on the share class and is shown for distributing share classes only. It is calculated over the last 12 months as income earned by the fund after withholding taxes, fees and expenses. Where hedged share classes are listed, for the purpose of currency hedging all assets attributable to them in this fund will be deemed to constitute exposure to USD. The fund will aim to hedge 100% (with reasonable margin of tolerance) of this deemed currency exposure back into the currency referred to in the relevant Class's designation.

The charges you pay are used to pay the costs of running the fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment. In addition to the Total Expense Ratio (TER), entry charges may apply according to provisions described in the Prospectus. Data is likely to change over time and does not constitute a commitment from the management company. Past results are not a guarantee of future results.

Total Expense Ratio (TER) is calculated over the last 12 months with a one month lag. TER data is therefore as at 30 June 2019.

Risk factors you should consider before investing:

- This material is not intended to provide investment advice or be considered a personal recommendation.
- The value of investments can go down as well as up and you may lose some or all of your initial investment.
- Past results are not a guarantee of future results.
- If the currency in which you invest strengthens against the currency in which the underlying investments of the fund are made, the value of your investment will decrease.
- The Prospectus and Key Investor Information Document set out risks, which, depending on the fund, may include risks associated with investing in fixed income, emerging markets and/or high-yield securities. Emerging markets are volatile and may suffer from liquidity problems.

Other important information:

The fund is offered only by Prospectus, together, where applicable, with the Key Investor Information Document. These documents, together with the latest Annual and Semi-Annual Reports and any documents relevant to local legislation, contain more complete information about the fund, including relevant risks, charges and expenses, and should be read carefully before investing. However, these documents and other information relating to the fund will not be distributed to persons in any country where such distribution would be contrary to law or regulation.
