INVESTMENT OBJECTIVE

Global Managed Futures is a UCITS compliant thematic fund of hedge funds with a focus on systematic tactical trading strategies investing in global futures markets across most asset classes. The portfolio consists of a select group of managers employing primarily trend-following types of strategies. The investment objective is to achieve superior risk-adjusted returns with limited correlation to traditional asset classes over a market cycle.

RISK CONSIDERATIONS

- The Share class is assigned to this risk category because of the price variations resulting from its currency and the nature of the Compartment's investments and strategy.
- The risk category shown is based on historical data and may not be a reliable indication for the future risk profile of the Share class.
- The risk category shown is not a target or a guarantee and may change over time.
- The lowest category does not mean a risk-free investment.
- The Compartment offers no capital guarantee or asset protection measures.
- The Compartment may be exposed to the following material risks which are not adequately captured by the synthetic risk indicator and may negatively impact its performance:
 - Operational risk: losses may result from, for instance, human errors, system failures, incorrect valuation and safekeeping of assets.
 - Counterparty risk: losses may occur when a counterparty does not honour its obligations related to instruments or contracts such as over-the-counter derivatives.
 - Impact of financial techniques: the use of leverage may amplify losses and gains, and/or may not result in the intended exposure.
 - Liquidity risk: under certain market conditions (such as, but not limited to stressed markets or low volumes), difficulties may be encountered in valuing and/or trading some of the assets.
