Key investor information

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

OBJECTIVES AND INVESTMENT POLICY

The objective of the Fund is to achieve income and capital growth (total return). Specifically, the Fund seeks to outperform (net of fees) the reference index by at least 3.5%, over any given 3-year period.

Reference index: 3-month Euribor Index

The Investment Manager uses a combination of strategies, including a short-or-long directional strategy, an arbitrage strategy, an interest rate curve strategy and a credit strategy.

The Fund invests mainly in bonds of any credit quality, including below investment grade bonds, and in any currency from OECD issuers.

Specifically, the Fund invests in fixed rate, floating rate or inflation-indexed debt securities and negotiable debt instruments.

The Fund may invest in, or be exposed to, the following investments up to the percentage of net assets indicated:

- convertible bonds: 100%
- contingent convertible bonds (coco bonds): 20%
- mortgage- or asset-backed securities: 20%

RISK AND REWARD PROFILE

Risk and Reward Profile: The SRRRI (Synthetic Risk and Reward Indicator) demonstrates where the Fund ranks in terms of its potential risk and return. The higher the Fund's position on this scale, the greater possible reward, but also the greater risk of losing money.

The risk category is 3, which reflects the risk of investing in debt instruments, in all sectors and in contingent convertible bonds.

We bring your attention to the fact that:

- Historical data used in calculating the SRRRI may not be a reliable indication of the future risk profile of the Fund.
- The risk indicator shown above is not guaranteed and it may shift over time. The lowest category does not mean a risk free investment.

Risks materially relevant to the Fund which are not adequately captured in the indicator:

Credit risk: the Fund can invest in debt securities. There is a risk that the issuer may default. The likelihood of this happening will depend on the credit-worthiness of the issuer.

- UCITS/UCIs: 10%
 - equities (through exposure from convertible bonds) : 5%
- The Fund may invest in credit notes.
The Fund may hold cash and cash equivalent securities on an ancillary basis. These may include monetary UCIs or UCIs whose investment's overall weighted maturity or rate reset frequency does not exceed 12 months.
The Fund's net exposure (after hedging) to non-EUR currencies may be up to 10% of net assets.
To achieve its objectives, the Fund may use derivatives such as futures, options, swaps, caps and floors, CDS, CDS on indices.
The Fund may enter into temporary repurchase transactions and reverse repurchase transactions.
You can buy and sell shares of the Fund daily.
All dividend generated by the Share Class I Distribution EUR is distributed.
Recommendation: This Fund may not be appropriate for investors who plan to withdraw their money within 3 years.

Counterparty risk: the Fund enters into contracts with various counterparties. If a counterparty does not fulfil its obligations to the Fund (e.g. not paying an agreed amount or not delivering securities as agreed) the Fund can suffer a loss.

Interest rate risk: an increase in interest rates may cause the value of fixed income securities held by the Fund to decline. Bonds prices and yield have an inverse relationship, when the price of a bond falls the yield rises.

Risk linked to the impact of management techniques: risk of increased losses owing to the use of financial futures instruments such as OTC financial agreements, and/or the temporary acquisition and transfer of securities, and/or futures contracts, and/or derivative instruments. This risk may lower the net asset value.

Selection risk: the Investment Manager's judgment about the attractiveness, value and potential appreciation of a particular company's security could be incorrect.
